EUROPEAN POSTAL STATISTICS.

A Bremen paper has published a review of the postal traffic of European countries in 1879, from which is taken the following: The total increase that year was not quite 4 per cent., as against 11 per cent. the previous year. Of the total number of articles—viz., 5,815,005,887—letters and post cards form 61.6 per cent.; patterns and printed matter, 15.6 per cent., and newspapers 22.8 per cent. The newspaper traffic had again decreased, especially in Italy, Russia and Switzerland. Comparing the traffic of different nations, England takes the lead, with 27.4 per cent of the whole; next comes the German empire, with 23.8 per cent.; next France, 19.8 per cent. These three make 71 per cent. of the whole, and they are the only states in which individually the traffic is over one milliard articles. The next state, Austria-Hungary, comes far behind; Italy is fifth, Russia sixth, Belgium seventh, Switzerland eighth, and Holland concludes the series of states in which the traffic is over 100 millions. Luxemburg and Bulgaria are at the bottom of the complete list. The traffic in letters and post cards had increased in nearly all European countries, and a considerable decrease occurred only in Spain and Italy. Taking population into account, it appears that in England each inhabitant writes a letter or post card every 10 days, a Swiss every 14 days, a Wurtemberger about every 18 days, a German (in general) in a little more than 20 days, and so on successively with the Dutchman, Belgian, Frenchman, Dane, Bavarian, Austrian, &c., to the Roumanian, who writes every 300 days. The entire number of post offices in Europe in 1879 was 53,822, against 53,438 the previous year. In England there were 14,212, in Germany 9,201, in Austria-Hungary, 6,163, in France 5,802, &c., down to Bulgaria with 35. Some states show a decrease here (Spain, Holland, Sweden), which does not always correspond with a falling off in postal traffic. There was a post office in Switzerland to every 984 inhabitants; in Norway, to 2,076; in England, to 2,414; in Sweden, to 2,527; in Holland, to 3,030; and so on successively, with Wurtemberg, Luxemburg, Bavaria, Denmark, Germany —, to Russia, 19,617; Roumania, 23,073; Bulgaria, 41,292. While in Switzerland the way to the nearest post office is on an average not over a quarter of a mile, a Russian must travel five miles for the same purpose. England comes next to Switzerland in this matter; then come Holland, Wurtemberg, Belgium, &c. The total number of persons occupied with postal business in 1879 was 217,944. The German imperial post-office had 62,431 (but this includes telegraph officials, many of whom have postal duties as well); England follows with 34,700, France with 33,966, Austria-Hungary with 18,350, Russia with 14,985, &c. Of a total net profit on postal traffic of about £5,600,000, nearly one-half falls to England, a fifth to France, a seventh to Germany, a twenty-eighth to Austria, &c. Several states work with a deficit—e. g., Denmark, Norway, and especially Russia and Bulgaria. Again, an equal distribution for 1879 gives for each inhabitant in Europe 11.3 letters and 4.3 newspapers forwarded by the post office. The total increase of postal traffic in Europe in the six years ending 1879 was 46.9 per cent., while the increase of population cannot be estimated at more than 6 or 7 per cent.

Men trust rather to their eyes than to their ears; the effect of precepts is, therefore, slow and tedious, whilst that of examples is summary and effectual.

DALTON, MASS., U.S.A.,

HAS BEEN AWARDED THE

GRAND PRIZE GOLD MEDAL

AND RECOMMENDED THE

Medal of Honor and Perfection

At PARIS, 1878,

This being the **HIGHEST** and **ONLY** AWARD given for

LINEN RECORD & LEDGER PAPER.

—A SPECIALTY.—

THIS Paper has received THE HIGHEST PREMIUM over all
others from the Cincinnati Industrial Exhibition, Massachusetts
Charitable Mechanics' Association, Franklin Institute of Philadelphia,
Louisville Exposition, Medal and diploma from United States Centennial
Commission, Medal of Progress American Institute, 1877, and Medal of
Improvement and Progress, Boston, 1878. Its

PRINCIPAL ADVANTAGES

are as follows:—1. It contains more LINEN than any other Ledger
Paper, has a longer fibre, and is, consequently, tougher. 2. Having a
harder and better body, it frays less in erasure, so that by simply using
the rubber after the eraser, the ink is prevented from spreading. 3. It is
more uniform in Weight Color and Finish. 4. It never cockles if properly
bound. 5. Its chemical action upon ink is such that it both writes and rules
up better. For proof of the foregoing, refer to a large number of Sta-
tioners, Bookbinders, Bookkeepers, and Recorders, who have given it,
after a severe test, the preference over all others. This paper is Double
Sized, and will stand any climate or the most acid of fluid inks.

Send for sample sheet, **ERASE** and **REWRITE FOUR TIMES** on same spot.
Each sheet is water-marked with name and date.

BALTIMORE NOTES.

[FROM OUR REGULAR CORRESPONDENT.]

BALTIMORE, Md., September 20, 1881.

Trade has been good, especially in the school book and stationery line, since I last wrote you, and the prospects for a continuance of the same appear to be rosy. Next month we are to have a grand three days' festival on the plan of the Mardi gras celebrations of Mobile and New Orleans, and Mr. De Leon, who prepares the shows in those cities, states unhesitatingly that the Baltimore demonstrations will surpass in splendor any thing of the kind ever seen in America. In addition to the mystic devices seen in the tableaux of Louisiana and Alabama there will be in the coming display several mammoth floats devoted to local institutions and enterprise. As the affair has been most extensively advertised by the railroad companies, who have arranged to reduce fares on the occasion to one-half, it is calculated that at least 300,000 strangers will visit the city during the continuance of the "Oriole," as the festival is styled. The official programme privilege has been purchased by Guggenheimer & Weil for \$550, and they will issue the pamphlet in good shape with illustrations of the Baltimore bird, &c. The first order they received was for 50,000 copies, and they expect to sell at least 100,000.

The rejection of Professor Shepherd's new grammars by the school board occasioned considerable surprise to persons interested in the welfare of the educational system of the city, and the *Baltimorean*, which ever upholds reform and the progress of the city's interest, gives voice to the people's feelings in the matter. Mr. Shepherd, who is superintendent of the public schools, and late professor of language and literature in the Baltimore City College, wrote the grammar at the request of many of his friends, including several of the professors and teachers of the public schools. John B. Piet undertook the publication of the work for the reason that it was written by a man so eminently qualified for the task, as well as for the fact that it would add to the list of admirable Baltimore publications already in use. It should, one would think, have had little opposition in getting into the schools. Every paper in the city spoke its praises on several occasions, and the school teachers and professors were a unit in regard to its manifold merit. After the book was printed, it was submitted to the Board of School Commissioners, who referred it to the Text Book Committee, the members of which

made the strongest kind of a report in its favor. After this report of the committee had been handed in, the matter had to go over thirty days in accordance with the rules of the board. This brought it to the first meeting of the board, after summer vacation, at which there is rarely a full attendance. There was no exception to the rule in this case. The president of the board and many other friends of the book were absent, and when the chairman of the Text Book Committee asked leave to have the matter postponed until another meeting, the other side objected, knowing that the book could not be adopted while so many were away. They promptly took advantage of the situation, and the result was that a work which was badly needed and wanted by a majority of the teachers was rejected. The grammar at present in use is Harvey's, which is published by a Cincinnati house. It is said by men competent to judge to be in every way inferior to Professor Shepherd's work, and disliked by those who use it in their schools.

W. E. C. Harrison, bookseller and stationer, has just returned from his vacation, and looks much improved.

Frank O. Evans, is in town for S. Hildesheimer & Co., New York, this week, exhibiting a very handsome line of Christmas and New Year's cards. This house has paid particular attention to silk and satin fringed cards, and its line in this particular is a success.

Charles S. Plummer, or "the plum plumber," as the boys here call him, is also in town with a goodly line of Christmas goods, in the way of box papers, cards, &c.

Wm. J. C. Dulaney, acting foreman of the Grand Jury of the Criminal Court, dislocated his knee-cap recently by a fall. He has now entirely recovered.

The following named representatives of the trade have been here within the past couple of weeks: C. L. Betts, of M. F. Tobins, New York; S. L. Harrell, of Harrell & Cole, Boston; Kaufman & Strauss, New York; J. R. Hope, of L. Prang & Co., Philadelphia; and Charles L. Chase, of the American News Company, and P. Morgenstein, both of New York. W. P. M.

CHICAGO NOTES.

[FROM OUR REGULAR CORRESPONDENT.]

WESTERN OFFICE LOCKWOOD PRESS. }
8 LAKESIDE BUILDING, CHICAGO, ILL., Sept. 17, 1881.
Chicago is just now experiencing her annual fit of exposition. The weather is fine, the show is in full blast, and everybody who does not exhibit goes to see those who do.

Among the most noticeable exhibits in the

trade is that of A. G. Spalding & Brother, the supreme criterion in sporting goods here. Spalding's exhibit occupies a space of say 20x40 feet, and is conspicuously placed on the main floor, close to the grand entrance. It comprises everything in the line of elegant sporting goods and requisites of amusement, and is one of the most attractive in the building. The space is inclosed on all sides by a railing composed of alternating ornate base-ball bats and Indian clubs, the former plain wood, the latter ebonzized. At each corner and at the centre of each side, a gigantic black bat, reaching to a height of about ten feet above the floor, supports a second palisade of fly-rods of infinite variety. Upon the top of each of these curious pillars rests a large black ball, perforated to receive a sheaf of parti-colored arrows, while around them is arranged a corresponding fasciculus of bows. The effect is very novel and striking. The whole is finished off with eight fine fish paintings. Inside of the railing there are two cases of skates, beautifully arranged, and of every conceivable style and make. Here are skates in blued and polished steel, gold and silver plated skates, nickel-plated skates, or a mixture of each. There are "Acme," "Barney & Berry," "Peck & Snyder," "Ice King," "N. Y.," "Centennial," and half a dozen other varieties of favorite club skates. But the grand coup in the skate line is the case containing the various patterns of "American Club," for which the house holds the sole Western agency. In the exhibit there are two small cases of dog collars of great variety, in brass, nickel, leather and celluloid. Another case contains games and various pocket novelties, such as miniature hunting lanterns, cigar lighters, match safes, whistles of various designs, etc. Probably the most attractively arranged showcase is that containing fishing goods. Here are to be seen flies in profusion, spoons and other bait; rod tips and butts, reels; lines of every grade and price; snoods and snaps—in fact, the whole collection has been denominated "a soft snap." There is a case containing boxing goods—gloves, belts, tights and walking shoes. Another case contains clogs and other stage requisites; one end of the same being reserved for parlor skates. The remaining case exhibits revolvers and general pocket cutlery. In the centre of the space a tall upright post serves as a vehicle for la crosse and tennis bats, dumbbells, footballs, &c.; while from the top of this post to each of the four corners of the inclosure hammocks are extended lending the effect of a graceful drapery. The rest of the space is filled with velocipedes, for which Spalding is famous; croquet, &c., and

finally an admirably finished four-oared hunting skiff completes the list. Spalding has done well, and his display is noticed by every one who enters or leaves the building.

Among the other exhibits to which I shall devote more particular attention in my next are John Wilkinson, games and sporting goods; David C. Cook, religious books; Beard Brothers, books and stationery; Alden & Chadwick, books; Duncan Brothers, publishers and book-sellers; J. E. Muchmore, Jr., fancy stationery; United States Ticket and Tablet Company; Mackinnon Pen Company; Livermore Pen; John Gibbs, rug patterns, and others. The Exposition continues until October 23, during which period I shall be able to give to each exhibitor in the trade a due notice.

E. P. Donnell & Co. have just invented a handy novelty, in the shape of a tablet counter. It should be seen by the trade.

Keen & Brown, who commenced business here on La Salle street a few months ago, say that they 'have passed the experimental point, and are now enjoying a fair share of the public patronage. They report business good, and I notice that their stock includes all of the staples and a choice line of novelties. A full line of Livermore pens has been recently added to their catalogue.

Tuerk Brothers and Johnston have one of their small "T" motors (No. 11), running a fast Kidder press at the Exposition. Its small size and the work it does are a surprise to many.

The only Chicago exhibitors at the recent Printers' and Stationers' Exposition at London were Cameron, Amberg & Co., whose files, &c., attracted considerable attention.

J. E. Muchmore, Jr., will occupy his fine new store, at 36 Monroe street, about October 20. He will carry a full line of elegant novelties and Christmas goods.

G. B. H.

OHIO NOTES.

[FROM OUR REGULAR CORRESPONDENT.]

DAYTON, O., September 17, 1881.

I do not know of much that is new in the stationery business, but I do know that trade for the last thirty days has been the best ever known in Dayton—all agree in this. There has been a good deal of complaint of the difficulty in getting orders filled, and after they are filled East the railroad companies seem to vie with each other as to which can be the longest in delivering goods; twenty days from New York is not unusual—by fast freight lines at that.

Travelers are not very numerous the last few weeks, but among others here were Mr. Turner, of Langfeld, Turner & Andrews, and Stanly Morrell, of Weill, Livingston & Co. Both say that the demand for pocket-books is wonderful, and that the people have the money to put into them besides.

I was going to write that Mr. Hey—, of the Eagle Pencil Company, was in our city; but I forbear. He once told the writer that he was "going for" MIAMI VALLEY for mentioning him.

Classon was also here from the Plimpton Manufacturing Company, and reports millions in the business.

Justly or not, dealers don't seem to place very much dependence in the assumed advance in envelopes.

Mr. Gilliland, of the Southworth Paper Company, paid our city a visit yesterday, and reports the rebuilt mill as doing all in its power.

The mills throughout the valley are all busy, although prices have not been advanced to any great extent, except in common wrappings, which are up about ten per cent. There is an

advance in straw of about three dollars per ton; coal advanced twenty-five cents—and low water did it.

The new mill of the Mead Paper Company is rapidly approaching completion, and will make a large addition to the output of the valley.

The two mills of A. Hill & Son, at Middletown, are stopped awaiting a compromise with the creditors, which, I am told, is likely to be effected, and then the mills will start at once. The withdrawal of their product from this market has made manilla somewhat scarce, although the low freights from the East have allowed shipments from mills in that direction.

G. W. Holden starts East to-morrow to renew his somewhat depleted stock. He reports the demand for his book cover as unprecedented.

We have been blessed in the last week with the long-looked-for showers, and vegetation has again returned to its pristine green, and the garden of the world again presents its usual appearance throughout the

MIAMI VALLEY.

TORONTO NOTES.

[FROM OUR REGULAR CORRESPONDENT.]

TORONTO, Ont., September 17, 1881.

On the first I took passage on one of our steamers for Montreal, glad to get out of the city and excessive heat. The trip is one I have often taken, and always with pleasure. The run down the lake was a revel in pure fresh air. Hardly a ripple disturbed its surface, and the night was well gone before I could make up my mind to seek my berth. Early on the following morning we left Kingston and entered soon after the maze of the Thousand Islands, by the south channel, calling at Clayton and Alexander Bay. I had not been down this way for many years, and was surprised to see the number of fine summer residences on the islands, many of which presented a very attractive appearance. Steam yachts and small boats were lying at anchor and others were flitting about, disappearing and re-appearing in unlooked-for quarters. It was delightful. For variety and beauty these islands are unsurpassed, and as a summer resort they are unequalled. After these follow the rapids with their excitement. Altogether there is no such trip to be had anywhere.

Montreal is going ahead. Business of all kinds is brisk, and particularly among the stationers. I found the well known firms of Dawson Brothers, Morton, Phillips & Bulmer, I. B. Rolland & Fils, and others, driving away with all their force. But, not wishing to encroach upon your correspondent's preserves in that quarter, I shall add no more. I may add that the Montreal Exhibition, which opens on the 20th, is expected to be the best they have ever had, and a great success.

During this and the following month, shows will be the order of the day throughout the country. First in order are the provincial, then the county, and lastly the township shows, so that everybody has a chance if he has anything to exhibit. Our Industrial Exhibition, which opened on the 5th and closed yesterday, has been in all respects satisfactory. The exhibit in book-binding, printing, &c., was very comprehensive, and the workmanship equal to anything that can be produced. Brown Brothers had a fine display of blank books in Russia leather, calf, Canadian sheep, &c., also pocket-books, wallets, &c., and diaries. Davis & Henderson and Copp, Clark & Co. had also a fine exhibit in the same goods. The Methodist Book and Publishing House had a miscellaneous collection of its products, and in the book way, Copp, Clark & Co. had also an excellent exhibit. The Canada Pub-

lishing Company had a fine display of school books and wall maps. The exhibits in all of these departments were of superior excellence and conclusive evidence that our manufactures are coming to the front. For some reason or another the well known and enterprising firms of W. J. Gage & Co., W. Warrick & Son, James Campbell & Son, and Barton & Ellis were not competitors.

Hart & Co. are getting things in shape in their new premises, and when completed they will have one of the finest book and stationery stores in the Dominion. It is situated in one of the best positions on King street, west, and as might be expected from the well known taste of the Messrs. Hart their store will be a model of convenience and tasteful appearance. The woodwork is of native pine, relieved with cherry finished in oil and varnished. They are making office stationery a prominent feature, and have excellent facilities for carrying on this important branch. When the firm gets in working order I shall take occasion to notice other leading features of their business.

The Montreal stationers are not disposed to let their Western friends get the start of them in enterprise. A strong company has been formed to go into the manufacture of fine papers. An excellent site for the purpose has been secured at St. Jerome, P. Q., and building operations will be commenced at once. The intention is to have the mill at work early in the spring.

Mr. Rawlinson, late of Hart & Rawlinson, has bought the stock of R. L. Chandler, St. Thomas. Mr. Rawlinson is an old book and stationery man, well known in this city, and has the best wishes of the trade here.

It is stated by a Montreal paper that two hundred factories have been established in the Province of Quebec during the current year.

Business continues good, our houses now are full of orders.

C. H.

HECKTOGRAPH WITH PRINTERS' INK.

Copying with the hecktograph, using printers' ink in place of aniline, depends upon the tanning of the superficial layer of the gelatine plate upon which the writing is made. Wherever this tanning takes place (that is, upon the written characters), the gelatine is rendered insoluble. These portions, however, will take fatty ink, while the rest of the gelatine surface will reject it. In practice, the operation is as follows: The copy is written on paper with a common outgall ink, which has been made more astringent by the addition of a little tannin (or extract of logwood). This is transferred to the common hecktograph plate in the ordinary manner. Those portions of the plate on which the transfer adheres become tanned, and on applying a roller charged with printers' ink to the gelatine surface, the ink will be rejected by the gelatine surface and will only adhere to the portions that have been tanned—that is, to the written characters. By laying a sheet of dry paper on the plate and applying gentle pressure with a roller of wood, rubber or paper, an impression of the copy in printers' ink is obtained. The hecktograph is then inked for another impression, and so on. The plate must be inked for each impression. Beyond these there are no special instructions. The process, in addition to the hecktograph, calls for a slab of glass or a zinc plate for spreading the printers' ink, a small printers' inking roller with a handle, and another roller of rubber, paper or wood for pressing the paper equally against the pad in making copies. By this process, it is said that, with a little practice, 300 to 400 sharp copies can be made on dry paper.

OLD BERKSHIRE MILLS

DALTON, MASS., U. S. A.

One party writes: "The two hundred RECORD BOOKS, for 88 of the 99 Counties, now on exhibition at the Iowa State Fair, at Des Moines; and all, but four (!) of them, made from your 'OLD BERKSHIRE MILLS LINEN LEDGER,' Medium, 40lb., make a splendid show

[The above cut is a fac-simile of the wrapper used on the Linen Ledger Paper.]

We will pay for any book rejected on account of fault in the paper. Send for Samples, test them in comparison, and see that your books are made from paper thus water-marked.

In addition to the above lines, our other Specialties are put up with care, in attractive and substantial form. Goods can be seen at the Mill, or New York Office, 47 Beekman Street. GEO. B. HURD, Gen'l Agent.

SEASON 1881-1882.

SEASON 1881-1882.

L. PRANG & CO.'S

Christmas and New Year Cards

ANNOUNCEMENT.

WE hereby beg leave to announce to the trade the completion of our line of Christmas and New Year Cards for this season, for which our agents are now soliciting orders. The extent of our list, the originality, and especially the American character of our designs, together with the great care taken in their execution, will, we have no doubt, secure for our goods the popularity which they have enjoyed heretofore. The efforts we have made to secure the highest excellence, is attested by the names of some of the artists whose designs have been reproduced. We would only name Elihu Vedder, C. C. Coleman, Thomas Moran, Miss Rosina Emmett, Miss Dora Wheeler, Mrs. O. E. Whitney, W. H. Gibson, F. S. Church, R. G. Birch, &c. That a due regard has been paid for the quality of the literary matter, in connection with these designs, is shown by the fact that many of the designs are accompanied by original poems from writers of note, such as Mrs. Celia Thaxter and Mrs. Emily Shaw Forman.

The great increase of our manufacturing facilities, secured by additions to our building nearly doubling our floor space and by the adding of new machinery, will place us in a position to fill orders promptly. Still we would request dealers to place their orders as early as possible, so as to still further enable us to make timely preparation for prompt deliveries.

Our Cards will, as heretofore, be put up in envelopes containing twelve Cards, unless otherwise stated on our price lists.

We furnish envelopes without extra charge for all our Christmas and New Year Cards, for which the list price is \$1.80 per set, and over. Our silk-fringed Cards will no doubt be in great demand this season. We have made ample preparation to furnish these in time and have made arrangements with our manufacturers for the best quality of silk fringes. We would call special attention to the excellence of our fringed Cards and the novelties in colors and style of fringes we offer for this season.

A marked and attractive feature of our cards are the elegantly ornamented backs.

All our fringed Christmas and New Year Cards are furnished with envelopes and protectors, so as to insure safe transportation in the mails.

It will be impossible to embody our whole list in the space of the advertisement, and we will therefore merely give a general outline of the variety offered.

PRANG'S PRIZE CHRISTMAS CARDS.

COMPETITION OF 1881.

These are the Cards selected by the judges in the second competition for four designs of Christmas Cards, for which we offered \$2,000 in prizes of \$1,000, \$500, \$300 and \$200 respectively. At the recommendation of the judges, Messrs. COLEMAN, LAFAROE, and WHITE, the prize for third best Card was increased to \$500. Mrs. CELIA THAXTER has written appropriate verses for each of the designs.

1st Prize Card (\$1,000), by Elihu Vedder. Size, $6\frac{1}{4} \times 9$ inches; price \$1 each. Same card with silk fringe, cord and tassels, price \$1.50 each.

2d Prize Card (\$500), by Miss Dora Wheeler. Size, 7×9 inches; price 75c. each. Same card with silk fringe, cord and tassels, price \$1.25 each.

3d Prize Card (\$500), by C. C. Coleman. Size, 7×9 inches; price 75c. each. Same card with silk fringe, cord and tassels, price \$1.25 each.

4th Prize Card (\$200), by Miss Rosina Emmett. Size, $5\frac{1}{4} \times 9\frac{1}{4}$ inches; price 60c. each. Same card with silk fringe, cord and tassels, price \$1 each.

The Prize Cards can also be had mounted on heavy board with gilt beveled edges.

We beg to call attention also to the following publications for New Year and Christmas:

"Goddess Fortune" New Year Card, by Elihu Vedder. Size, $6\frac{1}{4} \times 8\frac{3}{4}$ inches; price 75c. each. Same card with silk fringe, cord and tassels, price \$1.25 each.

"Christmas Dove," Size, $7 \times 9\frac{1}{2}$. This card is in the same style as the success of the last Easter season, the "Easter Dove" Price 60c. each. Same card with silk fringe, cord and tassels, price \$1 each.

Our Regular Line of Christmas Cards consists, among others, of the following Series:

Nos. 901, 902, 903, 906, 909, 910. Floral designs ranging in price from 20c. to \$1.20 per set of 12.

Nos. 904, 905. Humorous Cat and Frog Designs, 60c. per set.

No. 907 is a new series of Horseshoe designs, 75c. per set.

Nos. 920 and 929. Children's designs, at \$2.40 and \$3.60 per set.

No. 922. Shells of Ocean, with figures, \$2.40 per set.

No. 924. Fans with silk fringes, \$3 per set.

No. 933. Bric-A-Brac designs, very rich, \$6 per set, and many others.

We offer a similar assortment of New Year Cards, but would call special attention to No. 1320, a new folding calendar, at \$2.40 per set. Most of the Numbers can be had with silk fringes ranging in price from \$2.25 to \$12 per set. Stock will be ready for delivery September 15.

Besides the above, attention is called to our New Birthday Cards, Scripture Texts Cards, New Panels, New Water Colors, by Thomas Moran, and other publications. Our line of Thanksgiving Day Cards will also be shown by our agents.

Christmas and New Year Cards and Calendars for 1881-82

—WHICH ARE NOW READY,—

And Sample Books are in the hands of their Travelers, who will have pleasure in booking orders.

IN design, variety, and appropriateness, they greatly excel those of former seasons, for Marcus Ward & Co. have long recognized the fact that intrinsic merit alone can insure the increase and permanent success of high-class productions. To this end artists of acknowledged talent and mechanical skill of the highest order only are employed. An inspection of samples will convince the trade that, in the production of these beautiful souvenirs, they continue to be the leaders.

Orders should be placed early to insure timely delivery. All communications should be addressed

THE "UNIQUE" AMERICAN PORTABLE COPYING PRESS.

The "Unique" is designed to supply a long-felt want in the shape of a portable letter press that is durable, compact and cheap, and an effective means of taking and preserving copies of letters, &c., dispensing with the costly, cumbersome, and old-fashioned presses hitherto in use. By means of the "Unique," letters are said to

THE "UNIQUE" AMERICAN PORTABLE COPYING PRESS.

be copied instantaneously and perfectly with greater facility than by any other press in existence. It is adapted to a book of ordinary thickness. The mechanism is of the simplest kind, and is said to render the press more lasting and less liable to break down than other copying presses now made. The "Unique" contains a damping brush and water tank, and is always ready for use at home or abroad. It is made of the best walnut and other choice woods, nicely finished, with all the metallic parts nickel-plated, making an ornament either for the counting room, or upon the table of a library. It can also be supplied with a padlock for private use. It is claimed to be the most complete and portable copying apparatus invented. It is made in three sizes—note, letter and cap. Lucien Sanderson & Co., 103 Devonshire street, Boston, Mass., are the sole agents.

NEW PATENTS.

No. 246,412. Toy Wagon.—John Murray, New York, N. Y.

No. 246,461. Blotting Pad.—John Henry Chataigne, Richmond, Va.

A frame for holding blotting pads, having a hole made through its centre, so that the pad can come in contact with the paper written upon, having its edges turned over upon its top to form guides to hold the paper, and having a portion of the cut-away metal turned back, so as to form a paper cutter.

No. 246,478. Automatic Feeder for Printing and other Presses.—Henry Dedreux, Philadelphia, Pa.

No. 246,497. Map Holder.—Fred. B. Ginn, Chicago, Ill.

No. 246,514. Sheet Delivery Apparatus.—Gustav L. Jaeger, New York, N. Y.

No. 246,518. Album Clasp.—Thomas Kelly, New York, N. Y.

No. 246,519. Sketching Block.—Charles R. Lamb, New York, N. Y.

No. 246,554. Drawing Table.—Hermann Probst, New York, N. Y. Patented in Germany November 20, 1879.

No. 246,562. Galley Rest for Printers.—George Scales, Plainwell, Mich.

A galley rest having an inclined portion, with its shoulder, on and against which the bottom and side of the galley respectively rest, and projecting lugs, which prevent displacement of the galley rest.

No. 246,621. Paper Bag.—James W. Maloy, Somerville, Mass.

No. 246,629. Wheel Toy.—William H. Nelson and Philip H. Weadon, Alexandria, Va.

No. 246,663. Pantograph.—James B. Crocker, Jr., and Bernard Frese, Chicago, Ill.

A frame supported on a fulcrum and provided with two or more carriages sliding toward and from the fulcrum, which carriages are connected by stretched cords, wires, or chains to pulleys pivoted on the frames, by the relative diameter of which the relative travel of the carriages is governed, all for the purpose of making copies of or reproducing enlarged or reduced given outlines by tracing a point or its equivalent on one of the carriages over, on, or in such outlines.

No. 246,668. Jewel Casket.—John A. Eades, Middle-

No. 246,570. Process of Building Perforated Iridium Tips for Stylographic Pens, &c.—William W. Stewart, Brooklyn, N. Y.

1. A process of building perforated iridium tips for stylographic pens and like purposes, which consists, essentially, in cementing iridium dust or small fragments of the same upon a core of copper or other corrodible metal with tragacanth, and afterward covering the iridium and tragacanth with a flux and solder, then fusing the solder, and subsequently removing the core by corrosion or otherwise. 2. The process of building perforated tips for stylographic pens and like purposes, which consists as follows: First, placing a wire of copper or other base material within a suitable tube of non-corrodible metal and covering portions of each with dissolved tragacanth and sprinkling with iridium dust as much as will adhere; second, after thoroughly drying the tragacanth and iridium, covering with a paste of borax ground in distilled water and sprinkling with dust or fillings of solder composed of gold—say fourteen parts—and silver—say ten parts—as much as will adhere; third, fusing the solder by the blow pipe; fourth, dissolving the wire out by acid; fifth, finishing the tip by dinging and polishing.

No. 246,573. Bill File.—Smith Thompson, Washington, D. C., assignor of four-fifths to Cyrus C. Turner, St. Louis, Mo., and Thomas Turner, Mount Sterling, Ky.

No. 246,588. Toy.—Luther J. Adams and Carl J. Adams, Leominster, Mass., assignors to said Luther J. Adams, Waldo Whitney, and Alfred L. Walker, all of same place.

town, assignor to the Cromwell Plate Company, Cromwell, Conn.

No. 246,693. Sample Envelope.—Alexander H. Schults, Arondale, N. J.

No. 246,737. Pantograph Engraving Machine.—Stephen D. Engle, Hazleton, Pa.

No. 246,769. Pen Holder.—Joseph G. Hester, Washington, D. C., assignor of forty-five one-hundredths to Julius Lansburg, same place.

No. 246,794. Pocket Lamp and Friction Lighter Combined.—Thomas Lawrence, Absolom C. Stratton, and James M. Wolf, Mountain Home, Ark.

The cover is provided with a lip, which not only locks the same, but acts as a snuffer for the cord.

No. 246,813. Paper Box.—George S. Pickell, Philadelphia, Pa., assignor to J. Thomas Stavelly, same place.

No. 246,821. Chromatic Printing Press.—Ira Robbins, Camden, N. J., and David Heston, Philadelphia, Pa., assignors of two-thirds to David Heston and one-third to Ira Robbins.

DESIGNS.

No. 12,450. Toy Money Box.—William Evans, Jr., Philadelphia, Pa. Term of patent, seven years.

TRADE-MARKS.

No. 8,623. Lead Pencils.—Eberhard Faber, Port Richmond, N. Y.

"The word 'Union.'"

No. 8,624. Lead Pencils.—Eberhard Faber, Port Richmond, N. Y.

The above cuts show our new method of putting up *Fine White Writing and Linen Papers*, for general use, in *Portfolio Style*, with a sheet of the best Blotting Paper attached to the cover as represented, making it the **BEST** and **MOST** CONVENIENT form for writing tablet in the market, which will only need to be seen to be appreciated.

TOURISTS' TABLETS.

This is a line of *Fine White Writing Paper*, handsomely bound in Tablets, with flexible covers to keep the paper compact and prevent it from being soiled. They will be found very convenient for the use of travelers and others where a less expensive tablet than our "Portfolio" is desired. The covers are printed with a neat design, making them a very attractive as well as a convenient article for general use. They are put up in packages with ten tablets of eighty sheets each, of the following Nos. and Sizes:

No. 121.—Commercial Note. No. 122.—Packet Note. No. 123.—Congress Letter.

Trade Gossip.

All new goods and designs which are not, strictly speaking, "Novelties" will be noticed under this head. The trade are requested to forward descriptions with samples in order to secure proper notice.

D. F. Welling, publisher of the *Argus*, Boston, Mass., has sold out.

The stock of T. D. Cain, dealer in notions, Pueblo, Col., has been attached.

E. T. Fuller, dealer in notions, Hartford, Conn., has been sold out at auction.

W. J. Davis, publisher of the *Sentinel*, Columbia, Mo., is advertising to close out.

Queen Brothers, stationers, Carrollton, Mo., have been burned out; partly insured.

The property of James H. Atkinson, printer, Newport, R. I., is advertised at mortgagee's sale.

Thomas Sinclair, of the firm of Thomas Sinclair & Son, lithographers, Philadelphia, Pa., is dead.

Ph. Thalheimer, of Thalheimer & Dalsheimer, wholesale dealers in notions, New Orleans, La., is dead.

Daniel Hurlbut, of the firm of Hurlbut & Baker, straw paper manufacturers, Bradford, Vt., is dead.

B. S. Hood, printer, Litchfield, Ill., has admitted John G. Campbell to partnership. Style, B. S. Hood & Co.

Whedon & Culley, publishers, York, Neb., have dissolved partnership. Mr. Culley has sold his interest to J. Armstrong.

Reynolds & Reynolds, Dayton, O., are reported crowded with business, and will have several specialties ready for the holiday trade.

D. F. Foley, of Aikin, Lambert & Co., has met with an accident, spraining his ankle. He is, however, at his post and busy as a bee in honey time.

Z. Crane, Jr., & Brother, and Crane Brothers, of Dalton, have recently made sales of their papers in England at the same price as they get in our home markets.

R. Worthington, 770 Broadway, announces for immediate publication "Cat's Cradle," an original book of rhymes and pictures for children, with sixty illustrations in colors.

Esterbrook's mammoth falcon recently described in *THE STATIONER*, is now being made nickel plated, and done up on cards containing a dozen pens. The nickel plating renders them less liable to corrode.

G. W. Leman & Brother have a lot of red and blue and colored pencils, which cost \$8 per gross to import, which they offer to the trade at \$4.50. They also have a small lot of bone artists' pencils, which they offer at a bargain.

William L. Hoskins, Philadelphia, has his sample book of wedding, invitation and visiting cards of every description ready for the trade, to whom it is sent on application. It is said to be one of the best sample books of this kind seen so far.

Henry Levy & Son, 477 Broadway, have just received an elegant line of Olive and Turkish wood goods, new in design and of exquisite taste, consisting of writing sets, papeteries, card boxes, odor and jewel cases, paper cutters, inkstands, stamp boxes, &c. As inexpensive and tasteful presents, they cannot be equaled in any other class of goods.

Among the first to drape their houses in mourning on Tuesday were the members of the stationery, paper and fancy goods trade. The following named firms displayed particular taste in the sorrowful decoration: Myers Brothers, A. Weidmann & Co., McCarty & Hasberg, Eberhard Faber, E. & H. T. Anthony & Co., Ivison, Blakeman, Taylor & Co., A. H. Goetting, Hard & Parsons, McLoughlin Brothers, L. Prang & Co., Aiken, Lambert & Co., R. Hutchinson, M. A. Reay, Liebenroth Von Auw & Co., Henry Levy & Son, Evans & Gardner, J. H. Bufford's Sons, J. H. Hamburger, A. S. Barnes & Co., Daniel Slote & Co., Kiggins, Tooker & Co., M. L. Lemans, Thaddeus Davids & Co., Samuel Raynor & Co., Jones & Skinner, Jessup & Moore, William P. Dane, Bulkley, Dunton & Co., Joseph Gillott & Sons, J. O. Smith Manufacturing Company, E. P. Cobey & Co., Francis & Loutrel, R. H. Kimpton, Alex. Agar, Acme Stationery and Paper Company, Esterbrook Steel Pen Company, Charles T. Bainbridge's Sons, P. H. Hake, P. P. McHugh, Keuffel & Esser, Koch Sons & Co., J. F. Anderson, Jr. & Co., Miller & Flinn, Molleson Brothers, Coffin & Butler, Henry Lindenmeyr, Clement & Stockwell, R. Fideau, Conrow Brothers, B. & O. Myers, H. C. Hulbert & Co., Hubbs & Lamb, C. W. Barnes, Boorum & Pease, Vernon Brothers & Co., Geo. W. Millar & Co., National Blank Book Company, Lewis De Jonge, Perkins, Goodwin & Co., Woolworth & Graham, T. W. & C. B. Sheridan, James E. Hayes & Co., Remington Paper Company, Wilkinson Brothers & Co., Horace Taylor, J. H. Van Kirk, Doty & McFarland, Carter, Dinsmore & Co.

J. H. Bufford's Sons have published a new series of orders of dance called the Pompeian, and which are in two sizes, each having four designs. They are entirely new in style and coloring, and although samples have only been shown, considerable orders are said to have been received for them. The firm has also introduced three new series of French gold ground cards. One of them, No. 738, is called the "Sunshine" series, and represents babies out of doors in summer; No. 739 shows cupids and robins; the remaining series represents little girls at out-of-door sports. The firm has just published a new chromo sheet which is known as No. 143 of cottage chromos; its scenes include hares, rabbits, dogs and landscapes. A new crayon portrait of Mrs. Garfield, 23x28 inches in size, is among other new publications of the house. It is elegantly executed.

L. Prang & Co. have found it impossible to begin the delivery of fall orders this month, as intended, on account of the unusually large demand for their goods. Many of the editions have already been sold out, so that new editions had to be printed. The house announces that it will positively begin to deliver on or about October 1, and all dealers who have not yet ordered are requested to do it at once, as they may not get their requisitions filled promptly otherwise.

The Mead Paper Company, Dayton, Ohio, has built a new engine room, 80 by 100 feet, and has put in three new paper machines, a Gordon engine, 100 horse-power, and will produce 15,000 pounds per day of news and book. The mill will be started up about December 1.

Theo. Leonhardt & Son, Philadelphia, have just published an illustrated catalogue and trade price list of French chromo and Christmas and New Year cards. This is a novelty in trade literature, and is probably the first thing of the kind in this line.

Pitts & Crockett, printers, &c., Fredericton, N. B., have dissolved partnership.

C. N. Dickey & Co., stationers, &c., Marysville, Cal., have dissolved partnership.

N. Harding, fancy goods dealer, Lincoln (Central Falls), R. I., has made an assignment.

Louisa C. Waters, dealer in notions, Selin's Grove, Pa., has been sold out by the sheriff.

The Holyoke Envelope Company is making a large run on its colored manilla envelopes.

Hill & Cutler, paper stock dealers, Boston, Mass., have had their stock damaged by fire.

Roberts & Wood, booksellers and stationers, Adelaide, South Australia, have dissolved partnership.

McCarty & Hasberg report their sales so far this season fifty per cent. ahead of those at this time a year ago.

Leroy W. Fairchild is getting up a line of very rich goods for the fall and Christmas trade, and is making a number of improvements, which will render them very attractive.

The Holden Manufacturing Company, Dayton, Ohio, is said to be doing a very large business in book covers, and has had to double its orders for paper to supply the increasing demand.

The tablet card cases manufactured by Langfeld, Turner & Andrews, of Philadelphia, are in great demand. Their round purses for holding coin are reported to be sold in such large quantities that the firm has trouble to manufacture enough to meet the orders.

The menu and guest card line of J. D. Whitmore & Co. is said to be meeting with an excellent sale. Novelties are being constantly added. It is the aim of this house to carry a line of these goods which, in point of variety, good taste and general excellence, will not be surpassed.

It is a treat to visit the mill of Z. Crane, Jr., & Brother, at Dalton. Everything is in apple-pie order. The walls, floors and ceilings are as clean as those in any dwelling, and the machinery is in perfect order and of the latest and most approved makes. No wonder the product is unexcelled.

The trade should lose no time in seeing the leather fancy goods line shown by Jas. D. Whitmore & Co., and placing their orders. Later in the season, as has always been the case in former years, it will be difficult to fill their orders. The plush goods are also very attractive. This firm is showing some novelties in plush which have not been put before the trade by travelers' samples. Visiting buyers should call and see them.

A subscription list in aid of the sufferers by the recent forest fires in Michigan has been gotten up by the Stationers' Board of Trade in the past few days, and among the contributors were Ivison, Blakeman, Taylor & Co., \$100; E. & J. B. Young & Co., \$100; Boorum & Pease, \$100; Thaddeus Davids & Co., \$100; Liebenroth, Von Auw & Co., \$100; Henry Lindenmeyr, \$100; Baker, Pratt & Co., \$100; Louis De Jonge & Co., \$50; Berlin & Jones Envelope Company, \$50; Bulkley, Dunton & Co., \$50; A. Dougherty, \$50; E. P. Dutton & Co., \$50; Hecht Brothers, \$25; Dreyfuss & Sachs, \$25; Woolworth & Graham, \$25; A. S. Barnes & Co., \$25; B. Ilfelder & Co., \$25; Samuel Raynor & Co., \$25; Koch, Sons & Co., \$25; National Blank Book Company, \$25; Perkins, Goodwin & Co., \$25; Daniel Slote & Co., \$25; Alexander Agar, \$25; Keuffel & Esser, \$25; Selchow & Righter, \$25; M. Hard's Sons, \$10. Total, \$1,285. Subscriptions

sent to the Stationers' Board of Trade for this laudable purpose will be duly acknowledged.

R. L. Chandler, bookseller and stationer, St. Thomas, Ont., Can., has sold out to Rawlinson & Co.

T. S. James has just returned from a two months' trip for Daniel Slote & Co. He says that the prospects for trade looked good everywhere he went.

Senseman Brothers, printers and manufacturers of paper bags, Philadelphia, Pa., have dissolved partnership. Emlius and Clarence D. Senseman continue under same style.

Charles T. Bainbridge's Sons are adding new designs to their line of tuck circulars. They have a new design of tuck circular for Christmas and holidays, and one in blue and bronze for fall openings.

The firm of H. T. Brawner & Son, booksellers and stationers, Griffin, Ga., has been dissolved, H. T. Brawner retiring. James M. Brawner, who has had the active management of the business from the beginning, in 1869, will continue it at the old stand.

The Crume & Sefton Manufacturing Company, Dayton, O., which makes a specialty of oyster buckets and butter dishes, has made a number of changes in its factory and is now producing new and improved goods. Its trade has largely increased during the past year, and the factory is running full capacity.

Meyers Brothers have been doing an unusually large business during the past week, and had to increase their manufacturing facilities, and enlarge their force of employees so as to fill in time the large number of orders on hand. This great rush for the firm's goods is said to be the result of the varied and elegant lines which it presents to the trade.

W. A. Haines, of Philadelphia, is manufacturing some new articles in ladies' small hand bags in all shades of plush ombrés, plain plush and damassé velvet. Genuine alligator skin is the latest fashion. A new and very nice article made by this firm is a gentleman's companion, leather case, and memorandum book, inside of which is to be found an excellent set of toilet requisites. The sales of this firm are said to be remarkably good; orders from the West are particularly numerous.

H. Bahr, with McCarty & Hasberg, was married, on Wednesday last, to a young lady who is said to be the daughter of one of New York's millionaires. The presents received on the occasion were rare and costly, and included about \$500 worth of fancy articles from the firm which Mr. Bahr so long and faithfully served. After the ceremonies the happy couple started on a wedding trip of a month's duration. The congratulations of THE STATIONER are tendered to both bride and groom.

It is reported that George Des Forges, of Des Forges & Co., Milwaukee, is going into the live-stock business. This came about in this way. It appears that one of his customers in the West, who owed him a small account for stationery, was written to and requested that if he could not forward the cash to send half a dozen pigs to square the account. The pigs came a few days afterward, somewhat to the surprise of Mr. Des Forges, and it is now a question with him as to whether he will run the live-stock trade in connection with the stationery business. Among Mr. Des Forges' collection is a fine specimen from Lake Minnetonka. Will there be a "leader" on pigs or any "undercutting"?

NEW YORK OFFICE AND SALESROOM, 18 MURRAY STREET.

THE BAY STATE PAPER COMPANY, HOLYOKE, MASS.,

were among the pioneers in the W. C. Paper trade, and their goods, from the start, were distinguished for their fine quality and the superior style in which they were wrapped. Their example has been approved and imitated by a swarm of competitors, who have flooded the market with inferior goods, put up in packages of 600 to 800 sheets, misleading the unwary, and sold at apparently lower figures; but the trade and consumers generally recognize the fact that a good article, honestly put up, in 1,000 sheet packages, is the most profitable both for use and for sale. Their goods are all guaranteed 1,000 sheets to package, and **no short count**. No wood is used in any of these papers, but they are made of the very best stock in the market.

THE "MEDICATED BOUDOIR" BRAND

Has no equal for weight, strength, softness, and color, and commands the front place with "fine retail trade." Present reduced quotations furnished on application.

THE STATIONER.

DEVOTED TO THE INTERESTS OF THE

Stationery and Fancy Goods Trades.

WEEKLY--\$2.00 PER ANNUM.

Single Copies - - - 10 Cents.

NEW YORK, THURSDAY, SEPTEMBER 22, 1881.

Advertisements cannot be received for insertion in the current week later than 12 M. on Wednesday. The charge for advertising is 25 cents a line, each insertion. Special terms for standing and displayed advertisements to be had on application.

This Journal aims to be a medium of information for and a representative of the interests of every one connected with the stationery and fancy goods trades. It contains a full and trustworthy survey of the market for stationery in this country, in all cases giving the actual prices at which goods can be bought of importers and jobbers in this city, together with a detailed account of novelties in the trade, patents relating to stationery, and current items of interest. A review of foreign markets and accounts of movements abroad will also be furnished, and no pains will be spared to make THE STATIONER a thorough and complete exponent of the trade.

Subscription and postage for Great Britain, per annum..... 12s.

Any information our readers may wish to obtain shall be cheerfully given, and prompt replies will be made to all inquiries addressed to us on any subjects of interest to the trade.

Communications on all trade matters are earnestly solicited. Address

HOWARD LOCKWOOD, Pres. and Treas.

Subscribers to THE STATIONER can be supplied with the best cloth binder in the market. Deliverable at the publication office. Price, fifty cents.

Readers of this paper who avail themselves of the information obtained from its columns, by advertisement or otherwise, are requested to notify their correspondents of the source of their information.

THE envelope manufacturers were in session yesterday, and there are suggestions that some advance in the price of envelopes was likely to be effected. One of the features of this meeting was, we observe, to be an effort to unite the trade and prevent the breaking loose from pledges, which has heretofore resulted so unfavorably to the manufacturers and to their customers. If the meeting shall accomplish anything to this end, it will have done a good work, and we are sure that the trade will be thankful to them for it, if even there is a higher quotation put upon goods. We have just time to add, while delaying the press, that an advance of from five to ten cents per M. has been made on some grades of envelopes.

HOPE filled the heart of the nation last week. That hope has been grievously dispelled, and sorrow is supreme. The death of the President, of which doubtless all of our readers are apprised, is a shock against which, if we have had time to prepare, we can scarce oppose a show of fortitude. The general grief and sympathy goes beyond the power of expression, and we feel that we cannot pronounce the intensity of sorrow which pervades every section of the Republic. We can ill afford to lose a man whose life in its beginning and culmination made him the greatest citizen of the State, and put him in the position of peer to any who preceded him in the executive function. We can only declare our pain and sympathy. The extremity of national and individual woe has no limit or measurement.

In view of the events of the week, it is difficult to think of matters of common interest or to undertake to review the aspects of trade. From all reports the commercial situation continues favorable, and our correspondents assure us that an unprecedented amount of business has been done, is in progress, and is likely to develop. It will be seen that this condition of affairs only justifies the opinion heretofore expressed in these columns, that trade would steadily improve and show results which were probably unexpected by many, and certainly questioned by not a few. We have no reason to expect a check to this prosperity, and do not think that any one is justified in apprehending any disturbing or unfavorable results from whatever may have happened this week.

New features are constantly developing in our export trade, and they are not only encouraging but admonitory. They further bring up the old inquiry why, in view of the fact that this country can turn out the

finest kinds of goods, our manufacturers do not make greater effort to extend their foreign trade or enter the foreign markets if they have not already started therein. It must be very significant to even the most casual observer, when American paper manufacturers can enter the English market and close contracts at figures which we quote here. And this is the case. In another column will be found an announcement of that fact and the names of the firms which have been able to put their goods on fair terms in what is notoriously one of the most, if not the most, competitive markets in the world. Time was when the American paper maker would have laughed at the thought of selling his paper in Great Britain. Under the spur of bad trade and a glutted market, the experiment was tried, and if profit did not follow at first it is reasonably certain, in view of our latest information, that now there is money in it. And not only should the paper trade seek their opportunity abroad. Foreign journals are constantly speaking of one or another American novelty in the stationery line, and there is proof positive that the set is now in our favor. It is foolish to be indifferent or neglectful to taking advantage of it.

ANSWERS TO CORRESPONDENTS.

G. A. W. asks who makes Shattuck's ink wells?

Ans.—The inquiry seems to us to concern a familiar article, yet on inquiry in the trade we fail to elicit any information. We invite a reply from any one who knows.

J. B. C. inquires who manufactures commercial note paper branded St. James?

Ans.—We fail to recognize such a brand. Inquiry discloses the fact that Dickinson & St. John, who did business at 75 John street this city some years ago, had the brand, but this firm has retired from the field. Is our correspondent certain that the name St. James is a regular mark for the paper?

OBITUARY.

THOMAS SINCLAIR.

The death of Thomas Sinclair, of the firm of Thomas Sinclair & Son, Philadelphia, Pa., is announced. Mr. Sinclair died on Saturday last after a brief illness. He was eighty years old and had been forty-one years in the lithographing business. He was the oldest lithographer in Philadelphia. No change will be made in the firm or its business.

The copartnership heretofore existing between Zenas Parmenter and Amory H. Walker, under the style of Parmenter & Walker, was on September 13, 1881, dissolved by mutual consent. Mr. Walker has associated with him F. H. Walker, and the business will be continued under the style of A. H. Walker & Co. The superiority of the Waltham crayons is well known, and it will be the aim of the new firm to keep the quality of its goods fully up to the high standard for which they are so noted.

Among the visiting members of the trade to the city during the week were C. C. Righter and Isaac Hammond, Charleston, S. C.; Max Elser, Fort Worth, Texas; E. M. Taintor, Middletown, Conn., and L. J. Elser, Corsicana, Texas.

THE FALL TRADE SALE.

The regular fall trade sale will open this morning, and will begin with the invoice of D. Appleton & Co., followed by the lists of Phillips & Son, Hall & Whiting, Gebbie & Co., Jansen, McClurg & Co., Wm. S. Gottsberger, Call, Calkins & Co., and A. J. Holman & Co. The second day opens with Little, Brown & Co., followed by W. J. Widdleton, Roberts Brothers, Clark & Maynard, James Miller, E. Claxton & Co., J. Fagan & Son, National Publishing Company, Sheldon & Co., and Andrew F. Graves. On the third day the lists of Jas. R. Osgood & Co., Collins & Brother, G. P. Putnam's Sons, Schaefer & Koradi, the Orange Judd Company, the Sharps Publishing Company, Hurst & Co., and John E. Potter will be taken up. On the fourth day R. Worthington, Henry A. Summer & Co., Hubbard Brothers, and Wm. T. Amies' lists will be offered. The fifth day's sale includes the invoices of Belford, Clarke & Co., A. C. Armstrong & Son, G. C. Merriam, Ivison, Blake-man, Taylor & Co., Lee & Shepard, C. A. B. Shepard, trustee, Shepard, Sanborn & Clark, trustees for Loring, Frederick Warne & Son, London, and Ward, Locke & Tyler, London. The sixth day is set apart for Chatto & Windus, Scribner & Welford, John Wurtell Lovell, the Arundel Book Company, Burdock & Co., and some others. On the seventh day the invoices of John Grant, Edinburgh; John Hogg, London; Gall & Inglis, Edinburgh; Wm. P. Nimmo, Edinburgh; Thomas D. Morison, Glasgow, and Henry Sotheran & Co., London, follow. The eighth day will be taken up by miscellaneous invoices, including offerings from Wm. L. Allison & Son, E. B. Treat, R. W. Bliss & Co., Francis & Loutrel, Wilbur & Hastings, Thorndike Nourse. The remainder of the sale will be devoted to the stereotype plates of numerous estates and publishers, the largest lot being some of the best selling of Loring's publications.

Among the visiting members of the trade in the city during the past week were: Charles A. Blackburn, of Geo. McDowell & Co., Philadelphia; Horace Drew, Jacksonville, Fla.; Mr. Boughton, of Boughton & McCann, Hannibal, Mo.; C. W. Breed, Malone, N. Y.; Mr. Young, of Young, Lockwood & Co., Buffalo, N. Y.; J. C. Eyrrich, New Orleans, La.; F. Von Santen, Charleston, S. C.; Thomas Chaffin, Columbus, Ga.; John W. Dunn, of L. A. Dunn & Brother, Elizabeth, N. J.; William Patton, Waterbury, Conn.; E. P. Judd, New Haven, Conn.; Edward Quinn, Milwaukee; and George L. Shivelor, New Brunswick, N. J.

A meeting of the New England manufacturers of envelopes was called to take place at the Massasoit House, Springfield, yesterday, for the purpose of considering the advisability of adopting some means and method whereby in the future the envelope manufacturers can pursue their business with less rivalry, and work together for the general good of the trade—for the dealer as well as for the manufacturer. It is likely that one of the questions to come up will be that of a small advance on some special grades.

J. P. Dinsmore, of Carter, Dinsmore & Co., returned home this week from a trip South and West. He says, he found trade at the South better than he expected. Although some complaint was expressed, business as a general thing was very good. In the West, trade was even lively, particularly at Chicago, where some of the houses were working late at night, and in instances some were several hundred orders behind.

PARABOLIC MIRRORS.

A very ingenious method of manufacturing parabolic reflecting surfaces has been invented by M. Latchinoff, who has described the process fully in the Russian journal *L'Electricité*. It is based on the fact that all points of the free surface of a liquid turning round a vertical axis acquire a constant angular velocity and take a parabolic form. If then the liquid is put into a vessel which is rotated round a vertical axis it will form a hollow shell of parabolic section inside, and if the liquid is one which will solidify a rigid paraboloid will be obtained capable of being used as a reflector. M. Latchinoff, therefore, mounts a hemispherical vessel upon a vertical shaft carrying a pulley, and rotates it by an endless belt from a motor. Into this he pours a sufficient quantity of plaster of paris liquid or a solution of the mastic prepared by M. Mendelejeff. Fusible metals would serve the purpose too, but they are apt to oxidize on the surface, and in cooling they tend to crystallize. The shape of the vessel need not necessarily be a hemisphere, but this form is convenient; and a glass cover should be added to it. To regulate the thickness of the liquid shell, a ring of wood is fixed within the bowl at a proper distance below the edge. This prevents the liquid rising above a certain height. Regularity of motion is most essential to the success of the operation, and hence a steam engine is not adapted to drive it; but a small Gramme or Siemens dynamo-electric machine actuated by a Thomsen or a Tchikoleff battery will answer well. Three or four cells will suffice, and the speed can be regulated by resistance placed in circuit. With a Deprez or Helmholtz regulator any kind of battery may be used. An angular speed of a turn per second is quite sufficient for the purpose; and the axis ought to be verticalized by means of a spirit level, and fixed so as to be free from shake or jar. The liquid should be one which solidifies slowly, say in an hour, and without shrinking much in bulk. The shells thus prepared can be made reflective by electrotyping with nickel silver, or iron, which, when prepared in this way, oxidizes with difficulty, and, being almost

white, will serve for a reflector if kept under glass.

Charles J. Cohen, Philadelphia, notwithstanding his close attention to mercantile duties, has some leisure to devote to the interests of his fellow-citizens. It is to be seen by the daily papers that Mr. Cohen is this year, as last, a member of the "Citizens' Committee of 100," formed for the purpose of purifying politics, and he has been appointed on the "Special Committee of 15" to investigate charges that have been made against the present Receiver in that city.

Market Review.

OFFICE OF THE AMERICAN STATIONER, }
WEDNESDAY, September 21, 1881.

THE MONEY MARKET.—The money market has not developed any easier tendency, and is not likely to until the banks get into better condition. Loanable funds have been obtainable at 4½ per cent., the former on governments and the latter on stocks. There has been an upward movement in the stock market. Yesterday the President's death was announced on the Stock Exchange, and the business transacted up to noon—the time of adjournment—showed in the final sales an appreciation in values ranging from ¼ to ¾ per cent., and the market closed strong. Government bonds were strong for the 4's, 4½'s, and extended 5's which sold at ½c. advance. Railway securities recorded an almost general advance, which ranged from ¼ to 1½ per cent. The market for foreign exchange was inactive but steady. The actual rates for prime bankers' sterling were \$4.80½@4.81 and \$4.48@4.48½, with cables \$4.84½@4.85, and prime commercial bills \$4.79@4.79½. The actual rates for Continental exchange were: Francs, 5.25½ and 5.21½; marks, 93½ and 94½, and guilders, 39½ and 39½.

THE PAPER MARKET.—The demand for paper, which has been undergoing a gradual improvement for several weeks past, has developed into a very fair trade, and gives promise of continued expansion. This improvement is due in some measure to the drought and to the anxiety shown by many large consumers, with the consequent scarcity of paper resulting. Fine writings and the higher grades of book papers are less affected by the short water supply than many other grades; and while the stock of these has been very little interfered with, the demand is very full and our quoted prices are firmly sustained. News has felt the drought very sensibly, and the demand is undoubtedly larger than a month ago, and it would be difficult to buy now at prices current then. There is very little news, except of the most inferior quality, now offering below ½c., and a fair grade is quoted up to 6½c. In manillas, several of our leading manufacturers have advanced their price from ¼c. to ¾c., and it is likely that others will follow shortly. Toilet tissues have been fairly active lately, with the demand close on to the production, while the movement in sheet tissue manillas is somewhat slow. The range of prices for toilet papers is \$8 to \$14 per case, according to quality, with discounts as to quantity. Binders' boards are in very good movement, with some scarcity of stock, and prices firmly held. Straw boards are in fair request, but quoted prices are not held in all cases.

THE STATIONERY MARKET.—Trade maintained the same general features of the past few weeks until Tuesday, when the sad news of the death of President Garfield put a stop to a great many transactions, and there seems to be a general indisposition among business men to engage in new operations in view of the general gloom experienced in presence of this national calamity. Trade will likely be very limited until after the funeral obsequies on next Monday. The most important event in the trade this week is the meeting of the envelope manufacturers, which takes place at Springfield today. The result of this meeting will likely be an advance in the prices of some grades. Favorable accounts of the prospects for trade still come in from various sections of the country, and if there is no set back, and all is realized that is so confidently anticipated, this year will be a noteworthy one in the history of the trade in this country. No changes in prices have been announced since our last issue.

CARTER, RICE & CO.,

PAPER WAREHOUSE, BOSTON, MASS.

THE DE LA RUE CHRISTMAS AND NEW YEAR CARDS.

PRICES GUARANTEED.

THE SATIN AND MANUFACTURED SATIN SERIES A SPECIALTY.

MYERS BROTHERS, Direct Importers, 62 John St., New York.

WE HAVE THE LARGEST VARIETY OF THESE CARDS IN THE UNITED STATES.

Also Manufacturers of a Large, Handsome and Varied Assortment of Cabinet Papeteries, from \$4.20 to \$72 Per Dozen.

CHICAGO, September 1, 1881.

DEAR SIR—With our Compliments, we desire to invite you to an examination of our HOLIDAY STOCK when you visit this city. Our Mr. Carl Beer, recently returned, has spent five months in Europe, purchasing from first hands for cash the greatest variety and most elegant stock of **Fancy Goods, Toys and Novelties** of the German, French and English Markets, which, with the elaborate selection of American made Fancy Goods for the Holiday Trade, makes our Stock the most complete ever offered in this city. We guarantee Low Prices, and hope you will favor us with a call.

Yours Respectfully, **SCHWEITZER & BEER,**

111 State Street, near Washington.

Our complete Fall Catalogue will be mailed on application, and orders will receive careful attention.

STANDARD BLANK BOOKS.

Booksellers desiring a salable line of first-class blank books, of the best materials and manufactured in the most substantial manner, which an experience of FORTY YEARS enables us to guarantee equal to any in the market, and especially adapted to the RETAIL TRADE, will send for our new Catalogue.

Special Attention. We manufacture an excellent line of Blank Books for the school room, as Composition and Exercise Books, Blank Writing Books, Bookkeeping Blanks, School Registers, Etc. Special lots made to order promptly and at reasonable prices. Estimates will be cheerfully given for any line of books that the local trade may require.

Sample orders are solicited. Send for our new Catalogue.

The J. W. Stoakes Automatic Shading PEN.

FOR PLAIN, FANCY AND ORNAMENTAL
LETTERING.

WASHINGTON, D. C., March, 1880.

I desire to say that the "Shading Pen" invented by Mr. STOKES meets a want long felt by penmen. The work done by it is perfect in line and shade. The rapidity with which lettering is done, aside from the beauty of the work, is enough to recommend it for general use.

H. A. WHITNEY, Ass't Cashier, U. S. Treasury.

U. S. ENGINEER'S OFFICE, ST. LOUIS, Mo.,

February 11, 1880.

I have tried the PEN, and it gives great satisfaction. It is worth twice the price asked. It is valuable for headings, etc.

JNO. R. BALLINGER.

CHICAGO, April 21, 1880.
Indispensable for the execution of neat, attractive lettering, etc.

"THE GREAT ROCK ISLAND ROUTE"

Call your attention to the following REASONS WHY, if about to make a Journey to the GREAT WEST, you should travel over it:

As nearly absolute safety as is possible to be attained. Sure connections in UNION DEPOTS, at all important points. No change of cars between CHICAGO, KANSAS CITY, LEAVENWORTH, ATCHISON or COUNCIL BLUFFS. Quick Journeys because carried on Fast Express Trains. Day cars that are not only artistically decorated, but furnished with seats that admit of ease and comfort. Sleeping cars that permit quiet rest in home-like beds. Dining cars that are used only for eating purposes, and in which the best of meals are served for the reasonable sum of seventy-five cents each. A journey that furnishes the finest views of the fertile farms and pretty cities of Illinois, Iowa and Missouri, and is afterwards remembered as one of the pleasant incidents of life. You arrive at destination rested, not weary; clean, not dirty; calm, not angry. In brief, you get the maximum of comfort at a minimum of cost.

That the unremitting care of the Chicago, Rock Island & Pacific Railway for the comfort of its patrons is appreciated, is attested by its constantly increasing business, and the fact that it is the favorite route with delegates and visitors to the great assemblages, political, religious, educational and benevolent, that assemble from time to time in the great cities of the United States, as well as tourists who seek the pleasant lines of travel while en route to behold the wonderful scenes of Colorado, the Yellowstone and Yosemite. To accommodate those who desire to visit Colorado for health, pleasure or business, in the most auspicious time of the year, the Summer season and months of September and October, the Company every year puts on sale, May 1st, at all coupon ticket offices in the United States and Canada, round trip tickets to

DENVER, COLORADO SPRINGS AND PUEBLO,

At reduced rates, good returning, until October 31st. Also to San Francisco, for parties of ten or more, good for ninety days, at great reduction from regular fares.

REMEMBER, this is the most direct route for all points WEST and SOUTHWEST. For further information, time-tables, maps or folders, call upon or address

R. R. CABLE,

Vice-Pres't and Gen'l Man'gr, Chicago.

E. ST. JOHN,

Gen'l Ticket and Pass'r Agent, Chicago.

THE PAPER TRADE IN THE CITY OF NEW YORK.

[Continued.]

The straw wrapping paper business is now one of the most important branches of the paper trade both on account of the magnitude of the sales and the manifold uses it subserves, yet it is of comparatively recent origin. Fifty years ago straw wrapping paper was hardly known, and ten years later it had scarcely come into general use. During the first third of this century wrapping paper, properly so called, was a scarce article, and prior to that era the merchant and the shopkeeper made out as best they could. What wrapping could be had was made from rags unfit for finer paper making and hard rope stock. The first straw wrapping paper produced in this country was made about 1830. As I am informed, a man named Phillip Winegar, at East Chatham, in this State, Marshall Doty, at Chatham Four Corners, and Cady & Smith, at Ghent, were the first to make straw wrapping paper, and they all began about the same time. Other early makers, who subsequently took up the manufacture, were Peter G. Tompkins, at East Chatham; Ebenezer Backus, at Chatham Four Corners; John S. Fosberg, who built what were called the Eagle Mills, afterwards owned by Thomas G. Son & Co.; Clark & Co., the company being Peter G. Simmons, whose mill, afterwards owned by Rathburn & Co., was burnt down and subsequently rebuilt by States D. Tompkins; A. P. Van Alstyne, whose mill was at Nassau, N. Y.; John R. House, at Kinderhook Landing, on the Hudson; Coventry & Dingman, at Philmont, above the town of Hudson; Harder & Pruyn, below Germantown, and McComber, Hunt & Olney, in Greene county.

In the beginning of the manufacture the paper was dried by air, or, as it was termed at the time, "loft-dried." But as the demand for it began to increase, some more expeditious method of drying had to be devised, and so it came to be "fire-dried." This change occurred about 1845, and about 1850 the steam drying, which has since superseded all others, was introduced. The advantage of the steam-drying process lies, of course, in the time and labor saved by it.

Much difficulty appears to have been encountered at the outset in finding a market for the paper. Abram Fosberg, a son of John S. Fosberg, already spoken of, and afterwards a colonel during the war, who between 1830 and 1840, ran a sloop down the Hudson to this city, gradually fell into the way of bringing the paper here for sale, but did not succeed in selling it except in very small quantities. In fact he is said to have had great trouble in getting rid of it, and was generally compelled to carry the bulk of it back up the river. This state of things continued until about 1838, when a market was suddenly opened to the manufacturers in rather an unexpected manner. As to the manufacturers, it may be inferred that up to that year they had not found much encouragement in their new departure.

In 1836 a native of Chatham Four Corners, who had drifted to New York on the vicissitudes of business, set up for himself here in the general auction and commission business. This was John P. Son, who has long been one of the interesting characters in the paper trade. In the auction line he was moderately successful, and between 1837 and 1838 was fortunate enough to secure the sheriff's sales. Accident, however, led him into an entirely different and much more lucrative business. He was acquainted with Abram Fosberg and in the habit of visiting him on his sloop from time to time. On one of

these visits, about the beginning of 1838, Mr. Son, having noticed a large quantity of straw wrapping paper in the hold of the vessel, asked Fosberg what he proposed to do with it. Fosberg replied that the mill owners up the river had placed it in his hands for sale, but he was unable to dispose of it. "Why," exclaimed Son, "you ought not to have any trouble in doing so. I'll guarantee I can sell it for you." Fosberg agreed to give him a commission, and so he went forth to make his word good. In a few hours he sold all the paper that the sloop contained, and obtained assurance that he could sell as much more. The news of this wonderful sale, as Fosberg regarded it, went of course like running water from mill to mill, except that it traveled up stream instead of down, and in a few weeks every manufacturer of straw wrapping then established along the banks of the Hudson was consigning his paper to John P. Son; and Son, being quite as successful in selling subsequent consignments as in the case of the first lot, soon found it profitable to relinquish his auction business and set himself up at 122 Fulton street, as a paper merchant. For more than twenty years he held supreme control of the wrapping paper business, and in that period set upon the stage many men, who have since figured prominently in the trade, and several who have made fortunes. Among these are Charles Hedges, Charles W. Kearney, afterwards of Kearney & Waterman; N. S. Briggs after making money in the paper trade branched off into the steamboat business. John S. Craft, who subsequently became the head of the firm of Craft & Bingham, and who died not long ago, was at one time a porter for Mr. Son. Charles J. Cave and David Phillips, the latter of whom is now with Joseph Hayward, were also clerks for Mr. Son.

Before proceeding further it will be appropriate, as well as interesting, to say a few words concerning the prices commanded by straw wrapping paper when and for some time after it came into general use. It was first made in two sizes, 14 by 18 inches and 18 by 28. The smaller size sold at from 40 to 90 cents a ream, according to quality and the proportion of demand and supply; while the larger size sold at from 90 cents to \$1.80 per ream. Before the introduction of straw paper the old rag wrapping was also made into two sizes, 15 by 20 and 20 by 30. The first sold at from 75 cents to \$1 per ream, and the latter at from \$1.25 to \$1.75.

The crisis of 1857 caught John P. Son with outstanding liabilities to the amount of \$84,000. He suspended and compromised with his creditors for 50 cents on the dollar, paying \$42,000 in cash. His business, however, languished afterward, and in 1860 he lost control of the trade he had held so long, new hands having risen up and wrested it from him. He continued, though, to do business in a smaller way, but subsequently failed again.

Mr. Son was born at Chatham Four Corners in 1810, and, although now over seventy years of age, is still active both in mind and body. His business career was begun as a clerk in a dry goods store in Albany. He came to New York city in 1832, and in 1833 was a clerk in A. T. Stewart's store, which was at that time opposite the old City Hotel on Broadway. For the last five years he has been a paper broker and had an office at 78 Barclay street.

RECENT AND NEEDED RAILROAD INVENTIONS.

It has sometimes been intimated that railroad employees are not infrequently saddled with too many and divers duties to insure the proper attention to the more important of them. However this may be as a matter of fact, our German friends do not seem to look upon it in that light, since, in addition to his other duties, the conductor on German railways carries around a fully equipped printing office, and prints the tickets for his passengers as they may require them. One particularly valuable feature of the press which he uses is that it reads its own proof, and immediately proceeds to kick up a row if the job is not clean. The invention has one serious drawback, which is that the conductor, in his capacity as editor—since he is at the same time compositor and pressman, as well as principal contributor and general distributing clerk—has rather limited openings for finding fault around the establishment.

The opportunities for adding to the literature of the Patent Office, in preparing the specifications for this patent, must have been something immense, and no doubt were fully improved. The average patent solicitor will get up fairly high sounding claims on reasonably small capital; but give him a possible combination of a live railroad conductor, a fully equipped printing office and an automatic proof reader, and corresponding results may confidently be expected.

One more invention is needed to reduce the running of railroad passenger trains to a close corporation basis. That is a portable machine and blacksmith shop, adapted to be attached to the engineer, so that by the assistance of the fireman he could do the repairs on his engine between stations. If to this were added a packing machine, capable of seating 250 persons in 100 seats, but little more would be needed.—*American Machinist.*

Mr. Miller, president of the Atlantic Iron Works, Boston, with several other gentlemen, have determined upon the erection in that city of an iron observatory, which, it is said, will be the highest structure in the United States. The models, plans, &c., have all been completed. The structure will be built of the best iron adapted for such a purpose, and its general appearance will be both ornamental and imposing, at the same time combining safety and comfort. The foundation will be sufficiently strong to support a structure weighing a thousand times more than will be the weight (260 tons) of the observatory, and the shaft itself will be cruciform in shape, with a "well" 3½ feet square in the centre. The shaft will be secured by 16 galvanized guys, or steel wire cables, each with a strength of 40 tons, the lower ends being anchored 10 feet in the earth, imbedded in stone and cement, and arranged in the form of an octagon. The shaft will have two opposite angles and a car in each, and each car will be operated by independent engines. It is unnecessary to add that the device for working the cars will be upon the most improved plan, and the machinery, steel wire cables, &c., connected with the same, will be such as to render an accident impossible. About half-way up the shaft there will be two galleries, in the opposite angles, each capable of accommodating twenty-five or thirty persons.

Artificial stone bricks, composed of sand and lime hardened by hydraulic pressure, are very durable and almost as good as the genuine clay brick.

WELDING COBALT AND NICKEL.

At the Exhibition of Düsseldorf, in 1880, some exhibits of special interest were shown by Dr. Theodor Fleitmann, of Iserlohn, these comprising a whole series of samples, illustrating the manufacture of nickel and cobalt, from the crude ore down to the purified metal. Among the specimens illustrating the application of these metals were particularly remarkable iron sheets, and articles of iron, such as plates, salvers, cups, teakettles, and other domestic utensils, which were covered on both sides with a thin plating of nickel or cobalt. This plating, however, was not combined with the iron by any process of galvanoplasting, but solely by welding both metals firmly together. The welding process was made conspicuous by sections of welded metals, among others by an 8-millimeter iron plate, with a skin of nickel upon each side of only $\frac{1}{2}$ millimeter in thickness. The welding operation had been carried out when both metals were still much thicker, and core and covering were then rolled out hot to the required thickness. It appears that since these samples were exhibited at Düsseldorf, Dr. Fleitmann has succeeded in further improving his process of welding nickel and cobalt with iron. He has proved that nickel may be alloyed with an equal quantity of iron by melting in a crucible, and that the alloy, which is thus obtained, will still weld very well, the same being the case with those alloys of nickel and copper which, when heated, remain soft enough to be rolled out in sheets without breaking. Both alloys, as well as alloys of nickel and cobalt containing zinc, will firmly unite with iron or steel when welded upon clean metallic surfaces, provided that, during the welding operation under the hammer or the rolls, the atmospheric air is carefully excluded, so that any oxidation of the welding surfaces is prevented. When the metals are thus firmly united, they can be rolled down to any required thickness, or they may even be drawn out to a very thin wire, when the coating of the pure metals of nickel and cobalt, or their respective alloys with iron, copper, and zinc will protect the core against oxidation. The exclusion of air during the welding operation can be obtained in various ways; for instance, by wrapping the metals before welding in a cover of thin sheetiron, which is afterwards separated by dissolving in a weak acid, which will not attack nickel and cobalt nor their alloys. The same result may be obtained by heating the metals in closed vessels until they have attained a welding heat, or, finally, by heating them in an atmosphere of gases, such as carbonic oxide or carburetted hydrogen, which prevent any intrusion of atmospheric air. In a similar manner an alloy of nickel and copper may be employed as a core and pure metal welded upon the surfaces, as the pure metal will adhere just as well as upon iron or steel. It is indeed a great progress in plating metals, that Dr. Fleitmann should succeed in welding firmly upon iron, steel, copper, or copper alloys, any thickness of nickel and cobalt or their alloys, supposed that free oxygen is carefully kept out under the operation. The articles which are thus plated with nickel, preserve a bright surface even in a damp atmosphere, and can be easily kept clean with soap, and they have thus a great advantage over polished steel, iron, or brass; and they will be found very useful for a great many domestic uses, such as kitchen utensils and ranges, pots, pans, kettles, &c.

George W. Millar & Co. have been awarded the contract for the supply of paper for message blanks used by the Western Union Telegraph

Company. This company has made a new departure in the substitution of manilla for white paper. Manilla paper has been in use for this purpose by European telegraph companies for several years, and is only just adopted in this country. The paper just contracted for will be of a fair quality of manilla and calendered for

writing purposes. It is probable that the Chemical Paper Company, of Holyoke, will make the paper for George W. Millar & Co. under this contract.

Constant complaining brings no sympathy it produces indifference.

The attention of the trade is directed to our Fine Manilla Writing Papers and Copying Books. A comparison in price and quality with other goods will convince any purchaser that it will pay to buy of us. Samples and prices on application.

INDUSTRIAL EDUCATION FROM A BUSINESS STANDPOINT.

(Continued.)

Although England is perhaps the most striking example of national dependence upon the concentration of human thought, we find it to be true in all civilized countries of the first rank, that the elements which go to make up national power are centring more and more around the industrial forces. It is upon these industrial forces that the leading states now rely for the maintenance of their political as well as their commercial supremacy; it is through the immense activity of the industries that the four quarters of the globe are being probed for food and raw materials, that methods of transportation and distribution have been developed, and that the huge manufacturing centres which play so great a part in modern political economy have reached their present importance. Industrial development has become, indeed, a profound national question. Under these circumstances it is not out of place for us to study with much care the industrial development of our own country.

For the purpose of bringing the matter concisely before your minds, let me invite your attention to a few commercial statistics in regard to the relative wealth which England, France and the United States are creating by the concentration of human thought in industrial labor and the bearing which this wealth has upon commerce:

ENGLAND.		Exports.
Imports.		
Raw material.....	\$784,236,980	\$117,727.03
Food.....	885,086,960	33,217.32
Manufactures.....	174,894,340	854,093.19
FRANCE.		Exports.
Imports.		
Raw material.....	\$425,330,200	\$250,838,600
Food.....	364,721,800	33,217.32
Manufactures.....	84,183,600	347,098,200
UNITED STATES.		Exports.
Imports.		
Raw material.....	\$182,057,686	\$310,900,287
Food.....	215,219,419	439,996,838
Manufactures.....	247,065,378	73,081,365

It will be observed in the exhibits of England and of France that it is the manufactures which give life to the commerce of each nation, consuming food and raw material on the one hand as imports, and exchanging manufactured products on the other as exports.

An examination of these statistics shows us that in the markets of the world England and France are great sellers of the thought of their people, while the United States sells but \$73,081,365 of thought, and buys foreign thought to the amount of \$247,065,378. It is true that the industrial power of the United States appears at some disadvantage in this exhibit, owing to the fact that most of our manufactures are consumed in our home market; but while this table more than suggests the industrial advantages which we have over England and France, by reason of our supplies of food and raw materials, it also makes painfully evident the fact that, in proportion to our opportunities, we are far behind the other two nations in the extent and variety of our industrial development.

Our inferiority in this direction was everywhere noticeable at the Centennial. I remember having been called to the Exhibition in March, 1876, before the opening, and meeting in the Main Building the manager of a New Jersey pottery. He was jubilant over the glories of his exhibit, and the certainty which he felt of securing a high award. Being at the building a month later, I met this New Jersey potter again. He was standing before the English and the French exhibits of porcelain and pottery, then just uncovered. I found he had experienced a complete change of heart. Frankly acknowledged

ing himself beaten, he said, "I am going home to learn."

The Centennial is an old story, but it taught us many valuable lessons. What could be more suggestive to the thoughtful man than the general display made by Great Britain and her colonies? Those who recall this exhibit will remember how, on coming from the western entrance of the Main Building, we first came in contact with the raw materials from the colonies, and that Australia was conspicuous by its exhibit of a monolith showing in bulk the extent of its gold product. Every step forward was the putting behind of these raw materials and meeting a higher degree of thought and skill, until, in the grand transept, in the exhibits of the Dougltons and the Mintons, we found the very soil of England transformed by skilled labor, and bearing values far greater than that of the gold of Australia; while in the Elkington exhibit gold and silver themselves became raw materials on which to float thought expressed by skilled labor more valuable still.

At this exhibition we were forced to recognize the industrial superiority of France as well. I am told that the poorest grades of cotton in the French exhibit surpassed the very finest cotton products which we had to show. It may be said that the development of our textile industries has only just begun.

Acknowledging, then, the general inferiority of our industrial development, as we must, save in a few directions, and acknowledging also the importance of industrial power to any great nation, the question arises, How can our industrial manufactures be promoted? I answer, *By the promotion of that factor which is the main element of value in them, human thought expressed by skilled labor.*

The nature of the thought required, and the manner of expressing it, are indicated by the industrial articles which we have been examining. Take this caliper, for instance. As we have seen, but a few cents' worth of iron ore is here carrying a value, created by thought, four hundred fold beyond the value of the material. Now, in order to render the raw material—iron ore—suitable for this ultimate purpose, thought has played all about it, has brought great natural forces to bear upon its constituent atoms,

and has recombined its inherent forces in a manner suitable to sustain the idea that thought has desired to impress into and upon it. Again, in the case of this vase, thought has been, as it were, playing about the raw material of common clay, readjusting its constituent elements to serve an industrial purpose, and the material, when thus reconstructed, has become the basis, as it were, upon which thought has expended itself in a purely æsthetic direction, creating great value by ministering to æsthetic tastes. Again, in this copper vessel we have thought working through skill, and, without changing at all the constituent elements of the material, it has created a new value by impressing thought upon the metal by the skillful work of the hand.

Thus we see that thought, to create these widespread industrial values, needs to be enriched by science, which shall inform it with regard to the constituent elements of the materials it has to deal with, and the nature of the chemical and physical forces which may be brought to bear upon them; and also by æsthetic art, that it may make use of the principles which govern the production of beauty. Furthermore, it requires the aid of graphic art, as a definite language in which to express its conceptions, and a knowledge of the manual arts, that there may be sufficient skill of hand to embody in the desired materials the thought expressed by graphic art.

Such is an outline of what is necessary for the development, enrichment and application of thought for industrial purposes. To elaborate the details of each subject is impossible within the present limits, and only the general features of each can be referred to here. Grouping them under the three heads of Science, Art and the Manual Arts, the fundamental elements in each subject may be outlined and illustrated as follows:

First. In Science, a knowledge derived from practical observations of the laws and phenomena of chemical and physical science, such as light, heat, electricity, magnetism, mechanics, molecular action, chemical affinities, quantitative and qualitative analysis, &c., &c.

These are some of the more fundamental features, and need not be more than referred to here.

Second. In Art, a knowledge of the features

of graphic and æsthetic art, which are three fold in their nature and relate to

1. Construction, or how industrial objects are made.
2. Representation, or how objects appear.
3. Decoration, or the enrichment of articles by ornament for the purpose of increasing their value.*

Third. In the Manual Arts a knowledge of the fundamental manipulative processes in dealing with raw materials. The worker in iron, for example, must be familiar with the processes of bending, drawing out, welding, punching, &c.; and in wood work a knowledge of planing, cutting and splitting, sawing, joining, turning, &c., is essential. In steel work we have the following, among various manipulations: Filing to line; sawing and filing; free-hand filing; fitting, chipping, &c.

There are various industries whose manipulative processes might be educationally arranged in a similar way.

* These features were illustrated by a number of charts and drawings, showing how drawing is practically applied in industry.

The work in iron, wood and steel was illustrated by examples of shop work from the Institute of Technology, Boston. The teaching of special or complete trades in this elementary construction was discontinued.

[To be Continued.]

"ART OF GLASS."

The following is an account of a most curious book, entitled "The Art of Glass," published in 1699, by H. Blancourt. The book is very quaint and is made up of theories relative to the properties and manufacture of glass, which are clothed with all the fanciful mysteries of alchemy. In fact, a perusal of the work calls to mind many of the lucubrations of the Rosicrucians, the transmutation of metals, the philosopher's stone, and illustrates what strange ideas seized hold of the minds of the writers of that age on glass. The full title of the book is "The Art of Glass, showing how to make all sorts of glass, crystal and enamel. Likewise the making of pearls, precious stones, china and looking-glasses. To which is added the method of painting on glass and enameling. Also how to extract the colors from minerals, metals, herbs and flowers. A work containing many secrets and curiosities never before discovered." The writer then indulges in a flowery dedication to the Lord Marquis of Villacerf, Counsellor of State, in which he elaborates the idea that he has made a number of marvelous discoveries regarding "the art of glass."

In the preface occur the following unique ideas: "Glass has something in it so beautiful to the sight, and in its transparency is so agreeable that it is no wonder we find it by several, and in the Holy Scripture itself, compared not only to gold, the most perfect of all metals, but also to things far more high and spiritual. They are mysteries of deeper consequence than at first sight we imagine, since by them we are informed that vitrification gives a better being or nobler nature. This requires the attentive thoughts of philosophers, not only in the nature of metals, where it is easily seen, but also in other things, where sense and experience testify to the truth of it. We have asserted in our book that glass is a perfect metal, since it will bear the utmost force of fire as well as gold, and that there is but one sort of fire, more puissant than the vulgar, that can consume it. But here we will take notice that there are two ways to make glass, and that it may be made more or less fixed. That the more fixed, which is the least beautiful and the least transparent, resists everything; no preparation of mercury, nor any species of aqua fortis can dissolve it, nor the most subtle poisons or highest corrosives arrive any further than to break it. The less fixed, on the contrary, which is the most clear and transparent, as that of Venice, is less capable of resistance, being composed of a more purified salt. Thus it will dissolve in the earth, or in cold and moist places, if there be more salt in it proportionally than sand, by a separation natural to these two sorts of matter, and poisons extracted out of minerals will dissolve it by reason of their great cold. We shan't repeat the virtue glass is capable of acquiring by the grand elixir of the philosophers, which makes it malleable and converts crystal into precious stones, as also by several other ways. We'll only add that there are several other less and particular secrets by which it may be made soft and supple like wax, and afterwards reduced to its former hardness in water." The writer then refers to the ancient manner of tingeing glass with those fine and rich colors whereof there are still some remains in ancient churches, and which at that time was looked upon as almost a lost art. The volume is divided into twelve books, and in the first the author speaks of the origin of glass. He takes the idea that glass was made at the time of the building of the tower of Babel. He says: "We might fetch the origin of glass from Tubal Cain,

son of Lamech, for, he being the first chemist that found out the way of melting metals, it is not improbable but that he might be the first inventor of glass, because one can scarce avoid reducing calcined metals into glass, especially when the fire is more than ordinarily violent."

Blancourt next endeavors to establish that the great Hermes understood the art of making glass and taught the knowledge of it to the Egyptian chemists, and, "although he possessed the knowledge of transmutation of metals, he did not divulge it." Speaking of the potency of the elixirs of the chemists as applied to glass, he says: "Philosophers and chemists attribute the malleability sometimes given in glass to the white elixir, which takes away the frangibility of the glass, and gives it extensibility like other metals; this is what we believe very possible, by reason of the infinite virtues that the elixir must needs contain; with which also crystals can be converted into very fine diamonds, giving them both lustre, weight, and hardness, and also many other miracles be performed. We only add that the white elixir having the power to change crystals into diamonds, the red elixir can convert them into fine rubies and carbuncles, and other sorts of precious stones." He next refers to a certain learned man who was imprisoned for life for having discovered the secret of making malleable glass. It seems that the learned man made a bust of malleable glass and presented it to Cardinal Richelieu, who ordered that the discoverer be imprisoned, his reason being that the discovery would destroy the "vested rights of French glass makers," so the secret passed away.

In the next book Blancourt describes the furnaces then used for the manufacture of glass. These furnaces, with their pots, &c., are substantially the same as in use at the present day, and which, at this late period, are now being abandoned for hot-air furnaces, which give an equable distribution of heat. In the book there is an engraving of the tools then used in manufacturing blown glass, and here one is able to almost draw parallels with those in the present day. He next devotes himself to giving recipes for making colored glass, and shows how the mineral colors may be mixed to advantage with the brittle fabric. These recipes are curious studies, and at the time they were promulgated by Blancourt must have caused considerable speculation, for at that time the art of coloring glass had gone out of use in many countries, and in others it had only been heard of as something of a wonderful nature. It was this ignorance of the facility with which the semblance of precious stones could be fashioned that gave rise to many frauds on jewelers and tradesmen.

It might also be stated that colored glass seems to have been made soon after the discovery of the process of making glass. On Egyptian mummies, at least three thousand years old, colored glass beads have been found, while in many of the tombs of ancient Egypt and Chaldea have been found pictures in colored glass which have been puzzles to glass makers since their discovery. While this ancient process came down in a rather disconnected way to comparatively modern times, it had its times of fashion and neglect, and gradually dwindled away until at last the glass makers of Bohemia were the exclusive possessors of the secret of coloring glass, and they held firmly to it until the year 1837. It was in that year that France awoke from her lethargy in that department of industrial art and moved into line with Bohemia.

At present the art of coloring glass is common, and it is a fact that many improvements of later years are due to Americans, and from several

of our advanced thinkers in the glass trade can be ascribed some of these notable as well as beautiful steps in advance. The master secret of the art of glass is the process by which it can be rendered malleable. This quality had been developed in early times if we can put faith in ancient authorities; but with all the progress now made in the manufacture, the secret still remains unbroken. Blancourt adds an appendix to his

book in which he speaks of the art of making glass eyes which looked very natural. This was the beginning of an industry which has grown to be quiet an important one in the glass trade in this age of experienced oculists. He also describes how to make looking glasses, and does it in a quaint and garrulous way. The book is in a splendid state of preservation, and evidently had good usage.—*Pottery Gazette*.

STAFFORD'S UNIVERSAL WRITING INK!

A PERFECT BLACK WRITING FLUID.

It contains no gum, and flows very freely, making a smooth, even mark.

It positively will not corrode Steel Pens.

Writes darker than any known ink, and turns at once jet black.

Being a perfect chemical solution, it cannot thicken or deposit a sediment.

Never moulds in any climate. Freezing does not injure it.

Never changes in color or consistency while in use in the inkstand.

Resists Acids. Is more permanent than any other ink.

It will be found more economical than any other ink, as it can be used to the last drop.

One of the most valuable and remarkable features of this Ink is the extreme rapidity with which it dries on the paper, it being seldom necessary to use a blotter. This quality should recommend it to bookkeepers.

In the United States, this Ink has completely superseded the old fashioned pale black inks, and has to a great extent taken the place of the faint green writing fluids.

Mr. J. ADEE HEPSWITH, the eminent English Chemist, says :

"I find S. S. Stafford's Universal Ink to be proof against all acids; and, from my knowledge of its ingredients, I believe it to be the most permanent ink in existence, as it cannot rust out like other inks that are prepared from galls and iron. As it seems to be entirely free from any tendency to thicken or corrode steel pens, and is BLACK AT ONCE, I cannot but regard its invention as a valuable discovery."

BYRON WESTON

DALTON, MASS., U. S. A.,

HAS BEEN AWARDED THE

GRAND PRIZE GOLD MEDAL

AND RECOMMENDED THE

Medal of Honor and Perfection

At PARIS, 1878,

This being the **HIGHEST** and **ONLY** AWARD given for

LINEN RECORD & LEDGER PAPER.

—A SPECIALTY.—

THIS Paper has received THE HIGHEST PREMIUM over all
others from the Cincinnati Industrial Exhibition, Massachusetts
Charitable Mechanics' Association, Franklin Institute of Philadelphia,
Louisville Exposition, Medal and diploma from United States Centennial
Commission, Medal of Progress American Institute, 1877, and Medal of
Improvement and Progress, Boston, 1878. Its

PRINCIPAL ADVANTAGES

are as follows:—1. It contains more LINEN than any other Ledger
Paper, has a longer fibre, and is, consequently, tougher. 2. Having a
harder and better body, it frays less in erasure, so that by simply using
the rubber after the eraser, the ink is prevented from spreading. 3. It is
more uniform in Weight Color and Finish. 4. It never cockles if properly
bound. 5. Its chemical action upon ink is such that it both writes and rules
up better. For proof of the foregoing, refer to a large number of Sta-
tioners, Bookbinders, Bookkeepers, and Recorders, who have given it,
after a severe test, the preference over all others. This paper is *Double*
Sized, and will stand any climate or the most acid of fluid inks.

Send for sample sheet, **ERASE** and **REWRITE FOUR TIMES** on same spot.
Each sheet is water-marked with name and date.

CINCINNATI NOTES.

[FROM OUR REGULAR CORRESPONDENT.]

CINCINNATI, O., September 26, 1881.

And now night closes in upon an epoch in human history. Our country has become an immense factor in human affairs. First patriarchs ruled men, then hierarchs and kings, then commerce and industries. It is in the dynasty of trade and toil we live. Industry, the despised Cinderella of past ages, is the crowned bride to-day of the king's son and the mistress of the world.

"There is nothing great in this world but ideas," said James A. Garfield in a speech about a year ago to soldiers at an unveiling of a soldiers' monument in northern Ohio. The idea of the dignity of labor and the measuring of a man by his own achievements as against measuring him by accidents of fortune or favor, to-day received the homage of millions of hearts mourning the loss of one whose history and whose trials and triumphs made him a conspicuous example, representative and embodiment of these ideas. There was a great procession here, composed of societies representing diverse nationalities, different races and conflicting social political and religious views, all fused together by a common sorrow. On this slow-moving craped procession of twelve thousand mourners fully a hundred and twenty thousand people looked in silence so profound, that the shuffle of the slowly moving, the only sound heard, rose on them like a muffled spirit dirge exhaling solemnly from the depths of the earth. The bells tolled, the houses were closed, the streets were still. The moment the procession passed as the sun sunk in red clouds, the roar of vehicles, the sound of hoofs, and the hum of voices filled the air as much as to say

"—then up and depart,

To life and to duty with undismayed heart."

"It won't make a ripple on the surface of business," said a great admirer, a warm supporter and an intimate friend of the late President; one who accompanied him from Mentor to Washington, and withal the editor of a great daily, to me a fortnight ago when I asked him for his opinion of the effect of the death and the succession upon the business of the country. And it will not.

Business has shown no disturbance in Cincinnati during the last dark ten days. Hearts full, hands busy, has been the history of these days. Traveling men halted and took a rest, but orders

have come and gone in number and volume that have surprised everybody most agreeably.

And now to dismiss the shadow and walk into the full light of life. I can report a concurrence of testimony to the fact that the state of business for the present and the outlook for the future are satisfactory beyond all precedent, and altogether out of keeping with the menacing drawbacks of a bad season and short crops in certain districts. While the dry weather has been bad enough, the extent of its damage to crops has not been underestimated—rather the contrary. The fact is, there are oases in the blasted districts where crops have been good.

Speculation in grain, cotton, beef, tobacco and whisky have been unusually active here for a month or more. There is evidently an effort to corner whisky and tobacco in this city. "But what has that to do with the paper trade?" I imagine I hear some one ask, and immediately I reply, "Though trade has many members, it has at the same time but one body, and the blood poisoning of one single member affects injuriously all of the others in the body." Now, speculation here in Cincinnati means speculation in all of the towns and villages of this great fertile region, of which Cincinnati is the centre. It means more. It means speculation in the greatest controlling trade and money centres of the country from which Cincinnati caught the infection. What is to come of it will depend upon the extent of the operations and the recklessness of operators. I find business men fully cognizant of the existence of the spirit of speculation in epidemic form, but I do not find any of them regarding the disease as virulent or alarming. Yet I observe that while they observe its progress without the least apprehension, they also watch it with interest.

Apropos of foreign trade I may say that the Mackinnon stylographic pen is made here by John Holland for the company. He is turning off nearly a thousand a week with iridium points. And what is beautiful, and will be news to many about their sale, a large portion of the weekly product is absorbed by the demand for the article in Great Britain and on the Continent. Mr. Holland has a fine exhibit of gold pens, penholders and charms and of iridium in the Exposition. His finished goods are exhibited in the same case that he used in his Centennial exhibit at Philadelphia. It is a splendid and costly case and was admired at Philadelphia; but the fact is it is almost overshadowed by the splendor and size of the cases which surround it in Music Hall.

One of the night features of the Exposition is the number of electric lights. There are not less than fifty of them, and as no electrical light

represents less than 2,000 candles, the halls and fountains and gardens of the great show are resplendent with the aggregate light of 100,000 candles.

In matters in the line of stationery and printing the Exposition is shamefully bare. It is a credit to the Lockwood Press that it is represented in several bound volumes of trade and class journals and in a number of samples of polychromatic as well as of black and white job printing. It has a dignified place in the scientific department, and keeps company with the Runkorf coil, and no end of philosophical and chemical apparatus, natural history, casts and charts, and the like.

In another part of the building are some tall cases, in which Skinner's removable blank book covers are exhibited. Outside of a printing press, which is always operated at the Cincinnati Exposition, there is nothing conspicuous in the printing and stationery line other than the exhibits mentioned. The Lockwood Press exhibit is the first ever made of journals as samples of class journalism challenging competition, and as there is no specified offer of a premium for such articles, it has been entered in the "unclassified class," and takes chances on its own merits.

Outside of the mechanical departments the exhibits show a tendency to run to spectacular splendor. Many of the cases are exceedingly costly, and the taste exhibited in the choice and disposition of articles for effect, as compared with that exhibited in the earlier exhibitions, show that the educational force of the Centennial and other national expositions has not been barren of results.

PRINCE WILLIAM.

PHILADELPHIA CORRESPONDENCE.

[FROM OUR OWN CORRESPONDENT.]

PHILADELPHIA, Pa., September 27, 1881.

Two years ago or more when chromo cards first found an active place among business men as a profitable medium of advertising, the old foggy element of the commercial world predicted that the demand, excitement or craze for them would be short-lived, and that the bottom (so to speak) would drop out of the business and leave the market drugged with the overplus.

This freely expressed opinion had its influence among the dealers in these goods, and they bought sparingly and for only immediate wants, and paid the publishers fancy prices, fearing a collapse, which would leave a surplus on their hands if they anticipated the demand.

But instead of a decrease there was a steady and decided increase. Shrewd advertisers foresaw that the mania or craze which had its run in Europe would reach this country and in no

modified form, and they confidently believed they could profit thereby. Instead of the small orders of perhaps one or two thousand cards these advertisers had been giving their printers, they suddenly appeared in the market for large lots of 50,000, 100,000, and some even for millions. The craze came; it struck New England first, then New York, Pennsylvania and the entire eastern coast, and was thought to have reached its height during the winter and spring of 1880 and 1881. But while the publishers received very large orders and increased their capacity, there was also a pressure to reduce prices, and the wholesale card men began a struggle to see who should sell the most at the lowest prices. As a result, dealers carrying the same lines began to cut in prices, to the injury of the publisher and the general trade.

As an illustration, a prominent publisher issued a very handsome reproduction of a series of foreign floral cards which he put on the market at \$3.50 per M. One or two unscrupulous dealers, to draw attention to their other lines, sold the cards at cost and lost the freight. The large and more honest dealers demanded an explanation and protection from the publishers, whose only remedy was to make a rebate. Large dealers had, of course, to meet the first cut and go a little better. You all know what this leads to. These cards are selling to-day at less than \$2 per M, and no one dares to buy beyond his immediate wants for fear of further reductions. Two or three of the largest dealers who were doing business for its profits rebelled, and immediately made arrangements to control the goods they sold with a smaller variety, and to realize themselves the publishers' extra profit, by buying in larger lots.

Early in the present year, one of the oldest and the largest publishers of cards in the United States, concluded to adopt the plan of selling only to the jobbing trade and to supply cards only in editions, but to give the purchaser the exclusive control of the lines ordered, and to protect him by copyright of the original designs. From the moment this plan was adopted their success was assured. This firm is T. Sinclair & Son, Philadelphia, which, under the management of George M. Hayes, has so far this year sold over one hundred millions of fine chromo cards in editions. The difference between the price at which small lots are sold and the price at which this firm's printed editions were disposed of, was in itself a handsome profit, and enterprising card jobbers were not slow in taking advantage of it. Its prize competition for designs brought novelties, and notwithstanding that the firm more than doubled its facilities, it has to-day orders for all it can produce. It is, however, open to arrangements with new parties wishing to control the goods it sells, and offers an enormous variety of designs.

Taken as a whole, the chromo card business is in a high state of prosperity. The South and West have taken the fever as well as the Pacific coast, and foreign dealers are now buying American cards. There is no prospect of an abatement in the demand, and dealers should adopt the independent method of controlling the lines they sell and hold themselves above the competition, which brings no profits.

The card business forcibly shows the enterprise of American publishers and American advertisers, and its superiority to that of other nations.

J. VIENNOT.

Good manners are the settled medium of social as specie is of commercial life; returns are equally expected from both; and people will no more advance their civility to a bear than their money to a bankrupt.

JAPANS AND JAPANING.

The following upon the subject of japans is worthy of attention, because it gives an insight into the methods of preparation and the general principles involved in the art:

When finished wood, papier-mâché, composition or metals are varnished in the usual manner and left to dry in the air, the drying is in most cases imperfect, and the coating more or less uneven. If the surface thus varnished is heated for some time to a temperature of from 250° to 300° F., or higher, it is found that the whole of the solvent or vehicle of the gums or resins in the varnish is soon driven off, and the gummy residue becomes liquified, or semi-liquified, in which state it adapts itself to all inequalities, and, if the coating is thick enough, presents a uniform glossy service, which it retains on cooling. This process of drying out and fusion secures a firm contact and adhesion of the gums or resins to the surface of the substance varnished, and greatly increases the density of the coating, which enables it to resist wear and retain its gloss longer.

This process of hardening and finishing varnish or lacquered work by the aid of heat constitutes the chief feature of the japanner's art. In practice the work to be japanned is first thoroughly cleaned and dried. If of wood, composition, or other porous material it is given while warm several coats of wood-filler, or whiting mixed up with a rather thin glue size, and is, when this is hardened, rubbed down smooth with pumice-stone. It is then ready for the japan grounds. Metals as a rule require no special preparation, receiving the grounds directly on the clean dry surface.

In japanning, wood and similar substances require a much lower degree of heat and usually a longer exposure in the oven than metals, and again a higher temperature may be advantageously employed where the japan is dark than when light colored grounds are used; so that a definite knowledge of just how much heat can be safely applied and how long an exposure is required with different substances and different grounds can only be acquired by practical experience.

The japanner's oven is usually a room or large box constructed of sheet metal, and heated by stove drums or flues, so that the temperature—which is indicated by a thermometer or pyrometer hung up inside, or with its stem passing through the side wall midway between top and bottom of the chamber—can be readily regulated by dampers. The ovens are also provided with a chimney to carry off the vapors derived from the drying varnish, a small door through which the work can be entered and removed, and wire shelves and hooks for its support in the chamber. The ovens must be kept perfectly free from dust, smoke and moisture. An oven especially prepared for the purpose is not absolutely essential, for ware may be baked in a hot closet, an oven, or in fact in almost any place when the proper heat and a freedom from dust can be secured.

A good cheap priming varnish for work to be japanned consists of:

Shellac (pale), ounces.....	2
Rosin (pale), ounces.....	2
Rectified spirits, pint.....	1

Two or three coats of this is put on the work in a warm dry room. A good black ground is prepared by grinding fine ivory black with a sufficient quantity of alcoholic shellac varnish on a stone slab with a muller until a perfectly smooth black varnish is obtained. If other colors are required the clear varnish is mixed and ground with the proper quantity of suitable pigments in a similar manner; for red, vermilion

or indian red; green, chrome green or prussian blue and chrome yellow; blue, prussian blue, ultramarine or indigo; yellow, chrome yellow, &c. But black is the hue commonly required. The following are good common black grounds:

1. Asphaltum, pound.....	1
Balsam of capivi, pound.....	1
Oil of turpentine, sufficient quantity.	

The asphaltum is melted over a fire, and the balsam, previously heated, is mixed in with it. The mixture is then removed from the fire and mixed with the turpentine.

2. Moisten good lampblack with oil of turpentine, and grind it very fine with a muller on a stone plate. Then add a sufficient quantity of ordinary copal varnish and rub well together.

3. Asphaltum, ounces.....	3
Boiled oil, quarts.....	4
Burnt umber, ounces.....	3
Oil of turpentine, sufficient quantity.	

Melt the asphaltum, stir in the oil, previously heated, then the umber, and, when cooling, thin down with the oil of turpentine.

An extra fine black is prepared from:

Amber, ounces.....	12
Asphaltum (purified), ounces.....	2
Boiled oil, pint.....	½
Rosin, ounces.....	2
Oil of turpentine, ounces.....	16

Fuse the gum and rosin and asphaltum, add the hot oil, stir well together, and, when cooling, add the turpentine.

From one to six or more coats of varnish are applied to the work in japanning, each coat being hardened in the oven before the next is put on. The last coat in colored work is usually of clear varnish, without coloring matters, and is in fine work sometimes finished with rotten-stone and chamois. For ordinary work the gloss developed in the oven under favorable conditions is sufficient. A white ground is prepared from copal varnish and zinc white or starch.

Large japaners never, so far as we know, attempt to make their own varnishes or japans. They can be more cheaply procured from the varnish or japan maker. It is hardly worth while for one who attempts to work upon a small scale to undertake to make anything in this line, because he can buy a vastly better quality than he can make, and get it at a figure much lower than that which a similar article would cost him to make.—*Metal Worker.*

AQUEOUS SHELLAC VARNISH.

About the solution of shellac in water by means of borax, Dr. Geissler makes the following remarks: A varnish for covering maps, photographic prints, &c., can be readily prepared, as I have found by experiments, by merely shaking together two parts of a saturated solution of borax and one part of pulverized shellac, applying no heat. Solution will be effected in two or three days. In three parts, however, the shellac is easily soluble. Bleached shellac must be preserved under water and must be dissolved immediately after being powdered; for if the powder be exposed to the air for several days, it will dissolve only with great difficulty, and perhaps not at all. If in preparing the varnish a higher temperature than 50° or 60° C. is employed, the liquid is apt to assume a faint reddish color; the finished varnish, however, bears heat very well. Now, this varnish may not only be used for rendering pictures, prints, maps, &c., glossy, but it forms an excellent starch gloss. In fact, this varnish will be found much more adapted for laundry purposes than any of the starch glosses found in commerce.—*Pharmetrallé.*

OLD BERKSHIRE MILLS

DALTON, MASS., U.S.A.

One party writes: "The two hundred RECORD BOOKS, for 88 of the 99 Counties, now on exhibition at the Iowa State Fair, at Des Moines; and all, but four (!) of them, made from your 'OLD BERKSHIRE MILLS LINEN LEDGER,' Medium, 40lb., make a splendid show

[The above cut is a fac-simile of the wrapper used on the Linen Ledger Paper.]

We will pay for any book rejected on account of fault in the paper. Send for Samples, test them in comparison, and see that your books are made from paper thus water-marked.

CARSON & BROWN CO., Manufacturers.

Extra Fine Papers

Manufactured by

Z. CRANE, JR., & BRO.,

DALTON, MASS., U.S.A.

These Papers, which are acknowledged to equal the finest foreign manufactures, are presented in the following styles and qualities:

REGULAR QUALITY.

In handsome Light Blue Packages containing one-quarter of a ream of Note Paper each, and bearing in blue letters description of contents.

In a separate Package of uniform size, is one-eighth of a thousand Envelopes corresponding in tint and quality to the paper.

EXTRA QUALITY.

In attractive Lavender Colored Boxes containing one-quarter ream of Extra Fine Paper each, with contents printed in red. Corresponding to this, in like Boxes, are Envelopes to match.

All this Stationery may be relied on to be according to representation. It is suited to the tastes of the most select trade.

In addition to the above lines, our other Specialties are put up with care, in attractive and substantial form. Goods can be seen at the Mill, or New York Office, 47 Beekman Street. GEO. B. HURD, Gen'l Agent.

SEASON 1881-1882.

SEASON 1881-1882.

L. PRANG & CO.'S

Christmas and New Year Cards

ANNOUNCEMENT.

WE hereby beg leave to announce to the trade the completion of our line of Christmas and New Year Cards for this season, for which our agents are now soliciting orders. The extent of our list, the originality, and especially the American character of our designs, together with the great care taken in their execution, will, we have no doubt, secure for our goods the popularity which they have enjoyed heretofore. The efforts we have made to secure the highest excellence, is attested by the names of some of the artists whose designs have been reproduced. We would only name Elihu Vedder, C. C. Coleman, Thomas Moran, Miss Rosina Emmett, Miss Dora Wheeler, Mrs. O. E. Whitney, W. H. Gibson, F. S. Church, R. G. Birch, &c. That a due regard has been paid for the quality of the literary matter, in connection with these designs, is shown by the fact that many of the designs are accompanied by original poems from writers of note, such as Mrs. Celia Thaxter and Mrs. Emily Shaw Forman.

The great increase of our manufacturing facilities, secured by additions to our building nearly doubling our floor space and by the adding of new machinery, will place us in a position to fill orders promptly. Still we would request dealers to place their orders as early as possible, so as to still further enable us to make timely preparation for prompt deliveries.

Our Cards will, as heretofore, be put up in envelopes containing twelve Cards, unless otherwise stated on our price lists.

We furnish envelopes without extra charge for all our Christmas and New Year Cards, for which the list price is \$1.80 per set, and over. Our silk-fringed Cards will no doubt be in great demand this season. We have made ample preparation to furnish these in time and have made arrangements with our manufacturers for the best quality of silk fringes. We would call special attention to the excellence of our fringed Cards and the novelties in colors and style of fringes we offer for this season.

A marked and attractive feature of our cards are the elegantly ornamented backs.

All our fringed Christmas and New Year Cards are furnished with envelopes and protectors, so as to insure safe transportation in the mails.

It will be impossible to embody our whole list in the space of the advertisement, and we will therefore merely give a general outline of the variety offered.

PRANG'S PRIZE CHRISTMAS CARDS.

COMPETITION OF 1881.

These are the Cards selected by the judges in the second competition for four designs of Christmas Cards, for which we offered \$2,000 in prizes of \$1,000, \$500, \$300 and \$300 respectively. At the recommendation of the judges, Messrs. COLEMAN, LAFARGE, and WHITE, the prize for third best Card was increased to \$500. Mrs. CELIA THAXTER has written appropriate verses for each of the designs.

- 1st Prize Card (\$1,000), by Elihu Vedder. Size, $6\frac{1}{4} \times 9$ inches; price \$1 each. Same card with silk fringe, cord and tassels, price \$1.50 each.
- 2d Prize Card (\$500), by Miss Dora Wheeler. Size, 7×9 inches; price 75c. each. Same card with silk fringe, cord and tassels, price \$1.25 each.
- 3d Prize Card (\$500), by C. C. Coleman. Size, 7×9 inches; price 75c. each. Same card with silk fringe, cord and tassels, price \$1.25 each.
- 4th Prize Card (\$200), by Miss Rosina Emmett. Size, $5\frac{1}{4} \times 9\frac{1}{4}$ inches; price 60c. each. Same card with silk fringe, cord and tassels, price \$1 each.

The Prize Cards can also be had mounted on heavy board with gilt beveled edges.

We beg to call attention also to the following publications for New Year and Christmas:

"Goddess Fortune" New Year Card, by Elihu Vedder. Size, $6\frac{1}{4} \times 8\frac{1}{4}$ inches; price 75c. each. Same card with silk fringe, cord and tassels, price \$1.25 each.
 "Christmas Dove." Size, $7 \times 9\frac{1}{4}$. This card is in the same style as the success of the last Easter season, the "Easter Dove" Price 60c. each. Same card with silk fringe, cord and tassels, price \$1 each.

Our Regular Line of Christmas Cards consists, among others, of the following Series:

- Nos. 901, 902, 903, 906, 909, 910. Floral designs ranging in price from 20c. to \$1.30 per set of 12.
- Nos. 904, 905. Humorous Cat and Frog Designs, 60c. per set.
- No. 907 is a new series of Horseshoe designs, 75c. per set.
- Nos. 920 and 929. Children's designs, at \$2.40 and \$3.60 per set.
- No. 922. Shells of Ocean, with figures, \$2.40 per set.
- No. 924. Fans with silk fringes, \$3 per set.
- No. 933. Bric-à-Brac designs, very rich, \$6 per set, and many others.

We offer a similar assortment of New Year Cards, but would call special attention to No. 1320, a new folding calendar, at \$2.40 per set. Most of the Numbers can be had with silk fringes ranging in price from \$2.25 to \$12 per set. Stock will be ready for delivery September 15.

Besides the above, attention is called to our New Birthday Cards, Scripture Texts Cards, New Panels, New Water Colors, by Thomas Moran, and other publications. Our line of Thanksgiving Day Cards will also be shown by our agents.

REGULAR DISCOUNT TO THE TRADE. PRICE LISTS AND CATALOGUES SENT ON APPLICATION.

NEW PATENTS.

No. 246,863. Game Cards.—Milton Bradley, Springfield, Mass.

Improved game cards, consisting of a number of equal-sized sections of several larger individual cards, each of the sections having upon its face side complete and incomplete figures of living and other objects, which sections, when assembled to reform the individual cards, show upon their united faces a complete picture representing a diversity of living and other objects.

No. 246,867. Joint for Toys and other Movable Figures.—Alfred E. Cooke, Philadelphia, Pa.

No. 246,884. Printing Machine.—Jesse H. Holmes, St. Louis, Mo.

No. 246,892. Cutter Holder for Paper Cutting Machines.—James C. Marshall, Boston, Mass.

No. 246,913. Chalk Holder.—Azell N. Rouech, Bay City, Mich.

No. 246,923. Rotary Paper Cutter.—William D. Turner, Providence, R. I., assignor to James C. Marshall, Boston, Mass.

No. 246,951. Fan.—Ernest W. Hoeffle, New York, N. Y., assignor to Scheuer & Brother, same place.

No. 246,960. Type Writer.—Justus F. Lindgren, Peoria, Ill.

No. 246,961. Lead and Crayon Holder.—Charles W. Livermore, Providence, R. I.

1. A lead or crayon pencil consisting of an outer case and inner crayon-holding tube adapted to slide between stops, the crayon-holding tube being provided with grasping-jaws, and also with a clamping-sleeve, combined with the crayon-holding tube and outer case. 2. A crayon-holding tube with spring jaws for grasping the crayon, and longitudinally movable with respect to a clamping-sleeve for closing and releasing the jaws, in combination with an outer case adapted to slide longitudinally within fixed limits upon such holding tube and cover and uncover the point of the crayon, as desired, the outer case being arranged to gauge or measure the projection of the crayon from its holder when requiring to be set forward.

No. 247,000. Calendar.—Jabez Bath, Brooklyn, N. Y.

No. 247,013. Newspaper File.—Henry F. Childers, Elsberry, Mo.

No. 247,020. Toy Pistol.—George W. Eddy, New Britain, Conn., assignor to Charles G. Street, Brooklyn, N. Y.

No. 247,083. Sponge Cup.—George W. Fisher, Uniontown, D. C.

No. 247,058. Type Writer.—George H. Herrington, Wichita, Kans.

No. 247,059. Printing Machine.—Jesse H. Holmes, St. Louis, Mo.

In a printing machine, an impression cylinder having two impression surfaces arranged directly opposite each other upon the cylinder, and spaced apart thereon a distance not less than the length of one of the surfaces, in combination with a double or two-part flat bed, the two parts of the bed being spaced apart a distance not less than the length of one of the cylinder impression surfaces, and the bed having a reciprocating movement past the cylinder.

No. 247,120. Pen Holder.—Philip Schrag, New York, assignor to Eberhard Faber, Port Richmond, N. Y.

DESIGNS.

No. 12,450. Font of Printing Type.—James M. Conner, New York, N. Y. Term of patent, 7 years.

EARLY INDIAN ART.

The only notice of gold plate in the Indian Rig Veda is a mention of gold cups, but the references to jewelry are so frequent that the precious metal and stones must have been familiar to the Aryan immigrants from their earliest settlement. Yet no specimen of the art of gold-working has been met with which can, with certainty, be attributed to the ancient period of Indian history. The oldest example now extant was found by Mr. Masson, about forty years ago, in a Buddhist tope in the neighborhood of Jalabad. In the centre of the tope was a small apartment, constructed of squares of slate. A steatite vase was found in it, containing, besides mold and the ashes of burned pearls, a gold casket, filled with similar remains. By its side were four copper coins, by which the monument is assigned to one of the dynasty of Greco-barbaric kings who ruled the Northwest of India about half a century before the Christian era. The ornaments of this casket are extremely curious. The Greek feeling apparent in them is most interesting. A plate of silver of similar design was long in possession of a family (the Mirs of Badakshan) who claimed to be descendants of Alexander the Great. Dr. Birdwood sees in these relics distinct evidence of the influence of Alexander's invasion on the arts of India. The Greeks, he asserts, had conquered all this part of India, had established a monarchy, and issued a coinage. Their money is well known, and is thoroughly Greek in character. Moreover, in the travels of Apollonius of Tyana he is said to have come upon remnants of Greek civilization and language in the former Kingdom of Porus. The Buddhist sculptures in the Punjab are due, says Dr. Birdwood, to Greek rather than Byzantine influence. It is true that their exact date is unknown. They may have been carved at any time in the thousand years between the middle of the third century B. C. and the middle of the eighth of our reckoning; and those which are later than A. D. 300 may have been influenced by Constantinople. But the date of this gold casket proves that its Greek look is due to Greek inspiration, and many specimens of carving in stone are now recognized as betraying a similar origin.—*The Saturday Review*.

FIRE GILDING.

In fire gilding, gold is dissolved in mercury, forming an amalgam, which is spread upon the article to be gilded. Heat is then applied, and the mercury is drawn off, leaving the gold firmly attached to the metal. The quantity of gold applied by this process is greater than by many others, and the coating is more durable and is said to be more beautiful. If the work to be gilded is silver, it is to be carefully cleaned with ammonia and water, by means of a brush, until the surface is bright all over and no signs of tarnish can be seen. Cleaning with acid is often recommended. The amalgam, or combination of gold with mercury, is formed by putting four parts of mercury in a clean iron ladle and adding one part of gold. It is usual to make the mercury hot before adding the gold, which is also heated by some workmen. The metals are then carefully stirred until the mixture is perfect; the amalgam is then poured out upon a plate and is ready for use. The amalgam is next rubbed upon the article to be gilded by means of a piece of dry cloth, an even coating being given.

The next step is to drive off the mercury by heat and leave the gold. This is done by exposing the article upon an iron plate to the heat of

a charcoal fire. No draft is used in this process. The regular platers are very careful to turn the article about, and, as the process goes on, to brush the amalgam so that all parts are equally well coated. The mercury fumes are very dangerous, and a plate of glass was always used by workmen in the old times to protect the face, while the charcoal fire was so placed that the fumes, as far as possible, were conducted up a flue or chimney. It is said to be a very difficult matter to obtain an even and thin coating. If our friend is willing to use a small extra quantity of gold, we suppose that a coating can be obtained which, though irregular in thickness, will show of one color. The quantity of gold needed for work of this kind is exceedingly small. The coating is not, however, as thin as that produced by the electro-plating method, where the amount appears to be merely nominal—so small, indeed, in some cases as not to be perceptible in weight.

If the quality of the gold makes no difference, a very pure coating may be put on by amalgamating the surface of the metal with pure mercury, and then covering all portions to be gilded with the gold foil or gold leaf used by dentists. The mercury is then drawn off by heat, and the gold remains behind. The coating in this case is pure gold, and we suppose is very soft. On this account we should presume it would wear rapidly. The best quality of ordinary leaf could be used in the same way, but it would have this disadvantage—that, being very thin, several leaves would be required, one on top of the other, to cover a given surface.

The "fire" methods of gilding, as they are called, are well worth attention at the present day from those who wish for something more than a "blush" of gold upon their work. The tendency of the day is to make plating too thin; and a gold-plated harness with \$2.50 worth of gold upon it is said to be heavily plated, and \$20 has been charged within ten years for putting on this amount of gold.

TO FASTEN CLOTH ON WOOD.

The following is said to be an excellent method of fastening cloth to the top of tables, desks, &c.: Make a mixture of $2\frac{1}{4}$ pounds of wheat flour, 2 tablespoonfuls of powdered resin, and 2 tablespoonfuls of powdered alum; rub the mixture in a suitable vessel, with water, to a uniform, smooth paste; transfer this to a small kettle over the fire, and stir until the paste is perfectly homogeneous without lumps. As soon as the mass has become so stiff that the stirrer remains upright in it, transfer it to another vessel and cover it up so that no skim may form on its surface. This paste is applied in a very thin layer to the surface of the table; the cloth or leather is then laid and pressed upon it, and smoothed with a roller. The ends are cut off after drying. If leather is to be fastened on, this must first be moistened with water. The paste is then applied, and the leather rubbed smooth with a cloth.

To copper-plate type metal, clean the type perfectly, attach it by means of a copper wire to the negative or zinc pole of a strong battery, and immerse the type in a strong solution of sulphate of copper in water. Place a small sheet of copper in the sulphate of copper bath with the type (they must not touch), and connect this by means of a copper wire to the other pole of the battery. Under the above conditions the type will speedily become covered with a film of metallic copper. Great care is necessary when cleaning the type to remove every trace of oil and rust, otherwise the deposition will be unequal, or will drop off.

A NEW STEEL PEN.

Of the making of new varieties of steel pens, as of the making of books, there is, it would appear, no end; but it must be confessed that the new pens have the advantage of the new books, inasmuch as they are often manifest improvements on their predecessors, which the literary wares very rarely are. The latest modification of the steel pen is the patent globe-pointed pen, which presents several peculiarities and improvements on the ordinary shapes. The chief of these is the enlargement of the extreme points of the nib, so that they form a small disk-like point, so to speak, similar to the button of a fencing foil, except that the foil button is fastened to the body of the weapon by its centre, while the disk at the end of the pen is fastened by the edge. This arrangement obviates some of the objections to the use of the ordinary steel pen without impairing the usefulness of the instrument for ordinary work. The globe-pointed pen writes easily, and is well adapted for rapid work, or work on rough, common, or thin paper. It does not spurt, or splutter, or catch, and will stand a very considerable amount of rough usage without injury, all qualities which will make it a favorite of those with whom rapid writing is a constant necessity. The pen, too, is commendable in another respect, that is, that by a simple variation from the ordinary shape this pen is made to hold a considerable quantity of ink, thus avoiding the hindrance and annoyance of frequent dipping.—*British Mail.*

CHINESE PRINTING.

The blocks are all of the same size, about eight inches by twelve inches, and about half an inch thick. Each block represents two leaves, or four pages of the book, being engraved on both sides. The blocks for a complete work can thus be stowed away in a very small compass. The cost of engraving a page of these wooden blocks is said to be but little more than the expense of setting up a page of Chinese type and preparing it for the press. An edition of one copy can be printed if no more are required, and thus the expense of keeping a large stock of printed books on hand—some of which might eventually have to be sold as waste paper when they grow out of date or revisions had to be made, as is the case among ourselves—is entirely avoided. Any errors or misprints that may be discovered can, as a rule, be corrected on the blocks with but very little trouble. A skilful printer can print by hand 5,000 leaves of two pages each in a day, using no press or machinery whatever. He supplies his own tools, and receives as wages about one shilling a day. The paper ordinarily used is white, and of the best quality, although a yellowish kind is also made use of at a reduction of twenty per cent. on the selling price. The books are bound in the usual Chinese style, and fastened with white silk thread. They present an appearance which satisfies the taste of the most fastidious native.

Louis Elzevir, the founder of the family whose books are so eagerly sought after, was a book-binder by trade, and was born at Louvain 1540. About the end of 1580 he settled in Leyden, and obtained leave to build a shop in the grounds of the university. His central position gave him great advantage; he started as a bookseller, published his first volume in 1583, and continued to print and publish until his death, in 1617. His five sons were all printers, and of the twelve printers of his name, (descendants of the first Louis,) at least seven were celebrated for special excellence. The Elzevirs did not aspire to luxurious editions, like the Aldi and the Stephens, but devoted their energies to furnishing accurate works for common use.

"THE GREAT ROCK ISLAND ROUTE"

Call your attention to the following REASONS WHY, if about to make a Journey to the GREAT WEST, you should travel over it:

As nearly absolute safety as is possible to be attained. Sure connections in UNION DEPOTS, at all important points. No change of cars between CHICAGO, KANSAS CITY, LEAVENWORTH, ATCHISON or COUNCIL BLUFFS. Quick journeys because carried on Fast Express Trains. Day cars that are not only artistically decorated, but furnished with seats that admit of ease and comfort. Sleeping cars that permit quiet rest in home-like beds. Dining cars that are used only for eating purposes, and in which the best of meals are served for the reasonable sum of seventy-five cents each. A journey that furnishes the finest views of the fertile farms and pretty cities of Illinois, Iowa and Missouri, and is afterwards remembered as one of the pleasant incidents of life. You arrive at destination rested, not weary; clean, not dirty; calm, not angry. In brief, you get the maximum of comfort at a minimum of cost.

That the unmitigated care of the Chicago, Rock Island & Pacific Railway for the comfort of its patrons is appreciated, is attested by its constantly increasing business, and the fact that it is the favorite route with delegates and visitors to the great assemblages, political, religious, educational and benevolent, that assemble from time to time in the great cities of the United States, as well as tourists who seek the pleasant lines of travel while en route to behold the wonderful scenes of Colorado, the Yellowstone and Yosemite. To accommodate those who desire to visit Colorado for health, pleasure or business, in the most auspicious time of the year, the Summer season and months of September and October, the Company every year puts on sale, May 1st, at all coupon ticket offices in the United States and Canada, round trip tickets to

DENVER, COLORADO SPRINGS AND PUEBLO.

At reduced rates, good returning, until October 31st. Also to San Francisco, for parties of ten or more, good for ninety days, at great reduction from regular fares.

REMEMBER, this is the most direct route for all points WEST and SOUTHWEST. For further information, time-tables, maps or folders, call upon or address

R. R. CABLE,

Vice-Pres't and Gen'l Man'gr, Chicago.

E. ST. JOHN,

Trade Gossip.

All new goods and designs which are not, strictly speaking, "Novelties" will be noticed under this head. The trade are requested to forward descriptions with samples in order to secure proper notice.

K. B. Grahn, printer, Ashland, Ky., has sold out.

M. S. Monteith, printer, Albany, Oregon, has sold out.

H. F. Perry, publisher, Friend, Nebraska, is closing out.

Martin A. Haynes, printer, Lake Village, N. H., has been burned out.

G. F. Robbins has succeeded William Colville, printer, Cookstown, Ont.

George Home & Son, stationers, Montreal, Can., advertise their business for sale.

Bausman & Williams, bookbinders, Minneapolis, Minn., have dissolved partnership.

Jarvis E. Dannon, publisher of the *Lynn (Mass.) Record*, is advertising to close out.

E. Watkins & Co., booksellers and stationers, Meridian, Miss., have sold out to Jones, Mooning & Co.

H. J. Atwater, of H. J. Atwater & Co., wholesale dealers in paper, twine, &c., New Haven, Conn., is dead.

George W. Plummer & Co., manufacturers of stationers' specialties, New York city, have dissolved partnership.

Hennig & Kruckeberg, printers, Minneapolis, Minn., have dissolved partnership. Hayward & Kruckeberg succeeded.

Felix B. Mulgrew, publisher of the *Enterprise*, Healdsburg, Cal., has admitted Charles Montgomery to partnership.

Martin & Roth, publishers of the *Banner*, Bluffton, Ind., have dissolved partnership. Samuel S. Roth continues.

Eusebe Senecal, printer, Montreal, Can., has admitted J. J. E. and L. H. Senecal to partnership under the style of Eusebe Senecal & Fils.

Among the visiting members of the trade to the city during the week were John Hooper and Charles H. Miller, Jr., of Hooper, Lewis & Co., Boston.

S. S. Stafford has a large number of orders booked ahead for his various inks and mculage, mostly of the large sizes. His goods seem to give such general satisfaction that no effort is required to seek orders.

T. Sinclair & Son, 506 North street, Philadelphia, have ready their Novelty easel calendar. Stationers and dealers can obtain samples, and have the address of the nearest wholesale dealers handling these calendars by enclosing stamps for postage.

Charles Taber & Co. have just published by the artotype process two new subjects entitled "Cherry Ripe" and "Morning." Each represents the bust of a little girl dressed in ancient yet neat costume, and is on 22x28 inch paper, with tint around the picture. The demand for them so far is very good.

Henry Levy & Son, 477 Broadway, are opening an extremely pretty line of Swiss carved wood goods, which are in a great variety of designs and make very handsome and inexpensive presents. They are also opening some exquisite pieces of china, in the shape of vases, figures and toilet goods.

The line of Christmas and New Year's cards shown by McCarty and Hasberg is thought to be one of the finest in the city. It has been in preparation over a year, and the designs are from some of the first artists in Europe and America. Among the most elegant are those numbered 124, 126, 129, 131 and 133. No. 124 is in two designs, one of which represents a small boy donning his father's hat and cane to make New Year's calls; No. 126 is illuminated with portraits of two beautiful girls and a rich profusion of flowers. No. 129 is handsomely printed in a great variety of colors, and shows a number of angels descending from the celestial regions carrying Christmas gifts. No. 131 represents two girls in eager consultation on Christmas Eve as to their expected visit from Santa Claus the following morning. No. 133 shows a real winter scene. A yoke of oxen is drawing a load of Christmas trees from a wood, while the wind blows the snow pitilessly in the face of both oxen and driver. The other designs shown by the house are very appropriate for the season of the year they intend to represent.

J. D. Whitmore & Co.'s line of elegant holiday boxes in 1, 2½ and 4 quires, are being shown to the trade. There are many handsome novelties in plush taking the lead. Satin and fancy materials in variety have been made use of to place before the trade a line that will add very much in artistic effect to a stationer's display. The line of stamped and illuminated papeteries is still in great demand, and extra facilities have been obtained to meet it. The complete line shown by this house is adapted to all demands, from the low-priced papeterie or cabinet to the very costly, plain boxes with plain and with elaborate fittings; medium-priced boxes the same.

Attention is invited to the new advertisement in this issue of Charles J. Cohen, Philadelphia. Mr. Cohen has shown great industry and care in the selection of goods suitable for the holiday trade and the ample space afforded in the recent extension to the firm's premises will render the exhibit attractive and easy to be selected from. The new descriptive list (No. 37), showing a full assortment of fancy articles, will be mailed to the trade on application.

McCarty & Hasberg's curio room is a great success, and is daily inspected by visitors. J. B. McCarty, the senior member of the firm, has displayed rare taste in selecting the exquisite assortment exhibited in this apartment. Members of the trade who have visited the curios say there are few who possess the necessary qualifications to select such a stock for such a purpose.

Adolph G. Brown, formerly with Willy Walach, is about to engage in business on his own account as a manufacturer and importer of Christmas, New Year, birthday, valentine and Easter cards, fine stationery and leather goods. He will be located next week at 50 Beekman street.

J. H. Bufford's Sons sold during the past week an immense number of crayon portraits of the late President and his widow. These portraits are said to be the best published both as regards correct pictures and elaboration of finish.

The stock of Henry J. Blitz, Jr., dealer in fancy goods, Allegheny, Pa., is advertised for sale by sheriff.

The firm of J. A. Spradling, printer, Cerrillos, New Mexico, will be changed to a joint-stock company.

There is quite a number of new styles introduced this year in fancy leather goods.

G. M. Espy, dealer in notions, Piqua, O., is closing up.

Leonard Brown & Co., printers, Lowell, Mass., have sold out.

Reeve L. Knight, Jr., wholesale paper dealer, Philadelphia, Pa., is dead.

Eugene Ely, of Eugene Ely & Son, dealers in paper stock, New York city, is dead.

Thomas Campbell, stationer, Buena Vista, Col., has been succeeded by Sheperd Brothers & Austin.

Brown & Samson have got out some new designs in papeteries, which are said to be selling very largely. They are known as the "Louis XIV.," "Marie Stuart" and "Marie Antoinette."

Joseph Hyer, stationer, New York, has removed to 57 Beekman street. He makes a specialty of tinted envelopes and blank book manufacture. He has also published several new designs in illuminated advertising cards.

The October number of *Our Little Ones* has been received from the Russell Publishing Company, Boston. It is full of pretty pictures and nice reading for the pets of the household. The publishers announce that they have bought the *Nursery* and that it will be merged in *Our Little Ones* next year.

Among the sufferers by the burning of the Kansas City Exposition building on September 14, Winbush, Powell & Harrington, stationers, sustained damage to the extent of \$300. They lost one small card press, samples of advertising and visiting cards (thirteen handsome frames), besides office supplies.

Short & Boland, St Louis, have issued their 1881-82 trade catalogue of books, stationery, &c., handsomely printed, blue-lined and illustrated. The list is very complete, and the catalogue itself is harmonious in its general style and production. The cover is tasteful in azure, dark-blue and silver, and is a creditable piece of work.

F. H. Dunkinson, of Irish linen paper fame, has accepted the agency for Clay & Richmond, lithographers, of Buffalo, N. Y., and has opened a branch office at 146 Reade street, this city. Mr. Dunkinson is well known among the trade, and has a great many friends who wish him all the good luck he deserves. Mr. Dunkinson has severed his connection with the Hatch Lithographing Company.

Following is a list of additional subscriptions for the Michigan sufferers received by the Stationers' Board of Trade: Previously acknowledged, \$1,285; received since—D. Appleton & Co., New York city, \$100; Eberhard Faber, New York city, \$100; A. Jardine & Co., Rahway, N. J., \$50; Byron Weston, Dalton, Mass., \$25; George West, Ballston Spa, N. Y., \$25; Macmillan & Co., New York city, \$25; George Routledge & Sons, New York city, \$25; Robert Graves & Co., New York city, \$25; Cassell, Petter, Galpin & Co., New York city, \$25; Henry Holt & Co., New York city, \$25; Willy Walach, New York city, \$25; Stearns & Beale, New York city, \$15; total to date, \$1,750.

Among the visiting members of the trade in the city during the past week were: J. S. Hooper and Mr. Miller, of Hooper, Lewis & Co., Boston; Mr. Goldsworthy, of E. L. Freeman & Co., Providence, R. I.; Mr. Ogden, of Ogden Brothers, Knoxville, Tenn.; Mr. Newell, of Newell, Smith & Co., Ogdensburg, N. Y.; H. A. Smith, Rome, Ga.; Mr. Boyd, of Scott & Boyd, Floyd Court House, Va.; A. F. Kennedy, La Crosse, Wis.; A. Selleck, Norwalk, Conn.; Mr. Gay, of Ward & Gay, Boston; Mr. Wheeler,

of Wheeler & Osborn, Nashville, Tenn., and Paul G. Schuh, Cairo, Ill.

A. A. Smith & Co., booksellers and stationers, Salem, Mass., are closing up.

P. W. King, dealer in wall paper, Rock Island, Ill., has assigned to C. A. Davis.

Hayman Brothers, dealers in rags, Columbus, O., have been succeeded by M. Hayman.

There is an unusual run on Myers Brothers' new cabinets, and the orders for them are said to be accumulating.

Charles T. Bainbridge's Sons brought out last week a memorial papeterie. Each sheet of paper was ornamented with a steel plate likeness of the late President Garfield, surrounded with appropriate designs. "In memoriam, J. A. G.," was stamped in black on the flap of the envelope.

Mary Neal Sherwood has translated "Sabine's Falsehood," a love story, by the Princess Olga. It is a story of rare self-abnegation and strong character well drawn and pathetic. All of its features, descriptive and otherwise, are well individualized. T. B. Peterson & Brothers, Philadelphia, are the publishers.

The increased demand for the Livermore stylographic pen has compelled the Stylographic Pen Company to greatly increase the facilities for its manufacture and to more conveniently accommodate its customers, it has removed its New York office from its old location at 169 Broadway to No. 173 Broadway, corner of Courtlandt street.

The Philadelphia Novelty Manufacturing Company, Philadelphia, Pa., has issued a sixth edition of its illustrated catalogue of patented specialties. The Novelty paper fastener, with automatic clincher, is one of the most convenient articles for driving and clinching staples for fastening papers together that can be found, and the facility with which it accomplishes the work required of it is remarkable.

TO TEST JAPAN AND VARNISH.

Japan, like varnish, must be good to give entire satisfaction, and much damage is done by using a poor article. One way of testing a japan is to spread some on a piece of glass and leave it in the direct rays of the sun. When it has entirely lost its fluidity, scratch it lightly with the nail, and if it falls in powder without cracks, its quality is proven good. This is also said to be a good way of testing varnish. The liquid which begins to enamel in places is of an inferior quality.

The application of reptiles on pottery is unlimited as to the number of differently shaped vases, and also to the position of the reptiles, but very restricted as regards variety of animals, the whole of the living, and even of the mythical class of reptiles, consisting only of snakes, lizards, crocodiles, tortoises and dragons, from which the tortoises must be exempted as unfit for the purpose in question. Reptiles have been applied for decorating pottery by several of the Eastern people, who have cultivated pottery as an art; and we meet occasionally, among Chinese, Japanese, and particularly Indian wares, with some fine specimens of china ornamented with dragons.

Under the auspices of Archbishop Guibert, a society for the study of the history and archaeology of the diocese of Paris has been formed, with M. Natalis De Wailly as president. The society proposes to issue a quarterly magazine, on the lines of those published by existing bodies.

NEW YORK OFFICE AND SALESROOM, 18 MURRAY STREET.

THE BAY STATE PAPER COMPANY, HOLYOKE, MASS.,

were among the pioneers in the W. C. Paper trade, and their goods, from the start, were distinguished for their fine quality and the superior style in which they were wrapped. Their example has been approved and imitated by a swarm of competitors, who have flooded the market with inferior goods, put up in packages of 600 to 800 sheets, misleading the unwary, and sold at apparently lower figures; but the trade and consumers generally recognize the fact that a good article, honestly put up, in 1,000 sheet packages, is the most profitable both for use and for sale. Their goods are all guaranteed 1,000 sheets to package, and no short count. No wood is used in any of these papers, but they are made of the very best stock in the market.

THE "MEDICATED BOUDOIR" BRAND

Has no equal for weight, strength, softness, and color, and commands the front place with "fine retail trade." Present reduced quotations furnished on application.

THE STATIONER.

DEVOTED TO THE INTERESTS OF THE

Stationery and Fancy Goods Trades.

WEEKLY---\$2.00 PER ANNUM.

Single Copies - - - - 10 Cents.

NEW YORK, THURSDAY, SEPTEMBER 29, 1881.

Advertisements cannot be received for insertion in the current week later than 12 M. on Wednesday. The charge for advertising is 25 cents a line, each insertion. Special terms for standing and displayed advertisements to be had on application.

This journal aims to be a medium of information for and a representative of the interests of every one connected with the stationery and fancy goods trades. It contains a full and trustworthy survey of the market for stationery in this country, in all cases giving the actual prices at which goods can be bought of importers and jobbers in this city, together with a detailed account of novelties in the trade, patents relating to stationery, and current items of interest. A review of foreign markets and accounts of movements abroad will also be furnished, and no pains will be spared to make THE STATIONER a thorough and complete exponent of the trade.

Subscription and postage for Great Britain, per annum..... 12s.

Any information our readers may wish to obtain shall be cheerfully given, and prompt replies will be made to all inquiries addressed to us on any subjects of interest to the trade.

Communications on all trade matters are earnestly solicited. Address

HOWARD LOCKWOOD, Pres. and Treas.

Subscribers to THE STATIONER can be supplied with the best cloth binder in the market. Deliverable at the publication office. Price, fifty cents.

Readers of this paper who avail themselves of the information obtained from its columns, by advertisement or otherwise, are requested to notify their correspondents of the source of their information.

ONE of the latest accessions to trade journalism is the *English Stationer*, conducted by a gentleman not unknown to the readers of its cousin and elder, THE AMERICAN STATIONER. The new paper is well printed, and has a generally bright and intelligent appearance. It is chatty and interesting, and if it keeps on in the way it has begun, it will certainly make its mark as a representative journal of the English stationery trade, and should be supported accordingly.

It is not often that we hear of the Board of Trade. Indeed, so infrequently does it assume a position that of right belongs to the representative organization of a great commercial interest, that people might reasonably be led to assume that it was moribund. But within the past fortnight it has undertaken the praiseworthy task of acting as the almoner of the stationers, paper-makers and printers in administering to the needs of the sufferers by the forest fires in Michigan. The generous aid given through its medium is another happy illustration of the kinship of humanity, but we wish that the Stationers' Board of Trade was more often heard of in connection with subjects of public stirring interest.

THE STATIONER does not believe in intruding politics into trade journalism, but when it finds one of the craft taking prominent position, it claims the right to wish him well and happily out of it. As a consequence of the action of a political convention during the past week, Byron Weston, the well known paper maker, is a candidate for re-election as Lieutenant-Governor of the Commonwealth of Massachusetts. In discharging the duties of his official position Lieutenant-Governor Weston has won the highest encomium; and when we find in a daily contemporary the suggestion that in the time to come that gentleman should be called upon to go up higher and take the gubernatorial chair of the Old Bay State we feel that we have a right to say: Amen, "them's my sentiments." We are sure that our friends are Mr. Weston's friends, and that they will be pleased to witness his success in the political field, even if it is not quite so grand as that of first-class paper making.

REMARKABLE things are always coming to pass. We have been wont to regard Latin, the tongue of the Cæsars, as a dead language, but if we may believe what we are told this is not the case. The principal of a school in this city presents as an inducement to scholarship under her auspices the fact that French, German, Spanish, Latin, &c., are taught in her school by professors to whom these languages are native. We could conscientiously accept the French, German, and Spanish natives, but when we are called upon to look upon a real, live Roman, not of modern date, but of B. C. antecedents, and to learn prose composition independent of Arnold, and in the commonest way imaginable, we are surprised—we

may say shocked. The interesting tutor whose *alma mater* must have been the genuine thing ought to be preserved. The Smithsonian Institute or the British Museum are the proper conservators of this curiosity, and we give the suggestion for what it is worth, as perchance those institutions may be anxious to secure so scarce a lingual specimen.

SPECULATION is rife. It is extending, and scarcely a line of trade is exempt from the fever of going ahead in a hurry to make money too fast. The greatest trouble is that, when the breaking up begins, the evil effects are felt by those who have kept apart from the epidemic, and unless extraordinary precautions are taken the innocent suffer with those who invite destruction. It is, therefore, the duty of trade journals to warn the interests which they represent to be wary and to let prudence take supreme command of their transactions. Be cautious of extravagant credits, and prepare to weather the storm, which may come at any time. With the prosperity which the country now seems to be enjoying, there is possibly no immediate chance of trouble, but we are warned that the effect of short crops will be felt in another year, and that next summer we may begin to find that money is hard to get in, and that a tightness may be experienced which will come closer to strangulation than business men care to undergo. We are not alarmists, nor do we wish to predict disaster, but reckless trading and gambling speculations bring evils in their train which the business public wot of as well as we. Therefore, again we say, watch and be ready.

ANSWERS TO CORRESPONDENTS.

N.—Wants to know who makes manilla felt window shading besides the Manilla Felt Shade Company, of Cleveland.

Ans.—We think that this is a specialty confined as yet to the manufacturer mentioned.

J. B. C.—Last week asked for name of manufacturer of "St. James" commercial note paper.

Ans.—A Western correspondent, whom we thank for the information, says "the Worthington and Judd Paper Company, Holyoke." This company is, however, unknown to us. Another kind reader of THE STATIONER says that the Morgan Envelope Company, of Hartford, has a line of paper and envelopes bearing the same brand.

NEW VARNISH.

Fr. Theie, of Bissendorf, prepares a varnish, consisting of 100 parts of resin, 20 parts of crystallized carbonate of soda, and 50 parts of water, by heating these substances together and mixing them with a solution of 24 parts of strong liquor ammonia in 250 parts of water. With the mass thus obtained the pigments are levigated without the addition of linseed oil or turpentine; the paint dries readily without the aid of a drier, and looks very well, especially when varnished. The paint keeps well, even under water, and becomes very hard. The cost is said to be about one-third of that of ordinary oil paints.

CHICAGO NOTES.

[FROM OUR REGULAR CORRESPONDENT.]

WESTERN OFFICE LOCKWOOD PRESS, 8 LAKESIDE BUILDING, CHICAGO, ILL., Sept. 26, 1881. The arrangements relating to the memorial services of the dead President leave but little thought for trade news.

George F. Berry, books, stationery and fancy goods, has been in the city recently. He quotes trade good in Newton, Kansas, whence he hails.

The Photo-Engraving Company, New York, is represented in this city by its agents, Palmer & Stillwell, who will shortly open a new store at 180 Dearborn street.

Mr. Reed, of Snider & Noble, Cincinnati, was in town last week. He reports a phenomenal August trade.

Russell, Morgan & Co., Cincinnati, have commenced the manufacture of playing cards. Their list includes six styles, made in the best and neatest manner. The trade may find it of interest to obtain their prices.

Redhead, Wellschlagler & Co., Des Moines, Ia., are making extensive preparations to meet the large demand they expect for wall papers this season. Ten men were sent out upon the road with their lines during last week.

The Novelty Card and Advertising Company have removed to 199 Clark street. It has increased its facilities considerably, and is now in better shape than ever to meet the demands of the season.

Mr. Palmer, of the firm of Palmer, Rey & Smith, lithographic presses, etc., San Francisco, Cal., was in town last week, superintending the opening of a branch house at 173 Monroe street. Mr. Smith will be resident manager.

A novelty in the shape of a hand guide for writers (L. M. Beebe, inventor, Beaverton, Ill.), is the latest announcement. From its design this seems to be destined for use as well in forming the hand of a beginner, as for assisting the hand of an old penman.

E. P. Donnell & Co. now offer their new tablet counter to the trade. It is simple and cheap, and should be a great convenience in printing offices and binderies.

A. H. Andrews & Co. are about publishing an interesting and pleasing little book—a sort of souvenir of the Garden City, past and present. It is entitled, "The City that a Cow Kicked Over," and contains about forty-two fine and sketchy illustrations from the pen of Charles Copeland, the well known Boston artist. The verse, on the style of "The House that Jack Built," is contributed by Anna Mattson, a Chicago lady, by no means obscure as an artist herself. She also furnished the sketch ideas from which Copeland made the illustrations. Here we have the history of the city at a glance in picture and in rhyme—the city that was, the cow that razed it, the result and ruins, incidents and individuals, and, finally, the "phenix town" that is to-day. The whole—letterpress and cuts—is done in a soft sepia tint, and has a very pleasing effect. The book should interest both old and young, as it is not an advertising scheme. It retails at twenty-five cents, and is offered to the trade at the usual discounts.

The exposition continues crowded daily. Among other attractive displays is that of John Wilkinson, 77 State street, whose handsome arrangement of archery goods, games, toys and tourists' requisites, are very noticeable. There is not a finer show of amateur tool chests, jigsaws, &c., in the building; in fact, I do not remember any other.

Among the prettiest and most unique exhibits is that of the United States Ticket and Tablet

Company, whose alcove is literally a "leafy bower." Any one who has seen this display will not doubt the pleasing effect of such decoration. The company also shows a quantity of its different designs of fancy business cards.

Cresswell, Wanner & Co. exhibit two Prouty rotary presses—a small and a large eighth—which ought to secure them some trade.

The Lockwood Press exhibit has been removed to the main floor directly beside the main entrance, sharing the large wire fenced space of the Chicago World Company, which prints and publishes here the *Exposition Daily Press*, editor, the veteran journalist, Captain Kennedy. Undoubtedly this is one of the most attractive exhibits in the whole building; in front are arches bearing the legends *Exposition Daily Press* and *Chicago World*, and facing the orchestra and the lake appears a triple arch, the centre bearing the words "Lockwood Press, New York" and the arches at the side the titles of the various publications of that institution. Just inside of the railing is the exhibit, consisting of finely bound volumes of Mr. Lockwood's various publications, with specimens of the catalogue, job, and miscellaneous printing for which the house has already made itself a reputation in the West. Altogether, I think that the Lockwood Press may congratulate itself not only upon the neatness of its exhibit, but as well upon the company into which it has fallen here.

OBITUARY.

EUGENE ELY.

Eugene Ely, many years ago a paper manufacturer and a dealer in paper until 1862, and subsequently engaged in the paper stock business, died at his residence, in Elizabeth, N. J., on last Friday afternoon, aged about sixty-six years. Mr. Ely was disabled by a stroke of paralysis about three years ago, since when he has not been able to give any personal attention to his business, the conduct of which has devolved upon his son, Cheever N. Ely. During the past three winters Mr. Ely, in order to escape the rigors of this climate, passed the seasons at Nassau and in Florida. Mr. Ely was born in Orange county, N. Y., on May 18, 1815. His family moved to this city in 1829 and took up their residence in Beekman street. Mr. Ely's first venture in business was the formation of a partnership in 1840 with John D. Abbott at 71 Fulton street, under the style of Abbott & Ely.

This co-partnership was dissolved a few years afterwards, and was succeeded by Eugene Ely & Co., the company being John C. Ely, a brother of Eugene Ely. The brothers separated in 1849, and in 1850 were in business separately, Eugene Ely locating at 86 Fulton street. In 1850 Mr. Ely became interested in a paper mill at Westfield, Mass. Although the panic in 1857 involved him in difficulties which entailed some losses, he recovered from them and afterwards carried on a successful trade. In 1862 his paper stock business grew to such large proportions that, finding it difficult to conduct both branches, he resolved to confine himself principally to paper stock. In 1864 he took his son, Cheever Newhall Ely, into copartnership, the style being Eugene Ely & Son, under which name the business was conducted up to the time of his death. Mr. Ely is spoken of by many who have had close business relations with him, as a man of the strictest honor and integrity, and whose word was at all times as good as his bond. He has at various times held positions of honor and trust under the city government of Elizabeth, the last of which was as its financial officer. His loss will be felt by a large circle of friends and acquaintances.

Market Review.

OFFICE OF THE AMERICAN STATIONER, WEDNESDAY, September 28, 1881.

THE MONEY MARKET.—The money market continued in a steady and tranquil condition the greater part of the week. Near the close there was considerable activity, and the rate was advanced to one-eighth of 1 per cent. per diem in addition to the legal interest to borrowers on pledge of stock collateral. Government bond dealers continued to have their wants supplied at 4@5 per cent. Time loans were quoted at 6 per cent., and prime mercantile paper at 5½@6 per cent. The stock market ruled quiet, but generally firm till near the close, when a flurry in the money market caused a decline. Government bonds are generally firm and railway mortgages irregular. Foreign exchange is dull, and rates have been reduced all round. The posted rates at the close were \$4.80½@4.81 and \$4.81@4.84½, for bankers' sterling. The actual rates were as follows: For sterling, \$4.80@4.80½ and \$4.83½@4.84, with cables \$4.84½@4.84½, and prime commercial \$4.78½@4.79½.

THE PAPER MARKET.—While Monday was set apart for the obsequies of our late and lamented President, on Saturday and Tuesday business was more than usually quiet, owing in part to the high temperature of the weather. These two pauses have broken into the current week and have produced a temporary quietude among the city jobbing trade, but the manufacturers have had no further set back than the scarcity of water, of which the complaint is now becoming quite general. Even with the great facilities afforded at Holyoke, manufacturers are now restricted by being compelled to shut down for eight hours out of the twenty-four. We have nothing to add to what we noted last week as to the effect of the continued drought upon the market except that the stock is growing smaller day by day, and that values are undergoing a gradual hardening.

THE STATIONERY MARKET.—Although a portion of the week was given up to a remembrance of the late President, and the heat has had a depressing influence upon trade, business has been very good. In some branches of the trade there is such great activity that not only are some houses greatly behind in filling their orders for goods for the current month, but a great many orders have been booked for goods to go forward next month. The heavy wholesale jobbing trade generally have made the greater portion of their purchases, and the business now doing is chiefly confined to the retail buyers, whose purchases, although comparatively smaller than the wholesale jobbing trade, make in the aggregate quite a considerable quantity. The card business is particularly active, and we hear of some very heavy orders being sent in by the traveling salesmen of several of our city houses. The fancy goods branch of the trade is receiving its share of attention, nearly every house having all it can do. We hear of no further advance in the prices of staple goods since that made of envelopes last week.

ENGRAVING ON GLASS.

Cover the surface of a sheet of glass with a concentrated solution of nitrate of potash, by simply placing the glass flat on a table or in a shallow pan, and pouring the solution upon it. Then along the edges of the sheet place a platinum wire, keeping it immersed in the solution, and place it in communication with one of the poles of a secondary battery. Having done this, let another fine platinum wire be joined to the other pole, and incased in an isolating substance save at its point. With this wire trace on the glass the design required; a luminous streak will appear everywhere the wire touches, and however quickly it may be moved the design will be cleanly engraved on the glass. If the drawing or writing be done slowly the lines will be engraved more deeply. Their width depends on the diameter of the wire at its end; if it be reduced to a fine point, the work may be performed with great exactitude. The metallic thread conducting the electric current thus becomes transformed into a special graver for glass, and in spite of the hardness of the substance the operation requires no effort, for the corroding force is furnished by the action of the current upon the saline solution. Either pole may be used for engraving, but it requires a weaker current to engrave with the negative pole. If, instead of a plane surface, it is desired to engrave on a curved one, the same result may be obtained by thickening the solution with a gummy substance, in order to make it adhere to the glass, or by turning the object in a basin containing the solution, so that a freshly wetted surface may be continually presented to the operator. M. Gaston Planté has obtained these remarkable results by means of secondary batteries, but for continuous work any other source of electricity may be made use of, provided it has volume and intensity enough. Thus a pile of a good many Bunsen's cells, or a gramme machine, or even an electromagnetic machine, with alternate position and negative currents, will do.—*La Technologiste*.

COMPOUND FOR REMOVING VARNISH, PAINTS, &c.—Place in a suitable wooden trough 15 gallons of water, and add thereto 10 pecks of unslaked lime; let it remain until the lime is well slaked, then add 15 gallons more water, so as to produce a milk of lime, to which, when cool, is to be added from 30 to 35 pounds weight of treacle. These ingredients must be well stirred, so as to become thoroughly mixed, and 70 gallons more of water added. The liquid may then be drawn off and strained into a copper or boiler. Ten stones of flour (mixed in from 35 to 40 gallons of water) are to be added to the lime water in the copper, when the whole mass must be well stirred for about half an hour and then boiled or heated to about 200° F. for some twenty minutes, gradually adding $4\frac{1}{2}$ cwt. of common carbonate of soda, and taking care to keep the mixture continually stirred during the boiling. The liquor is then drawn off and strained and, when cool, a gallon of carbolic acid is added for the purpose of preventing the preparation from undergoing decomposition. This compound may be used either for cleaning paint (for which purpose it must be diluted), or for softening paint, varnish or japan, preparatory to removing the same from any wooden or other surface, and for removing oxide or dirt from the surface of metals. This preparation may be made up for the market in either a liquid, semi-liquid or in a solid form, the latter being obtained by evaporation.—*Oil and Colorman's Journal, London*.

TILES FOR MURAL DECORATION.

While the use of tiles for purposes of mural ornamentation reaches back to times and countries of the remote past, such use has been very far from continuous. Periods of centuries have elapsed during which their employment for practical and decorative purposes has entirely ceased, and their manufacture become almost a lost art. When their utility and beauty for the purpose named is considered, this would seem not a little singular, were it not in keeping with the mutations of all things sublunar, the history of the world being but a record of invention, loss and re-discovery. Beginning among the fathers of the ceramic art, the Chinese, tile-making spread throughout the countries of the East, and partially by means of commerce, partially by the diffusion of Eastern customs and ideas that followed the Crusades, was finally introduced into Europe, where, notably in Spain during the Moorish occupation, and subsequently in Italy, Holland and France, it was brought to a high state of perfection. But, as has happened to many another article in which use and beauty have been combined, it was refined and improved until its utility was lost and its beauty only remained, and then, very naturally, the manufacture practically died. Of late years, in our time, a return to first principles has taken place, and while the tile of the present day is made with a view to its being beautiful, it is made primarily to the end that it may be useful.

The recent revival of this manufacture in England, after nearly a century of practical abandonment, has been attended with the most encouraging results, there being now upward of a dozen large pottery firms engaged in the production of tiles of every variety, from the plain white up to the most artistically executed pictures on porcelain, rivaling in beauty the finest French plaques or the best work turned out in the sixteenth century from the furnaces of the Italian Duke Guidobaldo. That their manufacture is so extensive is proof of the general adoption of tiles for architectural purposes; and as by far the largest portion manufactured are of the commoner qualities, it may be inferred that they are used not by the rich in accordance with mere whimsical dictates of fashion, but by all classes, because of their real excellence and practical adaptability to the common needs of life. Whether for use in inner or outer walls, tiles possess certain advantages which are to be found in equal degree in no species of stone, excepting pure white polished marble. Their glazed surface affords no hold for dust, is absolutely stainless, may be washed without injury, and is an admirable reflector of light; and when is added to all this that they are comparatively cheap, are impermeable by water, and are almost indestructible, the sum of their excellence is self-evidently greater than that of any other substance which may be used for similar purposes. Aside from the mere question of utility, their beauty, even that of the plainest, is a strong point in favor of their general use in architecture. If totally devoid of design, but painted in warm, rich colors, nothing can be found more fitting and tasteful for a surbase or wainscot, while, warmer coloring being used, the entire walls of a room may be with tiling appropriately covered. But it would be an endless task to tell the various purposes to which tiles may be fittingly applied. From a kitchen to a cathedral they are in place, being always serviceable in any building where cleanliness or beauty is required. Americans, as a rule, rele-

gate beauty to a very secondary place indeed, but when anything is about that is of genuine utility Americans are apt to be awake enough to adopt it; and it is this latter phase of the national character that will bring about, sooner or later, the introduction of tiles into the architecture of our country. Tiles are worth more than their money, and Yankee shrewdness is bound to appreciate this fact, and seize upon the chance of a bargain. Already there are several firms in this country who do a large business in the encaustic and majolica tiles.—*Crockery and Glass Journal*.

OLD SWISS MAPS.

It is reported from Geneva that the Swiss collection of maps prepared for the Geographical Exhibition at Venice was shown early in last month at Berne in the Jura-Berne railway station. It contains some curious and interesting specimens of cartographic art, among others a map of Switzerland, made in 1538 by Ægidius Tschudi. There are also five maps of the Confederation, dating from the sixteenth century; seventeen from the seventeenth century, and a map of Neuchâtel and Vallangrin by David François de Merveilleux. As the last named map places Neuchâtel in Switzerland, it possesses a certain political importance, that canton

having been at one time claimed as an appanage of the Prussian crown. Thirty maps of the cantons, both ancient and modern, for use in schools, afford proof of the attention which the cantonal authorities for ages past have given to the efficient teaching of geography. In the class of geographical printed and manuscript works is a copy of the "Itinerarium Marci Poli," printed in French on parchment, an edition of Ptolemy (1486), containing, among other maps, the "Tabula Nova Eremitæ Helvetiorum," which Tschudi took as his starting point for the map of Switzerland. The works of Dr. Moesch, of Zurich, relating to different parts of the Jura and the Alps, comprise some maps on a large scale admirably executed. Among the maps in relief are one of Monte Rosa and the Wetterhorn on a scale of one to 25,000, by Imfeld; the relief maps of France, Alsace, Switzerland, and the St. Gothard Mountain, by Bürgi; but the finest specimen of this class is a relief of Switzerland, carved from the wood of the plane tree, by Bietrix, of Delmont. Herr J. Beck, a member of the Alpine Club, contributes a splendid collection of photographs taken in the regions of the high Alps, of great topographical as well as artistic value. Altogether, the collection is exceedingly creditable to Switzerland, and few more interesting ones are likely to be shown at Venice.

INDUSTRIAL EDUCATION FROM A BUSINESS STANDPOINT.

[Concluded.]

Having thus seen that in industrial products the most important and most valuable factor is human thought, having seen further that for the practical development of this thought it needs to be enriched by a knowledge of science and art, and equipped with a knowledge of the manual arts, our next inquiry is, how can these results be secured?

Before answering the question directly—and especially as by our statistics we have brought the commerce of England and France into contrast with our own—let us turn our attention for a moment to what England and France, our two most powerful industrial and commercial competitors, are doing in the way of protecting their commerce by protecting and stimulating their industries.

A brief survey of their efforts in this direction will show us that to an extent far beyond what is comprehended in this country, they are utilizing the forces of public education as tributary to this end. Our statistics show us that England is leading the whole world in commerce, and this through the industrial development which is carrying her commerce along with it. If we look carefully into the imperial policy of Great Britain, we shall find that this result is no mere accident, neither is it wholly the result of fortuitous circumstances.

It is a result which has been deliberately planned. For more than thirty years England has been spending immense sums of money for the avowed purpose of developing her industries through increased skill and taste. So systematic have been her efforts, so munificent her expenditures, that she has established industrial museums and schools of science and art by the side of every important industry in the kingdom, and has expended over \$20,000,000 in supporting them; and she is now supplementing these efforts by still broader provisions for the industrial education of her artisans in her national schools.

It is generally conceded that it is to these efforts that England mainly owes her present industrial supremacy.

If we turn to France, we find similar efforts in progress. In many respects the higher branches of technical education are better systematized and better developed in France than in England. At the same time, the trade education in France—that is, the training in the trades themselves—is broader than in England.

The recent efforts of England, however, through her national schools, will soon place her still further in advance. It may be said in this connection that France is endeavoring to meet England on her own ground, as will be seen by an examination of the recent provisions for public education in France.

If we were to extend our observations to Germany and Austria, we should find in those countries, also, the evidences of an earnest industrial arm. Indeed, Austria, a state which thirty years ago was behind nearly all Europe in education, is now looking to the development of industrial education with a liberality and a degree of practical foresight which challenge our most serious consideration.

To measure the exact effect in dollars and cents of such educational investments is, of course, impossible; yet it is the concurrent testimony of all who have given attention to the subject, that by such means only can industry be promoted in any broad way, while the results

which have flowed from the efforts which have been undertaken, particularly in England and France, have been simply incalculable. If time permitted a study of the details of English and French commerce for the past few years it would be full of interest in this connection.

These facts show us that, for industrial development—for the promotion of thought in industry, public education is a most powerful weapon, and our commercial statistics tell us only too plainly that we in this country, with the most opulent material resources, and with a most intelligent and enterprising people, have hardly begun a course of industrial development.

For the purpose of substantiating the statement made in the beginning of these remarks, permit me to turn aside for a moment from the main argument, to bring this matter directly home to you here in Philadelphia.

I am assured that the annual product of your local manufactures is about \$500,000,000. If this be so, you have an immense interest at stake in this question; and if what I gather from some of your leading manufacturers be true, your industries are far from having reached their maximum development in the matters of skill and taste. This being true, the assistance they need, the vital protection they need, is to have more thought in them—a higher degree of skill and taste among the artisans engaged in them. By providing this thought and this skill, they will be most securely protected, and I do not think it too much to say, with the results of European experience before us, that the expenditure of \$1,000,000 annually for broad industrial education would soon return you an increase of ten times that sum, in the enhanced value of your products, without additional cost for material, and with a reduction of cost in many directions. With such facts before you, with your vast industrial interests at stake, with the great activity of your industrial competitors on the other side of the water, aiming their industrial forces directly at your workshops, deem me not impertinent if I ask, what are you doing in the way of practically protecting your most important interests? Where are your schools of science and art, and your industrial schools for artisans, such as you find at Birmingham, Sheffield, Leeds, Kommatow, Mulhouse, Creusot, Zurich; or your industrial museums like those at London, Paris and Vienna?

This is a question for you to answer yourselves. Without going into further details, you will agree with me, from what has been shown, that not only does your future industrial prosperity depend upon your securing more thought as expressed by skill and taste in your industries, but also that one of the most important matters which can engage the serious attention of your community and Board of Trade is this question of practical industrial education.

Turning now to the broader or to the national aspect of the subject, the question arises, how can the education which we have seen to be so valuable, and which is being so earnestly promoted abroad, be introduced in this country?

I answer, it can be introduced in this country better and far more effectually than in any other country. We have simply to avail ourselves of our already established system of public education. By a readjustment of some of its features, and an incorporation therein of certain others, the main object can be accomplished. In this matter I know there are some difficulties in the way, and many prejudices to be overcome; still the thing can be done, and nothing is surer than the fact that the public schools will ulti-

mately be made to answer to broad public needs in this respect.

In engrafting industrial education upon our public education we shall have a great advantage over our foreign competitors in this respect. Our general system of public instruction has already been organized. With all its drawbacks, it is free from many of the bones of contention which surround public education abroad. On the other hand, in promoting industrial development, the public schools will be advancing their own interests. They have of late received the fiercest criticism from many quarters, and the burden of this criticism seems to be that our public instruction is wanting in practical elements. But I cannot state this aspect of the case more strongly than it was stated in an address before the Franklin Institute in 1874, by one of its most honored members, Mr. Coleman Sellers, who summed up his argument by saying: "Our common school education gives us traders, gives us shopkeepers, but it gives us no artisans. I know not if this can be remedied, but I do know we require some other training for our sons and our daughters."

This feeling is so universal a one, and is so closely related to the subject in hand, that I trust you will pardon me for stopping a moment to show, in a graphic way, why it is that our public education is so practically out of joint.

In all education what is it that we educate? Where do we lodge the instruction? What particular organs, senses, faculties, do we develop? The effort is to develop thought. What is thought, and how is it generated? Thought is brain power. Thought in literature, commerce or industry is produced by the legitimate physical action of the brain, and to study the purely materialistic action of the brain in generating and expressing thought becomes a primary consideration in all education.

Studying the functions of the brain, we find that for educational purposes it may be likened to an organism with a threefold form of working, an organism with a power of absorption, a power of assimilation and recreation, and a power of expressing or giving out. The force or character of a brain is measured entirely by its expressing power, by what comes out of it. Examining a little closer, we find that the brain absorbs through all the five senses, while for expressing purposes it makes use of but two of these senses, or rather of but two organs of these senses—the tongue and the hand. Fig. 1

Fig. 1.

is a simple diagram representing a brain with the five senses placed on one side, as means of absorbing power, while on the other side the tongue and the hand are placed as organs of expressing power. The other function of the brain, that of assimilation and recreation, cannot of course be graphically represented. It may, however, be said to be the result of the action of the other two functions. Now the equipping of a brain, or the healthy education of a brain, consists in giving it expressing power through the tongue and the hand coextensive with the power of absorption and the power of recreation.

Applying our popular schemes of education to the brain, and especially those based on the 3-R

idea of education, we find what is indicated in Fig. 2, that provision has been made for greatly distending the absorbing side of the brain, while for the expressing side, the practical side, provision has been limited to the use of the tongue in speech and to the hand in writing. If now we follow the result of this brain equipment into practical life, we find that speech and writing as means for expressing thought have their applications mainly in the commercial and financial employments and the professions, and only incidentally in the industrial and mechanical employments. With such an inadequate and one-sided brain equipment, it is not possible in any broad, practical way to bring thought or brain

Fig. 2.

power to the service of industry. The fact so generally admitted that we are getting so few intelligent artisans or mechanics from our scheme of public education, that we turn out pupils of both sexes with a decided repugnance to industrial labor, is an attestation to the truth of this statement. The simple fact is, that our education is not broad enough on the expressing side of the brain, that too much attention has been given to the absorbing side of this organ, that no adequate provisions have been made whereby it can discharge its power in work connected with the industries.

In Fig. 3 a remedy for this defect is indicated in the addition of the study of graphic and aesthetic art, through drawing, and of training in the manual arts, to the previous brain equipment. Observe where these features come in the scheme—on the expressing side of the brain and in the service of the hand, thus giving the brain ample power to discharge thought in its most complete form for use or for beauty. With these features added to the brain equipment its power of expressing thought in all practical directions will be coextensive with its absorbing and recreating powers; and just as soon as the public can clearly see that in the outcome of our public education there is no respecting of persons or of classes, that pupils are trained for honest labor with their hands as well as to living by their wits, are taught to produce something, to create values by the action of their brain through the work of their hands, a much deeper interest in public education will not only be manifested, but

generous provisions for its support will also be given.

The practical solution of the problem we have been considering is not a difficult matter. It consists of providing better instruction in science and in art, and in making provisions for the instruction of our youth in some of the manual arts.

All that is necessary in the instruction in science and in art is to reform the teaching in both subjects, and to make it more practical. Bring science down from the high school to the primary and grammar schools; teach it not by theory, nor even by the ordinary object lesson, but give pupils an opportunity to work with materials,

Fig. 3.

to make experiments, and thus to observe the results which take place under their own fingers, thereby gaining knowledge as well as manipulate confidence and skill. All this is possible.

In teaching art a radical reform should be instituted. Substitute for the dilettante drawing which cumbers many of our schools systematized and practical work like that which we have been considering, and which finds practical applications in education in our industries and in true aesthetic culture.

In regard to training in the manual arts, the question being one of comparatively recent growth presents more serious difficulty. The principal lines of work have been suggested and illustrated already; but that which has been accomplished in this direction has been done mainly in special mechanical schools like those of the Boston Institute of Technology, or of the Washington University at St. Louis, and a few other technical schools. The present problem is to bridge over the ground between the industrial training of the Kindergarten and that of these technical schools.

I think, however, that a full consideration of the question will show no insurmountable obstacle in the way of attaching like training schools to our public school system, or in the way of ultimately incorporating instruction in some of the fundamental manipulations in the manual arts into a regular scheme of public instruction. Various efforts are being made to solve this problem, and with the general interest in the subject which now exists, I have

no doubt but that the demands of practical public education will make themselves felt in this direction.

If my argument, then, is a sound one, we see that the material prosperity of this people, and especially of this community, is coming to depend to a very great extent upon the development among all classes of a knowledge of industrial science, art, and manual skill; that the promotion of this knowledge is fundamental to any broad material development, and that as yet but very meagre provisions have been made for it.

We see also that the most efficient provisions which can be made for this education must be made in connection with the public schools; and that in order to give proper elementary industrial training in our schools, we must have more practical and universal teaching in science, and more carefully systematized, more definite and broader instruction in industrial art; and that training schools in the manual arts should be grafted upon our present system of school instruction.

These ideas are not new; many of them have been carried into practical effect, as we have seen from our illustrations; but although the subject is not a new one, it is one whose educational, whose commercial, whose political importance is now for the first time gaining recognition. The more careful the study given to this question, the more vital does the necessity for this development of industrial thought appear, and I do not feel as if I could emphasize too strongly the imperative necessity to our political and commercial prosperity of a judicious investment in this tremendous, this incalculable source of wealth, the development of the industrial thought of the nation.

A serious word just here. We hear much in these days about protection to American industry. If my presentation be a true one, we are to-day sadly unprotected against the industrial competition that is coming against us from Europe, a competition against which no tariff can alone protect us. Remember that it is not now the pauper labor, but the skilled labor of Europe with which we have to contend. Europe has been arming for this contest for years, and is now putting millions of skilled workmen into her workshops. Against such a competition no tariff can give adequate protection, and if I may be permitted to do so, I would suggest as a fundamental article in the creed of protection, "The industrial education of the American workman."

One word more in explanation. I am aware that in stating the question thus broadly and practically, I lay myself open to the charge of advocating a materialistic education. Such, however, is not at all the result which I believe will follow. In a government like ours the development of good citizenship must always hold a foremost place in all schemes of education.

What is the basis of good citizenship?

It rests, in individual cases, primarily on the power of maintaining one's self in the struggle for existence; and when you observe the complex conditions under which life is given to us to-day, when you consider the necessity which rests upon every mechanic and artisan of Philadelphia that he shall produce something by the action of his brain and hand, something which shall exchange with the food produced by the Illinois farmer on the one hand, and with the work of artisans or producers in other communities on the other, you see that the first condition for good citizenship on the part of your industrial producers here in Philadelphia is the possession

of the power of supporting themselves by selling the expressions of their thoughts in iron or wood or steel or textiles. If it be not too abstract a thought, it may be said in this connection that the degree in which man becomes a good citizen, and the degree in which he becomes interested in the whole scheme of social and political order, can be approximately measured by the means afforded him for the creation of wealth and for the exchange of his products.

It may be alleged that I put even a material value upon citizenship. In one sense, I do. The material value of social and political order should, it seems to me, be the starting-point for the consideration of the subject, for, with all due respect to theoretic sentiment, in these days when the rapid increase and aggregation of population in industrial and commercial centres are presenting new problems in social, political and economic science, the responsibilities of life are too real and too fearful to admit of our relying wholly upon theories of human conduct, however sacred or however venerable. Strikes among miners and trade-union operatives are the legitimate, wasteful and barbarous attendants of our present industrial development. These evils are not to be corrected by the establishment of Sunday schools or by the distribution of religious tracts. We have first to deal with the people engaged in the industrial employments as men, having like interests, hopes and fears with ourselves. We must give those who live by the industries a fair chance; we must afford the men who are engaged in industrial labor an opportunity to live as men, and not as unthinking machines or as ignorant beasts; and the first great step toward the reconciliation of labor and capital seems to me to be this,—industrial education.

No, it would be an entirely false conclusion to say that the idea of education we have been considering tends to merely materialistic ends. It is true that its first object is to reach a material result through the concretion of human thought, either for use or for beauty. In the process, however, the very foundations of human knowledge, we may say of human culture, are laid hold of. The mind of man is pressed by an inexorable necessity against the primal forces of nature, feeling "God's great hand in that darkness;" and in studying the constituent action of these forces, in learning to appreciate their infinite extent, their marvelous power, he is brought into direct contact with eternal things. Whether dealing with iron, or textiles, or precious metals, he comes at last to see that these very materials in their last resolution are but emanations of that supreme power, which, clothed though it may be in the phraseology of the "Persistence of force," or invested with the personality of Zeus or Jehovah, pervades all things.

Industrial education, therefore, properly comprehended, means not simply the training for a trade, but the building up of a good citizen, who contributes by his thought, expressed by skilled labor, to the happiness of mankind. Trade and commerce are but servants to such a citizen, and by exchanging his products, they link him indissolubly to the preservation of social and political order, as mere accessories to the full development of his own spiritual individuality.

And this is industrial education from a business standpoint.

Unfortunately, the only pedigree worth having is one that can be neither transmitted nor inherited.

I WILL INSURE YOUR HOGS.

Dr. Jos. Haas' Hog Poultry Remedy.

THE ONLY SCIENTIFIC SWINE REMEDY COMPOUNDED.

Read My Propositions!

First—When my remedy is used as a preventive, I will insure hogs by the head for a year, and will make a deposit of money to make such insurance good. If any hogs die, they will be paid for from such deposit; you can refer to my bankers, Messrs. Fletcher & Sharpe, Indianapolis, Ind., for my standing financially.

Second—Where my expenses are paid, I will visit herds of not less than 100, and I will arrest the disease among them, or forfeit \$500.

Third—After hogs have been regulated with my remedy, I guarantee that the annual cost of feeding will not exceed 25 cents per head. Furthermore, that the increase of actual flesh will far more than pay for the remedy used.

SEND FOR IT!

It is not an experiment, but an established success. Remember, it is the only remedy that is used and indorsed by the great breeders of this country and England. It owes its great fame to its genuine merits, and every mail brings tidings of its good work. The evidence in its favor is so strong the most scientific men of the country have pronounced it the conqueror of this disease. It is gaining ground daily, and no hog raiser up with the times can do without it. It is not only a protection against disease, but it is a powerful appetizer.

Inquire of my Bankers, Messrs. Fletcher & Sharpe, Indianapolis, Ind., for my standing. Will make a deposit of necessary money, and will pay for all that die.

SEND FOR IT! I GUARANTEE IT WILL STOP THE COUGH AMONG HOGS

and put them in fine condition for fattening. It will expel the poison from their system, tone them up, and invigorate them generally. It will make them thrive so as to astonish you. It will pay such a large per cent. on the investment, that no one can afford to be without it.

REFER TO ANY WELL KNOWN BREEDER OR SHIPPER IN ANY PART OF THE COUNTRY.

J. H. Whetstone, druggist, Iowa City, says: "The Haas Remedy sells better and with less effort than any proprietary medicine I have ever undertaken to sell of any kind. We have nothing in stock to-day but what I would rather do without than the Haas Remedy."

C. H. Klauenburg, druggist, Carlinville, Ill., says: "The Remedy sells well, and is the best on earth."

O. A. Elliott, druggist, Russell, Ia., says: "The Remedy has given good satisfaction here."

J. N. Penn & Sons, druggists, Sydney, Ia., say: "We hear good reports from what we have sold."

Ed. J. Brown, druggist, Edina, Mo., says: "It has given general satisfaction in this county. Have sold \$1,000 worth in three months. Have tested its merits myself."

J. M. Krufer, druggist, Macomb, Ill., bought \$400 lot of Haas' Remedy and sold \$900 of it in seven weeks.

SEND FOR IT. LIBERAL TERMS TO THE TRADE. Terms, Circulars, &c., on application.

JAPANESE FANS.

That there is a comic element in the Japanese character is manifest in their designs upon the common painted fans, some of which will bear a close examination. The most common are those in which a huge dragon with large eyes and open mouth provided with formidable teeth, is seen in pursuit of a small boy who is running for dear life; but lest the sympathies of the public should be too strongly enlisted in behalf of the scared boy, the legs of the men who operate the dragon are seen beneath the folds of the cloth or paper upon which the dragon is painted. Another common scene is that of a number of old and young people clustered closely under the foliage of a large tree. They seem to be well sheltered from the storm of wind and rain that is pouring down upon a drenched fellow whose umbrella is torn in tatters by the wind, and who is making for the shelter of the tree; in the meantime he is evidently a subject for the jest and laughter of those who are watching his progress, thus illustrating human nature according to Rochefoucauld, who says, "that we bear the misfortunes of others with much philosophy." In some of these sketches a few lines suggest a great deal, and show artistic skill though they are rudely and roughly drawn. For instance, a thick fog at sea is represented by two or three sails showing above the fog; while the vessel and crew are concealed beneath it; a scene familiar to all who have ever been on our coast in the early spring.

Upon another fan a very fat fisherman is represented nearly up to his middle in water, and wielding a net large enough to catch a porpoise or a shark, while he drags behind him a little fish-boat hardly large enough to hold a minnow; the expression of his face is, however, comical, and sufficiently determined for a shark. The most busy scene is that of the mouse merchants. These are grouped together in very natural positions. In the foreground are the merchants looking over the invoice of the goods, which is handed them by their chief clerk. Behind them are the laborers, who are rolling bales of goods and piling them up some three or four tiers high. On the top of the pile sits a clerk who, with a tablet in his hand, is comparing the numbers and weights on each bale, and is calling them off to another clerk who sits below on the ground tier, and who is looking to the clerk above to be sure that he hears correctly before he puts them down on his own tablet. In the background is a weigher, and a servant bringing refreshments. They are all clad in various colored coats and vests, but the nether garments are omitted in order to leave the tails free to twist about in mouse fashion. The expression of each mouse is, however, different, and well represents the age and gravity of the merchants, the dignity and importance of the chief clerk, the youthful and jolly bearing of the younger ones, one of whom seems to be trying the patience and the correctness of the account of the others—perhaps to cause mistakes which may result in his own promotion; a base line of conduct that has been attributed to officers high in civil and military life.

Another scene is of a very different character, but still open to evil surmises. A rich old lady is seated on the floor of a large apartment counting her treasures, either of money or jewels, with her back to a large window or opening, where two figures are dimly seen dressed up as native or foreign devils and with masks on their faces. She is looking over her shoulder with much alarm and has left off counting her treasures, but with one hand placed over them, in order to

conceal them from the masked thieves standing without, and in the vain hope to save them.

But the crowning and most comical scene is that of the migration of a large family, consisting of father and mother with thirty-two children; perhaps thirty-three can be made out; probably the parents if questioned could not tell the number themselves. They are crossing the ford of a shallow stream which apparently allows but two to cross abreast. In front is the father, a very fat, good-natured fellow, with a huge bed which he carries on top of his head. On this are two of the children, quite comfortable, and looking down with complacency upon their struggling wet brothers and sisters. Two more are holding by the skirts of his scanty garments, but up to their knees in water. Next comes the wife, a diminutive person compared with 'pater familias,' but, as is natural with such a family, she has a worried expression. She is carrying one child on her back, perhaps a sick one, with his legs in front of her which she is holding. A long train is following after her by couples, except two of the older boys, who are in deeper water and are carrying a sick brother, and a bundle of provisions strung across a pole and borne on their shoulders. There is, however, trouble in the camp; one little fellow has slipped off into deeper water, and he is crying with one fist in his eye and the other hand held out for assistance, which is about to be grasped in order to get him back. An older brother, who has apparently been crowded off, is biting the hinder part of the brother who did the crowding. The last one in the procession is a little fellow, who is holding back and seems afraid of stepping into the water at all, but he is encouraged by those in front, who are holding out hands to him. It would seem as if the father should compel one of the fellows on the bed to change places with him, only a halt or any change of plan would throw the whole line into confusion. The father seems, however, well satisfied with the arrangements, and is evidently proud of his family. He seems to be in no wise disturbed as to ways and means, or how he is to accommodate himself, wife and thirty-three children, on the bed he carries. It is their affair, to be sure, but it is somewhat difficult to account for the number of the family, as none of them seem to be over ten or twelve, and none under five or six years of age. It is to be hoped that they all got safely over the river and found a dry place in which to deposit the bed and make the boys and girls comfortable. The one bed would, however, seem to be as inadequate for their comfort as the small package of provisions would be for their appetites. In this inadequacy of means to ends the humor probably consists.

In animal life the Japanese are true to nature. Often only a few lines are sufficient to delineate a fish or a fowl, a stork, a humming bird, a frog or a flounder. In landscape and in distances they have no idea of perspective. Ladies swing in the air, but how they ever got into the swing, or how they are ever to get out of it without breaking their necks, it is difficult to discover. The same thing is represented in pagodas and summer-houses, which are perched up among trees or over them; but there must be some way of getting down not perceptible to "barbarian" eyes, for the ladies have a most serene and placid expression, as if there was no difficulty in the matter or even a necessity of folding their fans. This placidity seems to be characteristic wherever they are. In their domestic scenes, when they are surrounded with beautiful fabrics and called upon to make a choice of silks and satins, not a particle of feminine enthusiasm is

manifested, and the elaborate dressing of the hair is left to the servants, without the requisition of a mirror to satisfy their vanity. In this respect the calm and lofty indifference, the perfect "nonchalance" of the Japanese ladies is equal to those of any "barbarian" lady of England, France or America. But foreign fashions are coming in; the vices as well as the virtues of civilization. Who will care to visit China or Japan when cocked hats, chapeau bonnets, pull-back dresses are worn by ladies, and "all aboard" called out by the native conductors? Japanese fans and sunshades will then be rarities, the manufacture will cease, and they

will be preserved as curiosities of past ages. Consider the time and trouble it must cost to make these articles, the cost of importation and duties, and then the low price at which they are sold in our markets. There is probably no machinery used in the manufacture, or only what is very simple; the work must be done by hand; but when our scale of prices reach China and Japan, and new openings for labor are supplied, fans cannot be sold for five cents which, if they could be made here at all, would cost ten times ten. The labor paid for one day's work here would support a Japanese or a Chinese for one week.—E. Winslow, in *Christian Union*.

At PARIS, 1878,

This being the **HIGHEST** and **ONLY** AWARD given for

LINEN RECORD & LEDGER PAPER.

—A SPECIALTY.—

THIS Paper has received THE HIGHEST PREMIUM over all others from the Cincinnati Industrial Exhibition, Massachusetts Charitable Mechanics' Association, Franklin Institute of Philadelphia, Louisville Exposition, Medal and diploma from United States Centennial Commission, Medal of Progress American Institute, 1877, and Medal of Improvement and Progress, Boston, 1878. Its

PRINCIPAL ADVANTAGES

are as follows:—1. It contains more LINEN than any other Ledger Paper, has a longer fibre, and is, consequently, tougher. 2. Having a harder and better body, it frays less in erasure, so that by simply using the rubber after the eraser, the ink is prevented from spreading. 3. It is more uniform in Weight Color and Finish. 4. It never cockles if properly bound. 5. Its chemical action upon ink is such that it both writes and rules up better. For proof of the foregoing, refer to a large number of Stationers, Bookbinders, Bookkeepers, and Recorders, who have given it, after a severe test, the preference over all others. This paper is *Double Sized*, and will stand any climate or the most acid of fluid inks.

Send for sample sheet, **ERASE and REWRITE FOUR TIMES** on same spot.
Each sheet is water-marked with name and date.

PHILADELPHIA TRADE NOTES.

[FROM OUR REGULAR CORRESPONDENT.]

PHILADELPHIA OFFICE OF THE LOCKWOOD PRESS. }
PHILADELPHIA, October 4, 1881.

Thos. W. Price & Co., Philadelphia, well known for its excellent manufacture of blank books and its fine assortment of job printers' supplies, has also a very remarkable stock of advertising cards, among which I may remark as deserving special mention: Twelve fancy designs (etchings) of folding cards, 7 inches by 8. Among these cards two different designs of a head of horse are very good. Besides these, there is a series of four folding cards, 5½ by 6½ inches, on tinted paper; another series of four folding cards, 4 inches by 4¾. They are the best cards which have been made for the price. The firm has also a large assortment of folding cards on glazed papers with colored and gilded borders. These cards are of different sizes. Three beautiful designs of folding cards are on tinted paper, 4½ by 5½ inches. Sixteen beautiful fancy designs of folding cards, 5 by 7 inches, have a medallion on the centre of both sides for advertising purposes. Two designs of folding cards—one representing a ship at sea, the other a fine landscape—come on tinted paper, 4½ by 4¾ inches. Three Greek designs comprise folding cards, 5 by 7 inches. Three designs of folding cards are on tinted paper, 4½ by 7½ inches. Thos. W. Price & Co. has also a very good stock of Eckman's patent advertising circulars, viz.: Six patterns printed in blue on white paper are very remarkable, and are sold in large quantities; also six designs of these same advertising circulars, printed in several colors and gold are artistic works.

Before closing this enumeration, I must mention four designs of folding cards, 4½ by 4¾ inches, on white cards with a small landscape, and bunches of colored flowers of the best effect, and eight designs of the same style with a larger landscape in flowers, 5 by 6½ inches.

Charles Beck is reported as having an extraordinary good season for all of his imported and manufactured articles. His orders for cutting machines are very numerous.

Janentzky & Co., the manufacturers and importers of artists' materials, are selling a great many of Lacroix's china colors, which are accepted as the best for the purpose. Their papier maché plaques are also in such demand that they find some difficulty in filling their orders.

The French chromo Christmas, New Year's and advertising cards, imported by Theo. Leon-

hardt & Son, have met with great success. Although they are receiving invoices by every French steamer, they find it very difficult to keep on hand all of the numbers described in their catalogue published last month. The branches of the house of Theo. Leonhardt & Son in Boston, Chicago and San Francisco, have received a greater number of orders than was expected.

Charles H. Sherman & Co. (successors to John W. Gladding) have moved their establishment from Fourth street to 403 Market street. The location is more central, and the building affords more space for their manufactory, which had to be enlarged in order to meet the demands made upon them. J. VIENNOT.

BALTIMORE NOTES.

[FROM OUR REGULAR CORRESPONDENT.]

BALTIMORE, Md., October 4, 1881.

Notwithstanding the extreme heat of the "mild September," business has been good, and "Oriole" programmes, posters, and papers are keeping the types and presses on a constant go. The "Oriole" promises to be the greatest thing of the kind ever attempted in this country, although, as some writer has suggested, it will be a Mardi Gras out of season. Mr. De Leon, who is preparing the mystic tableaux, states that he will astonish as much as he will delight those who will witness the great street pageant on Tuesday evening next. A. Hoen & Co., lithographers, have gotten up some very handsome "Oriole" posters in colors, at the request of the Merchants and Manufacturers' Association.

The State Librarian has advertised for proposals for stationery and printing for the Legislature, for 1882. The contract will be awarded in a few days, and the usual competition is expected.

W. E. C. Harrison and the Baltimore News Company have had large sales for the portraits of the late President and Mrs. Garfield.

E. B. Young, formerly the junior member of the firm of Newson, Curry & Co., has accepted a position with his old house, W. L. Stork & Co.

The last six months has been the busiest ever experienced in the printing office of John B. Piet.

Oliver W. Clay, who has been chief clerk in the Methodist Book Concern, of this city, ever since its establishment in 1872, has associated himself in business with W. H. Curry, under the style of Curry, Clay & Co. They succeed the old firm of Newson & Curry. Mr. Clay has had an experience of sixteen years in the business, and is well qualified for his new venture. He began the business in 1865 with M. H. Waite.

The new firm has abundant capital, and expects to make things lively. D. H. Newson, on the 2d ult., sold his entire interest in the business to W. H. Curry.

The following named representatives of the trade have been in town during the past few days: George A. Roberts, for Charles J. Cohen, of Philadelphia; J. E. Zender, for James D. Whitmore & Co., of New York; A. J. Schad, for Nagle & Co., of Philadelphia; and H. G. Phillips, for Daniel Slote & Co., of New York. Now for the Oriole. W. P. M.

BERLIN LETTER.

[FROM OUR OWN CORRESPONDENT.]

BERLIN, September 20, 1881.

The sad end of our much beloved President has created an immense excitement in this country. The conversation everywhere turns on that subject, and true and unfeigned sympathy is manifested by all classes of people, rich and poor, at the loss that has befallen the nation. All of the papers have filled their spaces with reflections on the awful sufferings the patient had to endure during his long illness, and the fortitude and piety he showed all along. After the fatal attack all of the papers brought out daily bulletins on the state of his health, and every favorable turn was received with much joy. The Emperor had daily reports laid before him, and the Crown Prince, even on his travels, had daily telegrams forwarded for himself. Next Saturday we will have a meeting at the American embassy to express our feelings in a becoming way, and to show our sympathy as American citizens for the honored dead.

This has nothing to do with the stationery business, but when the heart is full it must pour out and relieve itself, even at the expense of business.

The leather goods trade has been flourishing all this year; all of the manufacturers had plenty to do, some more than they could manage. This, however, refers more to the album makers who were kept busy by our American friends, who never visited this city before in such numbers as they have done this year. The English trade has been very slack until now, when it turned up right brisk.

To judge from the new styles and patterns I have seen so far, there will be some very beautiful designs laid before the dealers for the coming season. These will be highly ornamented with flowers and fruit pieces, such as strawberries, cherries, apples, plums, &c., painted and inlaid with silk and velvet. There is a new edge gilding machine here in operation which promises to improve the goods very much in quality, to

say nothing of the speed with which the work can be accomplished. It will be brought over to New York in a few weeks and offered to the trade.

I enclose a card of a young lady who keeps a well recommended boarding school in this city, and if some of our friends who intend to send their daughters here to be educated will make use of it they will do well. PAPERMAN.

TORONTO ITEMS.

[FROM OUR REGULAR CORRESPONDENT.]

TORONTO, Ont., October 1, 1881.

On Monday, September 26, from 2 to 4 P. M., a scene occurred the like of which was never before witnessed in this city; business was suspended; bells were tolling; stores were draped in black; flags at half-mast floated from all public buildings and many private ones—the latter for several days; and a memorial service was held at the Metropolitan Methodist Church. This large edifice was crowded during the service, and it is said that thousands could not get in and went away. And what was it all for? Out of sympathy for the people, and profound respect to the memory of the late President of the United States—Garfield. During the Sunday services preaching, I do not think there was a church in the city whose minister did not make special allusion to the dreadful calamity which has befallen you and the noble man whose career has been cut short by the hands of a worse than mad man. The death of our Queen could hardly have excited more sorrow with us than the harrowing event, the victim of which after many days of hope was buried on Monday. It is impossible for the finite to grasp with the dealings of the Infinite, and it may be that the death of this great and good man will knit the ties more closely between the two greatest nations of the earth. In the very nature of things this is what should be—we are members of the same family, and like smaller ones have had our jars. But after all, when we look around us, whatever the faults of our *pater* may have been, we cannot but feel proud of our sire, and he has reason to feel proud over the success of the unruly youth who broke away from his control a century ago, no doubt for his and the world's good. The English speaking race on Monday, over the grave of the dead President, showed its practical oneness. They joined with the widow in throwing their

"Weight of cares
Upon the great world's altar stairs,
That slope through darkness up to God."

Conformity and non-conformity in England joined hands over the grave of Garfield. All creeds, all classes were fused for the time into one. It was one of the grandest funerals the world ever saw, and was only possible in these days of "harnessed lightning."

In addition to the endless variety of Christmas cards that have been offered in our market this season, the enterprising firm of Ralph Smith & Co., lithographers, &c., are out with a series Canadian in conception and execution. It would perhaps be a little too much to say that they will compare with Prang's, De La Rue, Tuck, and other houses who have won a very high reputation in this way. At the same time they are certainly worthy of consideration, and the house is to be congratulated on having produced a set of cards appropriate to the season and country, artistic in design, and thoroughly well executed; and though late in the field will, I am sure, receive the attention they deserve when the time comes for selecting and dispatching

these holiday expressions of good will and remembrance to friends at home and abroad. Mr. Henderson, of Montreal, has also just issued a set which are likely to be popular, all descriptive of the Canadian holiday season.

There has been a change in the management of the Canada Paper Company, Montreal. Thos. Logan has been appointed president in the place of Wm. Angus, who resigned, and John Macfarlane as vice-president and managing director. The latter, who has had charge of the branch house here since its opening, returns to Montreal. Mr. Macfarlane's genial manner and business tact have secured him a good many warm friends in this place, who will regret his departure. He will be succeeded by Mr. Gillian, who is well and favorably known.

An establishment for the manufacture of paper pulp from sawdust will very shortly commence operations in the vicinity of Ottawa City. The machinery has arrived, and the prospects are the new enterprise will be a profitable investment.

There is no complaint about trade here this season; on the contrary, it has been exceptionally good in all branches. The consumption of goods of every description will be much larger for the current year than ever before. Grain is coming in freely, and the farmers are getting good prices. More gratifying signs of prosperity on all hands than prevails now throughout the country could hardly be desired. C. H.

BIBLIOTHECA SUNDERLANDIANA.

Under this title Puttick & Simpson, London, have just issued a catalogue of the first portion of the books in the Sunderland or Bleinheim Library, to be offered for sale at the auction rooms, 47 Leicester Square, on Thursday, December 1, and nine following days. This magnificent library comprises a remarkable collection of first and rare editions of the Greek and Roman classics; a large series of early Bibles and Testaments in various languages; ancient and important manuscripts, and a number of rare and valuable works of different kinds. It was formed during the reigns of George I. and George II., by Charles Spencer, third Earl of Sunderland, whose arduous was such that, in less than twelve years, he had gathered together a collection which has become famous throughout the whole of Europe. The sale was originally announced to take place last year; but it is only now that the dispersal of the library has been finally decided upon. The present catalogue, containing but the first installment of the sale, numbers two hundred and thirteen pages, and embraces a list of close upon three thousand works. As thus far arranged, the library will be offered at two sales, the second to take place in April, 1882; but, judging from the magnitude of the collection, we are inclined to think that it will be found necessary to alter this arrangement, and make four distinct offerings.

When complete the catalogue will possess great value as a work of reference, the arrangement being strictly alphabetical, so that the whole may be bound up into one desirable volume. A preface by Puttick & Simpson gives a brief summary of the contents, together with other acceptable information; but, as is there pointed out, though it enumerates the chief classes of literature contained in this grand library, it is only by a careful perusal of the contents of the volume itself that any approximate idea can be formed as to the treasures it contains.

The Sunderland Library must ever possess a peculiar interest to printers, containing as it does so many of the earliest and rarest specimens of

the art. For instance, in Bibles, we have the Hebrew editions from the presses of Stephen Plantin, Froben, and others; in Greek, those of Aldus, Hervagius, Zanetti; and the large number of Latin editions, including those printed by Fust and Schoeffer, on vellum, in 1462; editions from the presses of B. Richel, J. P. De Ferratis, M. Moranus, A. Coberger, Th. De Reynsburch, Nic. Jensen, J. Herbolt De Selgenstadt, Fr. Renner De Hailbrun, G. De Rivabenis, Nic. Kesler, Jac. Maliet and Sim. Bevilacqua, all printed in the fifteenth century; together with numerous rare and important editions from the sixteenth century printers.

Nearly all the writings of Boccaccio are here to be found, the most important being, however, the first edition of the "Decameron" with a date, printed by Christofal Valdarfer, at Venice, in 1471, and renowned throughout the literary world on account of the enormous sum given for the Duke of Roxburghe's copy, which was purchased at an outlay of £2,260.

The only "Caxton" in the list is the "Cronycle of Englande," which is without name of printer, place or date, but is printed with the types of Machlinia. So rare are perfect copies of this book that Dibdin supposed the Spencer copy to be the only one known. Sir W. Tite's imperfect copy, it is mentioned, *en passant*, sold for £90 sterling. What the present wonderfully preserved copy will fetch remains to be seen.

As most bibliophiles will be anxious to know how the library is distributed after the sale, we may here mention that a limited edition of the catalogue will be printed, giving prices fetched and purchasers' names, so that the books may not altogether be lost sight of. The price of this special catalogue—for which application must at once be made—is half a guinea per "portion," the price of the ordinary catalogue being five shillings per "portion." The entire collection of books will be on show at the auction rooms, 47 Leicester Square, W. C., one week prior to sale, so that intending purchasers may have a favorable opportunity of collating them at their leisure.—*Paper and Print.*

THE CYCLOSTYLE.

The Cyclostyle is a new copying process, claimed to be the cheapest, best, and easiest plan for obtaining a number of copies in indelible and permanent black ink. By writing on the prepared paper with the Cyclostyle pen, having placed the plate under the top sheet, a stenciled original is obtained, in which the letters consist of a number of minute points, but so close together that the lines and strokes on the copies taken from it seem continuous. A great advantage which it offers is, that the original stencil, when the required number of copies has been taken, can be laid aside and used again after any lapse of time. If, therefore, through want of time, it is impossible to complete all the copies wanted at the one operation, further copies can be taken subsequently as required. It is very simple in manipulation, can be worked by a boy, requires no wetting of any part, and no press, and only wants a little care in writing and in laying the stencil down, so as to get it to lie flat without folds or creases, to insure admirable results.

Every one has noticed the letters "T. D." on the front of the bowl of a clay pipe, and some Dryasdust has made the discovery that they stand for Timothy Dexter, an eccentric Newburyport man who endowed a clay pipe factory, wrote a book with a few pages of punctuation marks in the back, and insisted on viewing a mock burial of himself, at which he thrashed his wife because she did not weep enough.

OLD BERKSHIRE MILLS

DALTON, MASS., U.S.A.

One party writes: "The two hundred RECORD BOOKS, for 83 of the 99 Counties, now on exhibition at the Iowa State Fair, at Des Moines; and all, but four (!) of them, made from your 'OLD BERKSHIRE MILLS LINEN LEDGER,' Medium, 40lb., make a splendid show

Extra Fine Papers

Manufactured by

Z. CRANE, JR., & BRO.,

DALTON, MASS., U.S.A.

These Papers, which are acknowledged to equal the finest foreign manufactures, are presented in the following styles and qualities:

REGULAR QUALITY.

In handsome Light Blue Packages containing one-quarter of a ream of Note Paper each, and bearing in blue letters description of contents.

In a separate Package of uniform size, is one-eighth of a thousand Envelopes corresponding in tint and quality to the paper.

EXTRA QUALITY.

In attractive Lavender Colored Boxes containing one-quarter ream of Extra Fine Paper each, with contents printed in red. Corresponding to this, in like Boxes, are Envelopes to match.

All this Stationery may be relied on to be according to representation. It is suited to the tastes of the most select trade.

In addition to the above lines, our other Specialties are put up with care, in attractive and substantial form. Goods can be seen at the Mill, or New York Office, 47 Beekman Street. GEO. B. HURD, Gen'l Agent.

SEASON 1881-1882.

SEASON 1881-1882.

L. PRANG & CO.'S

Christmas and New Year Cards

ANNOUNCEMENT.

WE hereby beg leave to announce to the trade the completion of our line of Christmas and New Year Cards for this season, for which our agents are now soliciting orders. The extent of our list, the originality, and especially the American character of our designs, together with the great care taken in their execution, will, we have no doubt, secure for our goods the popularity which they have enjoyed heretofore. The efforts we have made to secure the highest excellence, is attested by the names of some of the artists whose designs have been reproduced. We would only name Elihu Vedder, C. C. Coleman, Thomas Moran, Miss Rosina Emmett, Miss Dora Wheeler, Mrs. O. E. Whitney, W. H. Gibson, F. S. Church, R. G. Birch, &c. That a due regard has been paid for the quality of the literary matter, in connection with these designs, is shown by the fact that many of the designs are accompanied by original poems from writers of note, such as Mrs. Celia Thaxter and Mrs. Emily Shaw Forman.

The great increase of our manufacturing facilities, secured by additions to our building nearly doubling our floor space and by the adding of new machinery, will place us in a position to fill orders promptly. Still we would request dealers to place their orders as early as possible, so as to still further enable us to make timely preparation for prompt deliveries.

Our Cards will, as heretofore, be put up in envelopes containing twelve Cards, unless otherwise stated on our price lists. We furnish envelopes without extra charge for all our Christmas and New Year Cards, for which the list price is \$1.80 per set, and over. Our silk-fringed Cards will no doubt be in great demand this season. We have made ample preparation to furnish these in time and have made arrangements with our manufacturers for the best quality of silk fringes. We would call special attention to the excellence of our fringed Cards and the novelties in colors and style of fringes we offer for this season.

A marked and attractive feature of our cards are the elegantly ornamented backs.

All our fringed Christmas and New Year Cards are furnished with envelopes and protectors, so as to insure safe transportation in the mails.

It will be impossible to embody our whole list in the space of the advertisement, and we will therefore merely give a general outline of the variety offered.

PRANG'S PRIZE CHRISTMAS CARDS.

COMPETITION OF 1881.

These are the Cards selected by the judges in the second competition for four designs of Christmas Cards, for which we offered \$2,000 in prizes of \$1,000, \$500, \$300 and \$300 respectively. At the recommendation of the judges, Messrs. COLEMAN, LAFARGE, and WHITE, the prize for third best Card was increased to \$500. Mrs. CELIA THAXTER has written appropriate verses for each of the designs.

- 1st Prize Card (\$1,000), by Elihu Vedder. Size, $6\frac{1}{4} \times 9$ inches; price \$1 each. Same card with silk fringe, cord and tassels, price \$1.50 each.
- 2d Prize Card (\$500), by Miss Dora Wheeler. Size, 7×9 inches; price 75c. each. Same card with silk fringe, cord and tassels, price \$1.25 each.
- 3d Prize Card (\$500), by C. C. Coleman. Size, 7×9 inches; price 75c. each. Same card with silk fringe, cord and tassels, price \$1.25 each.
- 4th Prize Card (\$200), by Miss Rosina Emmett. Size, $5\frac{1}{4} \times 9\frac{1}{4}$ inches; price 60c. each. Same card with silk fringe, cord and tassels, price \$1 each.

The Prize Cards can also be had mounted on heavy board with gilt beveled edges.

We beg to call attention also to the following publications for New Year and Christmas:

- "Goddess Fortune" New Year Card, by Elihu Vedder. Size, $6\frac{1}{4} \times 8\frac{3}{4}$ inches; price 75c. each. Same card with silk fringe, cord and tassels, price \$1.25 each.
- "Christmas Dove." Size, $7 \times 9\frac{1}{4}$. This card is in the same style as the success of the last Easter season, the "Easter Dove." Price 60c. each. Same card with silk fringe, cord and tassels, price \$1 each.

Our Regular Line of Christmas Cards consists, among others, of the following Series:

- Nos. 901, 902, 903, 906, 909, 910. Floral designs ranging in price from 20c. to \$1.20 per set of 12.
 - Nos. 904, 905. Humorous Cat and Frog Designs, 60c. per set.
 - No. 907 is a new series of Horseshoe designs, 75c. per set.
 - Nos. 920 and 929. Children's designs, at \$2.40 and \$3.60 per set.
 - No. 922. Shells of Ocean, with figures, \$2.40 per set.
 - No. 924. Fans with silk fringes, \$3 per set.
 - No. 933. Bric-à-Brac designs, very rich, \$6 per set, and many others.
- We offer a similar assortment of New Year Cards, but would call special attention to No. 1320, a new folding calendar, at \$2.40 per set. Most of the Numbers can be had with silk fringes ranging in price from \$2.25 to \$12 per set. Stock will be ready for delivery September 15.
- Besides the above, attention is called to our New Birthday Cards, Scripture Texts Cards, New Panels, New Water Colors, by Thomas Moran, and other publications. Our line of Thanksgiving Day Cards will also be shown by our agents.

REGULAR DISCOUNT TO THE TRADE. PRICE LISTS AND CATALOGUES SENT ON APPLICATION.

NEW PATENTS.

- No. 247,165. Tag.—John Cantrell, Bridgeport, Conn.
The combination, with the cord and tag-body, of a metallic clip passing through the slot in the body and provided with end tongues bent down upon either or both sides of the clip.
- No. 274,178. Paper-Folding Attachment for Printing Presses. Talbot C. Dexter, Des Moines, Iowa, assignor of three-fourths to W. E. Andrews, same place.
- No. 247,213. Paper Packing Box.—Frederic M. Peck, Hartford, Conn.
A packing box formed with sides embossed with devices which protect, and one or more of which also indicate the character of the contents.
- No. 247,223. Fastener for Pocket-Books, &c.—Leopold Strauss, Middletown, Conn.
A fastener having spoon-shaped ends and teeth for attaching it to the article, all stamped or struck up in one piece and bent into form.
- No. 247,233. Toy Pistol.—Henry H. Whitcomb, Bridgeport, Conn.
- No. 247,287. Foot-Lock for Printers' Galleys.—William J. Adams, Philadelphia, Pa., assignor of one-third to Stephen T. Beale, Jr., same place.
A clamp, having an open and tapered recess upon its lower side, adapted to encompass the side piece of the galley, in combination with a right-angular bar having one arm extended across the bed of the galley and the other extended alongside of the side piece of the galley and tapered.
- No. 247,302. Toy Box.—Thomas Candy, Cincinnati, O.
1. A box provided with elastic thong and self-closing lid. 2. A series of boxes with pictured walls or facets, and permanently united by a central thong or pivot, about which they may be separately rotated. 3. A series of boxes with pictured walls or facets, and permanently united by a central extensible elastic thong, which permits of their rotation and of their partial separation. 4. One or more permanently-connected boxes capable of rotation relatively to one another, and having one or more orifices, whose lids are retained and made self-closing by means of an extensibly elastic thong, which is attached to the centre of the lid and constitutes its sole fastening.
- No. 247,317. Bill File.—Fred H. Cutler, Buffalo, N. Y.
1. A letter or bill file consisting of frame or tray having grooved side pieces, tenoned slats, and partitions or leaves flexibly connected to the slats, substantially as and for the purpose set forth. 2. The combination, with the frame or tray consisting of grooved side pieces and tenoned slats, with spaces between them, of the partitions or leaves and flexible connections secured to the leaves and passing down through the spaces between the slats and secured upon the bottom thereof. 3. In a letter or bill file, the combination, with the tray or frame and the leaves or partitions, of spring hinges or connections.
- No. 247,324. Wire Easel.—Andrew M. Ernsberger, Philadelphia, Pa.
As a new article of manufacture, an easel consisting of a single piece of wire, having a V-shaped rear portion and a front portion provided with holding-coils and coiled terminals or feet.

NEW YORK OFFICE AND SALESROOM, 18 MURRAY STREET.

THE BAY STATE PAPER COMPANY,

HOLYOKE, MASS., were among the pioneers in the W. C. Paper trade, and their goods, from the start, were

distinguished for their fine quality and the superior style in which they were wrapped. Their example has been approved and imitated by a swarm of competitors, who have flooded the market with inferior goods, put up in packages of 600 to 800 sheets, misleading the unwary, and sold at apparently lower figures; but the trade and consumers generally recognize the fact that a good article, honestly put up, in 1,000 sheet packages, is the most profitable both for use and for sale. Their goods are all guaranteed 1,000 sheets to package, and no short count. No wood is used in any of these papers, but they are made of the very best stock in the market.

THE "MEDICATED BOUDOIR" BRAND

Has no equal for weight, strength, softness, and color, and commands the front place with "fine retail trade." Present reduced quotations furnished on application.

TWO WORKS

OF

Great Value

TO

STATIONERS.

The Stationers' Price Book and
Illustrated and Descriptive
Catalogue, . . . \$2.00

Lockwood's Directory of the Paper
Trade, . . . \$2.00

EVERY STATIONER wants the above
Works for the

FOLLOWING REASONS.

The Price Book and Catalogue furnishes Stationers information which, if they have at all, is usually scattered and never right at hand when wanted. As a book of immediate reference it will be found invaluable.

The Directory of Paper Manufacturers and Jobbers is a guide to **First Hands** in the Paper Trade. Any one who uses it intelligently can save many times its cost at once.

THE PRICE BOOK is deliverable in the cities of New York, Boston, Philadelphia, Chicago, Detroit and St. Louis, where purchasers can have it packed with any goods they may be buying.

THE DIRECTORY is sent post-paid.

All Stationers who wish to keep
ABREAST WITH THE TIMES,
must own these two books.

THE

Paper & Printing Trades Journal

[QUARTERLY.]

Subscription—2s. PER ANNUM, Post Free.

POSTAGE STAMPS RECEIVED IN PAYMENT.

IT is simply the best got up and most
ably edited journal of the kind which
is published. The general reader will find
much in it that will amuse at the same time
that it instructs, while the printer will be
astonished by the great variety and excel-
lence of the type with which it is printed.

The Clerkenwell (London) Press.

Every Printer, Stationer, Paper Maker, Book-
seller, Author, Newspaper Proprietor, Reporter, in
fact everyone interested directly or indirectly (and
who is not?) with Printing and Paper, ought to sub-
scribe.

"I consider this the best paying investment I have
entered into this year." (From F. W. TALBOT,
Printer, 19 Sussex Street, Cambridge.)

Thousands of letters of this character
have been received.

Useful Trade Tables, Trade Information,
Heaps of Wrinkles, Sprightly Articles,
Amusing Gossip, in every issue.

* * OVER 400 APPLICATIONS for goods have
been received by an extensive manufactur-
ing firm in London from a single advertise-
ment in THE PAPER AND PRINTING TRADES
JOURNAL.

FIELD & TUER, Publishers,
(Contractors to Her Majesty's Government),
Ye Leadenhale Presse,
50 LEADENHALL, ST., LONDON, E. C.

Trade Gossip.

All new goods and designs which are not, strictly speaking, "Novelties" will be noticed under this head. The trade are requested to forward descriptions with samples in order to secure proper notice.

E. C. Hart, publisher of the *Journal*, Willows, Cal., has sold out.

S. P. Davis, publisher of the *Appeal*, Carson, Nev., has sold out.

E. A. Weed, publisher of the *Bulletin*, Greenville, Cal., has sold out.

Duel & Scherwaly, printers, Stillwater, Minn., have dissolved partnership.

L. R. Smith, news dealer, &c., Addison, N. Y., has sold out to C. H. Smith.

William White, fancy goods dealer, Manchester, N. H., is advertising to close out.

Hasey & Lancaster, fancy goods dealers, San Francisco, Cal., have dissolved partnership.

H. M. Bovey, stationer, &c., Somerville (West), Mass., has sold out to Charles M. Needham.

John C. Turner has retired from the firm of J. A. Tibbitts & Co., publishers of the *Day*, New London, Conn.

Mackintosh & Co., dealers in paper hangings, San Francisco, Cal., are advertised to be sold out by the sheriff.

Hard & Parsons are working late almost every night so as to fill in time the large number of orders on hand. They report that the present demand has far exceeded their anticipations.

Newson, Curry & Co., manufacturing stationers, Baltimore, Md., have dissolved partnership. William H. Curry continues, and has admitted Oliver W. Clay to partnership, style now being Curry, Clay & Co.

E. & H. T. Anthony & Co. are doing an unusually large business in all of the lines they handle. The new goods brought out this season have met with much approval, and the demand for many of them has exceeded the expectations.

Loeb & Brother are very busy, and report considerable more orders on hand than at this time in any previous season. This is attributed to the fact that the firm has this year introduced so many novelties that their line is one of the largest and most elegant ever shown. The trade should not fail to see it.

John Petrie, Jr., of Victor E. Mauger & Petrie, has returned from an extended trip through the State of New York. While away he visited Saratoga, Niagara Falls, the Adirondacks, and the Catskills; he fished in Lake Champlain and bathed in Lake Erie. He looks magnificent.

John W. O'Shaughnessy, assignee of D. & J. Sadlier & Co., has filed the schedules in the Court of Common Pleas. The liabilities are \$205,814.32; nominal assets, \$287,466.23, and actual assets, \$190,116.93. Among the assets is stock of the nominal value of \$85,252.68, and actual value of \$63,939.51; book accounts, nominal value, \$102,141.80; actual value, \$55,393.96. Accounts due *The Tablet*, nominal value, \$10,071.75; actual value, \$6,000; stereotype plates, &c., \$28,000; real estate, nominal value, \$50,000; actual value, \$25,000; bills receivable, \$11,783.49. In the liabilities the preferred list amounts to \$10,800; book accounts, \$18,810.75; due to banks, \$52,532.83, and due to Mrs. N. A. Sadlier, \$84,513.56, besides bills payable to the amount of \$39,159.32.

Henry Levy & Son, 477 Broadway, are having an immense run on their various lines of leather goods. In anticipation of this demand the firm brought from Europe this fall several skilled workmen, and even with this additional help it will hardly be able to fill in time the requisitions being made upon it. This house claims to be the pioneer for the manufacture of Russia leather goods in this country. The factory is superintended by Jacques Loew, formerly of Vienna, with an able assistant in Ernest Levy. All of the designs made this year are original; the workmanship is excellent, and the prices are said to be much lower than those of similar imported goods; and it is asserted that these goods are more adapted to the tastes of our people than those of the same class manufactured abroad. A visit to the establishment by parties interested in this line of goods will be well repaid.

McCarthy & Hasberg's line of leather goods is one of the largest exhibited in this city, and it is said to include more novelties than were ever shown in this market. Besides other good qualities in the line, particular attention has been given to the shades and colors of the leather. The designs are almost all original, and are such as to please the most fastidious. They include work-boxes, jewel, cigar, odor and card cases, as well as attractive novelties suitable for holiday presents. The house shows fifty-two new patterns of albums, which it claims cannot be seen elsewhere, and which come in calf, Russia, Turkey morocco, decorated and embroidered, and in plush of various colors. Among other things shown are entire new lines of writing-desks and portfolios, on which sketches are drawn by some of the best artists in Europe. A line of plush goods, with hand paintings on the outside, is also shown.

C. F. A. Hinrichs, 29 to 33 Park place, has a fine line of dressed and undressed dolls. His stock of imported Christmas tree reflectors is large and varied. He has just issued his annual toy catalogue, giving only a general outline of his goods, as his assortment is so extensive, and having novelties constantly arriving, it would be impossible to embrace them all. He will take pleasure in sending his catalogue to the trade on application. Mr. Hinrichs is very busy at present, and in fact has so many orders that it is all he can do to pack and ship the goods within reasonable time.

Hatch, Cummings & Co., of Cincinnati, Ohio, wholesale and retail dealers in notions, have failed, and have made an assignment to D. Humphreys. The liabilities are estimated at \$35,000. Nominal assets, \$30,000; actual assets, \$12,000.

Victor E. Mauger & Petrie report an active trade in the A. B. French copying ink. This house has the agency for a line of treadle perforating machines, without one of which it is said no first-class office can be considered complete.

Among the visiting members of the trade to the city during the week were G. W. Clark; Montreal, Can.; E. D. Dresser, of Winkley, Thorp & Dresser, Boston, and Wm. H. Laurence, of W. H. Laurence & Co., Denver, Col.

Curl & Wood, publishers of the *Herald*, Weatherford, Tex., have dissolved partnership. Wood & Coleman continue.

Scott, Fellow & Co., publishers of the *Republican*, Marion, Ind., have dissolved partnership. H. C. Fellow continues.

A. D. Gould, publisher, and E. Spider, news-dealer, of Eldred, Pa., were burned out on the 30th ult.

Philip Bauch, printer, Madison, Neb., has sustained at total loss by a cyclone.

William M. Hand, publisher of the *Mountaineer*, The Dalles, Oregon, is dead.

Hezekiah Holbert, bookseller and stationer, Williamsport, Pa., has sold out to L. S. Tilton.

Charles Carter, paper box manufacturer, Leominster, Mass., has sold out to George L. Chase.

Homer Blanchard, mercantile printing house, Hartford, Conn., is advertising the business for sale.

James K. Frew, publisher of the *Journal*, New Lisbon, O., has admitted his son, D. H. Frew, to partnership.

C. S. Holbrook has retired from the firm of L. Hollingsworth & Co., paper manufacturers, Boston, Mass.

E. P. Coby & Co. now have their pad calendars for 1882, printed on fine paper in two colors, which are now ready for delivery.

Hooper, Lewis & Co., stationers, Boston, Mass., have dissolved partnership. John S. and Chas. H. Hooper continue under the old style.

Buck & Lindner, lithographers, New York city, have formed a limited partnership, under same style, with special capital of \$10,000, to September 19, 1883.

Owing to the death of H. J. Atwater, of Atwater & Co., New Haven, Conn., the business will be continued under the same firm name by B. H. Kilborn, the surviving partner.

The Williamson-Stewart Paper Company, St. Louis, has just issued its new "annual catalogue and price list." This is very full and complete. It is completely indexed, and the trade will find it useful.

Franklin Sargent, of the National Blank Book Company, made a short run to the city from Holyoke yesterday. Since the removal of his factory to Holyoke he has been very seldom seen in New York.

W. Keuffel, of Keuffel & Esser, dealers in drawing materials, 127 Fulton street, has been confined to his home by sickness for some days, but is now convalescent, and it is expected will be at his store again very soon.

R. Fideau, 16 Beekman street, reports that notwithstanding the recent advance in the prices in school slates, he is very busy filling domestic and export orders. For slate pencils and school bags he has a good many orders, which he expects to execute inside of this month.

William C. Horn, of Koch Sons & Co., returned home this week from quite an extended bridal trip. If congratulations and the good wishes of friends are a pleasure to any man, then Mr. Horn ought to feel very happy, for these were extended to him everywhere he visited.

McLoughlin Brothers have just published three new toy books, "Billee Taylor," "Little Folks' Painting Book," and "Greenaway Pictures to Paint." The first belongs to the "Aunt Louisa Series," and contains six full page and four half page pictures, handsomely done in oil colors. They are good representations of the opera they are intended to represent, and the text follows the illustrations. The "Greenaway Pictures to Paint" is a series of pictures from "Under the Window," and is designed especially to amuse children by affording them pleasing subjects for painting. Each picture can be cut out from the book, giving an opportunity for framing, or using it in any desirable manner. It contains 62 illustrations. The "Little Folks' Painting Book" is similar to the foregoing in style and size, but

with different subjects, and contains 56 illustrations.

Aiken, Lambert & Co. are doing an immense business.

C. Hirstel & Co., stationers, &c., Portland, Oregon, have failed.

J. L. Cobb, dealer in fancy goods, Hyde Park, Mass., is closing out.

Hobart & Morden, publishers of the *Leader*, Eureka, Nev., have sold out.

D. C. Ireland, publisher of the *Astorian*, Astoria, Oregon, has sold out.

Miss Mason, fancy goods dealer, Dundas, Ontario, Can., has been burned out.

Bruns & Kaufmann, music publishers, New York city, have dissolved partnership.

Guy T. Cunningham & Co., paper-box dealers, Troy, N. Y., have dissolved partnership.

The stock of Edward McCormack, paper stock dealer, Boston, Mass., has been attached.

Abel Brothers, dealers in notions, Denver, Col., have assigned to Adolph Friedheim.

Richard W. Sheekells, paper stock dealer, Baltimore, Md., has been closed by the sheriff.

The stock of J. Bradley Adams, stationer, Washington, D. C., has been slightly damaged by fire.

The stock of Brown Brothers, paper manufacturers, East Hampton, Conn., has been damaged by fire.

The International Book and News Company, St. Louis, Mo., has been incorporated. Capital stock \$5,000.

Blakely, Brown & Marsh, printers, Chicago, Ill., have dissolved partnership. Blakely, Marsh & Co. succeed.

C. C. Shelley, 10 College place, has published a pocket "whist score book," intended for keeping a record of games played. It is neat and inexpensive, and is of capacity to record over three hundred games of whist.

Appleton & Co., 294 Broadway, have a full line of birthday cards, fringed and plain, in handsome designs and coloring. These goods are from the London firm of Hildesheimer & Faulkner, for which Appleton & Co. are agents.

It is asserted that traveling salesmen while in Boston, have long felt the want of suitable accommodations for displaying samples to advantage at as reasonable rates as in other cities of the Union. The prominent hotels, some of which are on the European plan, charge, it is said, from \$2 to \$5 per day for a sample room alone, without meals. A site for a new hotel has been talked of, and two capitalists, it is reported, are ready with \$300,000 to build a substantial commercial hotel where the rates will be in accordance with those of other large cities.

Among the visiting members of the trade in the city during the past week were W. H. Lawrence, of W. H. Lawrence & Co., Denver, Col.; George E. Weikert, of George E. Weikert & Co., Kansas City; W. F. Raybould, Salt Lake City, Utah; Mr. Smith, of Willard & Smith, Allegany, N. Y.; Mr. Cameron, of Cameron, Amberg & Co., Chicago; T. J. Kellum, Topeka, Kan.; Mr. Bouton, of Bouton & McCann, Hannibal, Mo.; Louis Perrault, of Louis Perrault & Co., Montreal, Canada; Mr. Bell, of Bell Brothers, Winchester, Va.; A. J. Wheeler, of Wheeler & Osborn, Nashville, Tenn.; A. F. Murray, Huntsville, Ala.; O. A. Dorman, New Haven, Conn.; G. W. Clark, Montreal, Canada; Mr. Brown, of Brown & Pilcher, Jackson, Mich.; James Blythe, of the Levison & Blythe Stationery Company, St. Louis.

THE STATIONER.

DEVOTED TO THE INTERESTS OF THE

Stationery and Fancy Goods Trades.

WEEKLY—\$2.00 PER ANNUM.

Single Copies - - - - 10 Cents.

NEW YORK, THURSDAY, OCTOBER 6, 1891.

Advertisements cannot be received for insertion in the current week later than 12 m. on Wednesday. The charge for advertising is 25 cents a line, each insertion. Special terms for standing and displayed advertisements to be had on application.

This journal aims to be a medium of information for and a representative of the interests of every one connected with the stationery and fancy goods trades. It contains a full and trustworthy survey of the market for stationery in this country, in all cases giving the actual prices at which goods can be bought of importers and jobbers in this city, together with a detailed account of novelties in the trade, patents relating to stationery, and current items of interest. A review of foreign markets and accounts of movements abroad will also be furnished, and no pains will be spared to make THE STATIONER a thorough and complete exponent of the trade.

Subscription and postage for Great Britain, per annum..... 12s.

Any information our readers may wish to obtain shall be cheerfully given, and prompt replies will be made to all inquiries addressed to us on any subjects of interest to the trade.

Communications on all trade matters are earnestly solicited. Address

HOWARD LOCKWOOD, Pres. and Treas.

Subscribers to THE STATIONER can be supplied with the best cloth binder in the market. Deliverable at the publication office. Price, fifty cents.

Readers of this paper who avail themselves of the information obtained from its columns, by advertisement or otherwise, are requested to notify their correspondents of the source of their information.

Two days ago we wilted, and yesterday it was warm; to-day overcoats are in vogue and fires are started. Does anybody recall a more remarkable season?

TRADE holds well; everybody is busy, and the activity which is apparent all around us is suggestive of good balance sheets at the end of the year.

A BRITISH contemporary illustrates an improved box for the transmission of articles by mail, and states that an English manufacturer has patented it. We do not know under what conditions the British patentee has secured the control of the article, but we do know that it is an American invention, patented in this country by one of our own trade, and that it was long ago illustrated and described in our columns. Is this a captured idea?

NUREMBERG toy makers are said to be waiting anxiously for the renewal of negotiations for a commercial treaty between France and the United Kingdom. This is because it involves the duty on German goods imported to France under the "most favored nation clause" of the Treaty of Frankfurt. If the negotiations fail, German toys, on entering France, will have to pay a duty almost prohibitive. We do not know how extensively German toys are sold in France, but from the circumstance mentioned must believe that the trade is of considerable importance.

REPRESENTATIVES of those who befriended us in our early struggles for national existence are with us to-day. They come to join in celebrating an event which gave culmination to our independence. They are heartily welcome. And we have a loving thought for the "Old Country." We cannot forget that, although separated politically, we are of the same kind, and we can appreciate the hearty friendliness of the English papers which, in commenting on the centennial anniversary of Yorktown, wish us joy of it, and declare that the event which we are to commemorate was of mutual advantage.

WE desire to explain. Our London contemporary who has such a very long name that it is fatiguing not only to write but pronounce it—we mean the *British and Colonial Printer and Stationer*, there! takes issue with us on our statement, that if Great Britain imposes duties on her imports, we shall be able to deal direct with consumers, and not through middlemen. It chooses to apply our remark to English consumers. Our friend is somewhat out in its application. We referred to the great mass of trade done with other countries by the medium of English houses. A great many goods of American manufacture are sold and shipped to England, to be resold and reshipped to other markets, and do not enter into consumption in the United Kingdom. If the English importer pays duty on

these goods, he must make up this additional expense when he exports them; this will help to "even up" trade, and his customers will probably find that they can buy cheaper of us. We may be able to sell at an advance, and sell so much cheaper as to warrant a direct trade with consuming countries. It seems to us that it would be more to our advantage to do so. This is all that we meant, and perhaps the *B. and C. P. and S.* will agree with us.

THE BUENOS AYRES Exhibition will open next February. It is not free to all classes of goods, but will be exclusively national except in machinery exhibits. But American manufacturers must not think that this exclusion will debar them from deriving advantage from the exhibition; they should rather arrange to be there in force, and combine to fit out a bazaar or "side show" of their own, in which perhaps they can display with greater effect, and sell without restriction the goods they may choose to send thither. There is not any time to be lost, and if our manufacturers of paper, general stationery and fancy goods, want to work the Argentine market, they must arrange accordingly, and that right soon. Who will call a meeting for considering this?

ANSWERS TO CORRESPONDENTS.

J. G. B. wants the address of some person here or abroad who will manufacture a small article in papier mâché in large quantities.

Ans.—James Goldsmith, 757 Broadway, New York; William Ramsden & Co., Pershore street, Birmingham, England; Albert Komp, 205 Walker street, New York; and Jennings Brothers, 51 Murray street, New York.

C. C. P. says: Inform me of the name of the manufacturer or jobber, or both, of a new article of "shelf oilcloth," to be used in a similar manner to shelf paper. It is made in rolls and scalloped.

Ans.—L. H. Rogers & Co., 75 Maiden lane, are said to make it to order.

S. & Co. want address of house which is headquarters for printers' supplies.

Ans.—Farmer, Little & Co., 63 and 65 Beekman street, New York. This application is rather indefinite or general in its requirements. The term "printers' supplies" can be understood to mean type, presses and printing office furniture, or simply printers' stock, such as inks, papers, cards, &c. Bruce's Son & Co., 13 Chambers street, New York; James Conner's Sons, Centre street, New York; McKellar, Smiths & Jordan, Philadelphia; R. Hoe & Co., Grand and Sheriff streets, New York; Vanderburgh, Wells & Co.; National Printers' Warehouse Company. The last three firms make a specialty of all printers' supplies, but do not manufacture type; the other firms are type-founders. If our correspondents want printers' inks, paper, cards, &c., we must ask them to go diligently through our advertising pages. They will find enough information there—more than we have space to repeat in this column.

Among the manuscripts lately acquired by the library of the Athenian Chambers is a roll of thick paper about a finger in width and a thousand feet long, on which the various anagrams of the name Constantinople are written. These different anagrams are arranged in alphabetical order and amount to no less than 40,135. This roll was written apparently in England in the last century.

OBITUARY.

FLETCHER U. HARPER.

Fletcher Urling Harper, the eldest son of Joseph W. Harper, second of the well known firm of Harper & Brothers, publishers, and a grandson of the late Fletcher Harper, one of the founders of the house, died at the residence of his wife's father, No. 61 West Forty-eighth street, at 4 o'clock yesterday morning. Mr. Harper had been a sufferer from ill health for four years. About the time of the death of his grandfather he was attacked with diphtheritic sore throat, which confined him to his room in the Fifth Avenue Hotel for a considerable period. His brain became affected, and he was never afterward able to attend to business pursuits. He went abroad and endeavored by traveling through the various countries in the Old World to recover his health. No climate seemed to agree with him, however, and he returned home. He next visited the Hot Springs, Arkansas, but derived little benefit from them. He rented a cottage in Islip, Long Island, last summer, to which he moved his family. His physicians—Drs. Guernsey, Carnochan, and Bagge—after a consultation, about four weeks ago, advised Mr. Harper to go to Richfield Springs and he took their advice. He had only been at the springs a week when he was stricken with paralysis, by which he lost the use of his left arm and leg. He was removed to his home in Islip, and afterward, owing to his wife's illness, he was brought to the residence of his father-in-law, in this city. This was on Thursday, September 22. He became unconscious on the following Friday, and remained in that condition up to the time of his death.

Mr. Harper was born in Seventh street in this city, August 15, 1848. After two years' preliminary education in Nazareth Hall, Nazareth, Penn., he went to Frankfort-on-the-Main, Germany, where he remained four years. Returning to this country, he finished his education in Fay's Institute, Newport, R. I. He then entered the Harpers' office, where he remained as a clerk for eighteen months. He was next sent into the composing room, and worked at the case until he was taken ill, in 1877. He evinced a deep interest in national politics and was a prominent member of the Union League Club. During the great Republican parade last fall Mr. Harper was one of the sides on the staff of Gen. Lloyd Aspinwall, the Grand Marshal of the occasion, and rode with his leader throughout the long

line of march. He afterward said that it was "the hardest work he had ever done in his life." Mr. Harper, when his health would permit, was a regular attendant of the Broadway Tabernacle, and the Pastor, the Rev. Dr. Taylor, was a warm friend of the family. Mr. Harper leaves a widow, the daughter of ex-Senator Alexander McDonald, of Arkansas, and three young daughters, the youngest being only four weeks old. Two brothers—J. Henry and Willy D. Harper—and a sister, Mrs. Theodore Haight, survive him. His father is in Europe, where he has been traveling for health and pleasure for several years. The funeral will take place at 1 o'clock to-morrow afternoon, and interment will be in the family plot in Sleepy Hollow Cemetery.

H. J. ATWATER.

H. J. Atwater, of Atwater & Co., stationers, New Haven, Conn., died at that place of paralysis and was buried on September 24. He was fifty-two years old, and had been engaged in the business of selling stationers' and printers' supplies for about thirty years. He leaves a widow and three daughters.

MINUTE MECHANISM.

There is a cherry stone at the Salem (Mass.) Museum, which contains one dozen silver spoons. The stone itself is of the ordinary size, but the spoons are so small that their shape and finish can only be well distinguished by the microscope. Here is the result of immense labor for no decidedly useful purpose; and there are thousands of other objects in the world, fashioned by ingenuity, the value of which, in a utilitarian sense, may be said to be quite as indifferent. Dr. Oliver gives an account of a cherry-stone on which were carved one hundred and twenty-four heads, so distinctly that the naked eye could distinguish those belonging to popes and kings by their mitres and crowns. It was bought in Prussia for fifteen thousand dollars, and thence conveyed to England, where it was considered an object of so much value that its possession was disputed, and it became the object of a suit in chancery. One of the Nuremberg top makers enclosed in a cherry stone, which was exhibited at the French Crystal Palace, a plan of Sevastopol, a railway station, and the "Messiah" of Klopstock. In more remote times, an account is given of an ivory chariot, constructed by Mermecides, which was so small that a fly could cover it with its wing; also a ship of the same material, which could be hidden under the wing of a bee! Pliny, too, tells us that Homer's Iliad, with its fifteen thousand verses, was written in so small a space as to be contained in a nutshell, while Elian mentions an artist who wrote a distich in letters of gold, which he enclosed in the rind of a kernel of corn. But the Harleian MS. mentions a greater curiosity than any of the above, it being nothing more nor less than the Bible, written by one Peter Bales, a chancery clerk, in so small a book that it could be enclosed within the shell of an English walnut. Disraeli gives an account of many other exploits similar to the one of Bales. There is a drawing of the head of Charles II. in the library of St. John's College, Oxford, wholly composed of minute written characters, which at a small distance resemble the lines of an engraving. The head and the ruff are said to contain the Book of Psalms, in Greek, and the Lord's Prayer. In the British Museum is a portrait of Queen Anne, not much larger than the hand. On this drawing are a number of lines and scratches, which, it is asserted, comprise the entire contents of a thin folio. The modern art

of photography is capable of effecting wonders in this way. We have before us the Declaration of Independence, containing seven thousand eight hundred letters, on a space not larger than the head of a pin, which, when viewed through a microscope, may be read distinctly. —Proof Sheet.

A blind boy of Montreal has made a miniature house inside an ordinary four-ounce medicine bottle. The building is made of forty pieces of wood, neatly fitted and glued together. It would puzzle a man who was not blind to get the pieces into a bottle without putting them together. The stopper of the bottle is still more wonderful. It almost fits the neck of the bottle, the top being large enough to prevent its going down too far. Near the other end of the stopper inside the bottle below the neck, a small wooden peg has been driven, which extends far enough on each side of the stopper to prevent its removal from the bottle. How this was accomplished is a mystery.

Market Review.

OFFICE OF THE AMERICAN STATIONER, {
WEDNESDAY, October 5, 1881. }

THE MONEY MARKET.—The money market continues stringent, and stock collateral borrowers have paid extreme rates for call loans, as high as one-eighth of 1 per cent. per diem in addition to legal interest ruling most of the week, and this price was bid at the close. Holders of government bonds were accommodated at 5@6 per cent. Time loans and mercantile discounts were unchanged. This stringency is of course in part due to the usual demand at this season of the year from the West and South for funds to move the crops, and to the great falling off in the receipts of gold from Europe, caused by the success of the speculators in produce on this side in forcing up prices. The stringency of the money market has exerted a depressing effect on the stock market, and prices have generally declined. The government bond market was weak, except for 4s, which advanced $\frac{1}{8}$ per cent., and extended 5s. In railroad mortgages there was a fair amount of dealings, but the transactions were nearly all at downward prices. Foreign exchange is depressed, dull and lower, owing to free offerings of bankers' bills, which presumably have been borrowed by speculators seeking time money.

THE PAPER MARKET.—An increased impetus has been given to trade since the beginning of the month, some buyers having held back their orders until after that time. Many of our city jobbing houses report a very satisfactory business in progress and in many instances their inability to get paper has been an additional drawback. Buyers are beginning to realize that paper is becoming scarce, as shown by the small advance in prices which some of them have paid within the past week on book and manilla papers. While we do not wish to be understood as saying that a general advance has been made in these grades, instances have come to our notice where the paper was wanted, and in order to secure it a higher price was paid. While no considerable advance in prices is anticipated very soon, the supply is so much lighter than it has been for a number of years that, even with the drought broken, it will take some time to create an over supply, and in the meantime a small advance would be very likely to be sustained.

THE STATIONERY MARKET.—The volume of transactions continues to foot up quite large, and the prospects of an active trade to the end of the fall season are everywhere regarded as encouraging. Thus early in the season considerable inroads have been made into stocks, and in some lines assortments are beginning to be broken; but there need not be any apprehension of a scarcity of goods, as the trade looked for a heavy season's business and prepared their stocks accordingly. Staple goods continue in the main firm; no change in prices has been reported since our last.

WHOLESALE

DANIEL SLOTE & COMPANY,

Manufacturers of

BLANK BOOKS.

Nos. 119 and 121 William Street, New York.

It is universally acknowledged that goods of our manufacture are the best shelf-made goods in the market. Since our introduction of Duck Bound Blank Books throughout the United States, we have added largely to our variety of bindings, and for the past two years have successfully introduced the NOW POPULAR SLATE COLOR.

TRADE NOTICE.

These Celebrated Pens are now manufactured with unprecedented skill and care. They have the distinction—which has now become historical—of being the FIRST SUCCESSFUL AMERICAN STEEL PENS, also of having been so popular as to have been counterfeited to the extent of HUNDREDS OF THOUSANDS of gross, which was stopped by judgments of the SUPREME COURT of NEW YORK and of the UNITED STATES COURTS.

The genuine Pens are now sold direct to the Trade by the proprietors,

THE WASHINGTON MEDALLION PEN CO.,

229 Broadway, N. Y.

BRITISH GROWLS AT AMERICAN PA- PER EXPORTERS.

There are signs of a keener competition on the part of American paper makers than is now the rule. At the recent meeting of the American Paper Makers' Association a plan of campaign was skillfully sketched out, by which our exports, and even our home trade, is threatened with vigorous opposition. It is a trite saying, but still a very true one, that competition is good for everybody, and we are not disposed to regard the British paper maker as a spoilt child, to be pampered and hedged round from naughty men, who think they can make headway against him in his own track. While on the one hand we hope and firmly believe that our manufacturers will in the long run more than hold their own in fair competition, there is room for a healthy stimulus to come into play, which may prove the making of what may now seem to be a drooping trade.

One improvement in the system on which a considerable part of the American paper trade is worked is greatly to be desired. From this side complaints are often heard as to the instability, if we may use the word, of makers of contracts for export from America. These complaints frame themselves in something like the following shape: We hear of English agents who have orders to plant receiving from American makers prices which are quoted to principals, or on which the agents' commission is based. Negotiations proceed smoothly enough until the critical moment for the execution of the order, when, without apparent rhyme or reason, the agent is told that the contract cannot be accepted for the original price quoted. The consequence is that many good transactions are lost, and, what is worse, a flavor of the most undesirable sort is left behind, to the prejudice of future business.

If this is a typical illustration, as we have reason to believe it is, we have a sufficient explanation of the limited extent of the American export trade. It may not be in our province to look behind for the causes of these unfortunate fiascos, and we do not profess to be able to lay our finger on the sore spot, but it may be credited, at least in some degree, to the combinations that find such favor among American paper makers. Associations and federations of mill owners agree to use every legitimate effort to keep up prices. Small blame to them for this, unless by shortsightedness they sacrifice a prospective large general trade for the sake of maintaining a price on a single paltry transaction. Assuming—for the sake of argument—that one member of a trade association has made a fair offer in the hope of securing a good export order, and that by the time its acceptance reaches him the price has slightly risen against him, if his trade association compel him to withdraw his offer and disappoint the customer, we consider that to be a shortsighted and a confidence-destroying policy. We do not allege that this is the rule, nor even a frequent occurrence; but if repetitions of such breaches of moral understanding have occurred in sufficient number to disturb the cordiality which should subsist between men of business, there can be little wonder if British and foreign buyers hesitate in wasting time and risking loss by entering upon uncertain negotiations. It has been the pride of English manufacturers, not only of paper but of all our staple products, that they consider themselves bound in honor to abide by their first quotations, win or lose. Confidence in capacity to carry out, and security in trusting to undertakings, make buyers more eager to do

business with producers. Without this confidence trade must languish, if it exists at all. Whatever hidden causes undermine confidence, they are radical mistakes, and should be abolished. If it be the case that a sense of insecurity in planting contracts in America affects British and foreign buyers, we do a service to the American export trade in inviting its attention to one of the alleged hindrances to its extension. —British and Colonial Printer and Stationer.

CASTINGS OF DELICATE NATURAL OBJECTS.

The following process is recommended by Abbas for producing metallic castings of flowers, leaves, insects, &c.:

The object, a dead beetle, for example, is first arranged in a natural position, and the feet are connected with an oval rim of wax. It is then fixed in the centre of a paper or wooden box by means of pieces of fine wire, so that it is perfectly free, and thicker wires are run from the sides of the box to the object, which subsequently serves to form air channels in the mold by their removal. A wooden stick, tapering toward the bottom, is placed upon the back of the insect to produce a runner for casting. The box is then filled up with a paste of three parts of plaster of paris and one of brickdust, made up with a solution of alum and sal ammoniac. It is also well first to brush the object with this paste, to prevent the formation of air bubbles. After the mold thus formed has set, the object is removed from the interior by first reducing it to ashes. It is therefore dried slowly, and finally heated gradually to a red heat, and then allowed to cool slowly to prevent the formation of flaws or cracks. The ashes are removed by pouring mercury into the cold mold and shaking it thoroughly before pouring it out, and repeating this operation several times. The thicker wires are then drawn out, and the mold needs simply to be thoroughly heated before it is filled with metal, in order that the latter may flow into all portions of it. After it has become cold, it is softened and carefully broken away from the castings.

TO REMOVE INK STAINS.—The *Journal de Pharmacie d'Anvers* recommends pyrophosphate of soda for the removal of ink stains. This salt does not injure vegetable fibre and yields colorless compounds with the ferric oxide of the ink. It is best to first apply tallow to the ink spot, then wash in a solution of pyrophosphate until both tallow and ink have disappeared. Stains of red aniline ink may be removed by moistening the spot with strong alcohol acidulated with nitric acid. Unless the stain is produced by eosine, it disappears without difficulty. Paper is hardly affected by the process; still it is always advisable to make a blank experiment first.

It may be interesting for the collectors of postage stamps to know that the number hitherto issued all over the world is estimated, in round numbers, at 6,000. Among them are to be found the effigies of five emperors, eighteen kings, three queens, one grand duke, six princes, one princess, and a great number of presidents, &c. Some of the stamps bear coats-of-arms and other emblems, as crowns, the papal keys and tiara, anchors, eagles, lions, horses, stars, serpents, railway trains, horsemen, messengers, &c. The collection preserved in the Museum of the Berlin Post Offices included, on July 1, 1879, 4,498 specimens of different postage stamps. Of these 2,462 were from Europe, 441 from Asia, 251 from Africa, 1,143 from America, and 201 from Australia.

"THE GREAT ROCK ISLAND ROUTE"

Call your attention to the following REASONS WHY, if about to make a Journey to the GREAT WEST, you should travel over it:

As nearly absolute safety as is possible to be attained. Sure connections in UNION DEPOTS, at all important points. No change of cars between CHICAGO, KANSAS CITY, LEAVENWORTH, ATCHISON or COUNCIL BLUFFS. Quick Journeys because carried on Fast Express Trains. Day cars that are not only artistically decorated, but furnished with seats that admit of ease and comfort. Sleeping cars that permit quiet rest in home-like beds. Dining cars that are used only for eating purposes, and in which the best of meals are served for the reasonable sum of seventy-five cents each. A journey that furnishes the finest views of the fertile farms and pretty cities of Illinois, Iowa and Missouri, and is afterwards remembered as one of the pleasant incidents of life. You arrive at destination rested, not weary; clean, not dirty; calm, not angry. In brief, you get the maximum of comfort at a minimum of cost.

That the unremitting care of the Chicago, Rock Island & Pacific Railway for the comfort of its patrons is appreciated, is attested by its constantly increasing business, and the fact that it is the favorite route with delegates and visitors to the great assemblages, political, religious, educational and benevolent, that assemble from time to time in the great cities of the United States, as well as tourists who seek the pleasantest lines of travel while en route to behold the wonderful scenes of Colorado, the Yellowstone and Yosemite. To accommodate those who desire to visit Colorado for health, pleasure or business, in the most auspicious time of the year, the summer season and months of September and October, the Company every year puts on sale, May 1st, at all coupon ticket offices in the United States and Canada, round trip tickets to

DENVER, COLORADO SPRINGS AND PUEBLO,

At reduced rates, good returning, until October 31st. Also to San Francisco, for parties of ten or more, good for ninety days, at great reduction from regular fares.

REMEMBER, this is the most direct route for all points WEST and SOUTHWEST. For further information, time-tables, maps or folders, call upon or address

R. R. CABLE,

Vice-Prest and Gen'l Man'gr, Chicago.

JAPANESE ART AT THE CINCINNATI EXPOSITION.

There is no more interesting exhibit in the Exposition than to be found just outside the gallery of paintings, in the south end of the corridor. It is truly a feast to the eye and the mind, and both quaint and curious to the great mass of our people, no matter how cultivated they may be. It is only a few years since Japan knew there was a world outside of their own country, inhabited by a people not barbarians, and we need not be very old to remember when the ports of her sea-coast towns were opened to foreigners. And to-day, to very many good folk, the almond-eyed, yellow-skinned little Jap means nothing more than a filthy little heathen. If the present exhibit does nothing more, it will open the eyes and understandings of many as to the perfection to which art in bronzes, copper, china, clay and painting was brought hundreds of years ago. A pair of craquelles vases—that rare, rich old work that puzzles and mortifies our potters abroad and at home—were manufactured about the time Columbus was sailing the salt seas in search of the Atlantis of the ancients. Four hundred years ago Jap artists turned out craquelles that defy age and time. No blur in color, no crack where a crack should not be, but perfect in form and finish as when taken from the kiln. In bronze there is a lightness and delicacy of design that is hoped for in this nineteenth century by Caucasians. When you were a young idea in school you remember the heads of this distinct race, and with what a feeling of pride your heart swelled at the printed declaration that you belonged to the highest type of the human race. You, maybe, never expected then to have Egypt and Japan and China poking in to suggest "this world is old." At the gates leading into this Japanese department are two large bronze lanterns delicately wrought and magnificent specimens of this art in the finest form, dark brown, almost black, standing three feet high, bearing on the standard the imperial crest of Japan, the chrysanthemum. These antiques are from the temple of Nikko, a mausoleum for the Mikados, but built by Hitetada in honor of his dead father, Icyasu. To the right on entering is a most beautiful antique screen of satin, the design a cock on a drum in gold embroidery. In the days when the hated European was a stranger in the land, these gorgeous coverings were sent enveloping gifts by the rich to each other. An antique fagedesba lacquer lunch cabinet is one of the gems in the collection, and is looked upon with longing eyes by connoisseurs. It contains Saki flask-boxes for sweetmeats, and a number of tiny dishes. The decoration is gold lacquer, presenting a graceful floral design. A large Satsuma jar painted in gold and bright colors represents warriors in battle—quoting from the catalogue, "A Scene in the Life of the Forty Ronins." One of the most exquisite gems is a vase cloisonne on copper. The ground is light blue, over which, like fleecy clouds on a summer sky, lies the pure white lily of the valley, in its sheathing of green leaves. Bands of color encircle the top and base, and the whole effect is chaste in the extreme.

Two ravishing vases are certainly the work of inspiration. Did the sad-eyed Mongolian see in his dreams our "Rockies," their snows, and the playful, treacherous black bear? A leaden sky, pines and rocks snow-covered, cascades that look as if in leaping they might turn to ice, and the perfection of bears and cubs. The nicety of the work of Japanese artisans is wonderfully apparent in this pair of vases. The open mouth of mother bruin shows within her red tongue, and

there isn't a tiny pine branch that does not stand out against the winter sky as true to nature as ever painter limned on canvas. One little wretch lies on his back kicking up his toes just as the children see their gambols at the Zoo. These are choice specimens of modern art. A Satsuma censer is worthy of careful scrutiny from the delicacy and care in design. Three grotesque young Japs are represented, one astride a drum, the other two steadying it on either side. The robes of these youths are as intricate in design and vivid in coloring as the fabrics they are to represent, the gorgeous brocade of the country. When our young women learn to take the circumference of a gold quarter, and on china cover it with a half dozen distinct colors, each a perfect design, then they will be creeping along to the excellence of the Mongolian. A handsome Owari vase of Tokio has flying ducks on delicate ground. This brings us to another perfection of Japanese art. When a goose or a duck, a stork or a blackbird starts, he flies; he doesn't lumber along through the azure like the theatre angels flit across the stage, by wires, but he sails the empyrean a thing of life. These are but a few of the gems in this unique collection, and from time to time we purpose describing the finest and rarest in the exhibit.—*Cincinnati Commercial*.

TELEGRAPHIC PHOTOGRAPHY.

The apparatus of which a short account is here given is a development of that exhibited at a meeting of the Physical Society on February 26.

In its new form the receiving instrument contains a platinum-covered brass cylinder, two inches long and seven-eighth inches in diameter, mounted horizontally upon a spindle seven inches long. One of the projecting ends of the spindle has a screw cut upon it of sixty-four threads to the inch; the other end is left plain. The spindle revolves in two bearings, the distance between which is equal to twice the length of the cylinder, and one of the bearings has an inside screw corresponding to that upon the spindle. A platinum point attached to an elastic brass arm, which is fixed midway between the two bearings, presses upon the surface of the cylinder. The positive pole of a local battery is connected through a set of resistance coils with the platinum point, and the negative point with the metal cylinder. If now a piece of paper which has been soaked in a solution of iodide of potassium be wrapped round the cylinder and the cylinder be caused to rotate, the platinum point will, so long as the current passes, trace a very close spiral brown line upon the paper. When the strength of the line is diminished, the intensity of the current is enfeebled; when the current is interrupted, the line is broken off, and the paper retains its original whiteness. It is evident that by regulating the intensity of the line thus traced and introducing gaps in the proper places, any design or picture might be represented upon the paper. The current is varied to produce the desired result simply by the action of light.

At the transmitting station is a second battery, which is connected with the receiving instrument, so that the current passes through the prepared paper in the opposite direction to that of the current from the local battery; and in the circuit of the second battery is introduced the transmitting instrument. The current passes through a selenium cell inclosed in a small rectangular box, from which all light is excluded except such as can pass through a pinhole drilled in the side of the box opposite to the cell. By means of a mechanical arrangement which, though very simple, cannot easily be described without a drawing, the box is connected with a horizontal spindle in such a manner that each revolution of the spindle causes the box to move perpendicularly up and down through a distance of 2 inches, and, at the same time, laterally through 1-64 inch. If now a picture of not more than 2 inches square is projected by a lens upon that side of the box which contains the pinhole, it is clear that by turning the spindle the pinhole may be caused to pass successively over every point of the focused image. The box while moving in the upward direction travels through space at precisely the same rate as any point on the surface of the receiving cylinder when the spindles of the two instruments are revolving synchronously; the downward movement is rapid, and is not concerned in the transmission of the picture.

The instruments are prepared for work as previously described, the variable resistance at the receiving station being so adjusted that when the pinhole is in the brightest part of the focused picture and the illumination of the selenium at its maximum, the two currents passing through the paper exactly balance each other. When this is the case the platinum point is not capable of making any mark. But when the pinhole is in a darker part of the picture the resistance of

the selenium is increased, the current from the local battery predominates, and the point traces a brown line upon the paper. In this manner a picture may be formed by the receiver which, if the instrument were perfect, would be a counterpart of that projected upon the transmitter.

Designs such as butterflies and horses painted in black upon a transparent ground, and projected by a magic lantern, are reproduced by the above described arrangement far more perfectly than by the original form of the instrument. By employing the square box to contain the selenium cell instead of the former cylindrical arrangement, several advantages are secured; *e. g.*, the light always falls perpendicularly upon the cell (instead of obliquely during the greater part of a rotation); also, the whole of the cell is illuminated during the passage of the pinhole over the bright parts of the picture, and thus there is greater uniformity in the action of the light upon the resistance of the selenium. But with a more delicate selenium cell and more sensitive paper there is little doubt that its efficiency might be almost indefinitely increased.—*Shelford Bidwell, M. A., in Engineering.*

THE CONSUMPTION OF CARMINE.

It having been asserted, on apparently good authority, that the consumption of carmine is decreasing in consequence of competition with aniline colors, we have visited some of the principal consumers as well as the several manufacturers of carmine in order to ascertain the truth of the statement. Our inquiries among manufacturers of ink for lithographers' use elicited the information that pure carmine was being superseded to some extent by "cardinal red," a cheaper form of carmine, but the aniline colors had not been, and would probably not be resorted to, as, from the nature of their composition, they were unsuited to this class of work. In the manufacture of ordinary printing inks, anilines are being largely used, and while the use of carmine is growing, the increase is not so great as would be the case without competition from the cheaper colors. On the whole no falling off in the consumption of carmine could be discovered in this branch of trade, and the most that can be said is that the use of this color is not increasing in proportion to the growth of the industry. The use of carmine in writing ink is and always has been limited as compared with lithographing and printing inks. Pure carmine ink was rarely made by manufacturers, owing to the high cost of carmine, and at present there are but two manufacturers, so far as we can ascertain, making it. Aniline colors enter largely into this class of inks, but before these colors were known various adulterants of carmine were used. The production of carmine ink is to-day no greater than when the color cost \$4 per ounce. Its greatest competitor is a scarlet ink, the composition of which is a secret, but which we suspect owes its color to aniline. We find that where permanency of color is desired, both in printing and writing inks, pure carmine still holds first place, and will, no doubt, continue to do so until some equally brilliant and permanent color is discovered.—*Oil, Paint and Drug Reporter.*

—MANUFACTURED BY—

RUSSELL PAPER CO., Lawrence, Mass. BULKLEY, DUNTON & CO., 74 John St., N.Y.

I WILL INSURE YOUR HOGS.

Dr. Jos. Haas' Hog AND Poultry Remedy.

THE ONLY SCIENTIFIC SWINE REMEDY COMPOUNDED.

Read My Propositions!

First—When my remedy is used as a preventive, I will insure hogs by the head for a year, and will make a deposit of money to make such insurance good. If any hogs die, they will be paid for from such deposit; you can refer to my bankers, Messrs. Fletcher & Sharpe, Indianapolis, Ind., for my standing financially.

Second—Where my expenses are paid, I will visit herds of not less than 100, and I will arrest the disease among them, or forfeit \$500.

Third—After hogs have been regulated with my remedy, I guarantee that the annual cost of feeding will not exceed 25 cents per head. Furthermore, that the increase of actual flesh will far more than pay for the remedy used.

SEND FOR IT!

It is not an experiment, but an established success. Remember, it is the only remedy that is used and indorsed by the great breeders of this country and England. It owes its great fame to its genuine merits, and every mail brings tidings of its good work. The evidence in its favor is so strong the most scientific men of the country have pronounced it the conqueror of this disease. It is gaining ground daily, and no hog raiser up with the times can do without it. It is not only a protection against disease, but it is a powerful appetizer.

Inquire of my Bankers, Messrs. Fletcher & Sharpe, Indianapolis, Ind., for my standing. Will make a deposit of necessary money, and will pay for all that die.

SEND FOR IT! I GUARANTEE IT WILL STOP THE COUGH AMONG HOGS

and put them in fine condition for fattening. It will expel the poison from their system, tone them up, and invigorate them generally. It will make them thrive so as to astonish you. It will pay such a large per cent. on the investment, that no one can afford to be without it.

REFER TO ANY WELL KNOWN BREEDER OR SHIPPER IN ANY PART OF THE COUNTRY.

J. H. Whetstone, druggist, Iowa City, says: "The Haas Remedy sells better and with less effort than any proprietary medicine I have ever undertaken to sell of any kind. We have nothing in stock to-day but what I would rather do without than the Haas Remedy."

C. H. Klauenburg, druggist, Carlinville, Ill., says: "The Remedy sells well, and is the best on earth."

O. A. Elliott, druggist, Russell, Ia., says: "The Remedy has given good satisfaction here."

J. N. Penn & Sons, druggists, Sydney, Ia., say: "We hear good reports from what we have sold."

Ed. J. Brown, druggist, Edina, Mo., says: "It has given general satisfaction in this county. Have sold \$1,000 worth in three months. Have tested its merits myself."

J. M. Kufer, druggist, Macomb, Ill., bought \$400 lot of Haas' Remedy and sold \$300 of it in seven weeks.

SEND FOR IT. LIBERAL TERMS TO THE TRADE. \$1.00, \$2.50, and \$5.00 packages. I can work up a trade for you. Terms, Circulars, &c., on application.

W. Harris, druggist, Storm Lake, Ia., says: "It has given splendid satisfaction."

J. C. Eacker, druggist, Elliott, Ia., says: "Have sold several orders and in every case satisfaction given."

A. P. Gano, druggist, Missouri City, Mo., says: "It will be a popular article in our drug market."

J. W. Wyman, druggist, Unionville, Ia., says: "It cures chicken cholera every time."

Smith & Thomas, druggists, Platte City, Mo., say: "It gives good satisfaction here."

Duffield & Harlan, druggists, Centerville, Ia., say: "It is entirely satisfactory."

Dr. S. S. Clayberg, druggist, Avon, Ill., says: "It gives good satisfaction here."

Melle Williams, druggist, Taylorville, Ill., says: "Have a good trade. It gives splendid satisfaction."

JOS. HAAS, V. S., INDIANAPOLIS, IND.

A. J. HOLMAN & CO., American Bible Warehouse, ARCH ST., PHILADELPHIA.

STAFFORD'S UNIVERSAL WRITING INK!

A PERFECT BLACK WRITING FLUID.

It contains no gum, and flows very freely, making a smooth, even mark.

It positively will not corrode Steel Pens.

Writes darker than any known ink, and turns at once jet black.

Being a perfect chemical solution, it cannot thicken or deposit a sediment.

Never moulds in any climate. Freezing does not injure it.

Never changes in color or consistency while in use in the inkstand.

Resists Acids. Is more permanent than any other ink.

It will be found more economical than any other ink, as it can be used to the last drop.

One of the most valuable and remarkable features of this Ink is the extreme rapidity with which it dries on the paper, it being seldom necessary to use a blotter. This quality should recommend it to bookkeepers.

In the United States, this Ink has completely superseded the old fashioned pale black inks, and has to a great extent taken the place of the faint green writing fluids.

Mr. J. ADEE HEPWITH, the eminent English Chemist, says :

"I find S. S. Stafford's Universal Ink to be proof against all acids; and, from my knowledge of its ingredients, I believe it to be the most permanent ink in existence, as it cannot rust out like other inks that are prepared from galls and iron. As it seems to be entirely free from any tendency to thicken or corrode steel pens, and is **BLACK AT ONCE**, I cannot but regard its invention as a valuable discovery."

S. S. STAFFORD, Chemist, No. 218 PEARL STREET, NEW YORK.

AIKIN, LAMBERT & CO.,

HAS BEEN AWARDED THE

GRAND PRIZE GOLD MEDAL

AND RECOMMENDED THE

Medal of Honor and Perfection

At PARIS, 1878,

This being the HIGHEST and ONLY AWARD given for

LINEN RECORD & LEDGER PAPER.

—A SPECIALTY.—

THIS Paper has received THE HIGHEST PREMIUM over all others from the Cincinnati Industrial Exhibition, Massachusetts Charitable Mechanics' Association, Franklin Institute of Philadelphia, Louisville Exposition, Medal and diploma from United States Centennial Commission, Medal of Progress American Institute, 1877, and Medal of Improvement and Progress, Boston, 1878. Its

PRINCIPAL ADVANTAGES

are as follows:—1. It contains more LINEN than any other Ledger Paper, has a longer fibre, and is, consequently, tougher. 2. Having a harder and better body, it frays less in erasure, so that by simply using the rubber after the eraser, the ink is prevented from spreading. 3. It is more uniform in Weight Color and Finish. 4. It never cockles if properly bound. 5. Its chemical action upon ink is such that it both writes and rules up better. For proof of the foregoing, refer to a large number of Stationers, Bookbinders, Bookkeepers, and Recorders, who have given it, after a severe test, the preference over all others. This paper is Double Sized, and will stand any climate or the most acid of fluid inks.

Send for sample sheet, ERASE and REWRITE FOUR TIMES on same spot.
Each sheet is water-marked with name and date.

TRADE NOTES FROM CHICAGO.

[FROM OUR REGULAR CORRESPONDENT.]

WESTERN OFFICE LOCKWOOD PRESS,
8 LAKESIDE BUILDING, CHICAGO, ILL., Oct. 8, 1881.

The Livermore Pen has a new and better office. Increasing demand for the pen has long required a change, but it was not effected until last week. Now Mr. Taylor has, at 38 Madison street, one of the neatest and best locations in Chicago—that long occupied by the Economy Company. "Not so many people pass here," says Taylor, "but more come in," which is to the point. Mr. T. has also been doing quite a fine trade with his exhibit at the Exposition, where my friend E. K. Cass does the honors in the evenings, with satisfaction and profit.

Faxon, fine paper hangings, has been installed since July 1 at 212 Wabash avenue, and is doing well in his line.

The United States Tablet and Ticket Company is always introducing some new design of fancy card. The latest is the "Dolly" fan, a very pretty little design in shaded tints. The company will soon have ready for the market something new and exquisite in design folders. The Butler Paper Company is now handling these goods.

John R. Barrett has recently made some changes in his establishment, now occupying two floors. A different arrangement of the office has allowed him to utilize the hall space in his factory. He has just issued some of the neatest samples of punched and eyeletted cards, in graded gauges, I have yet seen. The same cards illustrate his facilities and skill in corner-rounding.

Noyes, of Dictionary-holder fame, comes out now with a new and light white wire costing sled, very cheap, light and graceful—an excellent holiday article.

A fire last week "did things up brown," for E. L. Stevenson & Co. and Burkhardt Brothers, who occupy jointly the store at 39 Monroe street. By the fire Stevenson suffered the loss of some pictures, &c., but the Burkhardts were the heaviest losers, most of their large stock of brushes, imported and domestic, having been destroyed. They are nearly covered by insurance.

John Wilkinson is spreading out for the fall trade. He is now Western agent for Milton Bradley & Co.'s toys and games. The new catalogue is very fine. He also deals largely in Crandall's blocks. His large and beautiful exhibit at the State Exposition includes fishing

tackle, jig-saws, games, toys, tool chests and holiday goods.

A new house in an industry new to this city is George W. King, 38 Madison street. He keeps a full line of fine papeteries, &c., but his specialty is fancy cards for collectors and others. He sells to the retail trade in small quantities, and his lines include many goods never before seen here. He is sole agent for Robinson Engraving Company's steel-plate folders, &c., besides a full line of Robinson's beautifully colored Christmas and birthday cards on steel grounds. The "Favorite" card album is a neat and durable novelty offered by him to the trade. Altogether, Mr. King's enterprise promises well.

H. S. Goodspeed & Co. have now an office in Lakeside Building. Their specialty is Abbott's Pictorial New Testament.

The Chicago Toy Company is a newly established firm here, which enters the field with flying colors at 84 Wabash avenue. The building is a fine, large one, six stories high, with basement. The first floor is devoted to dolls, games and imported fancy goods; on the second floor are found tin, britannia and wooden toys, velocipedes, wagons and doll buggies; the third floor is given up to ten-cent counter goods and fancy wares; while the fourth, fifth and sixth floors contain the reserve stock. The stock carried is very large, and the company, besides importing largely, is manufacturers' agent for many of the lines carried in stock. The enterprise is an extensive one and promises well. The catalogue is now ready for the trade.

G. B. H.

CINCINNATI COLATURES.

[FROM OUR REGULAR CORRESPONDENT.]

CINCINNATI, O., October 10, 1881.

Those who dreaded a slackness of fall and winter business have set their dread forward into next spring. An experience of the fall and winter trade has entirely dissipated their fears on that score, and yet anxious minds tiptoe it and look over the shoulders of fall and winter, whose qualities have already developed themselves—and looking over the shoulders of the present and coming season, try to divine what spring has in store for them hidden in the folds of her glowing robe. They can't make it out, and therefore, like true weeping philosophers, draw the conclusion that the thing concealed in the vestments of spring is not a prize for them. But all this is not very distressing at the present moment. People are all too busy to waste time dreaming or droning. All thoughts and energies are so engrossed in discharging the duties required by the present moment as to

leave little leisure or inclination to look after or look at dragons in the future.

To come down to facts, business in the stationers' line goes with a whirl in Cincinnati that all but makes one's head swim merely looking on. How those men who are in the very midst of it manage to keep smiling faces is more than I can clearly make out. But they smile on as they whirl on.

There's Howard Hinkle, of Van Antwerp, Bragg & Co., viewed up in his wild cherry pen amid piled up precipes of school books and blank books, and under shadows of boxes in the side street that rise up in tiers between his windows and the light of heaven. There he sits at his desk, coat off, both hands busy, apparently writing his signature—to cash receipts no doubt. Workmen and clerks troop to him for orders. He answers them in pleasant monosyllables, now over his right shoulder, now over his left, never stopping that work of attaching his signature to one by one of the heap of supposable receipts lying before him.

I went over to J. R. Mills' establishment to see how that looked, and the house looked as if it was full of athletes training for a walking match. "Billy" O'Neil always was a fast walker, but I never saw him get around as spry as he did that day; and as to climbing a step-ladder swiftly, I don't think a squirrel could beat him—not that afternoon. Said I to myself: "Is this thing epidemic, or is it only Hinkle and Mills that have the complaint?"

I started out and discovered that I had somehow caught the infection, for I went like a racer up hill and peeped in at Carpenter's only to see the same sort of performance there.

I glanced across the street to see how it was at Stewart's and Louis Snider's Sons, and I could only see store boxes piled high on the sidewalk, obscuring their doors, and a street full of draymen jostling each other and looking daggers, but too busy to swear.

I crossed over and took a look along the sidewalk down the narrow lane between the store boxes and the warerooms only to see a wilderness of trucks hustling heavy boxes out and building up the pile as fast as the draymen took it down. I saw a man try to stop Stewart as he was coming up street, but it was no use. Stewart rushed to his desk, commenced burrowing into a pile of papers heaped up there—dry and dreary looking they were to me, but he seemed to take delight in them.

Snider's Sons constitute a double team, but the whole team was busy.

George Stevens had a house full of customers, and the clerks seemed to skate about like water spiders. John Beeler, who is with Stevens,

stopped to take breath, and in the meantime told me he thought there was a splendid opening here for an engraver doing fancy stationery for the trade—turning out fresh, tasteful, timely designs for writing paper, envelopes, cards and the like.

C. F. Bradley had not escaped the epidemic; neither has Pounsford nor C. F. Woodrow.

It would be difficult to picture the scene at Robert Clarke's book store. There is always a study of faces in the customers there, and the moving maze of clerks present the best example I can find of orderly confusion. One thinks them all tangled up sometimes, but presently they all come out of it each one in his right place.

If I had skipped Peter G. Thompson, with his fine book shop at the entrance of the Arcade, and the half-score of knicknackeries in the Arcade itself, I should only have stopped one step sooner than I have stopped, for I can't catalogue them. They are all enjoying the same epidemic.

Now, what in sober earnest is the meaning of this panorama I have been trying to unroll before you? It means: First, business is very brisk; second, people are laying in their holiday goods; third, they are buying a great deal of them; fourth, that they choose superior goods; fifth, that they have begun fully a month earlier than has been their wont; sixth, that they seem to have done this to get the selection from a full stock of goods; seventh, that the hurt of dry weather and short crops has been exaggerated.

The above is not my solitary individual diagnosis of the case. In these views I am sustained by numerous and able supporters.

By the way, the dry weather has compelled such of the paper mills in the Cincinnati district as were not provided with steam as well as with water-power to run only part of the time. This is a vexation when orders come in so freely.

I heard one or two complaints that collections were not always as easy as one could wish. I hope that this is exceptional. It is an interesting point to watch.

Stock gambling has struck some Cincinnati operators hard since I last wrote—in fact, made awful examples of them. Their regular line of business is not in the paper trade, however.

The Exposition closed on last Saturday. It was made up of several expositions; the horticultural display, for instance, gorgeous in detail, and as landscape gardening; the display of Cincinnati art and useful pottery, remarkable for variety, superior quality and large quantity; the exhibit of physical and chemical apparatus never before equaled here, certainly never west of the mountains; the natural history department, of which I have spoken. It was almost bare of goods in the stationer's line. Lockwood's class journals exhibited in the unclassified class, without competition, took an "honorable mention," which is a rather rare distinction, as no premiums are offered in this class.

In spite of a bad season, and, above all, the national bereavement, the attendance by railway was greater than that of last year. There was, however, an immense falling off in the city attendance; nevertheless, the Exposition paid.

Since my last the following-named trade visitors have given Cincinnati a passing call: A. W. Holmes, Readers and Writers Economy Company; Mr. Hayman, Eagle Pencil Company; J. B. Gunn, for E. Faber; W. T. Bursall, of H. Limberger; Mr. Giles, of Estabrook Pen Company; T. J. James, of Daniel Slote & Co.; Mr. Mabie, of Mabie, Todd & Co.; Mr. Baggot, of Celluloid Company, all from New York. There were also William H. Chamberlin, of Z. Crane, Jr., &

Brother, Dalton, Mass.; W. A. Gilliland, of Mittineaque, Mass., for Southworth Company; A. D. Freeman, of Culver, Page, Hoynes & Co., Chicago; B. H. Stone, of pocketbook fame, of Langfeld, Turner & Andrews, Philadelphia.

PRINCE WILLIAM.

ADELAIDE INTERNATIONAL EXHIBITION.

[FROM OUR AUSTRALIAN CORRESPONDENT.]

ADELAIDE, South Australia, Sept. 1, 1881.

The exhibits in the classes which come under stationery are large and interesting. The judges are gentlemen of much experience and have afforded general satisfaction. The chairman, E. Spiller, government printer, South Australia, was nominated by the representative of the United States exhibitors in this section, and they are under obligations to him for courtesy and impartiality. The following are the awards:

The chromograph, second order of merit, G. H. Cargeeg, of Adelaide, South Australia. "A useful apparatus for obtaining fac-similes of writings and drawings."

Paper ruling, commercial bookbinding, marbling, Whillas & Ormiston, Adelaide, second degree of merit. "Finishing and ruling good." Letterpress binding, first order of merit. "General leather goods very good, both in finish and price."

Commercial bookbinding, J. Williams, Adelaide, first order of merit. "Specimens submitted particularly firm."

Copperplate printing, J. Williams, Adelaide, first order of merit.

Specimens of colored lithographic labels and showcards, Barrow & King, Adelaide. "Design and work superior; price cheap." First order of merit.

Printing ink, Braddock & Sons, Port Adelaide, second order of merit.

Rubber stamp, Frearson & Brother, Adelaide, second order of merit. "Rubber soft, and price somewhat high;" steel-plate engraving, first order of merit; wood engraving, third order of merit.

British Mercantile Gazette, G. W. Plant, London. "A useful compendium of mercantile information."

Russell's Common-Sense Binder, Williams, Stillings & Co., New York, second order of merit. "A very useful handy companion for the library and reading-room office."

Graphite pencils, Dixon Crucible Company, Jersey, first order of merit. "A large comprehensive collection of superior American pencils; lead of very uniform grain and superior quality."

Pencil rubber ink eraser, A. W. Faber, New York, first order of merit. "India-rubber bands, white bands particularly good."

Gold pens and pencil cases, Leroy W. Fairchild, New York, first order of merit. "Finish and style good; novelty of pattern and design excellent."

Magill patent binder and staple press, Holmes, Booth & Haydens, America, honorable mention. "Very useful for office purposes."

American Mail and other publications, Howard Lockwood, New York, first order of merit. "As specimens of typography and wood engraving the jury consider the above unequaled in the sphere."

Black and colored printing inks, H. D. Wade & Co., New York, first order of merit. "Colors excellent and of good quality; black fair quality."

Office gum, marking ink, &c., household dyes and stationers' sundries, first order of merit, D. Judson & Son, London.

Writing inks and woodstains, H. C. Stephens, London, first order of merit. "Fine comprehensive exhibit; articles of superior quality."

Circular-pointed pens, C. Brandener & Co., Birmingham, first order of merit; J. Gillott & Sons, first order of merit. "Carelessly shown." Leonardt & Co., Birmingham, collection of cheap steel pens. "Exhibit very comprehensive, price low." Second order of merit.

Collection of note papers, playing-cards, new correspondence cards, and general fancy stationery, C. Goodall & Son, London, first order of merit. "Design, quality and style excellent."

Printed music and specimens of lithography, Augener & Co., London, first order of merit.

The typograph, Zincatto & Wolff, London, first order of merit. "A simple, cheap and effective apparatus for rapidly multiplying circulars, music, &c., in permanent inks."

Patent rubber stamps, W. S. Clark & Sons, Melbourne, first order of merit. "Several novel designs; rubber firm; price moderate."

Wood engraving, S. Calvert, Melbourne, first order of merit. "The specimens display very excellent taste, and are superior in execution." Special mention.

Heraldic designs, W. H. Usher, of Little Collins street, Melbourne, first order of merit. "Design, coloring and execution very good."

Calligraphy, J. S. Barker, Albany, New York, honorable mention. "An admirable specimen of skill."

Government Printing Office, Adelaide, South Australia. "The undersigned wish to express their opinion as to the special excellence of specimens of bookbinding and lithography shown by this department, and they would suggest that a service medal be, if possible, awarded to the chief of the department."

In Horology.—The time globe exhibited by Juvet & Co., Canajoharie, N. Y., was adjudged as follows: "This firm has exhibited specimens of their time globes or universal timekeepers. These may be regarded as cosmographic clocks. The globe is twelve inches in diameter, and revolves on its own axis in twenty-four hours by means of chronometer movement in its interior, or it may be turned by hand independently of the works without detriment to them. It gives the local time on a glass dial affixed to the North Pole, and the time of any other part of the world may be ascertained by merely glancing on the equatorial line. In order to test the accuracy of its movements, we had one of the clocks sent to a local manufacturer, where it was under our supervision for several weeks. We found its timekeeping qualities accurate, and the mechanism simple and easily renewed. It is evidently an invention which required much time and anxiety in its completion, and we recommend it for first order of merit and gold medal; and the inventor, L. P. Juvet, for special commendation."

This means another gold medal to Mr. Juvet, the inventor.

In the class which includes education John A. Hartley, Inspector-General of Schools, South Australia, was judge on behalf of the United States. That gentleman made the following report, which signifies a third gold medal to Juvet & Co., Canajoharie, N. Y.

School Globes.—I have examined the various globes exhibited by Juvet & Co., and consider them well adapted for school use. The "Tellurium" is a neat and well-made model, by which the various points in connection with the seasons, time, &c., can be readily and clearly explained, and for this purpose I have not seen a better. I recommend first degree of merit for school globes.

The jurors on appliances relating to the corn trade, awarded Howard Lockwood honorable mention for the *Millers' Journal*, New York, adding, "It is a useful paper."

Remington Patent Type Writer, U. S. A., recommended for honorable mention.

The jurors on musical instruments made the following awards:

Augener & Co., London.—Musical publications, edited by Pauer. All Messrs. Augeners' editions commend themselves to the jury for excellence of printing, superior paper and choice selections. All the classical works are carefully arranged, and the children's editions are worthy of special mention, as placing the works of the great masters within the grasp of the young. We would award this publication first order of merit.

The publications of the "Lockwood Press" were also honored by the judges on music. They wrote as follows:

Musical and Dramatic Courier, New York.—We would specially mention this literary organ as a use-

(Continued on Page 555.)

OLD BERKSHIRE MILLS

DALTON, MASS., U. S. A.

One party writes: "The two hundred RECORD BOOKS, for 83 of the 99 Counties, now on exhibition at the Iowa State Fair, at Des Moines; and all, but four (?) of them, made from your 'OLD BERKSHIRE MILLS LINEN LEDGER,' Medium, 40lb., make a splendid show."

[The above cut is a fac-simile of the wrapper used on the Linen Ledger Paper.]

We will pay for any book rejected on account of fault in the paper. Send for Samples, test them in comparison, and see that your books are made from paper thus water-marked.

In a separate Package of uniform size, is one-eighth of a thousand Envelopes corresponding in tint and quality to the paper.

EXTRA QUALITY.

In attractive Lavender Colored Boxes containing one-quarter ream of Extra Fine Paper each, with contents printed in red. Corresponding to this, in like Boxes, are Envelopes to match.

All this Stationery may be relied on to be according to representation. It is suited to the tastes of the most select trade.

In addition to the above lines, our other Specialties are put up with care, in attractive and substantial form. Goods can be seen at the Mill, or New York Office, 47 Beekman Street. GEO. B. HURD, Gen'l Agent.

SEASON 1881-1882.

SEASON 1881-1882.

L. PRANG & CO.'S

Christmas and New Year Cards

ANNOUNCEMENT.

WE hereby beg leave to announce to the trade the completion of our line of Christmas and New Year Cards for this season, for which our agents are now soliciting orders. The extent of our list, the originality, and especially the American character of our designs, together with the great care taken in their execution, will, we have no doubt, secure for our goods the popularity which they have enjoyed heretofore. The efforts we have made to secure the highest excellence, is attested by the names of some of the artists whose designs have been reproduced. We would only name Elihu Vedder, C. C. Coleman, Thomas Moran, Miss Rosina Emmett, Miss Dora Wheeler, Mrs. O. E. Whitney, W. H. Gibson, F. S. Church, R. G. Birch, &c. That a due regard has been paid for the quality of the literary matter, in connection with these designs, is shown by the fact that many of the designs are accompanied by original poems from writers of note, such as Mrs. Celia Thaxter and Mrs. Emily Shaw Forman.

The great increase of our manufacturing facilities, secured by additions to our building nearly doubling our floor space and by the adding of new machinery, will place us in a position to fill orders promptly. Still we would request dealers to place their orders as early as possible, so as to still further enable us to make timely preparation for prompt deliveries.

Our Cards will, as heretofore, be put up in envelopes containing twelve Cards, unless otherwise stated on our price lists.

We furnish envelopes without extra charge for all our Christmas and New Year Cards, for which the list price is \$1.80 per set, and over. Our silk-fringed Cards will no doubt be in great demand this season. We have made ample preparation to furnish these in time and have made arrangements with our manufacturers for the best quality of silk fringes. We would call special attention to the excellence of our fringed Cards and the novelties in colors and style of fringes we offer for this season.

A marked and attractive feature of our cards are the elegantly ornamented backs.

All our fringed Christmas and New Year Cards are furnished with envelopes and protectors, so as to insure safe transportation in the mails.

It will be impossible to embody our whole list in the space of the advertisement, and we will therefore merely give a general outline of the variety offered.

PRANG'S PRIZE CHRISTMAS CARDS.

COMPETITION OF 1881.

These are the Cards selected by the judges in the second competition for four designs of Christmas Cards, for which we offered \$2,000 in prizes of \$1,000, \$500, \$300 and \$200 respectively. At the recommendation of the judges, Messrs. COLEMAN, LAFARGE, and WHITE, the prize for third best Card was increased to \$500. Mrs. CELIA THAXTER has written appropriate verses for each of the designs.

- 1st Prize Card (\$1,000), by Elihu Vedder. Size, $6\frac{1}{4} \times 9$ inches; price \$1 each. Same card with silk fringe, cord and tassels, price \$1.50 each.
- 2d Prize Card (\$500), by Miss Dora Wheeler. Size, 7×9 inches; price 75c. each. Same card with silk fringe, cord and tassels, price \$1.25 each.
- 3d Prize Card (\$500), by C. C. Coleman. Size, 7×9 inches; price 75c. each. Same card with silk fringe, cord and tassels, price \$1.25 each.
- 4th Prize Card (\$200), by Miss Rosina Emmett. Size, $5\frac{1}{4} \times 9\frac{1}{4}$ inches; price 60c. each. Same card with silk fringe, cord and tassels, price \$1 each.

The Prize Cards can also be had mounted on heavy board with gilt beveled edges.

We beg to call attention also to the following publications for New Year and Christmas:

"Goddess Fortune" New Year Card, by Elihu Vedder. Size, $6\frac{1}{4} \times 8\frac{1}{4}$ inches; price 75c. each. Same card with silk fringe, cord and tassels, price \$1.25 each.
 "Christmas Dove." Size, $7 \times 9\frac{1}{2}$. This card is in the same style as the success of the last Easter season, the "Easter Dove" Price 60c. each. Same card with silk fringe, cord and tassels, price \$1 each.

Our Regular Line of Christmas Cards consists, among others, of the following Series:

Nos. 901, 902, 903, 906, 909, 910. Floral designs ranging in price from 20c. to \$1.20 per set of 12.

Nos. 904, 905. Humorous Cat and Frog Designs, 60c. per set.

No. 907 is a new series of Horseshoe designs, 75c. per set.

Nos. 920 and 929. Children's designs, at \$2.40 and \$3.60 per set.

No. 922. Shells of Ocean, with figures, \$2.40 per set.

No. 924. Fans with silk fringes, \$3 per set.

No. 933. Bric-a-Brac designs, very rich, \$6 per set, and many others.

We offer a similar assortment of New Year Cards, but would call special attention to No. 1330, a new folding calendar, at \$2.40 per set. Most of the Numbers can be had with silk fringes ranging in price from \$2.25 to \$12 per set. Stock will be ready for delivery September 15.

Besides the above, attention is called to our New Birthday Cards, Scripture Texts Cards, New Panels, New Water Colors, by Thomas Moran, and other publications. Our line of Thanksgiving Day Cards will also be shown by our agents.

REGULAR DISCOUNT TO THE TRADE. PRICE LISTS AND CATALOGUES SENT ON APPLICATION.

HOLYOKE, MASS., were among the pioneers in the W. C. Paper trade.

and their goods, from the start, were distinguished for their fine quality and the superior style in which they were wrapped. Their example has been approved and imitated by a swarm of competitors, who have flooded the market with inferior goods, put up in packages of 600 to 800 sheets, misleading the unwary, and sold at apparently lower figures; but the trade and consumers generally recognize the fact that a good article, honestly put up, in 1,000 sheet packages, is the most profitable both for use and for sale. Their goods are all guaranteed 1,000 sheets to package, and **no short count**. No wood is used in any of these papers, but they are made of the very best stock in the market.

THE "MEDICATED BOUDOIR" BRAND

Has no equal for weight, strength, softness, and color, and commands the front place with "fine retail trade." Present reduced quotations furnished on application.

AMBERG'S PATENT NEW "PEERLESS" LETTER FILE.

The Best in the World.

The Best in the World.

Manufactured by CAMERON, AMBERG & CO., New York, Chicago and London.

Sold by all leading Stationers throughout the World.

Trade Topics.**NEW PATENTS.**

No. 247,331. Sketching Apparatus.—Richard D. Gallagher, Omaha, Neb.

No. 247,336. Panoramic Toy.—William F. George, New York, N. Y.

No. 247,363. Manufacture of Embossed Lace Paper.—Charles Lang, Brooklyn, N. Y., assignor to Wal-demar A. Walther, same place.

1. As a new article of manufacture, embossed lace paper, the perforations of which have smooth edges on both sides of the paper. 2. A within-described process for producing the required perforations in lace paper, by exposing the paper to an abrading or rubbing action. 3. The combination of an engraved roller, brush and mechanism for imparting a revolving motion to these devices. 4. The combination of the engraved roller, mechanism for imparting a revolving motion to this roller, the brush, and mechanism for imparting a lateral as well as a revolving motion to this brush. 5. The combination of the engraved roller, the brush, the embossing-roller and mechanism for imparting a revolving motion to each of these devices.

No. 247,397. Addressing Machine.—Samuel P. Pant-on, Milton, and Alfred F. Holmes, Napanee, On-tario, Canada. Filed December 23, 1879.

No. 247,400. Machine for Cutting Paper.—Edward Partington, Manchester, county of Lancaster, England. Filed June 29, 1881. (No model.)

The web or webs are led between rotary slit-ters, which are adjustable, so as to split the web into strips of any desired width. Part of the strips are led to one rotary transverse cutter and the other part to another. These cutters run, or may run at different speeds, so that the sheets of paper severed may be of different lengths.

No. 247,418. Process of Producing Printing and other Surfaces.—Jos. J. Sachs, Woodlands, Sun-bury-on-Thames, county of Middlesex, England. Patented in England January 21, 1881.

1. A mode of producing surfaces for printing, stamping or embossing, consisting in first pro-duc-ing a design in wax and asphaltum or equiv-alent on paper or other flexible material, then causing this to adhere to the surface to be etched with the designed surface next to the latter, and finally etching the plate through the paper or other flexible material. 2. The mode of pro-duc-ing surfaces for printing, stamping or em-bossing, first printing the design by photogra-phy on a sensitized gelatine layer on paper or equivalent material, then covering this surface with wax and asphaltum or equivalent, swelling the portions of the gelatine not acted upon by light, removing the wax-asphaltum layer from such swelled portions, and then causing the ma-terial with the prepared surface to adhere to the plate to be etched, and etching the latter through the paper or equivalent material.

No. 247,420. Check File.—Herschel V. Sanford, Mil-ledgeville, Ga.

No. 247,441. Cuff Box.—Isaac P. Turner, Troy, N. Y., assignor to Shepard Tappen, same place.

No. 247,463. Printing Machine.—Robert J. Johnston, Brooklyn, assignor of one-half to John Wilkinson, New York, N. Y.

No. 247,467. Book Clasp.—Henry T. Morse, Boston, Mass., assignor to Michael R. Gately, same place.

A clasp the swinging member of which is composed of a hinged arm and a plate pivoted thereto, provided with orifices or equivalent de-vices arranged at different distances from the pivot of the plate and adapted to engage with the other member of the clasp.

Trade Gossip.

All new goods and designs which are not, strictly speaking, "Novelties" will be noticed under this head. The trade are requested to forward descriptions with samples in order to secure proper notice.

Asbury G. Blair, printer, Waynesboro, Pa., has failed.

C. L. Rounds, Kalamazoo, Mich., was in town this week.

John Schofield, newsdealer, &c., Peoria, Ill., has sold out.

J. Q. Lindsley, dealer in notions, Greenville, Pa., is closing out.

E. M. Wood, newsdealer, &c., Quincy, Mich., has sold out to Hugh C. Alger.

N. Deane, fancy goods dealer, Manchester, N. H., is advertising to sell out.

Samuel P. Town, printer, Philadelphia, Pa., is advertised to be sold out by the sheriff.

Horvüleur & Levy, dealers in fancy goods, Portland, Ore., have dissolved partnership.

Sleight & Howard, booksellers and stationers, Richmond, Va., have dissolved partnership.

Clay, Allen & George, publishers of the *Wood River News*, Bellevue, O., have dissolved partnership.

Drake, Cook & Hall, printers, Elizabeth, N. J., have dissolved partnership. Cook & Hall succeed.

H. B. Cartwright, stationer, &c., Santa Fe, New Mexico, has been succeeded by Jacob Weitmer.

The Hektograph Company has added to its business a department for the manufacture of printers' rollers.

J. S. Caldwell, bookseller and stationer, Belfast, Me., has admitted A. Clements to partnership. Style, J. S. Caldwell & Co.

Ristine, Conrad & Wheeler, publishers of the *Sun-Review*, Galion, O., have dissolved partnership. Wheeler & Conrad succeed.

E. C. Palmer & Co., New Orleans, have opened a New York office at 44 Duane street, Ira L. & C. Beebe representing them.

The new fancy goods catalogue of Charles J. Cohen, Philadelphia, is very comprehensive, and should be in the hands of buyers of holiday goods.

The St. Louis Paper Company has issued a new catalogue and price list of papers, cards and printers' stationery, and invites inquiry for samples.

Alexander Olivotti has withdrawn from the firm of Olivotti Brothers, dealers in fancy goods, New York city. The firm's style is now L. & E. Olivotti Brothers.

J. H. Bufford's Sons have at present orders for 250,000 of their crayon portraits of the late President, and also orders for the same number of those of Mrs. Garfield.

The ninth annual report of the trustees of the Fairmount Park Association has been forwarded by the printers, Wm. F. Murphy's Sons, Philadelphia. The report is an interesting resumé of the work of the association, and is well printed.

Hart & Co., stationers, &c., Toronto, Ont., announce that they have leased the commodious warehouses, 31 and 33 King street, West, and will continue the principal specialties and the branches of business lately conducted by Hart & Rawlinson.

Henry Levy & Son, 477 Broadway, invite the attention of the trade to a writing desk that they handle, and which can be retailed at one dollar. It is an excellent article for the price, and it is said that a good profit can be realized by selling it at that rate. The firm's full line of writing desks is very extensive, includes many new and elegant designs in wood, leather and papier maché. Among the work-boxes shown is a line in polished wood, neatly decorated on the exterior, with interior compartments and four pieces of fittings. The full line of work-boxes consist of fifty-two varieties. The house also shows an elegant line of dolls which are said to be the best and showiest of the kind in the market; they are sold to the trade at a price that leaves a fair margin for profit. The firm has recently received new and elegantly decorated china ware, part of which was designed and specially made for the house. Those designs which are after green moss and crystallized snow patterns, and ornamented with pansies, roses and ivy leaves, are extremely pretty, and include baskets, card receivers, ash cups, mantel and sideboard ornaments. Among other new things shown is a line of Carthaginian ware, elegant in design and appearance, and moderate in price. It is made expressly for the house, and it is claimed that it cannot be had elsewhere.

M. A. Reay shows three elegant series of New Year's calling cards. Each series consists of nine designs, which come both in square and turned-down corners. All of the designs are neat, attractive and rich, yet chaste, and it is asserted that there is nothing in the market to excel them, or perhaps to equal them. No. 1 series is in silver and colors; No. 2 is in gold and colors; while series No. 3 is altogether in colors, and is particularly handsome. The illuminated part of each card of this series which appears on the turned-down corner is embossed, and shows a tropical bird resting on a bough. Some of the designs of the other two series are also embossed. There is also shown a new series of menu cards in eight designs, illuminated and plain. This house is the well-known depot for John A. Lowell & Co.'s steel plate engraved Christmas and New Year's cards, which this year include several new folders, showing exquisite designs in children's heads. The No. "2B" series of Lowell's New Year calling cards contain beautiful designs, representing scenes applicable to New Year's Day; the No. "1B" also shows a well selected arrangement of scenes. All of the goods above mentioned make a very artistic and recherché selection, and it is claimed are suitable to all tastes.

The James & Holstrom piano ranks high as a musical instrument, and although not known so well as those produced by larger houses, it is said to be equal to any piano in the market. It is lower priced than others of equal quality, and when it becomes more known will probably be rated as one of the best. Attention is invited to advertisement in another column.

L. Prang & Co. are actively engaged in the preparation of their new valentine card line for 1882. The sample editions are being pushed vigorously, and it is expected that they will be ready before November 15. The line promises to be an unusually fine one, and will include about twenty different series put up in various ways.

S. D. Andrus, of the Denver Journal of Commerce Publishing Company, Denver, Col., has sold out his interest to H. S. Wicks.

George Curry, fancy goods dealer, Cobourg, Ontario, Can., has been partly burned out.

Geo. Everall, printer, Buton, Ontario, has assigned in trust.

A. E. Burgess, dealer in fancy goods, Geneva, N. Y., has sold out.

B. E. Pike, with M. A. Reay, has just returned from a successful Western trip.

Sherman & Kent, printers, Seneca Falls, N. Y., have dissolved partnership.

W. H. Ransford, bookseller and stationer, Clinton, Ont., has assigned in trust.

A. D. Yoran, stationer, &c., Tom's River, N. J., has sold out to W. J. Harrison.

H. P. Guyton & Co., stationers, Baltimore, Md., have sold out to Harvest Osbourn.

The stock of J. L. Damon, publisher of the *Weekly Record*, Lynn, has been attached.

Mantz & Healy, printers, Rochester, N. Y., have dissolved partnership. E. R. Mantz continues.

Mark Roylance & Co., New York, have issued an illustrated price list of specimens of wood engraving.

H. H. Sylvester, publisher of the *Advocate*, Provincetown, Mass., has sold out to N. T. Freeman.

The style of the Teller Printing Company, publisher of the *North Park Miner*, Teller, Col., has been changed to T. L. McKee.

Finley & Johnson, publishers of the *Independent*, Alamosa, Col., have dissolved partnership. The style now is T. M. Finley & Co.

C. S. Adams desires to notify to the trade that he still represents Willy Wallach, notwithstanding representations to the contrary made by salesmen of rival houses.

"A Prince of Breffny" is the title of a new novel by Thomas P. May, and published by T. B. Peterson & Brothers, Philadelphia. Why will publishers put their stamp on such a book?

The firm of Linton, MacFadden & Co., paper and paper stock dealers, Philadelphia, Pa., has been dissolved by the retirement of Patrick Dickie. The remaining partners continue under the same style.

Notices in THE AMERICAN STATIONER of goods offered by J. H. Bufford's Sons have brought this week to that firm orders from London, England; Sydney, South Australia; and Auckland, New Zealand. Comment is unnecessary.

Albert E. Tolly, with John R. Edwards, blank book manufacturers, of Baltimore, was in Philadelphia last week, where he has been doing remarkably well, taking many orders for perforated tablets and manilla order books.

Charles J. Cohen, Philadelphia, has recently opened a large invoice of foreign scrap books. These goods are in twelve or fifteen styles, and are said to be equal in finish and quality to American goods, while the prices are 25 to 30 per cent. less. The trade should write for samples.

Henry Bainbridge and wife have just returned from a two weeks' visit to Canada and the West, during which time they went to Buffalo, Niagara Falls, Toronto, Montreal, Detroit, Chicago and Milwaukee. Mr. Bainbridge speaks in glowing terms of Chicago as a second New York. He also has a good word to say of the hotel accommodations of Montreal. It has been about ten years since Mr. Bainbridge took a trip of this character.

T. M. Simpson, Philadelphia, has made a special reputation for advertising cards, of which he has a fine stock. He has just added to his assortment a series of four different designs in imitation of etchings, representing animals and

landscapes; another series is of eight designs of flowers, and another of four designs of roses in brilliant colors. There are also four designs, ladies and cupids, gold ground of very fine effect. This firm has also an excellent selection of reward of merit cards for schools. The firm makes a specialty of silk-fringed cards and also fringes cards for the trade at very low prices.

W. Waters & Son are prepared to fill orders for their patent daily and monthly pad calendars, which have been improved very much in style, and are much more attractive than formerly. This calendar is so arranged that one leaf serves for two days, thus saving one-half of the paper required for an ordinary daily calendar. The calendar is fastened to a substantial back, which is ornamented in gold and colors embossed. The usual discounts are allowed to the trade.

Brown & Sanson have just brought out a very beautiful line of plush card cases in three tints, red, blue and old gold, with heavy silk cord and tassels to form the handle. They find it difficult to keep up with their orders in this line of goods as well as in other handsome lines of holiday goods which the house is getting out, so that they find it necessary to run their factory at night. They appear to be busy and in good spirits, anticipating a continued good fall business.

S. S. Stafford's "Railway" copying ink is used by leading railroad and transportation companies. This ink will copy from thirty to forty impressions in ordinary letterpress. This house shows specimens of letterpress copy written with the "violet black" copying ink taken two years after, which are as perfect as if taken just after being written. Both of these inks are having a large sale in England and are said to be superseding Stephens', Arnold's and Jackson's long known inks.

L. Frang & Co. are beginning to deliver their fall goods, and are pushing them as fast as possible. On account of the extraordinary demand for Christmas cards the production of the firm's new birthday cards had to be temporarily suspended, but will be resumed very soon. Thanksgiving and birth announcement cards are ready and are proving a great success. Orders for them are heavy.

Among McCarty & Hasberg's stock are some neat specialties in the way of low-priced goods. The house also shows elegant lines of writing desks, albums, inkstands, portmonnaies, pocket-books, card cases, cigar cases, baskets and plush and leather goods, all of which include novelties suitable for holiday gifts. These goods should be seen by the trade before they place their orders.

Potsdamer & Co. have completed their almanac for 1882. The design is in very good taste and superior to anything of the kind which has yet been brought out. Its execution is a true *chef d'œuvre* of lithographic etching, in imitation of steel engraving. This almanac, which Potsdamer & Co. present to their friends, is a very fine specimen of the class of work in which they excel.

The firm of George E. Selleck, printer and stationer, Brattleboro, Vt., has been changed to Selleck & Davis.

Spaulding & Tewksbury, wholesale paper dealers, Boston, Mass., have dissolved partnership.

James Torrens, publisher of the *Journal*, Evans, Col., has sold out to G. B. Caldwell.

John Flett, stationer, &c., Carleton Place, Ontario, has assigned in trust.

THOS. SINCLAIR & SON, LITHOGRAPHIC ESTABLISHMENT, 506 & 508 NORTH STREET, PHILADELPHIA, PA.

IN ANSWER TO NUMEROUS INQUIRIES FOR OUR PRIZE ADVERTISING CARDS, WE WISH TO INFORM THE TRADE THAT THEY CAN BE HAD ONLY OF MESSRS. A. M. COLLINS, COPE & CO., 37 BEEKMAN STREET, NEW YORK, WHO WILL FURNISH SAMPLES AND PRICE LISTS. THE STATIONER.

DEVOTED TO THE INTERESTS OF THE

Stationery and Fancy Goods Trades.

WEEKLY---\$2.00 PER ANNUM.

Single Copies - - - - 10 Cents.

NEW YORK, THURSDAY, OCTOBER 13, 1881.

Advertisements cannot be received for insertion in the current week later than 12 M. on Wednesday. The charge for advertising is 25 cents a line, each insertion. Special terms for standing and displayed advertisements to be had on application.

This journal aims to be a medium of information for and a representative of the interests of every one connected with the stationery and fancy goods trades. It contains a full and trustworthy survey of the market for stationery in this country, in all cases giving the actual prices at which goods can be bought of importers and jobbers in this city, together with a detailed account of novelties in the trade, patents relating to stationery, and current items of interest. A review of foreign markets and accounts of movements abroad will also be furnished, and no pains will be spared to make THE STATIONER a thorough and complete exponent of the trade.

Subscription and postage for Great Britain, per annum..... 12s.

Any information our readers may wish to obtain shall be cheerfully given, and prompt replies will be made to all inquiries addressed to us on any subjects of interest to the trade.

Communications on all trade matters are earnestly solicited. Address

HOWARD LOCKWOOD, Pres. and Treas.

Subscribers to THE STATIONER can be supplied with the best cloth binder in the market. Deliverable at the publication office. Price, fifty cents.

Readers of this paper who avail themselves of the information obtained from its columns, by advertisement or otherwise, are requested to notify their correspondents of the source of their information.

TRADE holds good here and everywhere throughout the country. Those who, Ven- nor-like, made predictions which came to naught, are now prognosticating of the later future. The season just at hand has too promising a forecaste.

BEFORE us is a letter, in which the writer, after discussing certain matters of business, remarks: "We couldn't carry on business without THE STATIONER." Well, we don't think that he or any other enterprising stationer could. And that is just the feature in which we try to make THE STATIONER most prominent.

SHANGHAI is a familiar word to many of our readers. To some people it is more associated with a familiar domestic fowl, but everybody knows that it is the name of a city in China. It is to be made still more remarkable, however, from the fact, as stated by the United States Consul at that point, that an International Exhibition is to be held there—the first, we believe, ever attempted on Chinese soil. It may be that we shall have more to learn—certainly more to see—than ever before of Chinese skill and handicraft at such an exhibition; but there still remains the suggestion that perhaps it would do American manufacturers some good to be represented there. Is it not worth considering?

A HINT to non-advertisers. An item appears in THE STATIONER this week which is suggestive to every person who, while anxious to extend his trade, is slow to avail himself of the privileges afforded for so doing. A leading firm informs us that it has secured several important foreign orders simply by advertising in this paper. If the influence thus exerted is sufficient to command a foreign trade, what must it be with those who command the home markets. THE STATIONER reaches every nook and corner in this country and is well known and circulated abroad. It is independent, but true to the interests it represents, and they who neglect the opportunities which it offers have only themselves to thank if they fail to become known and do not secure the commercial position to which they aspire. A word to the wise should suffice.

GERMAN as well as English trade journals have been impressed with the report of the proceedings of the last meeting of the American Paper-Makers' Association. The *Papier Zeitung* of Berlin, commenting upon the subject of the development of the American export trade, says: "The measures proposed are no doubt practical and well calculated to attain the end in view, but we nevertheless are of the opinion that we need not apprehend much American competition abroad as long as the United States increase in prosperity at such a colossal rate as at present, whereby they are able to absorb the notable increase of production. But as soon as the current of immigration into that country diminishes, it is to be expected that

exportation will be resorted to with redoubled vigor, and that we shall then have to engage in a fierce struggle with them. For this struggle we ought to get ready even now, by improving our mills and procuring new fields to sell in abroad, if need be, with government aid (federal subsidies)." The *Papier Zeitung*, in sympathy with a plan formed for diverting emigration to other countries than to the United States, seems to think that some of the danger of American competition will be thereby averted, and, therefore, lends its aid to the project for establishing German colonies in South America. It would seem that any plan for depleting population would be as injurious to Germany as the absorption of Germans in our population, but it is otherwise considered, for the reason that in South America, German autonomy will be better preserved, and that the emigrants will cling to old habits, and will buy from the home country. This is supposing that Yankee enterprise is going to stand idle, neglectful of the advantages which it can derive in a country that is being opened up and developed under changed circumstances. We would be more likely to find a chance for extending our influence and doing a better business. But it matters little where the stream of emigration flows when it comes to the question if we intend to let the trade of the world go and to take an inferior position in the commercial polity. Whether here or there, in the Eastern or Western hemisphere, we shall certainly hold a larger interest in the affairs of trade, and claim and secure a position not inferior to that of any other nation. To that we shall come.

ANSWERS TO CORRESPONDENTS.

H. S. D.—Asks for address of manufacturers of fringes and tassels for fringing, &c., Christmas cards.

Ans.—We are not acquainted with the houses, but are told that Julius Urban, 288 Bowery, New York, and Levi Brothers, 19 Greene street, New York, make them.

N. B. & Co. ask for address of Blue Vein Slate Company.

Ans.—Slatington, Pa.

J. C. B.—Wants to know who makes carbon papers.

Ans.—Cooke & Cobb, 10 Broadway, New York; A. L. Shipman & Son, 10 Murray street, New York, and Field & Tuer, London.

NOTE.—The manufacturer of Hoyt's A. B. C. letter file is asked to send his address to the editor of THE STATIONER.—ED.

Among the visiting members of the trade in the city this week were, H. H. Shepard, Kansas City; Mr. Cooke, of Terry & Cooke, Brownsville, Texas; Mr. Jansen, of Jansen, McClurg & Co., Chicago; S. D. Palmer, of Palmer & Sloan, Marshalltown, Iowa; John F. Joy, Philadelphia, Pa.; George F. Connor, Bridgeport, Conn.; Mr. Hansen, of Hansen & Troall, Taunton, Mass.; and Edwin Quin, Milwaukee, Wis.

An ancient papyrus manuscript has been forwarded from Bakshali, in the Mardan Tahsil, Peshawar district, India. It is in very bad condition, being for the most part like tinder. In some of its pages, however, the character—which much resembles Prakit—is quite clear.

(Correspondence—Continued from Page 552.)

full exponent of the various improvements made from time to time in musical instruments generally, as well as of the progress of the great art, both in music and the drama in the United States. It is a weekly periodical, beautifully printed and illustrated. Price, 5c. We would award this publication first order of merit.

The exhibits of the "Lockwood Press" have not yet been judged in the Fine Arts department, where they are competing in photo-electrotyping and wood-engraving, where, no doubt, high honors await them.

The exhibit of Moses Warren & Co., Chicago, Ill.—"Hill's Manual of Social and Business Forms"—has not been judged, but will be pronounced upon next week.

The magnificent samples of ledger and record papers, sent by Byron Weston, of Dalton, Mass., were placed this day in the exhibition building—they are simply superior to anything of the kind ever landed in Australia, and doubtless will obtain the gold medal. Had Mr. Weston exhibited at Sydney and Melbourne, there can be no doubt that these papers would have secured the highest honors.

Communications, catalogues, &c., may be addressed to Box 337, G. P. O. Sydney; or to Box 86, G. P. O. Melbourne; or Box 162, G. P. O. Adelaide, for the Australian correspondent of THE AMERICAN STATIONER. JNO. HOGAN.

TRADE IN THE MIAMI VALLEY.

[FROM OUR REGULAR CORRESPONDENT.]

DAYTON, O., October 8, 1881.

Abundant rains in the last week or two have made everything fresh and green again. Factories depending on water-power can again make full time. The newly planted wheat is coming up in good shape and promises a heavy crop and acreage for next year.

Trade in every branch seems to be in good condition. Clothiers have complained a little on account of the unusually warm weather; but what would America be if our grumbling privilege was taken away?

Travelers from Eastern houses have not been very plenty in the past few days. Representatives of the Japanese Fan Company, Nagle & Co., and G. W. Cross have put in an appearance, and all say that trade was never better. Wright, of Phil Hake, was here and displayed some elegant novelties in Christmas, New Year and birthday cards and valentines; they were so pretty that they sold themselves, dispensing with the services of a salesman.

While on the subject of pretty goods, I wonder if Eastern houses would take a little advice from a wild Westerner. Always get your samples up in the very best and neatest style possible, whatever line of goods you represent. Whenever Alfred, of Ward & Parsons, Raisbeck or Wright, of Phil Hake, asks you to look at their line of samples, you know beforehand that you will see nice goods with their best foot forward. One good buyer told the writer that he went to see a line of Ward & Parsons' samples a few days ago and couldn't help buying.

A salesman of one of the largest stationery houses in New York was in our city a few weeks ago, and carried samples that looked like as if they might have been selected at random in a junk shop on Ann street, in an old greasy valise that Noah discarded when he got back to Ararat. He did not sell anything, and ought not to.

I think that the trade throughout this section find the demand is much greater for good goods than ever before. In albums, papeteries, frames and autograph albums this is especially the case,

and I don't think any one is shedding tears on account of it.

A run through the different stationery establishments did not develop anything especially new.

Reynolds is pushed night and day; cannot get stock to make up his work from.

Holden is just back from the East, and is letting his light shine among the trade through the means of a stenographer.

H. E. Mead & Co. are selling all the paper they can get.

R. H. Rogers & Co. report trade as something phenomenal, and are busy in their factory making oyster buckets and paper plates.

Among the manufacturers of paper mill machinery in our city trade is immense. Stout, Mills & Temple say that they are forty days behind orders. W. P. Callahan is in the same predicament. They are supplying beating engines for several new mills in course of erection throughout the
MIAMI VALLEY.

OBITUARY.

LAWRENCE R. FITZGERALD.

Lawrence R. Fitzgerald, a successful publisher of this city, died suddenly of hemorrhage at his residence in this city last Monday. He had been an invalid for some time, but it was not thought that his illness would so soon prove fatal. Mr. Fitzgerald was born in Philadelphia in 1826. He received a thorough training in the mercantile business when quite young, and in 1840 was a salesman with Burgess & Zieber. In 1842 Mr. Burgess came to New York and organized the firm of Burgess, Stringer & Co., booksellers and publishers, where for many years did business where the *Herald* building now stands. Mr. Fitzgerald accompanied him, and remained with that firm until Mr. Burgess retired from it in 1846. Mr. Burgess then formed a new copartnership with Ransom Garrett, under the firm name of Burgess & Garrett, and Mr. Fitzgerald was engaged with this new firm until 1850, when Mr. Burgess retired. Mr. Garrett then associated himself with William B. Dick and Mr. Fitzgerald, under the firm name of Garrett & Co. In 1857 Mr. Garrett retired, and the business has been carried on ever since by the firm of Dick & Fitzgerald. His funeral will take place to-morrow from the residence of his brother, Wilson Fitzgerald, at Camden, N. J.

Dr. J. G. HOLLAND.

Dr. Josiah Gilbert Holland, since 1870 the editor of *Scribner's Monthly*, and one of the most celebrated writers which this country has produced, died suddenly in his residence, at No. 46 Park avenue, yesterday morning. Dr. Holland had been troubled with heart disease for the last six years, but for two years he had suffered no particular inconvenience. On Tuesday afternoon he was apparently in good health, and went to the office of the *Century*, which is the new name of *Scribner's Monthly*, and wrote his "Topics of the Times." Yesterday morning he awoke at about 5 o'clock and told his wife that he was about to arise. As he spoke he began to breathe heavily, and Mrs. Holland, knowing from experience that this was a sign of returning heart trouble, sent at once for a physician. Before the physician arrived Dr. Holland died. The two daughters of the Doctor were summoned in time to be present at the death-bed of their father. The action of the heart seemed to have stopped suddenly, and to all appearances Dr. Holland died a painless death. He leaves a widow, one of the Chapin family, of Springfield, Mass., whom he married at the age of 22, two unmarried daughters, and one son, Theodore

Holland, who is a member of the Senior Class at Yale.

Josiah Gilbert Holland was born at Belcher-town, Hampshire county, Mass., July 24, 1819. His early struggles were such as were inseparable from the life of a poor boy. He worked in a factory, and occupied his spare time in studying. Obligated to relinquish the idea of going through college, he studied medicine, but his literary bent could not be controlled by the duties of a profession, and he devoted his efforts to literature with that success which has made him famous. He was for some years associate editor of the *Springfield Republican*. While connected with that paper, he had become a popular lecturer, and he finally withdrew from newspaper life in 1867. After making a tour abroad, he became editor of *Scribner's Monthly*. He had accepted the position of editor-in-chief of the new *Century Magazine*, the first number of which is announced to appear next week.

The funeral will take place from his late residence, No. 46 Park avenue, to-morrow at 2 o'clock P. M., and the remains will be interred at Springfield, Mass., on Saturday.

Market Review.

OFFICE OF THE AMERICAN STATIONER, }
WEDNESDAY, October 12, 1881. }

THE MONEY MARKET.—There has been an easier money market this week. At times during the week a commission above legal interest was demanded on time loans and prime mercantile discounts, but the rate now is nominally 5@6 per cent. on the latter and 6 per cent., sharp, on the former. The same causes noted last week were responsible for the condition of things that existed during the earlier portion of the week under review, viz.: Large demands from the West and South for funds to move the crops, the undue requirements of speculators engaged in bulling the produce markets, and local speculative manipulation. The government bond market was weak and irregular, as a consequence of the tightness in money. In railroad mortgages the dealings fell off very greatly during the latter part of the week, and prices generally were downward. The market for foreign exchange was quiet and about steady, commercial bills continuing scarce. The posted rates for prime bankers' sterling were unchanged; the actual rates are \$4.78½@4.79 for 60-day and \$4.82½@4.83 for demand bills. Cable transfers are \$4.89½@4.84 and prime commercial bills \$4.76½@4.77.

THE PAPER MARKET.—The general condition of the market has undergone no material change the last week, trade continuing fairly active, and prices being on a firm footing. The demand for book papers has been running very full recently, as many of the book publishers have been in the market for stock for their holiday publications. The events of the past few weeks have created an unusual demand for news, some manufacturers being called upon to increase their deliveries to those with whom they were under contract. Manillas have been in very good movement, prices firmer, with considerable scarcity of light-weight papers. Straw wrappings and straw boards are also in demand, supplies of the former being very light and prices firm.

THE STATIONERY MARKET.—Although there is some report of trade having slackened a little in some branches of the stationery business, yet, as a general thing, business is in a highly prosperous condition. The regular fall trade is now pretty well advanced, but there are still large quantities of goods going forward to the principal distributing points. Mail orders are as large as ever, and come in quite freely for all kinds. There is nothing approaching to stagnation in any branch of the trade. All appear to be steadily engaged, taking such stock as the demands of their trade require, and disposing of their goods nearly as fast as supplied. There might possibly be more snap to trade, with larger profits, but we cannot imagine a more healthy state of affairs, or one that is surer of being productive of good results, than that which now exists. Prices hold very steady, and in most cases are firm.

THE AMERICAN NEWS COMPANY'S

Thirteenth Edition Catalogue and Price List of

FOREIGN **STATIONERY** DOMESTIC

PREFACE.

WE present you, with especial pleasure, the Thirteenth Edition of our Catalogue and Price List of Stationery Articles.

We feel gratified to know, from the increasing interest the Trade has taken in each succeeding Edition, and from the **attempts made at imitating us in style and appearance**, that our book has attained the position of the **STANDARD for PRICES**, and a **GUIDE for SELECTION**, and as such we shall continue to maintain it.

On perusal of the present Edition, it will be found that we have added a number of entirely new lines—increased others where the manufacturers have enlarged their assortment—dropped such as have become superseded by superior styles—and have improved the quality of all of our own make.

Additional lines will be added as the demand for such or the varied interests of our customers seem to call for.

We desire to call attention to the fact that in our Catalogue we quote no article except such as we intend to have always in stock, but any article not quoted on our list may be ordered of us, and, if obtainable, will be supplied at lowest possible price; the importance of this will be appreciated by dealers who desire their orders filled promptly and complete.

We deliver all goods in the city or at the depots, free of cartage.

The present edition will show important reductions on former rates in the prices of many lines of goods, and we are constantly revising our quotations to keep them in accordance with the fluctuations of the market; **ALL IMPORTANT CHANGES WILL BE COMMUNICATED TO REGULAR CUSTOMERS BY SPECIAL CIRCULARS**, which, when added to our Catalogue, will make the same a correct and valuable book of reference.

We make no charge for cases or packing.

Newspaper and Periodical Price List will be sent on application.

Catalogue and Price List of the Book Department will be sent on application.

Cigar Price List will be sent on application.

THE AMERICAN NEWS COMPANY,

STATIONERY DEPARTMENT.

N. B.—A Supplement to the present edition will be issued in a few days.

For 1881—2

Is now ready for distribution. It is richly illustrated with new wood-cuts expressly got up for this edition, and its contents will be found of interest to every dealer in Stationery, Books, Newspapers, Notions, Drugs, Etc., Etc.

IT WILL BE MAILED

POSTAL SAVINGS BANKS.

It is understood that Postmaster-General James will in his report to Congress strongly urge the adoption of a system of postal savings banks on the general but lately improved plan of the English Government. The great end accomplished by the national institution is the ample security afforded and the prompt convertibility of the postal credit into money, two ends which are not possible under any system of private savings banks. There are now over 43,000 postmasters in the United States, and each post office may be made a place of saving deposit. At present savings banks are limited to the large cities and towns, and these banks in these places, being all private corporations, cannot offer to depositors security, nor can they permit depositors to draw their money on deposit. Four-fifths of the people of the country are, from their location, cut off from all the advantages of savings banks. The United States has the official machinery for extending the savings banks system to all parts of the country, and gather into the treasury all the savings of the people. There is hardly a village in the land where there are not some people who will gladly avail themselves of the opportunity to put their savings into the form of a national security. The cost of handling this money will be a very small percentage of the whole, and the Government can have the use of the millions at a low rate of interest.

A few days ago Alexander Agar was appointed receiver of the J. J. Parsons Bookbinding Company, of 132 and 134 William street. The difficulties of this firm were precipitated by the failure several months ago of John W. Lovell, the book publisher, who was indebted to the company about \$7,600. When the creditors of Mr. Lovell were called upon to grant an extension, the Bookbinding Company having negotiated most of the paper it had received from Mr. Lovell, took up a portion of the paper, and upon the non-payment of the remainder, some of the creditors of the Bookbinding Company applied to the court for the appointment of a receiver, which was granted. A statement of the affairs of the company is being prepared, and until this is done nothing definite can be said, but it is believed that its liabilities will not fall short of its assets over \$3,000.

Philip J. Cozans, who was with Willy Wallach for several years up to about eighteen months ago, has returned to the same employment.

Catalogue, . . . \$2.00

Lockwood's Directory of the Paper
Trade, . . . \$2.00

EVERY STATIONER wants the above Works for the

FOLLOWING REASONS:

The Price Book and Catalogue furnishes Stationers information which, if they have at all, is usually scattered and never right at hand when wanted. As a book of immediate reference it will be found invaluable.

The Directory of Paper Manufacturers and Jobbers is a guide to **First Hands** in the Paper Trade. Any one who uses it intelligently can save many times its cost at once.

THE PRICE BOOK is deliverable in the cities of New York, Boston, Philadelphia, Chicago, Detroit and St. Louis, where purchasers can have it packed with any goods they may be buying.

THE DIRECTORY is sent post-paid.

All Stationers who wish to keep
ABREAST WITH THE TIMES,
must own these two books.

**STEEL PLATE PORTRAITS.**

Ralph Trautmann, 312 Broadway, New York, has introduced a series of steel plate portraits which are some of the most successful introductions this year.

The Presidential series comprises our Presidents from Washington to Arthur, with facsimiles of their autographs, and an index card, giving dates valuable as historical references.

The series of authors and poets comprise Bryant, Burns, Byron, Dickens, Emerson, Goldsmith, Halleck, Holmes, Hood, Longfellow, Lowell, Moore, Poe, Saxe, Scott, Shakespeare, Taylor, Tennyson, Whittier and Willis—also with autographs, index cards and dates.

Each series is inclosed in a handsome leather portfolio, and is a beautiful and instructive ornament for the centre table, library or parlor. The portraits are cabinet size, on ivory finished, round-cornered cards, with gold beveled edges.

In order to bring them within the reach of all, the retail price of each series is made very low. Mr. Trautmann has also recently published the portraits of Mrs. Garfield and Queen Victoria. The Queen's message of condolence to Mrs. Garfield is neatly engraved under her portrait. The pictures of Garfield, Arthur, Mrs. Garfield and the Queen can be obtained separate. The demand for these pictures has taxed Mr. Trautmann's facilities to the utmost.

XMAS CARD PRIZE COMPETITION.

L. Prang & Co. have announced the terms of their third prize competition of Christmas card designs. There will be four prizes, called artists' prizes, the first of \$1,000, the second of \$500, the third of \$300, and the fourth of \$200, awarded to the four designs receiving the highest vote, not, as in 1880, of regularly appointed judges, but of artists and art critics. In addition to this there will be four other prizes of precisely the same amount as the artists' prizes, entitled popular prizes. As to the artists' prizes, non-transferable tickets, granting gratuitous admission, will be forwarded to every known artist and the leading art critics in the cities of New York, Philadelphia and Boston. On each of these tickets there will be four blank spaces on which the artist or critic will, during the first six days of the exhibition, insert the numbers of the designs which he selects for the various prizes in their order. At the end of the sixth day, the tickets having been every day collected, the votes are to be counted by a responsible committee of citizens, and the results determined in the following manner: The plurality of votes given to designs for the first prize will determine the award of this prize. The votes for the first prize given to other designs will then be counted with the votes given for the second prize; and the plurality of all these will determine the second prize. The remaining votes for the first and second prizes given to other designs will then be counted with the votes given for the third prize, and the plurality of all these will determine the third prize. The remaining votes for the first, second and third prizes given to other designs will then be counted with the votes given for the fourth prize, and the plurality of all these will determine the fourth prize.

For the popular prizes, every visitor paying the entrance fee of 25 cents will receive a ticket with a blank space, to be filled out with the number of a design and deposited by him at the door when leaving the exhibition. These votes will be counted under the control of the committee, and the plurality, after six days'

SANFORD'S INKS

MUCILAGE AND SEALING WAX.

IN ALL VARIETIES.—

SANFORD MFG. CO., CHICAGO, Ills.

SPECIMEN CIRCULAR SENT UPON APPLICATION.

MENTION THIS PAPER.

voting, will determine the first prize, which will be published on the morning of the seventh day, together with the first artists' prize. The designs announced as having obtained a prize are henceforth withdrawn from further competition. The popular voting to determine the second prize will then continue for two days, when the plurality of all the votes so far given, except those for the successful first prize design, will determine the second prize, which will be published on the morning of the ninth day, together with the second artists' prize. Two days' further voting will determine in like manner the third prize, and this will be published on the morning of the eleventh day, together with the third artists' prize. One day's further voting will determine in like manner the fourth prize,

and this will be published on the morning of the twelfth day, together with the fourth artists' prize.

The exhibition will open in the American Art Gallery, New York, on Monday, November 14, and will continue until Saturday evening, November 26, Prang & Co. reserving the right to one week's exhibition in Boston, after the close of the New York exhibition, of all the designs.

Louis Prang and wife left Liverpool on Tuesday last per steamer Sardinia, which vessel goes direct to Quebec. They are expected at Boston about October 25. They were absent about three months, during which time they visited England, France and Germany. Their trip combined business and pleasure.

PERFECTED STYLOGRAPHIC.

The original and genuine Pen. Warranted the best made. Thirteen Patents granted to A. T. CROSS, the last, June 20, 1880, being the most important and giving the name **Perfected**.

MAXIMUM.—Holds most ink of any pen made; tines the hand less than smaller barrels. Fits Hambley's Pocket. Same price as Long.

LONG.—The famous Desk Pen. Extra Long. Holds most ink, except the **Maximum**.

SHORT.—Most widely known and sold heretofore; but **Maximum** and **Long** are much better for desk or Hambley's Pocket. So this will be largely superseded.

GIANT, with Cord and Gold Ring, same price as **Short**.

LITTLE GIANT
Plain, \$3.00.
All Styles up to
\$4.50.

LITTLE GIANT.
The Ladies'
Favorite.

Thirteen patents granted; seven more applied for; more genuine improvements; better record; more styles; larger stock; more thoroughly protected by patents than all rivals combined. Dealers and agents supplied with wood, glass and paper signs, placards, circulars, leaflets and cuts. We make both the largest and smallest Pens, all of which will have the new improvements. Sole Agents for the World. See Descriptive Circulars.

BERLIN, GER. | NEW YORK

Stock of new Christmas, Birthday, Sunday School, Advertising Cards, etc.

TRADE NOTICE.

These Celebrated Pens are now manufactured with unprecedented skill and care. They have the distinction—which has now become historical—of being the FIRST SUCCESSFUL AMERICAN STEEL PENS, also of having been so popular as to have been counterfeited to the extent of HUNDREDS OF THOUSANDS of gross, which was stopped by judgments of the SUPREME COURT of NEW YORK and of the UNITED STATES COURTS.

The genuine Pens are now sold direct to the Trade by the proprietors,

THE WASHINGTON MEDALLION PEN CO.,

229 Broadway, N. Y.

MAGIC POLE

(PATENTED JULY 12, 1881.)

For taking down from HIGH Piles, or Shelves, or putting up in HIGH places, Boxes having a projecting lid.

For Envelopes it is invaluable.

Price, \$1.00 each; per dozen, \$9.00. One MAGIC POLE sent anywhere by Express for \$1.25, except the Pacific Slope.

Williamson-Stewart Paper Co.
ST. LOUIS, MO.

Agents Wanted in all large Cities.

The J. W. Stoakes Automatic Shading PEN.

FOR PLAIN, FANCY AND ORNAMENTAL
LETTERING.

WASHINGTON, D. C., March, 1880.

I desire to say that the "Shading Pen" invented by Mr. STOKES meets a want long felt by penmen. The work done by it is perfect in line and shade. The rapidity with which lettering is done, aside from the beauty of the work, is enough to recommend it for general use.

H. A. WHITNEY, Asst Cashier, U. S. Treasury.

U. S. ENGINEER'S OFFICE, ST. LOUIS, MO.,

February 11, 1880.

I have tried the PEN, and it gives great satisfaction. It is worth twice the price asked. It is valuable for headings, etc.

JNO. R. BALLINGER.

CHICAGO, April 21, 1880.

Indispensable for the execution of neat, attractive lettering, etc.

I WILL INSURE YOUR HOGS.

Dr. Jos. Haas' Hog Poultry Remedy.

THE ONLY SCIENTIFIC SWINE REMEDY COMPOUNDED.

Read My Propositions!

First—When my remedy is used as a preventive, I will insure hogs by the head for a year, and will make a deposit of money to make such insurance good. If any hogs die, they will be paid for from such deposit; you can refer to my bankers, Messrs. Fletcher & Sharpe, Indianapolis, Ind., for my standing financially.

Second—Where my expenses are paid, I will visit herds of not less than 100, and I will arrest the disease among them, or forfeit \$500.

Third—After hogs have been regulated with my remedy, I guarantee that the annual cost of feeding will not exceed 25 cents per head. Furthermore, that the increase of actual flesh will far more than pay for the remedy used.

SEND FOR IT!

It is not an experiment, but an established success. Remember, it is the only remedy that is used and indorsed by the great breeders of this country and England. It owes its great fame to its genuine merits, and every mail brings tidings of its good work. The evidence in its favor is so strong the most scientific men of the country have pronounced it the conqueror of this disease. It is gaining ground daily, and no hog raiser up with the times can do without it. It is not only a protection against disease, but it is a powerful appetizer.

Inquire of my Bankers, Messrs. Fletcher & Sharpe, Indianapolis, Ind., for my standing. Will make a deposit of necessary money, and will pay for all that die.

SEND FOR IT! I GUARANTEE IT WILL STOP THE COUGH AMONG HOGS

and put them in fine condition for fattening. It will expel the poison from their system, tone them up, and invigorate them generally. It will make them thrive so as to astonish you. It will pay such a large per cent. on the investment, that no one can afford to be without it.

REFER TO ANY WELL KNOWN BREEDER OR SHIPPER IN ANY PART OF THE COUNTRY.

J. H. Whetstone, druggist, Iowa City, says: "The Haas Remedy sells better and with less effort than any proprietary medicine I have ever undertaken to sell of any kind. We have nothing in stock to-day but what I would rather do without than the Haas Remedy."

C. H. Klauenburg, druggist, Carlinville, Ill., says: "The Remedy sells well, and is the best on earth."

O. A. Elliott, druggist, Russell, Ia., says: "The Remedy has given good satisfaction here."

J. N. Penn & Sons, druggists, Sydney, Ia., say: "We hear good reports from what we have sold."

Ed. J. Brown, druggist, Edina, Mo., says: "It has given general satisfaction in this county. Have sold \$1,000 worth in three months. Have tested its merits myself."

J. M. Kufer, druggist, Macomb, Ill., bought \$400 lot of Haas' Remedy and sold \$300 of it in seven weeks.

SEND FOR IT. LIBERAL TERMS TO THE TRADE. \$1.00, \$2.50, and \$5.00 packages. I can work up a trade for you. Terms, Circulars, &c., on application.

W. Harris, druggist, Storm Lake, Ia., says: "It has given splendid satisfaction."

J. C. Eacker, druggist, Elliott, Ia., says: "Have sold several orders and in every case satisfaction given."

A. P. Gano, druggist, Missouri City, Mo., says: "It will be a popular article in our drug market."

J. W. Wyman, druggist, Unionville, Ia., says: "It cures chicken cholera every time."

Smith & Thomas, druggists, Platte City, Mo., say: "It gives good satisfaction here."

Duffield & Harlan, druggists, Centerville, Ia., say: "It is entirely satisfactory."

Dr. S. S. Clayberg, druggist, Avon, Ill., says: "It gives good satisfaction here."

Melle Williams, druggist, Taylorville, Ill., says: "Have a good trade. It gives splendid satisfaction."

BYRON WESTON

DALTON, MASS., U. S. A.,

HAS BEEN AWARDED THE

GRAND PRIZE GOLD MEDAL

AND RECOMMENDED THE

Medal of Honor and Perfection

At PARIS, 1878,

This being the **HIGHEST** and **ONLY** AWARD given for

LINEN RECORD & LEDGER PAPER.

—A SPECIALTY.—

THIS Paper has received THE HIGHEST PREMIUM over all others from the Cincinnati Industrial Exhibition, Massachusetts Charitable Mechanics' Association, Franklin Institute of Philadelphia, Louisville Exposition, Medal and diploma from United States Centennial Commission, Medal of Progress American Institute, 1877, and Medal of Improvement and Progress, Boston, 1878. Its

PRINCIPAL ADVANTAGES

are as follows:—1. It contains more LINEN than any other Ledger Paper, has a longer fibre, and is, consequently, tougher. 2. Having a harder and better body, it frays less in erasure, so that by simply using the rubber after the eraser, the ink is prevented from spreading. 3. It is more uniform in Weight Color and Finish. 4. It never cockles if properly bound. 5. Its chemical action upon ink is such that it both writes and rules up better. For proof of the foregoing, refer to a large number of Stationers, Bookbinders, Bookkeepers, and Recorders, who have given it, after a severe test, the preference over all others. This paper is *Double Sized*, and will stand any climate or the most acid of fluid inks.

Send for sample sheet, **ERASE and REWRITE FOUR TIMES** on same spot. Each sheet is water-marked with name and date.

BALTIMORE NOTES.

[FROM OUR REGULAR CORRESPONDENT.]

BALTIMORE, Md., October 18, 1881.

The Oriole celebration has come and gone, and the city is again settling soberly down to business. The crowd here during the celebration exceeded even those of the sesqui-centennial last year, and many branches of business reaped a harvest. The two programmes gotten up respectively by Guggenheimer & Weil and John B. Piet had immense sales, the latter especially, although not what was termed the "official" pamphlet, attracted universal admiration. The other had too little reading matter and too many advertisements to please the public.

W. E. C. Harrison, the Baltimore News Company, and news dealers in general, did a large trade during the past week in Oriole papers, medals, badges, &c.

J. R. Edwards continues to increase his already large business in the manufacture of blank books. He has made a large trade in the West and South, and keeps a number of men constantly on the road. Enterprise like his is deserving of the marked success with which it meets.

James Gally has been in town during the past week with a handsome line of pocketbooks and leather goods. He represents the house of C. F. Rumpp, of Philadelphia, and the line of goods he shows cannot be surpassed. It includes many new and novel designs for the holiday season. The goods of this house are widely known and are more largely sold in this market than any other. Mr. Gally has made for himself and his house a good name with Baltimoreans, and is well liked by all the trade.

J. H. Murray, formerly second best man in D. H. Carroll's, has been promoted to the chief clerkship in that establishment in place of Oliver Clay, who is now a member of the firm of Curry, Clay & Co. Mr. Murray is one of the best and most active men in the trade, and has many friends who wish him well in his new position.

Harvest Osborn has bought out H. P. Guyton & Co., his former employers. He has a thorough knowledge of the stationery business and is very popular in business and social circles.

Herman Hooper, of the Nescochague Manufacturing Company, Philadelphia, has been with us this week. He was accompanied by his amiable wife, who being a native of Baltimore, came on here to witness the Oriole celebration.

W. P. M.

MONTREAL DOINGS.

[FROM OUR REGULAR CORRESPONDENT.]

MONTREAL, P. Q., October 11, 1881.

Trade is good—never was better. Everybody is in good spirits. Orders come in well, and both wholesale and retail trade report a like good state of things. One class of people put it down to the N. P. or protectionist theory. Another, to the natural result of the revival of trade. No matter what the cause, we are busy.

We have had visits from many of our American cousins this summer, some as tourists and others as the combination of business and pleasure. Eberhard Faber spent two or three days with us at the close of last month, and expressed himself well pleased with the look of the city and trade generally.

Henry Bainbridge and wife also "did the city" and were delighted. Mr. Keuffel, of Keuffel & Esser, with his wife, in passing through gave us a call and introduced his lines to us, which we thing may lead to something. A few more friendly visits from principals would give a better idea of our importance as a commercial centre.

Railways are being pushed along, more especially the Canadian Pacific, which means lots of paper, books, printing, &c., &c.

George Home & Son advertise that they intend closing out next May.

Wm. Angus has resigned the managing directorship and presidency of the Canada Paper Co. Mr. Logan succeeds as president, and John Macfarlane as manager, a man well qualified for the position and highly esteemed.

J. B. Rolland, wholesale stationer, &c., and others are building a paper mill at St. Jerome, about thirty-three miles north of Montreal, on the Q.M. O. & O. R. R. They intend to make writing, book and news. They intend putting in a 78-inch Fourdrinier, and hope to be running by next spring. Paper and pulp mills seem to be springing up all round. Hope they will all pay!

John Crilly & Co. are suffering from lowness of the water and cannot turn out orders in time. The new mill at Cornwall seems to be an accomplished fact. They also intend making writing and book papers. The stock in the concern is nearly all taken up by the paper trade. Mr. Barber, of Toronto, and Riordon, of St. Catharines, Ont., are pushing it energetically.

The Montreal Card and Paper Company has been purchased by G. B. Burland and is now called the Montreal Manufacturing Co. The same party also bought the Geo. J. Gebhardt estate and is running on playing cards.

Hands are scarce here; almost all of the book-

binders in the city have advertised for help. Good printers too can find employment.

J. C. Wilson & Co. are lively both in the mill and at the bag factory.

Dawson Brothers make quite a good display in their enlarged premises. One store is exclusively devoted to stationery, the other to books and periodicals. They are full of work in the bindery.

Morton Phillips & Bulmer are also hard at it in all departments and say they are satisfied. Their stock is well selected and most varied; they intend keeping abreast of the times.

G. W. Clarke, fancy goods, has had a good trade during the past month, the exhibition here having done him good. He anticipates the best Christmas trade in some years. The same tone prevails everywhere.

D. Bently & Co., job printers, are busy; they employ over twenty hands and are doing a first-class business. Mr. Bently is a thorough practical printer.

Mr. Pond, of the Dennison Manufacturing Company, Boston, has just called, on his wedding trip. He intends, with his bride, spending a few days here at our elegant Windsor Hotel. More anon.

C.

VARNISH OF METAL SURFACES.—To make alcoholic lacquers or varnishes adhere more completely to polished metal surfaces, one part boracic acid should be added to 200 parts of varnish. This composition will adhere so firmly and become so completely glazed as to be removed only with difficulty. Be careful not to add too much of the boracic acid, as it injures the gloss in that case.

Bernard Quaritch, London, has on sale a selection of valuable works from the libraries of the late Col. Sir W. L. Merewether, K.C.S.I., C.B., and the late Professor Tennant, F.G.S. Of these, perhaps the most remarkable is a perfect folio first edition of Shakespeare, with a portrait by Droeshont, dated 1623. Sir William Tite's copy of this work was sold for £440. There are also the "Little London Directory of 1677," the oldest printed list of merchants and bankers of London; the accounts of the churchwardens of St. Michael, Cornhill, from 1456 to 1608; and "A True and Faithful Account of the several informations exhibited to the Honorable Committee appointed by the Parliament to inquire into the late dreadful Burning of the City of London" (1667).

F. A. Brockhaus, Leipsic, is about to publish the thirteenth edition of his "Conversations-Lexicon," a work which has been in existence since the year 1796.

MUTILATED COIN.

The nuisance of punched pocket-pieces is probably doomed. When silver rose out of sight, during war times, a gold or silver coin was hoarded as a curiosity or souvenir. Rural beaux gave them to the belles for keepsakes. To punch a hole through one so that it might be hung by a ribbon around the neck was very natural; to string a dozen or twenty in a bracelet or necklace by means of the same device of a little hole in the edge, was not uncommon. Rogues soon saw in this practice temptation and opportunity to a swindle which has become very extensive. For, when coin returned to circulation, and the special interest attached to preserving specimens declined, many persons broke up their ornaments, made by stringing together dimes or dollars, and used the pieces, notwithstanding the little holes, for money. And then, under cover of the fact that a small number of punched pieces thus came into circulation somewhat legitimately, the swindlers adopted a practice of punching as large a piece as they dared out of every coin they could lay hands on; the mutilated coin was then put in circulation, while the pieces were kept till enough were gathered to warrant melting them and selling as metal. The good-natured tolerance of the people has allowed this nuisance to run too long. Two or three years ago the post office refused the punched pieces. Banks and establishments somewhat independent of popular custom have done the same. Keepers of small shops, restaurants, grocers, saloons and cigar stores, news-stands and the like, have felt obliged to continue to receive them, lest by refusal they should lose custom. Many of these have naturally felt justified in proffering to customers whatever coins customers gave to them; some have been magnanimous enough to sell their mutilated coin as such, and bear the loss.

Apparently the class of persons responsible for the swindle have lately been giving it a new turn, for an anonymous placard, headed "Notice to Customers," has made its appearance extensively. It reads:

The United States Government has fixed the following values on silver coins with holes in them:

Dollars.....	65 cents.
Half-dollars.....	35 cents.
Quarter-dollars.....	15 cents.
Dimes.....	5 cents.
Fives.....	4 cents.

These values are placed upon coins so punched with a view to calling in and stopping the unlawful practice of "mutilating" silver money of the United States.

We understand that this announcement is repudiated by Treasury officials in this city and in Washington. It can hardly be authentic, for it would oblige the government to receive coin notwithstanding it might have been mutilated more than the designated sum; a quarter-dollar might be cut in two, and fifteen cents demanded for each half. The only just and sensible way of valuing coin which has been clipped or punched must be by weighing it. Apparently the notice is a new cheat of the swindlers, designed to open the way for them to go through the city buying up mutilated coins at rates perhaps a little higher than that allowed by the notice, they knowing that they can get a much higher price by weight.

But a bogus notice may be effective in driving these coins out of use. The matter of making change depends very much on common usage of the people. No one likes to refuse what people generally accept. In many positions one cannot well refuse it. Whoever is obliged, as all constantly are, to offer a bill in payment for some-

thing bought, expecting change as matter of usage, is in a measure obliged to take such coin as usage sanctions. This disowned notice may be useful in changing the usage under which the depreciated coin has been circulated. Already the ticket sellers and the newsdealers at the elevated railroad stations are, we believe, instructed to refuse these coins uniformly and systematically, and will, of course, discontinue paying them out. Wherever the notice is posted it will serve to show that these coins had better not be offered to that dealer, and will make him ashamed of offering them to customers. A few days of general dissemination of such a placard will open the way—nay, probably has already opened the way—for the entire public to say, when one of these coins is offered: "I don't take that kind of money any more; it is no longer usual change." By all means pass the fictitious placard around till mutilated coin is known no more. Meantime the public will do well to be on their guard against pieces in which the hole has been ingeniously filled with some base metal.—*Tribune.*

ARCHÆOLOGICAL POTTERY.

Within the last few weeks an interesting find of archaic pottery has been brought to light in excavating the foundations for a new wing about to be added to Chesfield, Lower Teddington road, Hampton Wick, the residence of H. E. Tatham. At a depth of from eighteen inches to two feet, the workmen came upon a number of earthen vessels, which their pickaxes unfortunately reduced in a great measure to potsherds before the arrival of Mr. Tatham, who was happily in time to save several from more than partial destruction, one being secured in an almost perfect condition. This last was the smallest of them all, being no more than about six inches in diameter at the bulging central portion, whence it tapered upwards and downwards. It may stand eight or nine inches high, and is furnished with a pair of well proportioned, and not altogether inelegant handles. Two others are cylindrical in shape, are without handles, and are about a foot in width and altitude. To the same type as these two belongs another, which was broken to pieces as it was being extricated from the soil, all the fragments, however, having been carefully gathered and preserved. The whole of the vases present the appearance of cinerary urns, and this identification is confirmed pretty decisively by their contents, which in every instance turned out to be charred bone and other animal remains. Whether these bones belonged to man or to his four-footed friends has not yet been scientifically ascertained. No portion of these ceramic remains bears a trace of the potter's wheel, and the whole have been sun dried, not fired in a kiln. Among the detached potsherds are found portions of a chain-shape ornament, which seems to have traversed the bulging body of an urn. Similar pottery is said to have been found at Hampton Court or its neighborhood. Mr. Tatham deems it not unlikely that his new finds may date from a very early age, possibly before the Roman occupation of Britain. Urns of unbaked clay of a like type, he remarks, have been discovered in the barrows on Salisbury Plain, near Stonehenge; but it must not be forgotten, he adds, that in their immediate neighborhood were found beads of glass and amber, heads of spears, swords and bronze articles, and in some of the barrows the burnt bones of dogs, fowls, horses and other animals. But no metal, no glass or amber, not even a single flint implement has been discov-

ered in association with the Hampton Wick urns, whence Mr. Tatham infers that these urns must be referred to a remoter period than that to which belong those found in the barrows on Salisbury Plain. The whole of this new and interesting ceramic find will shortly be submitted to the judgment of the authorities at the British Museum.—*Pottery Gazette.*

MAGNETS IDENTICAL IN STRENGTH.

For some time past, M. Trouve, the eminent Parisian instrument maker, has been engaged in discovering the best mode of making powerful magnets of identical strength. For this purpose he has investigated the best kinds of steel, the most suitable degree of temper, and the most practical and simple method of magnetization. In testing the different kinds of steel, he cut the pieces of the same dimensions and magnetized them, then measured their portative force. They were afterward tempered and magnetized anew. The portative force, after this second magnetization, has led M. Trouve to the conclusion that the best French steel for making bar magnets is that of Allevard, as already known. He also finds that the portative forces, as determined after the two magnetizations, are connected by a simple law which can be expressed by saying that they are to each other in the ratio of $n : n^2$ —that is to say, if the portative force of the first magnetization is represented by 2, 3, and 4, that due to the final or saturated magnetization is represented by 4, 9 and 16. As regards the temper of the steel, M. Trouve finds that a regular temper is necessary, and to insure this condition he employs a muffle furnace heated by gas to a constant temperature. The actual magnetization of the bars is performed by placing them in two solenoids in juxtaposition, and closing the magnetic circuit by means of two plates of soft iron. The solenoids are then electrified by means of the current from six Wollaston elements. By proceeding in this manner, M. Trouve succeeds in preparing bar magnets which will sustain from 12 to 14 times their own weight, and if they are bent into horseshoe form the portative force is quadrupled—that is to say, it becomes 48 to 56 times the weight of the magnet.

DOUBLE-GLAZED WINDOWS.

A writer in the *English Mechanic* points out some of the advantages of double-glazing in promoting the health of homes in winter. Skylights, he says, ought never to be put up unless double or double-glazed. Double-glazing answers perfectly if the sashes are grooved out for glass on each side, and are then glazed with an air space of one-half inch or more between the panes of glass. The glass must be put in with its inner faces perfectly bright and clean, and the glazing should be done on a cold dry day, so as not to include watery vapor, which in cold weather will condense inside the air space, and cause a mistiness. This double-glazing with an air space makes a window almost as warm as a brick wall, and not only keeps up the temperature of a room in winter, and saves fuel, but it keeps the room cool in hot weather, and makes the temperature more uniform throughout the apartment. With ordinary thin glazing in winter the inmates are always being chilled on that side which looks toward the window, and baked on the side that is toward the fire. Double-glazing our window sashes would save all this trouble.

If you have nothing to give your wife, give her her own way.

OLD BERKSHIRE MILLS

DALTON, MASS., U. S. A.

One party writes: "The two hundred RECORD BOOKS, for 83 of the 99 Counties, now on exhibition at the Iowa State Fair, at Des Moines; and all, but four (!) of them, made from your 'OLD BERKSHIRE MILLS LINEN LEDGER,' Medium, 40lb., make a splendid show."

We will pay for any book rejected on account of fault in the paper. Send for Samples, test them in comparison, and see that your books are made from paper thus water-marked.

[The above cut is a fac-simile of the wrapper used on the Linen Ledger Paper.]

TRADE NOTICE.

These Celebrated Pens are now manufactured with unprecedented skill and care. They have the distinction—which has now become historical—of being the FIRST SUCCESSFUL AMERICAN STEEL PENS, also of having been so popular as to have been counterfeited to the extent of HUNDREDS OF THOUSANDS of gross, which was stopped by judgments of the SUPREME COURT of NEW YORK and of the UNITED STATES COURTS.

The genuine Pens are now sold direct to the Trade by the proprietors,
THE WASHINGTON MEDALLION PEN CO.,
229 Broadway, N. Y.

MAGIC POLE

(PATENTED JULY 12, 1881.)

For taking down from HIGH Piles, or Shelves, or putting up in HIGH places, Boxes having a projecting lid.

For Envelopes it is invaluable.

Price, \$1.00 each; per dozen, \$9.00. One MAGIC POLE sent anywhere by Express for \$1.25, except the Pacific Slope.

Williamson-Stewart Paper Co.
ST. LOUIS, MO.

Agents Wanted in all large Cities.

The J. W. Stoakes Automatic Shading PEN.

FOR PLAIN, FANCY AND ORNAMENTAL
LETTERING.

WASHINGTON, D. C., March, 1880.
I desire to say that the "Shading Pen" invented by Mr. STOKES meets a want long felt by penmen. The work done by it is perfect in line and shade. The rapidity with which lettering is done, aside from the beauty of the work, is enough to recommend it for general use.

H. A. WHITNEY, Ass't Cashier, U. S. Treasury.

U. S. ENGINEER'S OFFICE, ST. LOUIS, MO., }

February 11, 1880.

I have tried the PEN, and it gives great satisfaction. It is worth twice the price asked. It is valuable for headings, etc.

JNO. R. BALLINGER.

NEW PATENTS.

No. 247,475. Book-Sewing.—Edward S. Boynton, Bridgeport, Conn.

1. The combination, with the signatures of a book and a band-piece laid across the back thereof, of threads sewed directly through the band-piece and passed within the signatures to hold the inner sheets in place, whereby the different signatures are strongly fastened together and the sheets of each signature securely held therein. 2. The combination, with the signatures of a book, of the internal threads lying in the fold of the inner sheet, the band-pieces, and the binding threads interlooped with the internal threads and connecting them with the band-pieces. 3. The signatures of a book provided with a series of saw-cuts, the band-pieces therein, and the internal threads laid in the folds of the inner sheets of the signatures, and having their ends drawn through the saw-cuts nearest the ends of the sheets, combined with the binding threads sewed directly through the bands and interlooped with the internal threads.

No. 247,477. Art or Method of Making Ornamented or Variegated Gelatinous Sheets to Imitate Tortoise-Shell, &c.—William V. Brigham, Newton, Mass., assignor to the Gelatinoid Company, Jersey City, N. J.

Improvement on Letters Patent No. 233,973, dated November 2, 1880, to same inventor. The object of the invention is to produce imitation tortoise-shell, malachite, lapis lazuli, and the like.

No. 247,478. Gelatinous Blank for the Manufacture of Wall Ornaments, Baskets and other Articles.—William V. Brigham, Newton, Mass., assignor to the Gelatinoid Company, Jersey City, N. J.

Improvement on Letters Patent No. 233,973, dated November 2, 1880.

No. 247,481. Waxed Paper.—Oliver R. Chase, Boston, Mass.

As a new article of manufacture, paper or cloth treated with a mixture of wax and rosin.

No. 247,530. Copying Press.—Samuel R. Bartlett, Concord, Mass.

No. 247,568. Interchangeable Inking-Bed for Printing Presses.—Henry Letzeiser, New York, N. Y.

No. 247,574. Printing Press.—Alonso Newbury, Coxsack, N. Y., assignor to Emma A. Newbury, same place.

1. The combination, in a printing press, with a frame which carries a rotary ink-distributing disk, and a swinging bed connected with the frame, but having independent supporting arms, of a toggle for imparting motion to the frame and bed, a rotary driving crank, and a rod connected directly to the crank and to the centre joint of the toggle, and serving to impart motion from the crank to the toggle. 2. The combination, with the ink-distributing disk carried by a frame and furnished with a ratchet, of a pawl lever pivoted concentrically to the disk and carrying a pawl engaging with the ratchet, and a link connecting the lever with a fixed stud on the stationary frame of the press, whereby the rotary motion of the disk is obtained from the motion of the frame which carries the disk. 3. The combination, in a printing press, of a ductor or fountain roll in stationary bearings, a rotary ink-distributing disk mounted in a frame, an ink-distributing wheel or roller, a pivoted bearing block or support for the latter,

moving with the ink-distributing disk, and a fixed stop, against which the pivoted bearing block or support is brought in contact by the movement of the frame to raise the ink-distributing roller into contact with the ductor or fountain roller. 4. The combination, in a printing press, with a frame supporting an ink-distributing disk and a toggle for operating the frame, and adapted to move between the sides thereof, of arms for supporting inking rollers, and separate studs projecting outwardly from each side of the frame, to form pivots for supporting the arms.

No. 247,597. Manufacture of Printing Ink.—Charles T. Bastand, London, England. Filed July 5, 1881. [No specimens.]

The product obtained from engineers' cotton waste is covered by United States patent to same party, dated August 16, 1881, No. 245,765, and British patent dated November 13, 1880. It is extracted by passing bisulphide of carbon up through the cotton waste, then heating it, and drawing off the bisulphide of carbon and dissolved greasy matter to a still, and then repeating the steps, and finally distilling the bisulphide of carbon from the greasy matter and any remaining traces from the waste.

No. 247,601. Advertising Card.—Emil Bommer, Brooklyn, N. Y.

1. A business card provided with two angular rests or braces formed by cuts or incisions at two adjoining corners of the card, the rests or braces being bent back at points midway between the adjoining corners and at points near the opposite corners of the card. 2. A business card provided with rests or braces which are formed by cuts or incisions at two adjoining corners, the rests being bent back at points midway between the adjoining corners and near the opposite corners, and connected by a suitable locking device when bent back. 3. A business card having angular rests or braces formed by cuts or incisions extending around two adjoining corners of the cards, the rests or braces forming a portion of the card when laid flat therewith, or supporting braces when bent back to a suitable inclination thereto.

No. 247,611. Photographic Plate Holder.—Hutchins C. Cady, Columbus, Ohio.

No. 247,613. Die Stamping and Surface-Printing Machines.—John Carson, Brooklyn, N. Y.

No. 247,616. Sponge Holder for Slate Pencils.—David F. Coles and James H. Luckhurst, Rahway, N. J.

No. 247,646. Paper Bag.—Henry A. House, Bridgeport, Conn.

No. 247,688. Baby-Jumper.—Wesley Roberts, Martinsville, Ill.

No. 247,710. Hand Stamp.—Ogden H. Tappan, Potsdam, N. Y.

A hand stamp carrying two parallel rolls, one to postmark, the other to cancel, and both receiving their supply of ink from the same reservoir in handle and the same intermediate feed.

No. 247,738. Form for Registered Bonds and Certificates of Stock.—Willis A. Barnes, New York, N. Y.

A registered bond or certificate of stock provided with a series of detachable cancelable coupons, which said bond or certificate may be transferred from one owner to another by canceling and cutting off the coupon containing the name of the first owner and inserting the name of the new owner in the next coupon of the series, and so on until all the coupons have been exhausted, and a registry of the transfers at the same time obtained by preserving in proper form the detached coupon.

No. 247,773. Packing Box for Paper Folding Machines.—Wm. Mendham, Philadelphia, Pa., assignor to Cyrus Chambers, Jr., same place.

The combination, in the packing-trough of a

folding machine, of a plunger of the full width of the trough, guide-slits which support the folded sheet until the plunger reaches it, and then recede and allow the plunger to pass, and mechanism for effecting and timing these movements.

No. 247,785. Gage Stop for Paper Cutters.—Jas. Snover, Holyoke, Mass.

An adjustable stop for paper cutting machines, consisting of the combination of a shoe, slotted through a portion of its length, a piece movable upon the outer face of said shoe, and with a bolt secured therein extending through the slot in said shoe, and provided with a nut whereby said stop may be adjusted to the machine to determine the position of the gage in cutting paper to any desired size.

No. 247,808. Mechanism for Securing Paper Spools to their Shafts.—George Dunn, North Wilbraham, Mass.

The combination, with a shaft having a spool provided with a recess, substantially as described, of the collar secured on said shaft, and provided with an extension having locking projections to enter the recess.

No. 247,811. Celestial Globe.—Frederic W. Eighens, Paris, France. Patented in France, May 24, 1878.

In an astronomical instrument, a celestial sphere free to be moved in any direction whatsoever, a horizon and meridian capable of a like motion with or independently of the sphere.

No. 247,817. Rotary Paper and Card Cutting Machine.—Henry P. Feister, Philadelphia, Pa.

No. 247,824.—Student-Lamp.—Charles F. A. Hinrichs and Charles Reistle, Brooklyn, N. Y., assignors to said Hinrichs.

No. 247,903. Printers' Ink Fountain Knife.—Frederick L. Goss, Chicago, Ill., assignor of one-half to Charles J. Stromberg, same place.

No. 247,922. Folding Machine.—Gilbert E. Jones, New York, N. Y.

No. 247,945. Easel.—Samuel M. Philbrick, Waterville, Me.

No. 247,959. Fastening for Pocket-Book Handles.—Thomas P. Spencer, New York, N. Y., assignor to Henry Mehl, same place.

No. 247,761. Canceling Stamp.—George D. Spooner, Rutland, Vt.

No. 247,965. Toy Pistol.—Charles G. Street, Brooklyn, N. Y., and George W. Eddy, New Britain, Conn.; said Eddy assignor to said Street.

REISSUES.

No. 9,878. Toy Camera.—August Herzog, Guttenburg, N. J. Original No. 182,117, dated September 12, 1876.

DESIGNS.

No. 12,484. Group of Statuary.—John Rogers, New Canaan, Conn. Term of patent, 14 years.

No. 12,491 to 12,493 inclusive. Font of Printing Type.—Georg F. Giesecke, Leipzig, Saxony, Germany. Term of patents 7 years.

No. 12,497. Font of Printing Type.—Carl Müller, Chicago, Ill., assignor to Marder, Luse & Co., same place. Term of patent 7 years.

Trade Gossip.

All new goods and designs which are not, strictly speaking, "Novelties" will be noticed under this head. The trade are requested to forward descriptions with samples in order to secure proper notice.

M. Talamo, dealer in wall paper, Titusville, Pa., is dead.

James M. Rose, bookbinder, Elmira, N. Y., has sold out.

A. B. Nye, publisher of the *Tribune*, Dixon, Ill., has sold out.

Thompson & Co., bookbinders, Quebec, Can., have dissolved partnership.

P. T. Reed, of the firm of Blanchard & Reed, stationers, Gardiner, Me., is dead.

H. P. Diltz, publisher of the *Democrat*, Cynthiana, Ky., has made an assignment.

J. D. Whelan & Co., lithographers, Montreal, Can., have been burned out. Insured.

Pryor & McGarvey, publishers of the *People's Cause*, Red Bluff, Cal., have dissolved partnership.

Application has been made to force Ripley Brothers, paper manufacturers, Boston, Mass., into insolvency.

J. H. Brown, so long and favorably known as with Willy Wallach, is now with Robert Gair, 161 and 163 Chambers street.

The genial Richard Esterbrooke, Jr., is in the city, fresh from his Long Island home. Bluefish seems to have agreed with him this summer.

L. de Ronceray, San Francisco, Cal., was awarded the silver medal at the California State Fair, held at Sacramento, for the best display of lithographic and chromo work.

William H. Hoskens, Philadelphia, is receiving a great many orders from the trade for wedding, invitation, and visiting cards. His sample books have been in great demand.

Myers Brothers report a very brisk trade, and announce that they will begin shipping De La Rue's Christmas and New Year cards next week. Parties wanting these goods should forward their orders at once.

Sir Sidney Waterlow, of Waterlow & Sons, Limited, of London, England, is in the city, and has been stopping at the Windsor Hotel. He leaves here to-night for Boston, and sails for London on Wednesday of next week. He has called on some of his friends during his stay, and others he has received at his hotel.

Colonel Cyrus H. Loutrel left here yesterday for a trip West, stopping first at Chicago. This is Mr. Loutrel's first visit as far as Chicago. He will probably extend his trip to St. Louis and St. Paul. The trade West will have an opportunity of seeing in Colonel Loutrel a gentleman who, it is said, has been longer in the stationery business in this city than any other, viz., upwards of forty years.

Moss & Co., Philadelphia, have a large assortment of Christmas and New Year cards. Their wholesale trade has increased considerably. Their embossed cards, in splendid designs, are sold at a range of prices to meet all demands. They have also some elegant fringed cards, but the great success of the season will be their embroidered by hand and painted cards, which are, indeed, *chefs d'œuvre*. Their cards, with real flowers and mottoes will sell well, as they are in very good taste.

The *Missouri Republican* says that the finest display at the St. Louis Fair is that made by Geo. D. Barnard & Co., of St. Louis. Their exhibit in Mechanical Hall, directly in front of the main entrance, occupies a space 12 feet wide by 80 feet long and 12 feet high, and contains over 1,000 blank books, all of their own manufacture—650 of one size and style of binding, 371 of various sizes and styles of binding. The first that attracts the attention of the visitor is the biggest blank book ever made. This book measures 26 inches wide when closed, 28 inches long, and weighs 292 pounds, and contains over 3,000 pages. The paper in this book cost over \$100, and was made by Byron Weston, of Dalton, Mass. Speaking further of this firm, the *Republican* says that the house of Geo. D. Barnard & Co. has been in existence only a little over nine years, starting for the purpose of making blank books for public offices and for supplying office stationery. Its business has grown so much since then that, although its latest manufactory is very large, it has been obliged to secure more room, and will soon occupy the premises 210 and 212 Washington avenue, when it will have five floors, each 45 by 150 feet. New presses and machinery will be added.

Henry Levy & Son, 477 Broadway, have just received a large and elegant line of photograph albums, in which the binding of the leaves is separately attached by a process that gives additional strength to the book when bound. The covers of some of these albums are of plush, very elaborately embroidered, while others are either of calf or silk tastily painted. These goods are admirably suited to adorn a parlor table. The articles of this line in embossed leather, smooth Russia and plain plush, are very extensive, and the interior of each is adapted to hold *cartes de visite*, cabinet, and promenade pictures. A cheap album offered by the firm has been in great demand, as it is said to be the best article for the price in the market. The house has just received a large line of goods suitable for the holiday trade. Buyers are requested to call and inspect the firm's extensive and varied line.

A. M. Collins, Cope & Co. have recently brought out a new set of folding cards etched in black, specially for holiday advertising. They are in three designs, Nos. 1,110, 1,111 and 1,112. Also a new set of floral advertising folders in five designs, Nos. 1,090 to 1,094 inclusive. One of the newest things in folding cards is a series of four designs of large size suitable for menus, insurance statements, &c. Their novelty consists in a combination of black etching with color, giving the effect of a fine steel plate card having the floral portions of its design colored by hand. This is the most expensive line of folding cards ever issued for advertising purposes, and is known by Nos. 1,100 to 1,103 inclusive.

J. H. Hamburger shows two excellent lithograph engravings of Irish scenes, in which C. S. Parnell is the prominent figure. One represents the recent trial of the state prisoners at the court house in Dublin, and the other the Irish leader addressing a meeting at a country farm house. In both instances Mr. Parnell appears surrounded by his lieutenants. The engravings are well executed.

Ex-President R. B. Hayes made a visit this week to Samuel Raynor & Co.'s envelope establishment, and was shown through it, and seemed very much pleased with the process of making envelopes. He was much astonished to find that their product was a million per day.

It is reported that Henry A. Goff, paper stock dealer, Springfield, Mass., has left that place.

C. F. Palmer, publisher of the *Review*, Westerville, O., has sold out.

Weaver & Williams, stationers, &c., Duke Centre, Pa., have sold out.

L. de Ronceray, stationer, San Francisco, Cal., has sold out to W. T. Leavitt & Co.

The stock of George H. Cushman, paper box maker, Lynn, Mass., has been attached.

Faris & Corbett, printers, Wheeling, W. Va., have dissolved partnership. Faris & Clark succeed.

George H. Hill, bookseller and stationer, Portland, Ore., has admitted S. M. Barr to partnership.

Fanny Cohen, dealer in fancy goods, Utica, N. Y., is advertised to be closed out by the sheriff.

William T. Amies, publisher and commission bookseller, Philadelphia, Pa., has assigned to John C. Lucas.

The stock of George Hill, Jr., paper manufacturer, Georgetown, D. C., has been damaged by fire. Insured.

J. D. Pierce & Son, dealers in fancy goods, Augusta, Me., have dissolved partnership. A. J. Pierce continues.

Charles Hilb & Co., dealers in rags, Cincinnati, Ohio, have dissolved partnership. Samuel Bauer and Manes Hilb retire.

The Central Printing Company, Indianapolis, Ind., has been dissolved by the retirement of Louis Schmidlap. The remaining partners continue under same style.

J. H. Bufford's Sons received on Tuesday morning an order from Cadiz, Spain, in which the person ordering refers to notices appearing in the trade gossip of THE AMERICAN STATIONER.

McCarthy & Hasberg have just received another new and elegant line of goods suitable for the holiday trade. These goods comprise a large variety of novelties which retailers can sell at popular prices, and make a fair profit.

"Bertha's Baby" is a book that will take hold at once. It is the story (by Gustave Droz) of the first born, the hope and joy of the household—little mischief as well. It is published by T. B. Peterson & Brothers, Philadelphia.

J. H. Bufford's Sons have just introduced a new series of advertising cards. It consists of six designs, representing spring, summer, autumn, winter, the departing year and the coming year; each contains a calendar for 1882. The calendar comes in three different shades, and it is also of comic design.

Harry A. Schmook, with John Gibson, has returned from a three months' trip through the West and comes back perfectly contented, having had the best trade of any other trip he ever made. Mr. Schmook has opened at 1,232 Third avenue a very handsome stationery and fancy goods store, and will henceforth devote himself to Mr. Gibson's interest in the city in place of going on the road.

The new B. and O. Red Book for New York has just been issued by the Baltimore and Ohio Railway Company. It contains much interesting information, comprising full figures of the latest vote in this State on Congress, President, &c., with comparisons for previous years. There is also interesting reading of a special character giving some of the features of the great railway from which the book takes its title. Copies will be sent free of charge on application being made to C. K. Lord, General Passenger Agent, B. and O. R. R., Baltimore,

Md., or to C. P. Craig, General Eastern Agent, B. and O. R. R., 315 Broadway, New York.

L. Rosenberger, bookseller and stationer, Peoria, Ill., has sold out.

Christian & Co., paper stock dealers, San Jose, Cal., have been burned out.

Moses Warren, of Moses Warren & Co., publishers, Chicago, Ill., is dead.

F. P. Johnson & Co., booksellers and stationers, Augusta, Ga., have sold out.

Hasbrouck & Watson, stationers, New York city, have dissolved partnership.

Lubker & Cramer, stationers, Columbus, Neb., have sold out to I. J. Slattery.

H. Robinson & Co., wholesale dealers in notions, Terre Haute, Ind., have dissolved partnership.

Wald & Weiss, dealers in fancy goods and notions, St. Louis, Mo., have made an assignment.

W. W. Heath, fancy goods dealer, Seneca Falls, N. Y., is about to move to Fulton, same State.

T. B. Collins, publisher of the *Review*, Crawfordsville, Ind., has sold out to Hanna, Sellers & Hinkle.

Jesson & Holland, bookbinders, Philadelphia, Pa., have dissolved partnership. George R. Jesson settles.

P. Phillips & Co., wholesale dealers in fancy goods and notions, New Orleans, La., are asking an extension.

Alexander Agar, W. Irwin Martin, and D. M. Lent, formerly of Harper & Brothers, have been appointed a board of judges on stationery at the American Institute Fair.

Milton Bradley & Co., Springfield, Mass., have forwarded their new illustrated catalogue of specialties in toys and games. It is well gotten up, and the trade will find it useful.

J. B. Lippincott & Co.'s Philadelphia Monthly Bulletin of new publications for the current month is out. It has several important suggestions in the way of announcements, &c.

Charles S. Plummer and George A. Raisbeck have just returned from trips for Ph. Hake. Mr. Raisbeck will not go out again before the holidays, but Mr. Plummer, after taking a few days sport at "gunning" (?) will start out again.

R. Fideau, 16 Beekman street, has now a full stock of his unparalleled and Union school bags, and is prepared to fill all orders for them promptly. He has also a new line of embroidered and Manila school bags suitable for the holidays.

Charles T. Bainbridge's Sons have just issued their annual line of New Year cards. They consist of twenty-four designs, embracing lithograph, steel plate, and hand-painted. They are entirely original and have been very artistically executed. They have all of the designs mounted nicely on a folded show card.

William N. Kurtz, recently connected with the stationery department of J. B. Lippincott & Co., Philadelphia, will, on the 24th inst., take charge of the stationery department about to be started in the well known dry goods house of Sharpless & Sons, of Philadelphia, where he will be pleased to see his friends in the trade.

Among the visiting members of the trade to the city during the week were W. F. Parker, Fair Haven, Vt.; Wesley Jones, Burlington, Iowa; B. T. Wade and Mr. Bainbridge, of B. T. Wade & Co., Toledo, Ohio, and Mr. Hapeman, of Osman & Hapeman, Ottawa, Ill.

NEW YORK OFFICE AND SALESROOM, 18 MURRAY STREET.

THE BAY STATE PAPER COMPANY, HOLYOKE, MASS.,

were among the pioneers in the W. C. Paper trade and their goods, from the start, were distinguished for their fine quality and the superior style in which they were wrapped. Their example has been approved and imitated by a swarm of competitors, who have flooded the market with inferior goods, put up in packages of 600 to 800 sheets, misleading the unwary, and sold at apparently lower figures; but the trade and consumers generally recognize the fact that a good article, honestly put up, in 1,000 sheet packages, is the most profitable both for use and for sale. Their goods are all guaranteed 1,000 sheets to package, and no short count. No wood is used in any of these papers, but they are made of the very best stock in the market.

THE "MEDICATED BOUDOIR" BRAND

Has no equal for weight, strength, softness, and color, and commands the front place with "fine retail trade." Present reduced quotations furnished on application.

THE STATIONER.

DEVOTED TO THE INTERESTS OF THE

Stationery and Fancy Goods Trades.

WEEKLY--\$2.00 PER ANNUM.

Single Copies - - - 10 Cents.

NEW YORK, THURSDAY, OCTOBER 20, 1881.

Advertisements cannot be received for insertion in the current week later than 12 m. on Wednesday. The charge for advertising is 25 cents a line, each insertion. Special terms for standing and displayed advertisements to be had on application.

This journal aims to be a medium of information for and a representative of the interests of every one connected with the stationery and fancy goods trades. It contains a full and trustworthy survey of the market for stationery in this country, in all cases giving the actual prices at which goods can be bought of importers and jobbers in this city, together with a detailed account of novelties in the trade, patents relating to stationery, and current items of interest. A review of foreign markets and accounts of movements abroad will also be furnished, and no pains will be spared to make THE STATIONER a thorough and complete exponent of the trade.

Subscription and postage for Great Britain, per annum..... 13s.

Any information our readers may wish to obtain shall be cheerfully given, and prompt replies will be made to all inquiries addressed to us on any subjects of interest to the trade.

Communications on all trade matters are earnestly solicited. Address

Subscribers to THE STATIONER can be supplied with the best cloth binder in the market. Deliverable at the publication office. Price, fifty cents.

Readers of this paper who avail themselves of the information obtained from its columns, by advertisement or otherwise, are requested to notify their correspondents of the source of their information.

UNDER the head of Answers to Correspondents we reply to inquiries concerning the right of a lithographer to devote designs gotten up and paid for by one house to the benefit of another firm. The common law principle will sustain the first stationer in any reasonable claim that he may make for damage.

ASIDE from the legal question involved in the case which we have referred to, there is a moral obligation which we assume that no respectable firm would repudiate when brought face to face with it. A lithographer who undertakes to do a job for one person, and prepares a design for which he is paid, and who then utilizes the same for another individual, charging his price over again, is, to our mind, a scamp. We do not wonder that our correspondent should feel aggrieved by such action.

SOMETHING similar to the case referred to was brought to our attention not long ago, and we have had it in mind to remark upon it. The circumstances were these: A certain stationer got out a design, and not satisfied with the results produced in working it, gave the dies to another house for completing the job. Not long after, it was discovered that a rival stationer was using the same designs. Explanation being demanded of the house that did the work, the statement was made that new dies had been made in the second instance. This, however, it was thought, was disproved by the fact that a trifling imperfection apparent in the first piece of work, due to some defect in the die, had been perpetuated in the imitation. This seemed to be sufficient to raise a question of veracity; but the fact remained that the design had been sold. Taking either view of the case, whether the original die had been used or a new one made, we cannot but conclude that equity entitled the party aggrieved to his remedy at law. We cannot too strongly condemn the moral perversity which led the offending party to apply the designs to the use of other persons than the owners. If such acts cannot be restrained by a sense of business honor or morality, they ought to be prevented by an administration of law. The parties injured should prosecute the offenders and teach them a lesson in business ethics.

In one of our columns will be found the announcement that a member of the stationery trade has allied his fortunes with a large dry-goods house which is about to start a stationery department. We have printed the item as a matter of news, but if the unhappy stationer who has taken this step had consulted us we should have told him, Don't do it. We do not recede from our position that it would be better for each distinctive branch of trade to take care of itself and not to attempt to bring in other lines which do not assimilate. There are some departments of trade which naturally merge in each other and which have too much in common to permit of drawing a

fine distinction between them; but when it comes to calicoes and ink, we are disposed to believe that it is better to keep the two apart. But it is not so much the commingling of seemingly incongruous lines of business that we object to, as that one is simply taken up to be worked in a special way or as a "leader" to purchases of another character, whereby prices are made too low on one class of goods to secure values too high on another, the operation being to spoil the business of other merchants whose interests are not in the direction of that to be benefited. Retaliation, therefore, will be the only way to compass a lesson which should be felt and remarked, and to retaliation it must come. If the stationery trade could be reasonably certain that their customers would refuse to buy of dry-goods houses, they would have no reason to be concerned at these encroachments on their business; but they are not, and they must therefore try and apply the remedy.

ANSWERS TO CORRESPONDENTS.

Fact says: Will you please answer the following questions: 1. If a lithographer engraves a private job for a stationer, and is paid a large price for his work, has he a right to use the same engraving for another stationer, and charge him for the engraving? 2. Is he not stealing (appropriating to his own use) goods left in his possession? 3. Is he not a receiver of goods knowing them to be stolen? 4. To whom does the engraving belong, to the first or second stationer, or to the lithographer who has been paid for it twice?

Ans.—1. No. 2. Morally, yes; under the law, no. 3. No. 4. To the first stationer.

---------------------------------	-----

The Librarian of the University of Rome is endeavoring to persuade the Italian government to print a general catalogue of the books in the public libraries of Italy. The fulfilment of this important undertaking, in the event of its being agreed upon, will be a great step towards the compilation of the Universal catalogue of literature so often advocated at the meetings of the Library Association.

OBITUARY.

CHARLES VAN BENTHUYSEN.

Charles Van Benthuyesen, of Albany, the well known head of the house of Charles Van Benthuyesen & Son, died yesterday morning in the St. James Hotel, in this city, after an illness of a few hours. Mr. Van Benthuyesen, accompanied by his wife and daughter, left Albany on Monday morning by the day boat and reached this city in the evening, going to the St. James Hotel. He appeared to be in his usual good health. About five o'clock on Tuesday afternoon he was prostrated suddenly, and Drs. Stimson, Reid, and Bailey were called in to attend him. He was unconscious when first visited by the physicians and remained so until his death, which occurred at 6:50 o'clock yesterday morning. The physicians agreed that the cause of his death was apoplexy.

Charles Van Benthuyesen was born in Albany on May 6, 1817. He spent a few years at school. At ten years of age he entered his father's printing office, and applied himself to the work which was to occupy his attention for the rest of his life. By industry, natural aptitude, and careful attention, he rose by degrees to the most responsible positions in the office, until, in 1840, he assumed the active management of the concern. While he had spent but few years at school, he did not neglect his education. At the same time that he was forming correct business habits, and principles of honesty and integrity were becoming fixed as part of his character, he devoted himself to reading and study, equipping his mind as he worked at "the stand" or the "forms" in the printing office.

About the year 1836 Mr. Van Benthuyesen was appointed State Printer, and held this position until 1840. At intervals since Mr. Weed was superseded as State Printer, Mr. Van Benthuyesen has held the position, a portion of the time being associated with Edwin Crosswell, of the Albany Argus. Mr. Van Benthuyesen's father died in 1845, and left the business in his hands, since which time it has increased in proportions. Many inventions which have since proved invaluable in the trade were first tested in this establishment. It is said that here, and by Mr. Van Benthuyesen steam was first applied in this country to the work of printing, the engine with which the momentous experiment was made still being retained by the family. Some time ago Mr. Van Benthuyesen established a branch office at No. 64 College place, in this city, which is still in operation. In his business ventures he met with considerable success. Enterprising, industrious, intelligent, possessed of exceptionally genial qualities of mind and heart, he made many friends, and these, combined with his proverbial integrity, honesty and prudence assisted him to amass a comfortable fortune.

In 1840, the year that Mr. Van Benthuyesen assumed control of the house of Van Benthuyesen & Co., he married a daughter of Lyman Root, a prominent and influential merchant of Albany. Seven children came of this marriage, and of these five are now living—Charles H. Frank, Clarence, Florence and Bessie.

In business affairs in his native city he took a prominent part, and was identified with many leading enterprises there. He was at one time one of the leading American directors of the London and Liverpool and Globe Fire Insurance Company. He was a stockholder in several of the banks. He served one term as a member of the Board of Public Instruction of the city of Albany, and was at one time a member of the Board of Trustees of the Binghamton Asylum, to which position he was appointed by Governor

Dix, of whom he was a warm and intimate personal friend. At the time of his death he was a Trustee of the Albany Rural Cemetery Association, and also as a trustee was active in the rebuilding of the Albany City Hall, destroyed by fire in 1880. Mr. Van Benthuyesen was a prominent and active member of the Second Presbyterian Society of Albany.

Mr. Van Benthuyesen's body will be taken to Albany this morning, and funeral services will be held at his late residence on Saturday. The body will be buried in the family lot in the Albany Rural Cemetery.

ENGRAVING ON GLASS.

Cover the surface of a sheet of glass with a concentrated solution of nitrate of potash, by simply placing the glass flat on a table or in a shallow pan, and pouring the solution upon it. Then along the edges of the sheet place a platinum wire, keeping it immersed in the solution, and place it in communication with one of the poles of a secondary battery. Having done this, let another fine platinum wire be joined to the other pole and encased in an isolating substance, save at its point. With this wire trace on the glass the design required; a luminous streak will appear everywhere the wire touches, and however quickly it may be moved the design will be cleanly engraved on the glass. If the drawing or writing be done slowly the lines will be engraved more deeply. Their width depends on the diameter of the wire at its end; if it be reduced to a fine point, the work may be performed with great exactitude. The metallic thread conducting the electric current thus becomes transformed into a special graver for glass, and in spite of the hardness of the substance the operation requires no effort, for the corroding force is furnished by the action of the current upon the saline solution. Either pole may be used for engraving, but it requires a weaker current to engrave with the negative pole. If, instead of a plane surface, it is desired to engrave on a curved one, the same result may be obtained by thickening the solution with a gummy substance, in order to make it adhere to the glass, or by turning the object in a basin containing the solution, so that a freshly wetted surface may be continually presented to the operator. M. Gaston Planté has obtained these remarkable results by means of secondary batteries, but for continuous work any other source of electricity may be made use of, provided it has volume and intensity enough. Thus a pile of a good many of Bunsen's cells, or a Gramme machine, or even an electro-magnetic machine, with alternate position and negative currents, will do.—*La Technologiste*.

AQUEOUS SHELLAC VARNISH.

About the solution of shellac in water by means of borax, Dr. Geissler makes the following remarks: A varnish for covering maps, photographic prints, &c., can be readily prepared, as I have found by experiments, by merely shaking together two parts of a saturated solution of borax and one part of pulverized shellac, applying no heat. Solution will be effected in two or three days. In three parts, however, the shellac is easily soluble. Bleached shellac must be preserved under water, and must be dissolved immediately after being powdered, for if the powder be exposed to the air for several days it will dissolve only with great difficulty, and perhaps not at all. If in preparing the varnish, a higher

temperature than 50° or 60° C. is employed, the liquid is apt to assume a faint reddish color; the finished varnish, however, bears heat very well. Now, this varnish may not only be used for rendering pictures, prints, maps, &c., glossy, but it forms an excellent starch gloss. In fact, this varnish will be found much more adapted for laundry purposes than any of the starch glosses found in commerce.

Costly enamels in the Benvenuto style, with lockets either sacred or profane made by the famous Froment Meurice, are suspended from the delicate chateaines of gold or silver, now so fashionably worn.

Market Review.

OFFICE OF THE AMERICAN STATIONER, I
WEDNESDAY, October 19, 1881.

THE MONEY MARKET.—The money market has continued to grow easier, because of the diminished requirements of speculators through the recent decline in prices, the movement of stocks from weak to strong hands and liberal treasury disbursements. Call loans have ranged from 4 to 6 percent, with somewhat brighter financial skies, the "bulls" in stocks have been masters of the situation most of the time since our last, there having been only a few cases of temporary weakness due to sales to realize profits on higher prices. Government bonds were strong and $\frac{1}{4}$ ¢ higher for the extended 5s; the extended 6s were $\frac{1}{4}$ ¢ lower. Railroad bonds were dull and irregular. The market for foreign exchange is higher. The actual market was fairly active and steady for 60-day, on the basis of \$4.80@4.80 $\frac{1}{2}$, and active and very firm for demand at \$4.84@4.84 $\frac{1}{2}$, and at \$4.85@4.85 $\frac{1}{2}$ for cables. Commercial bills are \$4.78 $\frac{1}{4}$ @4.78 $\frac{1}{2}$. The actual rates for Continental exchange are as follows, this branch of the market being dull and steady: France, 52 $\frac{1}{2}$ ¢ and 52 $\frac{3}{4}$ ¢; marks, 93 $\frac{1}{2}$ ¢ and 94 $\frac{1}{2}$ ¢, and guilders, 39 $\frac{1}{2}$ ¢ and 39 $\frac{3}{4}$ ¢.

THE PAPER MARKET.—There is a continued fairly active demand for almost ever grade, more particularly for the low and medium qualities of book and news, with prices ruling very firm throughout. In the two grades mentioned several of our city houses have made an advance of $\frac{1}{4}$ ¢ on each, and this advance will probably become general and established very shortly. There is still considerable complaint of the drought from mills situated on some of the smaller streams, many being compelled to shut down on half time, while there are instances reported of others scarcely able to run at all. This continuation of the drought is not very likely to last much longer, as the time of the year is close at hand when we should expect the fall rains. In the meantime it effects a material shortening in the supply of paper, and prices are kept very firm and will be likely to continue so for some time after the drought is broken, as with the large number of orders already in hand, it will be some time before manufacturers will catch up and supplies on the market accumulate much in advance of the demand. Straw wrappings are in very light supply and the market is becoming exhausted, with light-weight paper selling on the basis of $\frac{3}{4}$ ¢. There is likewise a scarcity in light-weight manillas, and dealers are able to obtain very full prices.

THE STATIONERY MARKET.—Staple goods continue in good active movement although the demand is almost altogether from the out-of-town trade, the city dealers sending in very few orders at this time. In the line of fancy goods some improvement is reported, and some few houses already begin to experience a scarcity of stock. Import orders are being given thus early in the season for valentines, and in Christmas and New Year cards a very good business is being done, with a favorable prospect of a steady enlargement. Some preparation is being made for the holiday trade, which ought to start up in another fortnight, by which time a number of large out-of-town buyers for this class of goods are expected to be here, on the lookout for selections. There are no new features to prices, and the market generally is firm and steady.

HOW TO GILD ON GLASS.

First, I see that the glass is free from dirt and grease; then with my tongue I lick the place where I desire the figure or letter to be, and then press the dampened surface upon a piece of gold leaf of sufficient size, taking care to have it smooth and unbroken. After it has dried (which is indicated by its assuming a polished appearance), I place it over a board, and with a sharp instrument and ruler scratch lines for the top and bottom of the letters, and then (with quickly drying material) paint the letters, taking care to reverse them so that they will show right from the other side. When the paint is dry I rub off the superfluous leaf, and the job is done. If the work is to be done on large glass, like store windows, it is better to paint the letters first on the outside, as they are to appear, and this will show where to apply the leaf, and also how to paint on the inside, as the paint will show plainly through the leaf. When the job is done, the outside letters can be easily cleaned off. It will help most persons to paint the letters backwards, to mark them with pen and ink on paper, and after oiling the paper, look at them from the other side.—J. E. D.

ALLIGATOR LEATHER.

Alligator leather has been in use about twenty-one years. When first presented to the trade, says the *Western Leather Review*, its peculiar appearance was such, as to seriously interfere with its ready sale. Its many advantages, however (not the least of which are its strength, and the fact that it is absolutely waterproof) as soon as discovered and made known, caused it to rapidly grow in favor, not only with the manufacturers of heavy boots and shoes, but with other branches of the leather industry. So rapid was the growth of this leather in public favor, that the lagoons of Louisiana were almost entirely cleared of the reptiles, and the centre of the traffic in the salted skins changed from Louisiana to Florida. Throughout the vast swamps of the latter State the hunting of alligators has become a regular business, vast quantities being annually captured, and such proportions of the skin as can be utilized are sent north.

Blackie & Son, London, will publish, on November 1, the first of the four volumes comprising the new edition of Ogilvie's "Imperial Dictionary of the English Language." This revised edition contains no less than thirty thousand additional words, thus bringing the full total to about one hundred and thirty thousand.

THE PRINTING TRADE IN RUSSIA.

In the course of an interview with a Russian gentleman now on a visit to this country in search of bargains in printing machinery, &c., we gathered some information which we are persuaded will prove of interest to some, at least, of our readers. To others, the subject will doubtless prove attractive from the mere fact that it gives some insight into the life and ways of a foreign people.

Replying to a question as to the amount and quality of color printing done in Russia, Mr. W. assured us that, although the machinery in use there is similar to that used in England for the same purpose, and notwithstanding that inks of good quality are obtainable all over the empire, the amount of color printing was very small indeed, and the quality far from satisfactory. "The material is there," said our visitor, "but the men do not seem competent to produce good work, and we have to send all such either to Germany or to England."

It would seem that there is a scarcity of engravers, even in the large cities. The reply to a query on this head is worth recording in its original quaintness: "Where a printer or any man can engrave, he will make money come to him. There is no one to interfere with his business." This last sentence led to the inquiry as to whether, if such a man were to go out from England, he would be subjected to any annoying system of police supervision? The police laws are such, we are informed, that every person, no matter who or what he may be, is bound to submit to a periodical series of visitations from an emissary of the police department. This, we ventured to suggest, would be resented by an Englishman; but Mr. W. laughingly contradicted, and said that, after a little sullenness, our countrymen submitted themselves as freely and abjectly as any one else to the yoke of despotism.

Electrotypes are almost unknown in Russia, though the paper process of stereotyping is carried on with a certain amount of success. As for zincography, Mr. W. had himself only heard of it, but could gain no information respecting the process. He had an idea that it was similar to electrotyping and stereotyping, and was much surprised when we showed him some specimens of zinc-plate work.

Leading the conversation to literature and journalism, we were informed that quite a respectable number of newspapers were published in every city, and the machines of most printers were kept at work throughout the year in executing orders for religious and moral tracts, pamphlets, and books. Of these, millions are sent out annually, and are read with avidity by all who possess the power—and, we may add, the means—of purchasing them. "Some cities," said Mr. W., "have as many as sixty authorized newspapers;" but there are, it is perhaps needless to add, many for which the sanction of the authorities is never asked, for the simple reason that they are of a more or less desperately revolutionary character. It matters not what necessity there may be for expediting the publication of any kind of printed work, the Press Censor must have a voice in the matter, whether the proofs are those of a volume or of a circular. While such obstacles as these are placed in the way of an important industry, it is scarcely surprising to find Russia so slowly advancing in civilization.

Although English machinery is largely used in the printing offices of the Russian empire, it seems to be but little understood. None of the native workmen can be trusted to take down a

Wharfedale or any other machine, lest they should fit it up wrong, and so cause a "smash." Mr. W. cited an instance where a second-hand machine had been bought from an English broker, who merely packed it in a case, and allowed the shipping people to effect the delivery. There being no person in the district possessed of an atom of idea as to how to build-up the machine, it was left upon the machine-room floor in what a compositor would style a "state of pye," until a competent man could be obtained. This does not speak very highly for the mental calibre of the workmen.

Russia has tried her hand at some classes of machinery, but her manufacturers have not yet attempted anything in the way of printing appliances. England has the favor of the market in this respect, and may increase her trade if she sees fit to do so; for though American machinery is much admired on account of its finish, the great distance between the two countries—doubtless supplemented by the high prices asked by our transatlantic cousins—precludes the possibility of any very extensive trade being opened out in this direction.—*English Stationer.*

Among the visiting members of the trade in the city this week were Mr. Phillips, of Morton, Phillips & Bulmer, Montreal, Canada; B. F. Wade and F. W. Bainbridge, of B. F. Wade & Co., Toledo, Ohio; W. F. Parker, Fairhaven, Vt.; Frank Slason, of E. A. Lewis & Co., Bridgeport, Conn.; Peter O'Donnell, New Orleans, La.; Sir Sidney Waterlow, London, England; Mr. Adams, of Young, Lockwood & Co., Buffalo, N. Y.; Wesley Jones, Burlington, Iowa; Mr. Cunningham, of Cunningham, Curtis & Welch, San Francisco, Cal.; J. L. Putegnat, Brownsville, Texas; J. H. Hurd, Bradford, Pa.; C. S. Riley, Buffalo, N. Y.; George Apgar, of Finch & Apgar, Ithaca, N. Y.; Mr. Perry, of Ivison & Perry, Auburn, N. Y., and Mr. St. John, of Penoyer & St. John, Saginaw, Mich.

The stationery and paper trades of St. Paul and Minneapolis are said to be doing a very satisfactory business. The *Commercial News*, which represents the business interests of the two cities mentioned, speaking of True S. White, of St. Paul, as a representative stationer, says that he is "conspicuous for frankness, courtesy and liberal policy as a merchant."

CURIOUS MAJOLICA WARE.

The finest specimens of majolica are adorned with paintings of scriptural, mythological, or allegorical subjects, and are, therefore, devoid of positive historical value; but the minor efforts of the Italian potters are full of interest. Presents of majolica were frequently interchanged among the nobles of the sixteenth century, and in these cases the plates and dishes were adorned with the arms and portraits of the donor or the recipient, and frequently with the arms of both. One class of these presents is particularly interesting. Plates, jugs, or deep saucers, called *amatori* were offered by a cavalier to his lady-love, painted with her name, with the complimentary addition, *Diva* or *Bella*—as, *Cecilia Bella*, *Guilia Diva*. These portraits at the present moment are less interesting as memorials of dead-and-gone loves and vows, fragile as the material upon which they are recorded, than as exact records of the costume of the day. Wide latitude seems to have prevailed. One young lady, *Minerva Bella*, at the bottom of a plate, has her hair in multitudinous plaits, and wears a handsome dress with a "low dress;" while the beautiful *Cecilia*, smiling on a jug, wears her wealth of yellow hair in a few ringlets, looking like a "front," and rolled up in an enormous mass behind, as big as the head altogether, and confined by a green ribbon. This young lady, by no means unlovely, is also dressed in a "low body," from which springs the mysterious covering known in America as an "illusion waist," surmounted by a lace ruff closing round the throat. The lady's name is generally written on a scroll, often oddly disposed. At the South Kensington Museum will be found at the bottom of a dark blue and yellow plateau a picture of a lady who is clearly endeavoring to read her own name on the curly scroll before her. The contraction adopted by the artist has evidently puzzled the fair *Susanna*, who is trying to hunt up the wandering letters *Svanna Bella*. Another lady on a plate of ruby and gold lustre is looking rather gloomily at the motto inscribed on a ribbon curling about in front of her. "He who steers his bark well is always in port," may be a sententious maxim, but it has little of the dash of the amorous cavalier. Sometimes in place of the portrait was adopted a humbler decoration, somewhat after what I may call the "Valentine" style of art—such as two hands clasped over a fire, and above them a heart pierced with darts. A beautiful specimen of this kind of amatory dish is at South Kensington. The male hand is adorned with a thumb ring, the female with two rings on the second and two on the fourth finger. The heart above them is in ruby lustre, transfixt with three arrows (why three?) and underneath the hands is a fire, the flames in yellow lustre. The border is of rays in golden lustre, between which are flowers of ruby on a white ground, with pale, grayish blue outlines and shading. This may have been an engagement or betrothal plate. At the British Museum are several of these amatories. On one of these *Cupid* is riding on a stick; on another the god is mounted on a bird. The first is a specimen of Gubbio ware, of which middle-aged china maniacs will recollect a large quantity was bought for the museum at the sale of the Bernal collection. Very much after *St. Valentine* is a design mentioned by *Marryat*, "a heart transfixt with a sword and arrow, over a burning flame, bedewed by tears falling from two eyes placed above;" also these, "a grayhound with a heart in its mouth," and the two following, mentioned by *Passeri*. One of these is signed by the famous *Maestro Giorgio Andreoli*—a fe-

male head—having beneath *Daniella Diva*, and above a wounded heart, with "Oime!" These dishes were not presented empty, but filled with fruit or flowers. Now that a fashion has sprung up for costly valentines, perhaps we may live to see this pretty old Italian custom revived. It would at least afford the artists of the nineteenth century an opportunity of doing something original, if only in the way of amatory designs.

CHINESE GLAZING FOR CHINA.

They take the finest pieces of the petuntse, and treat them by pounding and washing over, and extract by repeated washings over the very finest part of the powder, which keeps so moist with the water that the mixture forms a liquid mass which they call the oil of petuntse. With this oil they mix an equal weight of borax. They then slake a quantity of quicklime, and form layers of that and dried furze, which they set on fire. When they have raised a large heap, after the first one is burned to ashes, they collect them and the lime, and form layers of them again, with a fresh quantity of the furze, which they burn as before, and they repeat this five or six times. They then put the ashes and lime into a vessel with water, adding some borax to the proportion of one pound to a hundred weight of the ashes. They next wash over the finer part of this mixture, and pour off at last all fluid from the dregs, which they keep together with the solid part washed over. They mix this composition of lime, ashes, and salts with the mixture above mentioned, of an equal quantity of the oil of petuntse and borax, and this compound forms the matter for glazing the ware.

Instead of the petuntse, the spar of lead used in the Saxon manufacture may be employed for forming a similar glazing, by treating it in the same manner, and it is said the glazing of the Dresden china is actually made in this way.

CRYSTALLINE SURFACE ON CARDBOARD.—The substance generally used for this purpose is the acetate of lead, commonly called sugar of lead; but inasmuch as it is poisonous, it is not to be recommended, as it is liable to become the cause of accidents. Better formulæ are the following, suggested by the late Professor Boettger, which afford a brilliant crystalline surface on wood, paper, &c. Mix a very concentrated cold solution of salt with dextrine, and lay the thinnest possible coating of the fluid on the surface to be covered, with a broad, soft brush. After drying, the surface has a beautiful, bright, mother-of-pearl coating, which, in consequence of the dextrine, adheres firmly to paper and wood. The surface may be made adhesive to glass by going over it with an alcoholic shellac solution. Beautiful crystalline coatings may be produced on wood or on sized or glazed paper by the use of the following salts: Sulphate of magnesia, acetate of soda, and sulphate of tin. Colored glass thus prepared gives a good effect by transmitted light.

The manufacture of playing cards in Russia is a monopoly of the government, whose agents produce them in a special manufactory in St. Petersburg. The work is executed almost exclusively by typographical means. The manufactory employs about 600 workmen, who turn out an average of about 2,000 dozens a day. The surplus funds are devoted to the support of orphan and foundling establishments. The cards are made from a stout kind of cardboard manufactured in the vicinity of Moscow.

WHERE IS THIS CHECKER-BOARD?

The *Utica Observer* says that, "there was a checker-board in New York a few years ago (and probably is still here), that was a sort of grand mogul of checker-boards. It was made in Florence, and one man worked 280 years putting it together, or 280 men worked one year, I forget which. It was made in the top of a table, and was composed of tiny pieces of stone, so nicely fitted together it was impossible to see where they were joined. If the pieces of stone had been larger the checker-board had been made quicker. When the table was done there had been so much labor expended upon it that nobody in Italy could afford to buy it. The workmen were discouraged, but the master bid them be of good heart. He had been trying in vain to sell the table to some of his countrymen for \$15,000. But he heard that a party of Americans were visiting Florence, and he put a new tag on the table, marked it \$30,000, and stood it in his show window. Sure enough, the Americans came along. One of them, who would have turned up his nose at a \$15,000 table, snapped at the \$30,000 one. So it came to New York, and stood for some years in a house in one of the cross streets, very near Fifth avenue. About four years ago the owner of the table checker-board determined to spend a year or so abroad. He had a large quantity of valuable furniture and he put it all in a storage warehouse, where the chairs and tables had "private plastered compartments at low rates." He was in Europe for a year or more, and when he returned he found that the storage warehouse had moved. That was nothing extraordinary, but the firm had forgotten to leave their new address. In other words, they had taken all this gentleman's furniture and disappeared. There was a long search and some of the furniture was recovered, but just where the \$30,000 checker-board is at this moment it would puzzle anybody to tell. This was no doubt the finest checker-board in America, and perhaps the handsomest ever made.

STAINING AND MATCHING.—To stain mahogany a dark color, dissolve bichromate of potash in warm water, and apply it to the part to be stained; it can be made weak by adding water, and the learner should use it weak at first, or he may make his work too dark; when dry, paper down. A little red sanders used in the polish makes it a bright red color, and improves the staining; this stain is used in matching mahogany work that has been repaired; if the work is not required to be very dark, a little red sanders mixed in the polish will be sufficient; this is likewise used for birch, or any wood that is used to imitate mahogany.

A new toy has been put upon the market. It is a twenty-five cent stem-winder watch, the hands of which move in their right relation to each other, the minute hand covering the circle while the hour hand moves five minutes only. A fifty-cent watch runs half an hour from time of winding, has a second hand attached, all the hands move with relative correctness, and a strong chain is attached. The metal of which the cases are made is a good imitation of gold and silver, and never tarnishes.

A remarkable clock has been set up in the Municipal Library of Rouen. It goes for fourteen months without rewinding, and shows the hour and day of the month. It was originally constructed in 1782, but underwent some alterations in 1816.

AMERICAN ART CASTINGS IN IRON.

A new departure of great interest has recently taken place in iron founding. This is the reproduction of various art works in iron castings. Shields ornamented with *repoussé* work, helmets ornamented in relief, plaques and Japanese bronze trays have been used as patterns, and successfully copied. The work has been done in an iron foundry in Chelsea, Mass. The most delicate patterns have been successfully followed. One large shield represents the siege of Troy, and is a copy of Cellini's shield. The numerous small figures are brought out clearly and defined with precision. The shield is twenty-two inches by twenty-eight inches, and is colored to represent bronze. This bronzing is produced by copper deposited by electricity. Another shield, heart-shaped, and 20 inches by 26, depicts the conflict between Jupiter and the Titans. This has the natural color of the iron. Two circular shields show Bacchus, armed with the thyrus and accompanied by a leopard. A triumphal procession is represented on a large salver. A copy of bronzed plaque, with a head of Shakespeare, and a reproduction of some *repoussé* work after Teniers, are also to be seen. A helmet, elaborately ornamented, with intricate designs, has been reproduced from a casting made at the Ilsenburg foundries in Prussia. Many fine castings have been made there, but there has been no attempt at classical art in the designs employed. Some antique swords, with curious hilts, accompany the helmet. Even more interesting are the reproductions in iron of two medallions. One is a profile portrait of F. D. Millet, by Augustus St. Gandens, and the other is the portrait of a young lady. In both the iron is bronzed. There are two small panels in iron, which have been "buffed" until they look like steel. One bears an exquisite chrysanthemum, with its delicate grace preserved in the prosaic medium in which it finds expression. The other bears some leopards taken from antique bronzes. A Japanese lacquer tray, with fine ornamentation, has also been reproduced in iron only a sixteenth of an inch thick. A medallion, with a head of Apollo *alto relief*, is as striking as the foliage and flowers that have been executed in low relief. The bronzed castings resemble beaten work in copper. There are no especial peculiarities about the production of these castings. American iron is used, the molds are of fine sand, and the best workmen and the greatest care are employed. The "facing" of the molds is of dust from the beams of the foundry. Impressions are secured in the sand of the shield or panel to be cast, and the mold formed in the usual way. The casts are put under a rag-wheel, with emery to prepare them for plating. The work has been treated in different ways, being polished to show the color of the metal, bronzed, copper-plated and oxidized, simply that varying effects might be studied. The experiments have proved that remarkable fineness can be obtained successfully in work in iron, and the art castings will now be placed on a commercial basis. The first work done in this direction was by the same company in 1876, when plates were cast from compression bronze patterns. About two years ago the matter of art castings was taken up, in connection with an attempt to introduce artistic work into the ornamentation of stoves. One advance led to another, until in the course of time the production of these art castings followed. The attention of architects and interior decorators has been attracted already. For plaques to be hung upon the walls, these reproduc-

tions are rather heavy. But a ready use is expected for iron panels, reproducing *repoussé* or other ornamental work, to be used in doors, in furniture, on the fronts of the steps in stairways, or in fireplace linings. Original patterns, of course, can be employed. Panels may also be used in friezes and dados, and in a great variety of decorative forms. A more directly architectural use of artistic iron castings is in balustrades and railings. Compared with bronze work, beaten by hand, the cost of these iron castings is very slight.

INSULATING WIRES.

The *Mechanical World* gives the following as an easy method for covering copper wire with gutta-percha for electrical purposes: Some commercial gutta-percha cut into small pieces is introduced in a bottle containing sulphide of carbon; this bottle must be kept well stopped. If agitated from time to time it dissolves at the ordinary temperature. When completely dissolved it is left to stand for some days, until the impure matters deposit at the bottom. It is then poured into another bottle, which is also kept well stopped and at a low temperature; for thick wire the solution must be concentrated. The wire being dipped in this solution, the sulphide of carbon evaporating, leaves on its surface a layer of gutta-percha more or less thick. In order to operate continuously, the solution is poured into a V tube, through which the wire is passed over a wooden pulley. The distance between the tube and the bobbin upon which the wire is rolled is about ten yards. In order that the sulphide of carbon may evaporate, this operation should be carried on in the open air.

SOME EARLY PATENTS.

Patent laws, which had their origin two hundred and fifty years ago, are now found on the statute books of forty-eight nationalities. The *American Inventor* says, that the first recorded patent was issued by Edward III. of England, to "two friars and two aldermen" for an alleged

discovery of the "philosopher's stone." It is to be presumed that the law officer of the Crown had serious doubts whether the "friars" and "aldermen" really discovered it, and he therefore stated it as an "alleged discovery." The term "alleged invention" has ever since that applied to new discoveries. It is also a little singular that the first recorded patent was for an invention as impossible in its nature as "perpetual motion."

The first patent on printing machinery was granted to Arnold Rotsipen, of England, June 24, 1634, and the same year "John Day Grant, citizen, fishmonger and broom maker, of the City of London," was granted a patent "for the sale and printing of the weekly bills of the prices of all foreign commodities for the term of fourteen years."

In our own country, Samuel Winslow, in 1641, received from the General Court of Massachusetts a patent for the term of ten years for a process of making salt. In 1652 the Superior Court gave John Clark a patent wherein it was decreed that a royalty of ten shillings should be paid by every family who should use his method of "saving wood and warming houses at little cost."

The wholesale trade of Rosenbaum & Co., Philadelphia, is reported as being very large. They have as much to do as they can attend to. Their assortment of frames is one of the best in that city. They make a specialty of gold and velvet picture frames, of which they have some splendid specimens. They have also an extensive line of velvet passe-partouts for photographs, and give particular attention to the manufacture of mats of every kind. They have 1,200 different styles of panel and satchel fringed cards, and they fringe cards to order at very low prices.

The most simple and best stain for mahoganyizing cherry is ground burnt sienna, mixed in benzine or turpentine. Apply with a brush or sponge, let it stand for a short time, and clean off with a cloth. It will be better to let it remain in this condition until the following day before commencing to finish.

THE PROGRESSIVE TRANSPARENT DRAWING SLATES.

This *entirely new* line of Transparent Slates will, on comparison, be found to surpass any of the kind heretofore offered; they are made of selected cherry wood, and jointed in the most substantial manner, similar to the best manufactured School Slates.

The pictures used are all prepared exclusively for these slates, so as to form selections interesting to the child and useful to the scholar, the subjects being attractive and their execution *PROGRESSIVE* from the easier to the more difficult. Each size forms a separate series of drawings, suited to the age or advanced ability of the scholar, which makes the *Progressive Drawing Slate* valuable as a toy, but more so as an article for useful educational purposes.

PERFECTED STYLOGRAPHIC.

The original and genuine Pen. Warranted the best made. Thirteen Patents granted to A. T. CROSS, the last, June 20, 1890, being the most important and giving the name **Perfected**.

MAXIMUM.—Holds most ink of any pen made; tires the hand less than smaller barrels. Fits Hambley's Pocket. Same price as Long.

LONG.—The famous Desk Pen. Extra Long. Holds most ink, except the **Maximum**.

SHORT.—Most widely known and sold heretofore; but **Maximum** and **Long** are much better for desk or Hambley's Pocket. So this will be largely superseded.

GIANT, with Cord and Gold Ring, same price as Short.

LITTLE GIANT
Plain, \$3.00.
All Styles up to
\$4.50.

LITTLE GIANT.
The Ladies'
Favorite.

Thirteen patents granted; seven more applied for; more genuine improvements; better record; more styles; larger stock; more thoroughly protected by patents than all rivals combined. Dealers and agents supplied with wood, glass and paper signs, placards, circulars, leaflets and cuts. We make both largest and smallest Pens, all of which will have the new improvements. Sole Agents for the World. See Descriptive Circulars.

"THE GREAT ROCK ISLAND ROUTE"

Calls your attention to the following REASONS WHY, if about to make a Journey to the GREAT WEST, you should travel over it:

As nearly absolute safety as is possible to be attained. Sure connections in UNION DEPOTS, at all important points. No change of cars between CHICAGO, KANSAS CITY, LEAVENWORTH, ATCHISON or COUNCIL BLUFFS. Quick journeys because carried on Fast Express Trains. Day cars that are not only artistically decorated, but furnished with seats that admit of ease and comfort. Sleeping cars that permit quiet rest in home-like beds. Dining cars that are used only for eating purposes, and in which the best of meals are served for the reasonable sum of seventy-five cents each. A journey that furnishes the finest views of the fertile farms and pretty cities of Illinois, Iowa and Missouri, and is afterwards remembered as one of the pleasant incidents of life. You arrive at destination rested, not weary; clean, not dirty; calm, not angry. In brief, you get the maximum of comfort at a minimum of cost.

That the unremitting care of the Chicago, Rock Island & Pacific Railway for the comfort of its patrons is appreciated, is attested by its constantly increasing business, and the fact that it is the favorite route with delegates and visitors to the great assemblages, political, religious, educational and benevolent, that assemble from time to time in the great cities of the United States, as well as tourists who seek the pleasantest lines of travel whither route to behold the wonderful scenes of Colorado, the Yellowstone and Yosemite. To accommodate those who desire to visit Colorado for health, pleasure or business, in the most auspicious time of the year, the Summer season and months of September and October, the Company every year puts on sale, May 1st, at all coupon ticket offices in the United States and Canada, round trip tickets to

DENVER, COLORADO SPRINGS AND PUEBLO.

At reduced rates, good returning, until October 31st. Also to San Francisco, for parties of ten or more, good for ninety days, at great reduction from regular fares.

REMEMBER, this is the most direct route for all points WEST and SOUTHWEST. For further information, time-tables, maps or folders, call upon or address

R. R. CABLE,

Vice-President and Gen'l Man'gr, Chicago.

E. ST. JOHN,

Gen'l Ticket and Pass'r Agent, Chicago.

THE ELECTRIC CANDLE IN VACUUM.

Sir Humphry Davy was the first to note that the voltaic arc became longer when confined in vacuum, and that the carbons were not consumed. In Jamin's experiments with the electric candle in vacuum, it has been found that when thus confined, or when hermetically sealed in vessels containing inert gases, the carbons are not acted upon. Such a gas is nitrogen, acetylene, carbonic oxide and marsh gas. Most other gases are decomposed by the arc: for example, steam gives carbonic oxide and acetylene, carbonic acid doubles its volume and changes into carbonic oxide, and the hydro-carbons, especially vapor of petroleum, is decarbonized, and produces filaments of coke connecting the carbon points. This action is employed to good purpose in fabricating the carbon loops for the Maxim incandescent light. Air in the sealed vessel offers a peculiar interest. First, there are seen vapors produced by the combination of oxygen and nitrogen, but this combination is soon destroyed, and the gas appears colorless again because of the oxygen combining with the carbon. Nitrogen and carbonic oxide then remain in the vessel. While the hyponitric acid vapors are in the vessel the arc changes in tint and elongates; but at last, when the chemical transformations are complete, the arc is good and of a greenish blue. The important point, however, it is stated, in a practical sense, is that it becomes quite fixed, and varies neither in color, position or intensity, as all naked arcs, however will regulated, still do. The spectrum is that of carbon raised to incandescence without burning, a spectrum such as has been observed in the tail of the recent comet by M. Thollon.

On the other hand, the spectrum of a naked arc glowing in the air is complicated by that of burning carbon. In an inert gas, therefore, the arc is a purely electric phenomenon, and it can be directed by electro-magnetic action. The ordinary arc, again, is composed of this electric incandescent current, and the flame due to the burning carbons and their irregular waste. The cessation of burning also stops the waste of carbons. When the Jamin candle burns in the open air it is consumed at the rate of 16 millimetres per hour; when closed in a sealed vessel this consumption is reduced to 0.2 millimetres per hour. Each candle lasts 160 hours, or 16 times longer than when burned free, and each lamp 800 hours, or 80 nights of 10 hours each. Not only the fixity of the arc, but its durability, is thus very much increased.—*Iron Age*.

ANTIQUITY OF TRADE MARKS.

The question has been asked somebody, "How old are trade marks?" who answers it by saying that they seem to be nearly as old as the industry of the race.

Ancient Babylon had property symbols, and the Chinese claim to have had trade marks 1,000 years before Christ. Guttenberg, the very inventor of printing, had a lawsuit about a trade mark, and he won it. As early as 1300 the English parliament authorized trade marks, and the laws of America have always protected them. The theory by which a suit is brought for infringement of a trade mark is that its use deprives the originator of his property, and deceives the public as to the article. Extraordinary means have been required at all times to guard against the fraudulent use of marks of manufacturers.

In ancient times the greatest importance was placed upon the marks of individual workmen,

because, as in the case of the armorers, valuable lives often depended on the quality of the workmanship. One old author complains that certain good and true soldiers were killed simply because the workmanship of their swords and arms were not good, and failed them when in battle. Very early, therefore, it was found necessary to make stringent laws against counterfeiting trade marks, and against *scamped workmanship*. Without protection in this one particular, trade would almost come to a standstill, because there are very few things, comparatively, that can be purchased on their merits, judged at the moment. In general, we know the quality of goods by experience, and it is only after they have been in use that a certain judgment can be pronounced upon their quality. Having, then, once found that a certain workman's productions are good, we seek them again in the market. If we have no means of identifying his trade mark the whole work of buying becomes a haphazard affair. The best goods at once lose their value. This was early discovered, and probably the successors of Tubal Cain were the first to use distinctive marks on their manufactures.—*Carpet Trade Review*

BATTERY CARBON.

A useful method of preparing cheap carbon poles for voltaic batteries has been devised by M. Mauri. It consists in taking finely powdered graphite mixed with an equal weight of sulphur free from carbonate, and heating the mixture in a crucible until all the sulphur is fused. The temperature, however, should not be raised over 200° Cent. When the mass is fluid it is poured into a suitable mold of metal, and a stout copper wire is inserted to serve for an electrode. When the mass is cool and solid it is ready for use. Its conductivity is practically as good as that of the best retort carbon, and as it is more electro-negative than simple carbon the electromotive force of the cell is higher. By increasing the proportion of sulphur in the mixture a highly resisting composition may be obtained which can take the place of copper or platinum silver coils for telegraphic or electric lighting purposes.

TO SOFTEN PUTTY AND REMOVE OLD PAINT.—Take three pounds of quick stone lime, slack the lime in water, and then add one pound of American pearl-ash. Apply this to both sides of the glass and let it remain for twelve hours, when the putty will be softened, and the glass may be taken out without being broken. To destroy paint apply it to the whole body of the work which is required to be cleaned; use an old brush, as it will spoil a new one; let it remain about twelve or fourteen hours, and then the paint may be easily scraped off.

A brilliant black is produced on iron and steel by applying, with a fine hair brush, a mixture of turpentine and sulphur boiled together. When the turpentine evaporates there remains on the metal a thin layer of sulphur, which unites closely with the iron when heated for a time over a spirit or gas flame. This varnish protects the metal perfectly, and is quite durable.

An old Connecticut copper coin made in 1788 has been found in overhauling an ancient house at Middle Haddam. It was in a rat's nest between the walls and had evidently slipped off the old mantel-piece and fallen inside the casing. The old house was once a tavern in which General Lafayette staid over night on his way to New London from Hartford.

L. PRANG & CO.'S

Christmas and New Year Cards

ANNOUNCEMENT.

WE hereby beg leave to announce to the trade the completion of our line of Christmas and New Year Cards for this season, for which our agents are now soliciting orders. The extent of our list, the originality, and especially the American character of our designs, together with the great care taken in their execution, will, we have no doubt, secure for our goods the popularity which they have enjoyed heretofore. The efforts we have made to secure the highest excellence, is attested by the names of some of the artists whose designs have been reproduced. We would only name Elihu Vedder, C. C. Coleman, Thomas Moran, Miss Rosina Emmett, Miss Dora Wheeler, Mrs. O. E. Whitney, W. H. Gibson, F. S. Church, R. G. Birch, &c. That a due regard has been paid for the quality of the literary matter, in connection with these designs, is shown by the fact that many of the designs are accompanied by original poems from writers of note, such as Mrs. Celia Thaxter and Mrs. Emily Shaw Forman.

The great increase of our manufacturing facilities, secured by additions to our building nearly doubling our floor space and by the adding of new machinery, will place us in a position to fill orders promptly. Still we would request dealers to place their orders as early as possible, so as to still further enable us to make timely preparation for prompt deliveries.

Our Cards will, as heretofore, be put up in envelopes containing twelve Cards, unless otherwise stated on our price lists.

We furnish envelopes without extra charge for all our Christmas and New Year Cards, for which the list price is \$1.80 per set, and over. Our silk-fringed Cards will no doubt be in great demand this season. We have made ample preparation to furnish these in time and have made arrangements with our manufacturers for the best quality of silk fringes. We would call special attention to the excellence of our fringed Cards and the novelties in colors and style of fringes we offer for this season.

A marked and attractive feature of our cards are the elegantly ornamented backs.

All our fringed Christmas and New Year Cards are furnished with envelopes and protectors, so as to insure safe transportation in the mails.

It will be impossible to embody our whole list in the space of the advertisement, and we will therefore merely give a general outline of the variety offered.

PRANG'S PRIZE CHRISTMAS CARDS.

COMPETITION OF 1881.

These are the Cards selected by the judges in the second competition for four designs of Christmas Cards, for which we offered \$2,000 in prizes of \$1,000, \$500, \$300 and \$200 respectively. At the recommendation of the judges, Messrs. COLEMAN, LAFARGE, and WHITE, the prize for third best Card was increased to \$500. Mrs. CELIA THAXTER has written appropriate verses for each of the designs.

- 1st Prize Card (\$1,000), by Elihu Vedder. Size, $6\frac{1}{4} \times 9$ inches; price \$1 each. Same card with silk fringe, cord and tassels, price \$1.50 each.
- 2d Prize Card (\$500), by Miss Dora Wheeler. Size, 7×9 inches; price 75c. each. Same card with silk fringe, cord and tassels, price \$1.25 each.
- 3d Prize Card (\$500), by C. C. Coleman. Size, 7×9 inches; price 75c. each. Same card with silk fringe, cord and tassels, price \$1.25 each.
- 4th Prize Card (\$200), by Miss Rosina Emmett. Size, $5\frac{1}{4} \times 9\frac{1}{4}$ inches; price 60c. each. Same card with silk fringe, cord and tassels, price \$1 each.

The Prize Cards can also be had mounted on heavy board with gilt beveled edges.

We beg to call attention also to the following publications for New Year and Christmas:

- "Goddess Fortune" New Year Card, by Elihu Vedder. Size, $6\frac{1}{4} \times 8\frac{1}{4}$ inches; price 75c. each. Same card with silk fringe, cord and tassels, price \$1.25 each.
- "Christmas Dove." Size, $7 \times 9\frac{1}{2}$. This card is in the same style as the success of the last Easter season, the "Easter Dove." Price 60c. each. Same card with silk fringe, cord and tassels, price \$1 each.

Our Regular Line of Christmas Cards consists, among others, of the following Series:

- | | |
|--|--|
| <p>Nos. 901, 902, 903, 906, 909, 910. Floral designs ranging in price from 20c. to \$1.20 per set of 12.</p> <p>Nos. 904, 905. Humorous Cat and Frog Designs, 60c. per set.</p> <p>No. 907 is a new series of Horseshoe designs, 75c. per set.</p> | <p>Nos. 920 and 929. Children's designs, at \$2.40 and \$3.60 per set.</p> <p>No. 922. Shells of Ocean, with figures, \$2.40 per set.</p> <p>No. 924. Fans with silk fringes, \$3 per set.</p> <p>No. 933. Bric-à-Brac designs, very rich, \$6 per set, and many others.</p> |
|--|--|

We offer a similar assortment of New Year Cards, but would call special attention to No. 1330, a new folding calendar, at \$2.40 per set. Most of the Numbers can be had with silk fringes ranging in price from \$2.25 to \$12 per set. Stock will be ready for delivery September 15.

Besides the above, attention is called to our New Birthday Cards, Scripture Texts Cards, New Panels, New Water Colors, by Thomas Moran, and other publications. Our line of Thanksgiving Day Cards will also be shown by our agents.

SOAPSTONE CAMEOS.

The extraordinary cheapness of "cameos" so-called, may be partly accounted for by the fact that many of them are made from soapstone. As is well known, this substance can be cut with a pocket-knife, and yields readily, therefore, to the graver's tool. The true stone cameo is much more intractable, and aside from the artistic skill shown in the work on it, much of its cost arises from the hardness of the material. The *Jewelers' Journal* says that the process of making soapstone cameos, which was for a long time preserved secret, has lately been stolen, and we publish it for the benefit of our readers. When the work, such as cutting, graving, &c., has been finished, the stones must be inclosed within an air-tight crucible. This is placed into the oven between coals and allowed to heat at a reddish white glow for several hours, after which the crucible is suffered to cool slowly. When the stones are taken out they will be found to have become so hard as to give sparks when struck with a steel, and resist the best heat. While steatite receives a milk white color by this operation, the naturally colored stone turns gray or reddish. Different colors may be given to either with such as will dissolve in amber varnish, or with colors dissolved in spirits of turpentine, which are more vivid, or with solutions of saffron, gamboge, campeche wood, dragon's blood, etc., in alcohol, in which the cooled steatite must be immersed for several hours. Gold dissolved in nitro-muriatic (aqua regia) yields, according to strength of solution, a more or less dark purple red. Indigo dissolved in sulphuric acid makes a grayish blue. Muriate of silver tinges black, especially with an addition of sulphuric acid. If the steatite, colored with a solution of gold or silver, is exposed to a bright flame, it will assume a gold or silver sheen.

The stone, when heated, is readily tinged by the acid-dissolved colors, and sulphuric acid is of more effect than either nitric or muriatic acid. Also colors dissolved in alkalies may be used. The tinge penetrates about one-eighth line. The stone is heated in the usual manner with emery, tripoli and tin ash, and receives a beautiful appearance resembling agate, jasper, chalcedony, etc.

PATENTS IN TURKEY AND LIBERIA.

General patent laws have been lately passed and promulgated in Turkey and Liberia, in which countries inventors may now, for the first time, secure their new inventions. The Turkish patent law is substantially a copy of the French and German systems. Any person may take a patent on deposit of drawings and specifications. Longest term of the patent is fifteen years; annual tax, £4. The invention must be worked within two years from the date of the patent. The penalties for infringement and the proceedings are the same as in European countries. In Liberia the patentee must be the inventor, or must have lawfully acquired the invention from the inventor. Drawings and specifications must be furnished. The government fee is about £10 10s. The proceedings are much the same as in taking an American patent. The invention must be worked within three years after the grant of the patent.

Richard McCloud, of Hartford, has a file of the *New London Bee*, for 1779-1801. The *Bee* was a Jefferson organ, and its editor was in jail three months for printing some reflections on President Adams.

IN 60, 80, 100 and 120 LBS. ALWAYS ON HAND.
TRY IT!

I WILL INSURE YOUR HOGS. Dr. Jos. Haas' Hog AND Poultry Remedy.

THE ONLY SCIENTIFIC SWINE REMEDY COMPOUNDED.

Read My Propositions!

First—When my remedy is used as a preventive, I will insure hogs by the head for a year, and will make a deposit of money to make such insurance good. If any hogs die, they will be paid for from such deposit; you can refer to my bankers, Messrs. Fletcher & Sharpe, Indianapolis, Ind., for my standing financially.

Second—Where my expenses are paid, I will visit herds of not less than 100, and I will arrest the disease among them, or forfeit \$500.

Third—After hogs have been regulated with my remedy, I guarantee that the annual cost of feeding will not exceed 25 cents per head. Furthermore, that the increase of actual flesh will far more than pay for the remedy used.

SEND FOR IT!

It is not an experiment, but an established success. Remember, it is the only remedy that is used and endorsed by the great breeders of this country and England. It owes its great fame to its genuine merits, and every mail brings tidings of its good work. The evidence in its favor is so strong the most scientific men of the country have pronounced it the conqueror of this disease. It is gaining ground daily, and no hog raiser up with the times can do without it. It is not only a protection against disease, but it is a powerful appetizer.

Inquire of my Bankers, Messrs. Fletcher & Sharpe, Indianapolis, Ind., for my standing. Will make a deposit of necessary money, and will pay for all that die.

SEND FOR IT! I GUARANTEE IT WILL STOP THE COUGH AMONG HOGS

and put them in fine condition for fattening. It will expel the poison from their system, tone them up, and invigorate them generally. It will make them thrive so as to astonish you. It will pay such a large per cent. on the investment, that no one can afford to be without it.

REFER TO ANY WELL KNOWN BREEDER OR SHIPPER IN ANY PART OF THE COUNTRY.

J. H. Whetstone, druggist, Iowa City, says: "The Haas Remedy sells better and with less effort than any proprietary medicine I have ever undertaken to sell of any kind. We have nothing in stock to-day but what I would rather do without than the Haas Remedy."

C. H. Klauenburg, druggist, Carlinville, Ill., says: "The Remedy sells well, and is the best on earth."

O. A. Elliott, druggist, Russell, Ia., says: "The Remedy has given good satisfaction here."

J. N. Penn & Sons, druggists, Sydney, Ia., say: "We hear good reports from what we have sold."

Ed. J. Brown, druggist, Edina, Mo., says: "It has given general satisfaction in this county. Have sold \$1,000 worth in three months. Have tested its merits myself."

J. M. Kufer, druggist, Macomb, Ill., bought \$400 lot of Haas' Remedy and sold \$300 of it in seven weeks.

SEND FOR IT. LIBERAL TERMS TO THE TRADE. Terms, Circulars, &c., on application.

W. Harris, druggist, Storm Lake, Ia., says: "It has given splendid satisfaction."

J. C. Eacker, druggist, Elliott, Ia., says: "Have sold several orders and in every case satisfaction given."

A. P. Gano, druggist, Missouri City, Mo., says: "It will be a popular article in our drug market."

J. W. Wyman, druggist, Unionville, Ia., says: "It cures chicken cholera every time."

Smith & Thomas, druggists, Platte City, Mo., say: "It gives good satisfaction here."

Duffield & Harlan, druggists, Centerville, Ia., say: "It is entirely satisfactory."

Dr. S. S. Clayberg, druggist, Avon, Ill., says: "It gives good satisfaction here."

Melle Williams, druggist, Taylorville, Ill., says: "Have a good trade. It gives splendid satisfaction."

\$1.00, \$2.50, and \$5.00 packages. I can work up a trade for you.

BYRON WESTON

DALTON, MASS., U.S.A.,

HAS BEEN AWARDED THE

GRAND PRIZE GOLD MEDAL

AND RECOMMENDED THE

Medal of Honor and Perfection

At PARIS, 1878,

This being the HIGHEST and ONLY AWARD given for

LINEN RECORD & LEDGER PAPER.

—A SPECIALTY.—

THIS Paper has received THE HIGHEST PREMIUM over all others from the Cincinnati Industrial Exhibition, Massachusetts Charitable Mechanics' Association, Franklin Institute of Philadelphia, Louisville Exposition, Medal and diploma from United States Centennial Commission, Medal of Progress American Institute, 1877, and Medal of Improvement and Progress, Boston, 1878. Its

PRINCIPAL ADVANTAGES

are as follows:—1. It contains more LINEN than any other Ledger Paper, has a longer fibre, and is, consequently, tougher. 2. Having a harder and better body, it frays less in erasure, so that by simply using the rubber after the eraser, the ink is prevented from spreading. 3. It is more uniform in Weight Color and Finish. 4. It never cockles if properly bound. 5. Its chemical action upon ink is such that it both writes and rules up better. For proof of the foregoing, refer to a large number of Stationers, Bookbinders, Bookkeepers, and Recorders, who have given it, after a severe test, the preference over all others. This paper is Double Sized, and will stand any climate or the most acid of fluid inks.

Send for sample sheet, ERASE and REWRITE FOUR TIMES on same spot. Each sheet is water-marked with name and date.

TRADE IN PHILADELPHIA.

[FROM OUR REGULAR CORRESPONDENT.]

PHILADELPHIA OFFICE OF THE LOCKWOOD PRESS,
407 Walnut Street,
PHILADELPHIA, October 25, 1881.

At no other time, even if we go back to the best fall season we have had in Philadelphia, would it be possible to find business in such a good state as at present. Manufacturers and dealers are crowded with orders, and many have more than they will be able to fill. There is everywhere in our trade a harmonious concert of congratulations of which any one may form an idea by perusing the following review that I believe will be of some interest, especially on the eve of the holidays:

A. M. Collins, Son & Co., on account of the great demand for cards, work to their full capacity. They try their best to keep up with the orders; but it is certain, should they continue, that they will have more than they can attend to.

J. B. Lippincott & Co., expecting an exceptional season, made extensive preparations for filling the numerous orders, but these have only sufficed until now, and they are to-day compelled to duplicate their stock to satisfy the needs of their trade.

George McDowell & Co. have tripled the amount of business done in former years.

Moss & Co. are completely satisfied. Their assortment of papeteries is magnificent, and they have a stock of these goods ranging from the cheapest to the most costly. They have just received from Europe some very handsome photo-albums at a fair range of prices. Among these is a series bound in plush and gold brocade of the most handsome effect.

The firm of William Mann retains its name despite the death of the regretted chief of the house. The business done by this firm is reported to be most brilliant, and the branch house at New York has also met with great success.

Wm. F. Murphy's Sons, whose letterpress copying books are in exceptional demand, have never had a better season in their department of stationery, blank books and printing.

Matthews & Co. are filling the numerous orders they receive every day for their Dickens Daily Calendar for 1882. The mottoes are entirely new and appropriate to the days; the almanac is handsomely printed on tinted paper, mounted upon fine steel engraved card, 6x9, printed in black and gold. The selections of mottoes have been approved by Charles Dick-

ens, Henry Fielding Dickens, Mamie Dickens, Kate (Dickens) Perugini, Letitia Austin (sister of Charles Dickens), Mrs. John Forster, James T. Fields, "Jennie June," Kate Field. Miss Hogarth (sister-in-law of Charles Dickens) writes: "I am greatly pleased with the calendar, and look with interest to the uncovering of every morning's motto." The engraving of the mount is very finely executed. The design consists of a handsome base, ornamented with branches of holly, &c.; upon the base stand two columns, connected by an arch at the top; at the foot of each column, standing upon the projecting ledge of the base, is a handsome vase, from which flowering vines are growing, entwining around the columns. This design is printed in a brilliant black, on rich, cream tinted card, which is further beautified by a plain gold border and gold lettering. The whole effect is very beautiful, and as Dickens' writings are almost universally popular, the sale of the calendar should be large.

Dreka, whose reputation for the finest article of stationery is so well established, has this year the handsomest selection that can be seen.

Rosenbaum & Co. have pushed out boldly into the wholesale and manufacturing trade, and have certainly chosen the best moment for doing so, as the amount of business they are doing is very great. They are receiving enormous orders for their picture frames, photograph albums, and also for their Christmas and New Year cards.

W. W. Ward, of the firm of Marcus Ward & Co., is in Philadelphia, with the manager of the firm, Mr. Ireland. These gentlemen report the most brilliant trade they have ever had. They have this year (as can be seen in another part of THE STATIONER) a splendid selection of cards unsurpassed by any other manufacturer.

Potsdamer & Co. are completely at home in their new location. All of their presses are kept steadily at work printing their folding and single advertising cards, which are a noteworthy artistic success, being a perfect imitation of steel engraving. The Christmas and New Year's cards of Potsdamer & Co. are also in very great demand.

Sinclair & Co. are working hard to fill the numerous contracts for their advertising cards.

T. M. Simpson has also had great success in the sale of all kinds of cards. He makes a specialty of fringing cards for the trade at very low prices, and receives many orders for this kind of work.

Charles Beck has been adding to his stock of advertising cards a very great number of new designs, among which I note the following series: No. 516, birds and landscapes in imita-

tion of etchings; No. 517, comic rabbit subjects; No. 524, children and flowers, chromo; No. 525, ladies and landscape, chromo; No. 518, cats and kittens, chromo; No. 42, children, gold ground. His newest card is No. 527, children and toys, a very brilliant chromo on gold ground. This firm has a large and splendid assortment of ball programme covers, entirely new and of the richest designs ever produced. Want of space forbids description of his Christmas and New Year cards, numbering about 300 and sold at prices ranging from the cheapest possible to the most expensive little *chefs d'œuvre* which are so well appreciated by the trade that their sale is enormous.

Theo. Leonhardt & Son have imported millions of French cards, of which they make a specialty. Theo. Leonhardt lately told your correspondent that when he started this importation he did not doubt of its extension, but that the business is so much greater to-day than when he undertook it, that it exceeds expectations.

Thos. W. Price Company has as much as it can do to fill orders for blank books. This company has had several very handsome orders from New York, and is also very busy with the sale of advertising, New Year and Christmas cards.

Charles H. Sherman & Co. (successors to John Gladding), are settled in their new stores. This firm has a specialty in the manufacture of the best qualities of blank books, for which John Gladding had made so excellent a name, that Sherman & Co. propose to sustain it.

Nagle & Co. have also been doing very satisfactorily. Henry L. Nagle returned lately from a long trip through the West, where he did an excellent trade, and found an unusual number of orders, which have made this season the best that the house has ever had.

The prosperity of this year has been most favorable to firms newly established. E. G. Locke & Co. have made a very brilliant beginning. Their handsome stock of glazed and fancy papers, paper laces, cards and cardboards, and also their chromo advertising cards, meets with ready sale.

Janentzky & Co., the great manufacturers and importers of artists' materials, have just received from Europe a full line of Opbacher's Christmas cards, which are much appreciated in our market. They have brought out a new paper palette, with gold beveled edge for decorating in water-colors. This is made in two sizes of various tints and finds a very good and easy sale on account of its very low price.

A. J. Holman & Co. have their new and commodious Bible warehouse, Nos. 1,222, 1,224 and 1,226 Arch street, above Twelfth street, about completed. The building is 60 feet front on

Arch street, running back in depth 175 feet to Cuthbert street, five stories high. The Arch street front is of very handsome pressed brick, with brown stone trimmings. The stories are high and the rooms are well lighted. The manufacturing department is very substantially built, the floors being supported by iron columns and girders, and it may in fact be considered a fireproof building. Their printing department has been moved to the new building, and the book department will be moved to the new quarters by the 20th inst. By the first of the year they will have one of the most complete publishing, printing and binding establishments in the country. The architects are Wilson Brothers & Co. of this city.

The activity which prevails at Langfeld, Turner & Andrews' is incredible. In all of their factories (for they have them in Philadelphia, New York, and Athol, Mass.), they are working their help day and night. Their stock is in great part broken up, but nevertheless orders are coming in daily, and the question is, how will they be able to meet all demands? The business of this house has more than doubled within two years.

William A. Haines, who has established a high reputation for tasteful goods, cannot make enough cuff, collar, glove and handkerchief boxes. His portmonnaies are also having an active sale, and his great success is in ladies' satchels in plush ombre, which are to be classed among the most beautiful goods of the season.

Turner & Harrison, steel pen manufacturers, are very busy and full of orders. Their standard styles of pens are giving satisfaction in all sections of the country. Their series of Russia Moheta pens are meeting with large and increasing sales, and are claimed to be the best series of pens ever invented in the United States. This series comprises pens of extra fine to coarse stub points.

Theo. L. Warrington is also enjoying the delights of good business. His pens find ready sale and are very much esteemed.

The Philadelphia Novelty Company, whose trade has greatly increased, finds it necessary to enlarge its manufactory. The Novelty pen clip which it manufactures is in great favor, and sells in large quantities. The same can be said of the Novelty fastener. J. VIENNOT.

THE CHICAGO TRADE.

[FROM OUR REGULAR CORRESPONDENT.]

CHICAGO, October 22, 1881.

Whether the present "boom" shall continue, who may foretell? but at present the trade are living in "green pastures and Piccadilly."

The Novelty Card and Advertising Company has lately removed to larger quarters, at 199 Clark street. It is constantly receiving new lines of fancy advertising cards, and has taken the Western agency for Downe's improved stylographic pen, of which a large stock has just arrived.

F. H. Revell, publisher and bookseller, has just removed from 77 Madison street to 148 and 150 Madison. Skeen & Stuart now occupy the entire store at 77.

Geo. J. Schmidt & Brother have added some new lines of stationer's fancy willow ware and rattan goods which the trade should see.

"The 19th Century," 8vo., cloth, 467 pp., by Robert Mackenzie, has just been issued in the Chatauqua Literary Course, by Fairbanks, Morse & Co., Chicago. It is well written and takes a comprehensive view of contemporary history from the opening of the century to the present day. It is especially convenient as a

book of reference, in that it places synchronous events in the whole civilized world side by side, thus presenting a fine opportunity for comparative analysis.

Fairbanks, Palmer & Co. have recently removed to ample quarters in a fine building at the corner of Adams street and Wabash avenue. C. H. Whiting, secretary, is a recent acquisition to the house. Mr. Whiting has been recently engaged in the book and music trade at Burlington, Ia. He is well known to music dealers throughout the country.

The Sanford Manufacturing Company announces a very neat novelty for retail dealers in the shape of a handsome black walnut sample case with glass front for the counter. It holds one dozen bottles of assorted colored inks, and is the very best thing possible for the display of these goods, being quite ornamental. All dealers handling Sanford's inks should order this sample case.

J. A. Straub, 193 Washington street, has recently added a fine line of emblematical programmes to his extensive list of "society cards." The designs are well executed in correct colors.

A new Chicago invention will shortly appear in the shape of a stenographic type-writer. It works very much on the principle of the ordinary type-writer, but the characters are stenographs. It is claimed that this machine will as much excel in speed the type-writer as stenography does long-hand. Brown & Holland, 50 Dearborn street, are the agents. Six hundred letters per minute is claimed to be an ordinary speed on this machine.

An informal meeting of Western type founders convened at the Grand Pacific, on October 11, to consider the interests of the trade. Conclusions reached have not transpired.

One of the Chicago papers has the following: "H. D. Chapin, of Chicago, like Simon Peter of old, went a-fishing last month, and, according to the Chicago Field, achieved on Lake Minnetonka, Minn., an enviable reputation by catching the two largest salmon ever hooked in that lake. The spot where this successful 'haul' was made, has been christened Chapin's Salmon Point. As a well-known dealer in books—new, old and second-hand—naturally 'all is fish that comes into his net.' May he be as successful in fishing for business as he is in angling for salmon."

H. H. Uny is rapidly disposing of Remington type-writers. Culver, Page, Hoyne & Co. are selling numbers of them daily.

J. J. Palmer, of Palmer & Rey, San Francisco, on his return from New York, where he has been buying very extensively of printing presses, &c., closed a contract this week with Tuerk Brothers & Johnston, Chicago, for the exclusive agency for the sale of the Tuerk Water Motor on the Pacific coast, their first order amounting to nearly \$1,000, and they hope to duplicate this order every thirty days. As Palmer & Rey only handle the best of everything in their line, it is a deserved compliment to the popularity and the effective working of the Tuerk Motor, which has never failed to come up to the guaranty of the makers, which is something that cannot be said of other motors and water engines. Tuerk Brothers & Johnston are to be congratulated on having such efficient representatives on the Pacific coast. I can also congratulate Palmer & Rey on having the exclusive sale of an article that is meeting with such an immense sale.

E. L. Stevenson & Co. are rapidly getting into shape since their recent fire, with a larger stock than ever. They are manufacturing a fine line of decorating goods, which are taking well.

Cresswell, Wanner & Co., type founders and

printers' supplies house, are now settled in their fine new building at 54 and 56 Franklin street. Their lines are very full, and the house is one of the most favored in the city.

H. C. Foster, representative of Chas. Pollock, at 31 Washington street, carries a fine list of fancy articles. He is paying especial attention this year to Mora's photos, Frang's cards, stereoscopes and views, fine frames, wood, porcelain, and papier-maché plaques, &c., for which he notes a better demand than usual.

The Chicago Toy Company, which started out under such fine auspices, is fulfilling prognostications. The trade is already pushing them for goods. It is a good idea for a house to carry so many complete lines, as it is convenient and satisfactory to buyers.

C. M. Barnes has just issued a catalogue of his new and second-hand books, many of which are rare and unique. His stock of school-books is very large, and buyers will do well to correspond with him. He also keeps a line of blank books at reduced prices.

Robert Graham, manager for George H. Sanborn & Sons, has been on the sick list for a couple of months past, and has been rusticated among the fields and hills. He is now back at work, "sound as a dollar."

John R. Barrett is doing some novel advertising. The latest is a series of differently colored square cards, in graded sizes, with corners rounded in different curves, and the whole fastened together by a fine large eyelet. It serves to illustrate Mr. Barrett's work in eyeletting and corner-rounding, which, judging from the sample before me, is very fine. His business card is printed in the centre, and a marginal note asks: "What must I do to be saved?" to which another replies, "Hang on a nail for future reference." The sample is so neat that there is no doubt this advice will be followed.

The Mackinnon "Sovereign" pen is growing in popularity here, so that although only a few months have elapsed since its appearance, Mr. Scott has succeeded in placing it on sale with almost every stationer in the West. It is the most convenient form of stylographic pen made, and is very ornamental. Mr. Scott is now away on a trip, from which he expects to gain many customers. His exhibit at the Exposition just closed was one of the most attractive there, and was profitable as well, for he sold pens there to the number of from two to five daily.

Baird & Dillon are doing a very heavy fall trade in their imported albums. Some of their latest are very attractive. The house is running till a late hour every night.

H. A. Taylor has just returned from a trip to St. Louis. He says that a novelty which the Livermore Company is about introducing takes among the trade without solicitation. I shall have the pleasure of announcing it shortly.

H. Hartt & Co. have just put in for the Chicago Herald one of Scott's latest improved perfecting web presses. A novelty in this machine is the change of direction given to the sheet as it passes from the cylinders to the folders, saving several feet of room. The press is claimed to print, fold and count 36,000 papers per hour, and the work is very clear and fine.

In times of prosperity, like the present season, a trade letter must necessarily be monotonous; but it is pleasant to know that the only thing to be said of the trade is that the season is a busy one. Only one complaint there is, and that a general one—that the school-book business is being taken from the trade entirely. There is something at fault here, and if the cause can be found it certainly admits of a remedy. Apparently the June convention has effected but little

improvement, and the natural argument is that the meeting did not strike the keynote of the evil. Is there not a present necessity for another and more determined convention to the same purpose?

G. B. H.

CINCINNATI PICKINGS.

[FROM OUR REGULAR CORRESPONDENT.]

CINCINNATI, O., October 24, 1881.

There are ways of gauging the volume of business in a commercial and manufacturing centre other than the testimony of the business men operating in that centre. Let us take the measure of Cincinnati for the fortnight closing last week. Look, for instance, at the Clearing House business for week before last. It was twenty-five millions of dollars, the greatest in the history of the city and last week—that is, during the week closing on Saturday they were twenty millions. This makes Cincinnati the fifth city in the United States in respect to the volume of her exchanges. She alternates occasionally with St. Louis from fifth to sixth place, but it now looks as if she was taking rank permanently. Another unit of measure for gauging the state of general business is the use made of the telegraph for business purposes. I have the testimony of the managers of the Western Union Telegraph Company here that the present use of the wires for business is vastly greater than last year at this season—say one-third greater, or thirty-three and a third per cent. Last year their use was greater than in 1879, when business was regarded as “booming”—a term I don't like, although compelled to use it for brevity's sake. The express company test, the railroad test, the post-office test, and all other tests, confirm and verify the conclusion already reached, that business never was so brisk here as it is to-day. Living testimony concurs to clinch and confirm this conclusion. There is no use of listening to one timid man's complaint in the face of this evidence. The wheels of trade are whirling with blinding swiftness, and it is folly to deny it, and the man is wicked who complains, and the one who listens to a complainer deserves jailing.

I am going now to name out some busy men in the stationery line who don't complain—in fact, haven't the time if they had the “gall” to grumble (there goes another slang word). One of the peculiarities of Cincinnati is the number and variety of her manufacturing interests—the number of industries she can boast that begin at the foundation of the matter and grow up and build one on the other, or both. I could name a number of great leading industries which started from very small beginnings, and now distinguish the city. The time was when John Holland and one other operative were the only workmen in the gold pen business—that was in Sheppard's time. John Holland succeeded to that business, and now employs not less than eighty skilled operatives, and will have speedily to greatly increase that number. He has that business pretty much to himself—no rivals.

Here is the firm of R. L. Curry & Brother, engravers and manufacturers of fancy stationery, who have a solid foundation for their business in that they have established it, and a splendid prospect before them in a rich field almost unoccupied by any manufacturing enterprise in the West. The ornamental letter paper and the illuminated cards they turn out are examples of brilliancy and beauty, and the work is as honest as it is bright. Both members of the firm are skilled artists, and both work at the business. R. L. is busier now than the bees in his hives at his Walnut Hills home. He has a bonanza in

his snug establishment on Fourth street, the value of which he will know better six months hence than he does at present.

The firm of Wiltach & Baldwin is one of the oldest in the city. It is an immense concern, with the most admirable appointments for a wide range of manufacturing. Its products are business paper of every description, blank books, and a most extensive range of general stationery. Its field is in a circuit around Cincinnati, with a radius reaching out as far as a locomotive will carry a man between sunrise and midnight. Hon. Charles Wiltach, of this firm, is a practical mechanic, understands machinery, and is familiar with all the details of his business. He is a man of public spirit; was mayor of the city two terms; narrowly escaped nomination for Congress, and is the suggester of our Expositions, and father, as it were, of the splendid park that adorns the city, and always has been a leading spirit in the Mechanics' Institute of this city. His full-length portrait adorns the walls of Greenwood Hall, in the Institute Building.

Samuel C. Tatum is a manufacturer of specialties, as the whole stationery world knows, from his celebrated letter-copying presses. He has a “corner” (there goes another bit of slang—must use the word “corner,” no other will suit, so here goes); he has a “corner,” as it were, in his peculiar style of presses and in their superior quality. The fact is I don't know much about them, and wouldn't know anything were it not that I can't get rid of hearing other people speak of them. Before I write another letter I'll go down to his John street factory and see them for myself. I do know their sterling reputation though, and I know they are to be seen all over the length and breadth of this mighty Mississippi Valley, and I have no doubt that they have made conquests beyond its bounds.

George Gibson, the lithograph publisher on Home street, is an original genius. I saw him only a day or two ago driving an express wagon like mad down Vine street. It was business. He's everywhere. An hour after I saw him he might have been driving his buggy out somewhere else after a bargain or a sale, and an hour later he may have been in his establishment, giving directions for a shipment or passing a judgment upon a picture or a design. It would be just like him. It needs no testimony to prove that his business prospers, and that it keeps up with the times.

Snider & Hoole are known to all bookbinders and bookmakers. Only a few such establishments are required to supply a nation in their line of products, that is, supplies and machinery for bookbinders and bookmakers. They have a firmly established business, a broad basis of trade in respect to volume and to the wide extent of territory they supply, and they may be said to have built on a foundation of bed-rock, for their reputation for producing and supplying honest goods has never been sullied and never been surpassed.

Among the manufacturers, Charles Stewart holds the fort with any amount of “grit.” (There it is again—“grit.”) You just ought to see that elevator of his bobbing up and down through all the stories of his big warehouses on Walnut street, and you ought to take a peep at the huge piles of stock in these same rooms. They are salesrooms, too; and you ought to see the bustle of the clerks and porters and shippers; and you ought to see the bookkeepers, &c.; and, finally, you ought to see Stewart at the close of the day, when he is “awful” tired, but, nevertheless, exhilarated by the flush of the day's business, and is about to set out for his elegant home in Clifton. Well, his mills are doing

all they can, working full force, and his business in lines of goods in which he deals is at flood tide.

Snider's Sons are doing fine bookwork at their Hamilton Mills, with a portion of the machinery new—that portion supplied after the fire from which they suffered slightly a few months ago. They grew up in the business and understand the details of the manufacture, as it were, by instinct. In news and book paper they have had a most admirable trade during the fall, and this experience naturally adds to the cheerfulness and vivacity of these gentlemen, socially—both of them, by the way, are jolly, lively companions when off duty.

Coming to book stores, it would be hard to find the equal of that of Robert Clarke & Co. From the street one sees two stores, aggregating 57 feet wide and 90 feet deep, but the establishment occupies in all eight times as much space as one sees from the street. Sixteen floors are nearly two acres of floor space. This includes the printing establishment, the warerooms and the shipping rooms. I can't go into detail—the subject is too long for this letter or any one letter, and the rush of business is so rapid that one can only give it a glance in correspondence like this.

George Stevens is doing a brisk work in books, and general and fancy stationery, on Fourth street, near Walnut. His store is always crowded and he must be thriving.

There's “Billy” Carpenter, of W. B. Carpenter & Co.; the house looks as if it would be turned upside down with the whirl of people through it, but, somehow, next morning it looks all right.

J. R. Mills' place has an air of order and easy dignity about it, that any observer will notice. From the selling room, when “Billy” O'Neill is not darting past the window too rapidly, you can get a glimpse of the manufacturing department, and you can hear the buzz of its machinery and the choral click of its presses at all hours. That means briskness and prosperity.

One of the bright artists of this city in the industrial line is Lewis B. Folger. Any man who has seen the school maps published by Van Antwerp, Bragg & Co. in their standard geographies will have admired the splendid maps in these books. They were drawn and engraved by L. B. Folger, of this city. He is young and has ability, and a bright future awaits him.

Since last week there seems to have been a disturbance in the elements. It has rained quite liberally, and there is promise of more.

Late last week H. H. Brennenman & Co., dealers in paper hangings, made an assignment.

H. H. Barney, of Robert Clarke & Co., has gone away to get married.

By the way, P. G. Monroe, of THE STATIONER, with headquarters at Chicago, was here most of last week. Perhaps that explains much of the phenomena I have tried to describe in this letter.

PRINCE WILLIAM.

ST. LOUIS ITEMS.

[CORRESPONDENCE OF THE STATIONER.]

ST. LOUIS, October 20, 1881.

Trade in St. Louis I find “booming,” as everywhere else, although most of the houses here have experienced considerable difficulty and annoyance from the freight blockades. Said one prominent gentleman with whom I conversed upon the subject, “All of our September business has been lying in East St. Louis for nearly a month past, and most of our October orders are there still.” However, the difficulty is now about over, and freight is coming into and going

out of town as rapidly as steam can take it. As I before said, the trade is fine, and all of the houses are pushed to their full capacity.

As I called on pretty nearly all of the trade while in town, and as they are all good friends of THE STATIONER, I may as well quote them in detail.

John J. Daly, 211 North Third street, whose advertisement is to be found in another column, has a fine, large store, and a still finer and larger selection of goods. His regular specialty is commercial stationery, in which he stands among our leading western houses. For the convenience of his friends and customers he keeps a line of fancy papeteries, as well as John Holland's gold pens and the Livermore stylographic pen. He has just received a full special line of fine pocket-books and general leather goods in seal, Turkey, Russia and other fine leathers. Mr. Daly can boast, if not of the largest, of one of the most complete lines of these goods to be found in the West.

C. W. Crutsinger, who also announces his business in these columns, moved during July last to roomy quarters at 116 and 118 North Second street, where I found him. Everybody in St. Louis knows "Charley" Crutsinger, and every printer in the West knows Crutsinger's "Old Reliable" Eagle composition. Mr. Crutsinger during the past five years has built himself up a trade that none other can touch; and, "besides that," says a St. Louis printer, "Charley is a personal friend to every one he meets, and his customers are all personal friends to him." I would recommend printers who want to find a reliable composition and a reliable manufacturer of composition, to give Mr. C. a call.

At the Central Type Foundry, J. A. St. John, secretary, says that the house is behind in orders, although it is putting in new machines as fast as they can be got from the foundry. Copper alloy type is the specialty of this firm, and Mr. St. John considers it worthy of special note that the house does not hold a single mortgage against man, woman or child, a rare boast, he thinks, with type founders East or West.

Robt. D. Patterson & Co., at 316 and 318 North Third street, are "too busy for any use." Mr. Patterson says that he "has no time even to smoke." He says that their business is more than double what it was last year.

The Hugh R. Hildreth Printing Company, 407 North Fourth street, is another very busy institution. The stock for the fall and winter trade is extra large, but scarcely heavy enough for the demand, Mr. H. thinks. However, the house is "pitching in with sleeves rolled up."

E. H. Ross, 311 North Fourth street, is withdrawing from the general frame and fancy picture trade, and intends devoting himself specially to map and gold frame making.

At 115 and 117 Chestnut street, I found Mr. Buxton, of Buxton & Skinner, full of business and the spirit of enterprise. The building into which they moved during last July is a new one, 35 feet front, 88 feet deep, and four stories high, with a basement, and was built with especial consideration of the requirements of the house. But while it is much larger than their old quarters, Mr. Buxton says that they are already cramped for room, and could employ comfortably twice the space. The departments are well ordered and conveniently arranged; the basement is used as a stock and packing room; the first floor is the general store and contains the retail stock, &c., of which there is a large and fine selection. On this floor is to be found a full line of blank books, fine stationery, and holiday goods, of which they claim to have this year one of the finest assortments in the West. On the

second floor are the composing and engraving departments, with the well filled stock-room. The third floor is occupied as a press-room, both for letterpress and lithographic printing. Here are three fine cylinder presses and some half dozen jobbers of different sizes, besides steam lithographic presses, one of the latter being "brand new," a Hoe, of the latest and most improved pattern. On the fourth floor is the bindery, which is very complete and supplied with the most improved machinery, to which are to be added immediately a rotary perforator, two new ruling machines and a new paging machine. The building is fitted throughout with a system of electric bells and speaking tubes, and the elevator is supplied with automatic fire-proof hatches. It is heated with steam, and new steam pipes are being laid underneath a raised platform, back of the two long counters on the main floor. A new Springfield gas machine is also being put in, so as to make the firm henceforth independent of gas companies. The house also talks of the electric light as a probability of the near future. Altogether, this is an enterprising house and full of business, from basement to roof.

The Graham Paper Company reports a rushing business and lack of sufficient room. This is to be remedied about December 1, when its new warehouse, now erecting on Commercial alley, will be ready for occupation. Mr. Graham is at present in the East. The house carries a full line of heavy wrapping papers, and also makes a specialty of Holyoke books and flats. The business is excellent and promises well, though somewhat disturbed by the freight derangements in East St. Louis. Despite the shortage in crops, country buyers, with the exception of a few South, are reported as paying promptly, and this I found to be a general experience with the St. Louis trade.

F. O. Sawyer & Co., 214 North Second street, deal in every description of paper for printers', binders', lithographers' and stationers' use, and printers' cover stock, as is set forth in their card in another column. This year they are devoting special attention to holiday and fancy advertising cards and folders, of which they have a fine and large selection, covering the best makes of Frang, Hake, Bufford, Collins, &c., all being picked.

Libby & Williams, paper, twine and paper stock, at 421 North Second street, are old tradesmen who have made a name in heavy papers. Last spring they completed their twentieth year in their present location. Although their specialty is wrapping, they keep a full line of all grades of paper. They report trade better than usual this season, but the scarcity of papers puts them behind somewhat. They have also experienced trouble with their freights.

R. & T. A. Ennis are very busy with the printers this season, they having an excellent trade in general printers' supplies.

Shorb & Boland are busy as usual. Mr. Boland is out of town.

Fred. Klunder, commercial printer, at 323 Market street, reports himself very busy.

Pettes & Leathe, 606 and 608 Washington avenue, have lately sold out their show-case manufactory, and are now devoting themselves to pictures, frames, mirrors and artists' materials. In the latter they are direct importers of Winsor & Newton's oil and water colors. They also keep a full line of the latest cabinet photo frames and stands.

Levison & Blythe report themselves "blithe" and busy, although cold weather always stops the shipping of inks.

Snider & Holmes, who announce themselves

elsewhere, are just in receipt of a fine line of visiting-menu and wedding cards and ball programmes, tassels and pencils. Their annual list of New Year goods will be ready by December 1, and is very full. Their stock of paper, blank books, &c., is also very complete.

The St. Louis type foundry and paper warehouse will remove, about November 1, to the new building at the N. E. corner of Third and Vine streets. This building is one of the largest and handsomest devoted to the business in the country, being 75 feet front, 138 feet deep and five stories high, with basement and sub-cellar. This will give the concern 43,260 square feet of room, enough, it would seem, for any business. The machinery will be all of the most approved makes, and the products, if possible, better than ever. The house also deals in paper and printers' supplies. It is the manufacturer of a new job press called the "Baltimorean," and said to possess many desirable improvements. The house is constantly inventing and improving, so that the trade will do well to keep track of it.

The G. H. Thonssen Manufacturing Company claims to be the only molding, frame and mirror manufactory in St. Louis, and the largest in the West. The factories at Main and Sydney streets cover an entire block, and their products are sold all over the country, and are sent abroad. They employ 250 hands.

The St. Louis Book and News Company repeats the universal complaint—"rushed!" The new price lists, containing many holiday novelties, besides all the regular staple goods, are now ready for the trade. Among the neatest lines may be mentioned fancy ornamental writing-desks in wood, leather and leatherette, besides albums, work-boxes, dressing-cases, &c.

The Williamson-Stewart Paper Company is busier than ever, and has no time to write an advertisement. Its business in type, presses and general machinery has been growing so rapidly during the past few years that it now announces a new and complete department for the sale of these goods. In a late circular it says: "Hereafter we will be glad to furnish or correspond about the following named articles, or anything else that fits into this line. In the matter of larger machinery, we have perfected arrangements with R. Hoe & Co., C. B. Cottrell & Co., C. Potter, Jr., & Co., Gordon, Peerless, Liberty, Universal, and other leading makes in the press line. And in the paper cutter line we have contracts with Acme, Sheridan, Sanborn, Peerless, Hoe, Hardy, Paragon and others. We give the above names only to show the completeness of our agencies." This is an enterprising house, and is reaping its reward in the confidence and patronage of the entire West.

The St. Louis Paper Company has just issued a neat price list of its printers' fancy stationery which deserves preservation.

To recapitulate. Trade in St. Louis is flourishing, and payments prompt and good. The high water at Rock Island and other places, together with scarcity of straw, has somewhat retarded the supply of paper. But the worst evil, and one which could and should be remedied, is the freight difficulty. It seems strange, but is nevertheless true, that thousands of cars full of goods are lying just across the bridge in East St. Louis, yet the merchants cannot touch them. The Transportation Company has the city by the throat, and its horses being sick, deliveries have stopped. The merchants offered to supply their own teams, but—on what grounds I know not—were forbidden. This must, and it is thought will soon, be remedied, either by the establishment of a freight depot in St. Louis, to which the cars shall be brought and placed under cover,

so that the merchants can reach them, or else by a new arrangement with the Transportation Company, which shall consider the interests of the merchants to a greater extent than at present. Something must be done, and that speedily. H.

NOTES FROM TORONTO.

[FROM OUR REGULAR CORRESPONDENT.]

TORONTO, Ont., October 22, 1881.

There are two obituary announcements in *THE STATIONER* of the 13th which will be read with regret by a great many people on this continent. Dr. J. G. Holland was largely read and admired in this country as well as your own, and his death removes from you one of your keenest and most genial of literary workers. As a poet, novelist, essayist and journalist, Dr. Holland's claim to admiration and remembrance is indisputable. From all that we know—and we have followed his literary work pretty well—there are no apologies required for a line that he has written. He never, so far as we have seen, transgressed the laws of God or man's proprieties in anything that emanated from his pen.

Mr. Fitzgerald, known more particularly to the book trade, we remember well, and did business with the firm of Dick & Fitzgerald for some years after its formation. I am at sea about the location you give them, and am not sure whether the *Herald* or *Times* office occupies the corner where Barnum's Museum used to be, and which attracted my attention in going down Broadway thirty years ago, and more by the hand occupying a balcony on the first story. The blast of horns and beat of drums mingled with the roar of traffic on that end of the street did not tempt me to hang around very long in that quarter. However, I knew the corner referred to in 1851-52, and along there was occupied by Stringer & Townsend, book-sellers and publishers of *Townsend's Magazine*, which has been long dead. I knew all those people in those days. Your late war broke up our trade relations, and after a lapse of more than twenty years I visited New York, and, to use a common expression, felt like a cat in a strange garret. I wandered through old and well known streets, but the houses I used to do business with were gone or had changed their names. Streets that were then occupied with private residences, and where I had spent many pleasant evenings, were given up to trade. Leading publishing houses, except Harpers' and a very few others, have been split up, and a few of the old names have been found in other shapes. The *Knickerbocker*, with its genial editor Clark—then in its prime, has passed away, and *Putnam's*, with many other good things, and others have taken their places. Time, the world's policeman, says, "Move on," and old stagers like myself, when we look around and mark the many changes which have occurred, feel like saying with poor Joe in "Bleak House," "I'm a-movin' on, sir," and will soon be out of the way.

Now about business. Mr. Reid, of Buntin Brothers & Co., is away to your side on a business trip.

Nisbet, Byron & Co. say that they are very busy. They have had an unusual demand for pocket bibles, and attribute the increased sale to the publication of the revised New Testament. The study of the latter, they think, has caused an increased sale of the former. They also report much larger sales than usual in miscellaneous books. In Christmas cards they have done a large trade in a high class of hand-painted, and have also been successful with a fine class of fancy goods.

Hart & Co. have their new premises nearly completed, and though not settled, are busy. They have brought out a new Pocket-book Dictionary or Spelling Guide, nicely gotten up, and can be carried in the pocket without any inconvenience.

On inquiry at Copp, Clark & Co., Joseph Campbell & Son, Canada Publishing Company, W. J. Gage & Co., Barber & Ellis, I met with the same reply: "We have nothing specially new, but have all we can do." These brief answers are perhaps all that are required, but become a little monotonous to your correspondent when the time comes to make a letter out of such material.

Davis & Henderson are full of orders, especially in their blank-book department, which is a specialty with them. They have an excellent trade with the banks, &c., and turn out some very fine work. They also report a large increase in their wholesale stationery department.

Brown Brothers, well known and deservedly popular, have been enlarging their premises by an additional story, which gives them an extra flat from front to rear, and enables them to give employment to quite a large number more hands. They have been putting in new and improved machinery, and have now one of the largest and certainly the most complete bindery in the Dominion. They report a large increase in sales of their own manufactures. Their wallets, purses, card cases and diaries are, in workmanship, style and price, equal to any goods of the kind produced, and are preferred here, as a rule, to any foreign goods. At the recent Industrial Exhibition, they carried off first prizes for all these goods, blank books, letterpress work, new cloth binding, &c. It is well understood in this country that anything they send out can be depended on. They also report their stationery trade, of which they are large dealers, as most satisfactory.

Rev. W. Briggs, of the Canadian Methodist Book and Publishing House, says that business in its publishing department is rushing. It has five cylinder presses and several smaller ones, which are running night and day in order to keep pace with work. It has also been enlarging its premises, but the demand upon it increases with more rapidity than the facilities to meet it. It has just brought out "Arrows in the Heart of the King's Enemies," by Dr. A. W. McLeod; a Tune Book for the New Hymn Book recently published, a new Sunday School Hymn Book, &c.

C. H.

"The largest use of Faure's accumulator in electric lighting," says Sir William Thomson, "is to allow steam or other motive power and dynamos to work economically all day or throughout the twenty-four hours, where the circumstances are such as to render this profitable, and so store up energy to be drawn upon when the light is required." There is also a very valuable use of the accumulator in its application as an adjunct to the dynamo, regulating the light-giving current and storing up an irregular surplus in such a manner that stoppage of the engine would not stop the light, but only reduce it slightly, and that there would always be a good residue of two or three hours of full lighting power, or a supply for eight or ten hours of light for a diminished number of lamps. Sir William has constructed an instrument to make and break the circuit between the Faure battery and the dynamo, and thus fulfill automatically the conditions for the economical use of generating machines and the regulation of the supply of electricity for the lamps. This instrument also guards the coils of the dynamo from damage, and prevents loss in the accumulator.

MARCUS WARD & CO.'S CARDS.

Of all the imported Christmas and New Year's cards, those of Marcus Ward & Co. are certainly recognized as being among the best. There are in England other important firms manufacturing the same articles, but none of them have specially in view the American market; while Marcus Ward & Co., who have a very extensive trade here, are constantly busy in asking what is most suitable to our taste, and by this means monopolize a large amount of the business in that line. This year their assortment is very great and much in excess of any previous year, as well as very good in an artistic point of view.

If space was not limited, a fuller description of these cards would have been given. They deserve as much attention as pictures, and that title they certainly have a right to.

Among the cheapest cards may be particularly noted the following: No. 408a, children and toys; No. 412, marine, flowers and mottoes; No. 442a, flowers, with Christmas mottoes; No. 459b, Robin Wood and the blackbirds, a charming card dedicated to children; No. 463, flowers and mottoes (octagon), entirely new style; No. 471, hanging basket of flowers in very good taste; No. 472, exquisite flowers; No. 474, sprays of holly, mistletoe and ivy, with Christmas mottoes; No. 476, Mizpah New Year and Christmas cards, one of the best which has been ever made.

The following cards are sold a little higher: No. 696, flowers, Christmas roses, oleanders, &c.; No. 606, children and peasants; No. 617, a folding card, representing the past, present and future, a charming Grecian design; No. 621, dancing girls, a new design by the great artist, Kate Greenaway; No. 639, Eastern girls, a charming design; No. 639a, young girls, by Kate Greenaway, with quotations from Shakespeare on the back of the card; No. 644, the four seasons, one of the best works of Walter Crane; No. 667, white flowers and cross, orange blossoms, passion flowers, &c.; No. 669, children, flowers and landscape; No. 667, ladies, a delightful card; No. 678, boys and girls, by Kate Greenaway, with greetings printed on the back; No. 679, fruits, and quotations from Shakespeare for birthday, wedding, New Year and Christmas; No. 692, folding card; a splendid picture of the history of the Nativity of Jesus Christ. This card is divided in three panels. No. 693, landscapes, in very good imitation of water-colors; No. 90, a calendar for next year, with designs by Kate Greenaway. A very useful and elegant little book, containing the legal holidays, church days, rates of foreign and domestic postages, and a list of the Presidents of the United States.

Among the next higher-priced cards may be mentioned the three following numbers: No. 910a, folding card, with verses, by Frances Ridley Havergal; No. 942, folding and fringed cards, representing lilies in blossom. These cards have illuminated backs. No. 971, folding and fringed baskets of flowers.

A great many of the cards, at 35 cents each, are of remarkably good value. Some of these are: No. 1,203, folding fringed card, with splendid design of flowers, as violets, roses and holly; No. 1,227, folding cards, flowers with greeting; No. 1,216f, folding and fringed card, with four different designs on each card of children and flowers; No. 1,212, in the shape of a screen; a very good imitation of embroidered flowers, with greeting; No. 1,234, folding card, illustrating Darby and Joan, with poem; No. 1,252, folding and fringed card, containing four designs by Kate Greenaway—the fringes are ombré; No. 1,243f, folding and fringed octagon,

with four designs of dogs; No. 1,279*F*, fringed card, an entirely new style, in the shape of an easel, with ombré fringes; No. 1,299, single fringed cards with Shakespearean quotations.

The following cards at fifty cents are called the best which have ever been made for that price: No. 1,873, folding fringed cards, with four designs of children and flowers; No. 1,859, folding card, illustrating Robin Hood and the black-bird, with poem on the back of the card; No. 1,834, folded card, with ombré fringe, representing the history of Darby and Joan; No. 1,848, folding and fringed card, with four designs of flowers; No. 1,889*a*, folding and fringed card, flowers and verses; No. 1,810, folding card, with three panels—angels, virgin, &c. It is a *chef d'œuvre*. No. 1,817, folding and fringed card, with the designs of Grecian women; the past, present and future. This card is one of the best published this year. No. 1,847*F*, folding and fringed card, with two designs of birds and two of cats, artistically treated.

No. 2,051*F* is a folding and fringed card, with designs inside, by Kate Greenaway, and birds outside; this card is sold at 60 cents. No. 2,003*F*, folding and fringed card, two designs of children inside, and two designs of birds outside; this card is a very nice one at 60 cents. No. 2,072*F*, folding and fringed card, easel style, with four designs of flowers; also at 60 cents.

No. 2,412*F*, folding and fringed, easel style, flowers and marine, at 75 cents; No. 2,437*F*, folding and fringed, four designs of Eastern girls, at 75 cents; No. 2,471*F*, folding and ombré fringed, hanging basket of flowers. This card is of the most exquisite taste, at 75 cents; No. 2,491, a garland of good wishes, containing calendar, church days, rates of postage, &c., with four beautiful designs, at 75 cents. This calendar will make a nice present for the holidays.

In No. 3,096*F* is found a folding and fringed card with four delightful designs of flowers, at \$1; No. 3,067*F*, folding and fringed, easel style, with four designs of flowers, at \$1; No. 3,070*F*, folding and ombré fringed, four designs of winter scenes, at \$1; No. 3,078, folding, fringed in the shape of easel, three new, splendid designs by Kate Greenaway, at \$1; No. 3,006*F*, folding and fringed, easel shape, with three designs of handsome children, at \$1; No. 3,099*F*, folding and fringed cards, flowers and Shakespearean quotations. This card is splendidly treated.

In the next grade may be mentioned: No. 4,892, folding cards, easel shape, the history of the Nativity. This card is the success of the year; it is sold at \$1.50; No. 4,839, sachet, beautifully hand-painted on satin, with designs inside by Kate Greenaway, at \$1.50; No. 6,038, a souvenir of the season; ribbon book, with landscape and verses inside and Egyptian women outside, at \$2 apiece. This ribbon book is the best article ever offered by Marcus Ward & Co.

The Royal Museum of Berlin has just received some archaeological treasures, which are believed to be unique of their kind, at least in the Old World. They are sculptured stones from Santa Lucia de Consumalapan, in Guatemala, the excavation of which has occupied the attention of the Prussian government for the past five years. After the visit of Professor Bastian to the spot in 1876, Dr. Berendt, one of the first authorities in American archaeology, was commissioned to explore the ruins. But, after a short time, he died from over-exposure, and his place was taken by Herr W. von Bergen, the German Consul-General in Guatemala, who has at last succeeded in excavating the sculptures and shipping them to Germany.

Trade Novelties.

[We will be glad to receive samples of all novelties issued in the trade, and will notice all such which possess merit free of charge. It is desirable to accompany descriptions with cuts whenever possible.]

THE NOVELTY LETTER AND NOTE FILE.

This is the latest and it is said to be in many respects the best file made, being suitable to use as a wall-pocket and equally well adapted to

use on a desk or in a drawer. Having no large projection, as in other files, it takes up only the space in thickness required by the papers. It is similar in principle and style to

and note. The Novelty bill-holders are also now made with the rubber attachment, as well as in the old way. They are made by R. G. Hutchinson, 44 Maiden lane, New York.

BEVELED ERASER.

Evans & Gardner call attention to their new "Beveled Eraser," a cut of which appears on this page, and claim for it that, in shape, it has all of the advantages of the old style square erasers, with the additional merit of having a sharp though firm edge with which to erase delicate lines. Like all of their rubber goods, it is made of the finest Para gum, and in its manufacture the most conscientious care is said to be exercised to produce the best that can be made. Taking this as the standard of excellence in manufacture, it will be seen that the eraser made by the firm mentioned

bears the name of "Standard American Eraser," a title which it behooves the manufacturers to sustain.

GALLEY RACK.

The drawing herewith illustrates Marvin's Patent Combined Galley Rest and Rack, manufactured by Shniedewend & Lee, 200 and 202

injury to type, and, as water from wet galleys drips on the floor, it keeps the cases always dry and clean. These rests are sold separately, for use simply in correcting, or with necessary castings for attaching to the end or back of the stand, or against a wall, to suit the convenience of the compositor. This is so thoroughly a prac-

tical adjunct to every printing office, that it is likely to be in demand with all printers, whether already supplied with the old style racks or not. The simplicity of the invention

the popular Novelty bill-holders, but with the addition of rubber bands extending from the lower brass wire to the bottom of the board, to prevent the papers from sliding out when the file is in a slanting or upright position. These bands may be readily replaced when necessary. The file is made in two sizes—letter

Clark street, Chicago. The cut gives a good idea of its general appearance as a galley rack. It will be seen that the rest can be detached from the rack for use on the front of case, for placing the galley upon when correcting. By this arrangement every box in the case is accessible, saving much time. It prevents breakage and

is apparent, and its utility will be readily understood by any practical printer. The rack is made in two sizes, eight or ten rests, and is for sale at all type foundries, or it can be ordered from the manufacturers at the address above given. A price list of racks and rests can be had on application.

NEW WALL DECORATIONS.

Artistic decoration has gone to great lengths in the production of wall papers, and to those who were familiar with what were the most elegant designs in paper hangings a quarter of a century ago, the rich elaborations of the present day must present a wonderful contrast. Formerly, we were indebted to Europe for the best and what were at one time considered the not-to-be-contested most desirable patterns of paper decoration for house interiors; but the time has gone by when we looked abroad for the highest efforts in such things, from an artistic point of view, and now American manufacturers find

stamped in beautiful patterns, upon paper, and thus applying it to a wall. The richness of this decoration cannot be well described, but it surpasses anything that has yet been offered in this style of ornament. The fitness of things appears to be a primary consideration with the manufacturers mentioned, and their goods are made in such designs and of such styles as to be available for the requirements of the parlor, the boudoir, the bedchamber, or the dining-room.

NEW PATENTS.

No. 248,012. Bronzing Machine.—John H. Bingham, Hartford, Conn.

impression in the operation of covering with a film of fatty ink or its equivalent the parts only of the metal or stone surface that are not to be cut by the acid in the etching process. 3. In the process of etching with acid metal or stone surfaces for the production of printing surfaces, a method of covering with a protecting film of a substance that will resist the etching agent only those parts of the surface that are not to be cut thereby, consisting, first, in covering the surface entirely with a film of albumen or its equivalent properly sensitized, so that the action of the light is to harden and render insoluble in water the albumen; then submitting the prepared surface to the action of light under either a nega-

that not only are they able to meet every requirement of the home market, supplying the wants of the most cultured in art and the less exacting demands of the mass of our people, but they are called upon to send their goods abroad, and can meet in the most earnest com-

No. 248,024. Delivery Apparatus.—John J. Clause, Chicago, Ill.

No. 248,065. Phototypography.—Hannibal Goodwin, Newark, N. J.

1. In the process of relief etching on a metal or stone surface with an acid for the production

tive or positive, and washing away the parts of the film not affected by the light in the usual way; then applying to this surface a dilute solution of perchloride of iron or its equivalent—such as a mixture of verdigris and sal-ammoniac—to dissolve away the remaining foreign matter

petition the manufacturers of other countries.

The illustrations of new wall papers manufactured by Frederick Beck & Co., Seventh avenue, corner of Twenty-ninth street, New York, are herewith given. This firm, while turning out certain low-priced patterns, makes a specialty of papers of the highest grade of excellence, both as to design and execution. Its best work is done by hand-presses, and its imitations of bronze, ancient metal or leather, are admirably done and are very effective. The same firm has also accomplished an improvement in velvet papers, which consists in laying real velvet of any color or shade,

of printing surfaces, the employment of a positive as the medium of getting a photographic impression in the sensitized film of albumen or analogous substance, and using such photographic impression in the operation of covering with a perfecting film of fatty ink or its equivalent the parts only of the metal or stone surface that are not to be cut by the acid in the etching process. 2. In the process of intaglio etching a metal or stone surface with acid for the production of intaglio printing surfaces, the employment of a negative as the medium of getting a photographic impression in the sensitized film of albumen, and using the photographic

from the bare parts of the surface and prepare it to receive and hold the substance next to be applied; then covering the surface with a film of asphalt, grease, or its equivalent, deposited from a solution; and, lastly, removing by the use of a suitable solvent the remaining film of albumen that has been hardened by the light and its overlying asphalt, leaving the parts of the surface not intended to be cut by the etching agent, or that are intended to take and hold the ink, covered by the film of asphalt or equivalent.

No. 248,047. Type Setting Machine.—William A. Lorenz, Brooklyn, N. Y., assignor, by means assignment, to Edward N. Dickerson, trustee.

No. 248,104. Double Reversible Slate.—James D. McDade, Pittsburgh, Pa.

1. A double reversible slate provided with a double sheath or pencil and pen holder, inserted within slots formed in the adjacent edges of the frames, and pivoted thereto by means of pintles which project into the ends of the slots and engage in the interior of the sheaths or holders. 2. As a new article of manufacture, a double reversible slate provided with a double sheath or pen and pencil holder, inserted within slots formed in the adjacent edges of the frames, and pivoted thereto by means of pintles which project from the ends of the slots into and engage in the ends of the sheath or holder, and having a set of cords which pass around the upper and lower portions of each frame and connect them together. 3. The combined tubular sheath and reversible hinged connection, provided with automatically-closing wings, which are actuated by means of small spiral springs inclosed within the ends of the tubular sheath. 4. As a new article of manufacture, a metallic blank having transverse cuts near its ends, which extend from its outer edges toward its centre, and cut away upon both sides along its central portion.

No. 248,146. Hermetically Sealed Paper Package.—H. C. Crocker, Milwaukee, Wis.

The paper wrapper inclosing the material is secured by pasting before applying paraffine. By this the joints and folds are sealed before dipping, which latter step renders it impervious to moisture and proof against atmospheric influences.

No. 248,179. Photographic Apparatus.—David H. Houston, Cambria, Wis.

No. 248,198. Bank Check, Draft, &c.—Alfred A. Nesbit, London, England. Patented in England May 28, 1880.

The body of the check is covered with a design printed with acid ink. The lettering and scrolls, &c., upon the check are printed with alkali ink. If the writing is removed by the use of an acid, the color of the alkali ink is changed, and if an alkali is used to restore the color thus changed the acid ink will be affected, and so on. Many modifications are described.

No. 248,205. Mechanical Movement for Toys.—Gustav Otto, Jersey City, N. J., assignor of one-half to C. W. Cooley, New York, N. Y.

No. 248,212. Blotter.—Samuel A. Piper, Newton Upper Falls, Mass.

No. 248,219. Panorama Toy.—Edmund Schissel, Brooklyn, N. Y.

REISSUES.

DESIGNS.

Nos. 12,516 and 12,517. Wall Paper.—Eduard Leissner, New York, N. Y., assignor to Leissner & Louis, same place. Term of patents, 3½ years.

No. 12,520. Movable Type.—James A. St. John, St. Louis, Mo. Term of patent, 7 years.

No. 12,522. Statuette.—Caspar Buberl, New York, assignor to himself and Oscar Neubert, Newtown, N. Y. Term of patent, 14 years.

England was indebted to Ireland for her most perfectly illuminated missals, for the Glastonbury monks acquired the art from the college founded by St. Columba at Lindisfarne, on the coast of Durham, and thence the art was carried into Germany by traveling monks, among others St. Boniface, the apostle of Germany, who was born in Devonshire, 680 A. D., and St. Kilian, who took with him to Franconia manuscripts still preserved at Wurzburg. St. Gall, in Switzerland, still treasures in the public library records of the labors of an Irish saint, from whom the Canton and town derived their name.

THE ORIGIN OF PROHIBITIVE DUTIES.

That home production may be fostered by prohibitive duties on foreign imports is an idea that is comparatively modern. The annals of the earliest nations may be searched in vain for any trace of such protection. What nation first imposed duties on commodities passing its borders, and what was the purpose of such duties, are facts yet to be discovered. But the moderate charges of which we have record, preclude all idea of a political purpose, and we are led to suppose that revenue was the real object sought; though it is very probable that the earlier charges were so different as to have indicated a totally different character. It is a matter for regret that in the history of no ancient nation are the materials so full and complete as to afford the means of tracing the course of the financial policy from its origin through the various changes by which in course of time it was modified. But many of the facts which have come down to us, through isolated parts of what once must have been a connected and well ordered economic policy, may be explained by corresponding measures in the policy of more recent peoples; and by applying such methods it may be said to be an almost assured fact that originally the larger part of custom duties were levied not on imports, but on exports.

It is not difficult to explain the object of such measures. Means of transport and of communication were few, and the intercourse among nations or even among adjacent districts was limited. Agriculture was as yet little advanced, and commerce confined within narrow limits. Famine might rage in one district, while there was abundance within a few days' journey, but there could be no relief. It is a known fact that in the early history of nations famines were more frequent and severe because each district, confined within itself, was forced to depend upon its own resources, which were, of course, limited. The chief object, or one of the chief objects, of the state would naturally be to take care that there should be a sufficient quantity of the necessities of life at hand, and thus guard against want and consequent disturbances among the people. What means could appear more fitted to attain this object than to place obstacles in the way of the free exportation of products either by positive prohibition or by imposing heavy duties on such exportation? Whatever goes out from the country is so much taken from its resources; and if the entire produce, whether of food or of manufactured commodities, be retained within the borders, there will be so much the less danger of want and famine. This course of reasoning appeared perfectly logical, as the circulation of goods and money was not made the object of special study until the doubling of the Cape and the discovery of America, which gave such an impetus to commerce, and the knowledge of the Greeks was extremely limited on this subject. As to the policy of such measures, and whether the object sought was really attained, these are matters with which we are not now concerned. Our only object is to give the probable beginning of a customs policy as developed in history.

That the provisioning of a country was the real object to be gained by prohibitions on exports many passages in Greek history show. Thus Aristotle, in naming the objects of public policy, mentions those of importation and exportation; with regard to which it must be ascertained what quantity of the necessities of life the state needs, what amount of them may be raised in the country or may be imported, and what importations and exportation the

state requires in order to make agreements and contracts with those who may be needed for these purposes. Plutarch (though the passage has been disputed) asserts that Solon favored prohibitions on the export of the produce of the soil; and the exportation of grain was always forbidden in Attica—a policy that was followed by other states of Greece. The export of oil was regulated in such a manner that a supply for the requirements of the state was first to be secured. Attica was specially deficient in ship-timber, and there were laws forbidding the exportation of timber, pitch, wax, cordage, and other articles for building and equipping of fleets, though these prohibitions may have been imposed for political reasons. But Macedonia, which possessed timber in abundance, forbade its exportation. That Athens might become a general emporium, the Athenians passed many severe laws to compel the importation into Attica of such commodities as were necessary to the country; and to none of these measures does Boeckh attribute a political reason.—*The Nation*.

UNPAID POSTAL ORDERS.—There is upward of \$1,750,000 deposited in the Treasury at Washington, the result of accumulations from money orders unpaid since the system was originated. At the next session Congress will be asked to cover this money permanently into the treasury. About three-eighths, perhaps one half of the whole amount was accumulated in the New York Post Office from orders made payable there. Orders remain unpaid from a variety of causes. Sometimes the person to whose credit the order is drawn never calls for it, because he has received no letter of advice informing him that the money has been sent. Persons do not receive these letters because they may have gone to another city, they may be dead or in prison or in a lunatic asylum. Sometimes, and not unfrequently, the senders of the money forget, or in ignorance omit to send the "order" on which the money is to be drawn, and keep it as a sort of receipt, and having no cause or necessity ever to communicate further with the payee, neither ever hears anything further as to the matter.

Dr. S. Houghton, in a late paper, showed how the Gulf Stream and the Labrador current influenced climate. The temperature of the northern hemisphere was higher than the southern from latitude 0° to latitude 30°, but was lower than the southern from latitude 40° to 60°. The warmth of the southern hemisphere in the temperate latitudes is due to the existence there of three "Gulf streams," while there is only one in the North Atlantic and a partial one through Behring Strait in the northern hemisphere. The general climatal effect of the Gulf Stream was to make the annual range of temperature less. It had no effect upon the summer heat or upon the fruiting of plants and trees which required a given July temperature for production. The January temperatures in the North Atlantic at 70° were raised by the Gulf Stream, but the July temperatures remain unaffected. The effect of the cold currents, which were indirectly caused by the warm currents, to preserve the proper condition of equilibrium, was nothing at all on the January temperatures, but they lowered the July temperatures. The cold water decreased the warmth of July and left the cold of January unmitigated. The warm current from the south had exactly the contrary effect.

Life is a short day; but it is a working day. Activity may lead to evil, but inactivity cannot lead to good.

THE ACME STATIONERY AND PAPER CO.,

No. 117 Fulton and 52 Ann Street, New York,

No. 43—5½ × 9 in., Packet Note.
No. 44—7 × 8½ in., Bath Letter.
No. 45—7 × 8½ in., Sermon.
No. 46—8 × 10 in., Congress Letter.

LINEN PAPER IN STAMPED
COVERS.
No. 141—4½ × 7 in., Octavo Note.
No. 142—5 × 8 in., Commercial Note.
No. 143—5½ × 9 in., Packet Note.
No. 144—7 × 8½ in., Bath Letter.
No. 145—8 × 10 in., Congress Letter.

The above cuts show our new method of putting up *Fine White Writing and Linen Papers*, for general use, in *Portfolio Style*, with a sheet of the best Blotting Paper attached to the cover as represented, making it the BEST and MOST CONVENIENT form for writing tablet in the market, which will only need to be seen to be appreciated.

TOURISTS' TABLETS.

This is a line of *Fine White Writing Paper*, handsomely bound in Tablets, with flexible covers to keep the paper compact and prevent it from being soiled. They will be found very convenient for the use of travelers and others where a less expensive tablet than our 'Portfolio' is desired. The covers are printed with a neat design, making them a very attractive as well as convenient article for general use. They are put up in packages with ten tablets of eighty sheets each, of the following Nos. and Sizes:

No. 121.—Commercial Note.

No. 122.—Packet Note.

No. 123.—Congress Letter.

Trade Gossip.

All new goods and designs which are not, strictly speaking, "Novelties" will be noticed under this head. The trade are requested to forward descriptions with samples in order to secure proper notice.

A. Weidmann & Co. are as busy as they possibly can be.

A. H. Goetting reports an accumulation of orders on hand.

J. P. Thompson, publisher of the *Journal*, Tucson, Arizona, has sold out.

Dennis & Barnard have succeeded W. C. Dennis, printer, Grand Rapids, Mich.

John Amos, printer and publisher, Oakville, Ont., has been succeeded by Joseph Joyce.

Abel G. Courtis, publisher of the *Transcript*, Lynn, Mass., has sold out to Geo. S. Newhall.

George H. Cushman, paper box manufacturer, Lynn, Mass., has filed a petition in insolvency.

Coombs & Worth, printers, Charlottetown, Prince Edward Island, have dissolved partnership.

Mrs. E. J. Copeland, dealer in fancy goods, Goderich, Ont., Canada, has sold out to Miss Wilkinson.

Roberts & Griffin, printers, Hamilton, Ont., Canada, have dissolved partnership. Justus A. Griffin continues.

The Kretschmar Publishing Company, St. Louis, Mo., has been incorporated. Capital stock, \$5,000, all paid up.

A receiver has been appointed for the Syracuse Lithographing, Engraving and Printing Company, Syracuse, N. Y.

Clark & Glendinning, printers, Denver, Col., have sold their interest in the Great Western Printing Company to Glaick & Pomeroy.

The following named members of the trade visited the city during the week: Peter O'Donnell and T. Fitzwilliam, both of New Orleans.

K. F. Heinzen, of L. Prang & Co., reached this city on Wednesday morning from Boston to receive his mother on her arrival from Europe.

C. S. Adams, with Willy Wallach, has returned from a successful trip through the South, and will start at once to visit his friends in the trade throughout New England.

J. H. Fox, bookseller and stationer, and McClure & Porter, publishers, Humboldt, Tenn., were recently burned out, the former sustaining a loss of \$1,000, not insured; the latter \$1,500, insured.

A. Wallach, of A. & E. Wallach, who has been ill for fourteen weeks, is now convalescent, and his numerous friends will be glad to hear that he will resume his former place in the store in a few days.

Remington Ward, Newport, R. I., has bought the printing establishment formerly owned by James Atkinson, and has put in new presses and type. He announces that the publication of the *Newport Advertiser* will be resumed at an early date.

Loeb & Brothers are working late at nights so as to fill, in time, the large number of orders on hand, which are said to be, this year, greater than ever. The firm's entire line is still complete, although considerable goods have already been shipped, and it might be to the advantage of the trade to see it before some of the styles are sold out.

The extensive trade built up during the past few years by George B. Carpenter & Co., of Cincinnati, in the manufacture of odd sizes of envelopes is a notable feature of the trade in that city; and when with this one takes into consideration the trade is their "Practical Copying Book," "Pleasant Writer" and "Improved Stub" pens—all of their own manufacture—he cannot but be struck by the enterprise of the house. In their blank-book manufactory, also, one of the most extensive in the West, can be found an establishment not only phenomenal in its growth, but one of which Cincinnati may well be proud. Perhaps the use of the word "phenomenal" may be erroneous in the present instance, for the result noted is only the natural outcome of judicious selection of materials, prompt attention to business, and a systematic course of square dealing and courteous treatment, for which the house has become noted.

The old-established house of Chas. Stewart, paper dealer, Cincinnati, is no more; but the house is by no means dead, only the man has developed into a giant, and has become the Stewart Paper Company, composed of some of the best material in the trade. Surely no one can blame the head of this establishment, after years of hard and assiduous labor, for seeking a little ease, and shifting a portion of the responsibility to younger, though it would be hard to find abler, shoulders. Mr. Stewart's interests, both in Cincinnati and at St. Louis, are too much for one pair of shoulders, however broad they may be. Still he does not retire in any sense from his old position, for at the head of the new company is "Chas. Stewart, President." No one can more heartily wish the new concern a more liberal success than does THE AMERICAN STATIONER.

John Wilson's Sons show, this year, an entire new line of goods which embraces most of the novelties manufactured in Vienna and other European cities, and includes inkstands, cigar stands, glove and handkerchief boxes, library sets, flower stands, vases, smokers' sets, &c. All of the goods are exceedingly handsome, and those displayed in the warerooms make a splendid exhibit. A very attractive article shown is a porcelain vase on a plush plaque, for which there is said to be an immense demand. In a single day the firm reports that six dozen mail orders were received for it.

Winkley, Thorp & Dresser, manufacturing stationers, Boston, are making the B B lap-tablet in several different styles, plain and portfolio, bound in cloth, leather, seal, Russia, &c. They also make papeterie styles, which are a combination of lap-tablet and writing-case. The convenience of these tablets will insure a wide and ready sale for them.

Carter, Rice & Co., wholesale paper dealers, Boston, carry a line of fancy advertising cards, ball orders, &c., in very large assortment. Their card albums supply the demand for a cheap, handsome, and durable book in which to paste cards.

Among the visiting members of the trade to the city during the week were George Des Forges, of Des Forges & Co., Milwaukee; William M. Kurtz, of Sharpless & Sons, Philadelphia; and H. H. Shepherd, Kansas City.

A fire broke out in Ogdensburg, N. Y., on Monday, in the block owned by the Gibbs' estate and occupied by the *Daily Citizen* newspaper. The loss is \$5,000; fully insured.

L. Prang and wife reached home on Monday night from Europe, where they have been for the past three months. They enjoyed the trip.

Frederick Stobbs, bookseller and stationer, Three Rivers, Quebec, is dead.

J. F. Pfeiffer, fancy goods dealer, Rochester, N. Y., has been burned out. Insured.

Wm. O. Kinzey & Co., dealers in notions, New York city, have dissolved partnership.

The *Reveille* Publishing Company, Cincinnati, O., has been incorporated. Authorized capital, \$5,000.

D. C. Leach, publisher of the *Patriot Advertiser*, Springfield, Mo., has sold out to H. E. Havens.

Henry M. Stinson, of the firm of Henry M. Stinson & Co., publishers of the *Journal*, Newton, Mass., is dead.

Lemon & Pritchard, booksellers and stationers, Ladoga, Ind., have dissolved partnership. Albert Pritchard continues.

Schautz, Metcalf & Co., wholesale dealers in notions, Philadelphia, Pa., have dissolved partnership. Taylor & Metcalf continue.

Ward & Gay, Boston, are doing quite a trade in Japanese napkins. These goods are put up 500 of a design in a package, assorted colors, sixteen designs. The napkins are now meeting with large sales for church fairs, society supers, &c.

The firm of Hasbrouck & Watson, New York, was dissolved by mutual consent on October 1. The retail business will be carried on by R. R. Watson, at 51 Nassau street, and the wholesale business will be carried on by W. H. Hasbrouck, at 91 Liberty street.

Charles Taber & Co. report trade very brisk, and request those wanting their lines to send orders at once so that they can be filled in time. Members of the trade visiting the city can conveniently see an extensive line of the firm's samples at 28 Bond street.

At one o'clock on Wednesday morning, fire broke out in a building on Main street, Woonsocket, R. I., owned by the American Worst Company. The printing press works of George W. Miller were destroyed. The office of the *Daily Reporter* was also burned.

McCarty & Hasberg are now shipping unusually large quantities of goods. As the stock is much larger this season than in any previous one, and as greater inducements have been offered, the rush for the firm's goods has far exceeded that of last year. In the selection of novelties for the holiday trade this house shows great enterprise.

The large stationery establishment of William F. Murphy's Sons, No. 509 Chestnut street, Philadelphia, was damaged by fire on Monday night. The fire originated in the basement from the boiler, the flames communicating to some combustible material in its immediate vicinity. The first and second floors suffered much by fire, water and smoke. The loss to the building will not exceed \$2,000. The loss to the stock is estimated at \$30,000; fully insured.

D. B. Brooks & Co., the well-known ink manufacturers of Boston, make a most remarkable offer to the trade, which it may be supposed all will accept. It is this: On receipt of \$8 they will send one dozen of their elegant bronze revolving double inkstands, with tray for pens, rubber, stamps, &c., and one dozen quarts of their justly celebrated Congress record and copying ink, which writes black from the start and is not injured by freezing. Each bottle has an elegant label printed in colors and a cork-screw attached. They add to this offer 500 four-page circulars, with any dealer's name printed

thereon. See cut of inkstand in another column.

Peter Skinner, of Henry Anstice & Co., stationers, New York city, is dead.

The stock of B. F. Wade & Co., stationers, Toledo, Ohio, has been seized by the sheriff, and a receiver has been appointed.

William W. Bainbridge, lately with Hard & Parsons, has just engaged his services to his brothers' firm, Charles T. Bainbridge's Sons.

W. H. Hasbrouck will continue the manufacture of the "M. & H." blotter tablets, novelty fasteners, and suspension rings, and act as sole agent for the automatic wire-stitching machines.

A novelty is to be seen in the way of a luminous match safe. It is made of glass with a background the surface of which is covered with a luminous paint, which shows brilliantly in the dark.

M. A. Ebert, formerly with Koch, Sons & Co., who has been traveling in Europe and through the South almost all this year seeking to recover his health, returned home a few days ago somewhat benefited.

The firm of W. L. Stork & Co., Baltimore, Md., has dissolved partnership, Frederick W. Koch having bought out the interest of William L. Stork in the business, and will hereafter conduct it at the old stand, 220 West Baltimore street, on his own account.

Orders for the Mark Twain scrap-book have been heavy during the past season, and the demand is still active. It seems to be gradually taking the place of the old style scrap books. Daniel Slote & Co. are prepared to supply the trade with all of the varieties at short notice.

The Central Ohio Paper House, Columbus, Ohio, has been obliged to extend its boundaries, and it has leased the premises 23 West Broad street. The concern will now occupy two buildings, each four stories and basement in height, with large storerooms, each 20x70 feet, in the rear. The house is said to be overrun with orders for goods.

J. E. Linde, 19 Beekman street, New York, is said to be fast taking the lead among New York houses in the publication of chromos, advertising cards and folders. The Bellevue cards and covers are particularly popular, the third edition being now on the market. Some winter scenes for folders, in fifteen colors, will, it is claimed, eclipse anything placed on the market this fall.

The Christmas and other festal cards published by Obpacher Brothers are very attractive in their new style of particolored fringing. Some of the handsomest goods of the season, both in fringed and unfringed goods, suited to every requirement of taste, elegant in design and sentiment, are offered by this house. No. 478 comprises a series of marine views; the angel cards, No. 430, are very attractive; No. 442 is a book folder of chaste features. In making selections the taste can scarcely fail to be satisfied with the offerings of this house, and no assortment would be complete without them.

Morton, Phillips & Bulmer, Montreal, have issued a specimen book of type, borders, &c., which is very neat and well printed. The front cover shows evidence of good taste, and the illuminated title-page, in green, carmine and gold, displays good judgment and skill in the effect produced. The book contains the latest novelties in type and borders produced by the principal foundries of the country, the selection having been made with evident care. It is to be regretted that a more even margin around the pages was not observed.

The new and artistic designs in Christmas and birthday cards issued by Ph. Hake, comprise a variety of novelties never before attempted, it is said, in this country. Eighteen designs of embroidered flowers and birds, on satin—a new feature—elegant and especially pleasing to the ladies, who may utilize them for the centres of tidies, ornaments for the dressing-table, &c. Satin sachets, ornamented with hand painting and embroidered figures, fringed, with appropriate verses, &c., are also in great variety, from the plainest to the most luxurious. Also a line of cards in plainer design, noticeable for their elegance of finish and delicacy of form. The demand for this line is said to be unprecedented, many duplicate orders being received from all over this country and from Europe. The new mechanical features displayed in the line of New Year calling cards, are most attractive in design, and comprise over thirty-five styles. The novelties of ribbon cards, which were so attractive last year, have been improved upon, and are very beautiful. Steel plate, hand painted, lithographed, satin embroidered, with the addition of satin and fringes, make the entire line of what is called the "Ne Plus Ultra" of New Year cards. The attention of the trade is called to the latest idea, "The Ladies' Card," to be used by ladies to send to gentlemen friends to signify their being "At Home" to receive calls. To judge of the new line of orders of dance, the various styles and shapes of visiting cards, correspondence and regret cards, one must view personally to fully appreciate the vast originality of designs. Holiday papeteries and cabinets of elegance are finished in satin, delicately embroidered with flowers; some in plush, with hand painting and embroidery; brocade satin ornamented with rainbow ribbon, silk velvet with embossed moss-roses on the cover, and other styles too numerous to describe in writing. Nearly forty different styles, all particularly new and salable. In fact, the entire line should be examined by all lovers of fine goods, as Mr. Hake and his assistants have surpassed all previous efforts. The line of Easter goods will be ready for inspection in about a month, and will comprise many new features of excellence.

The trade will learn with regret of the death of Otto Obpacher, manager of the New York house of Obpacher Brothers, communicated by cable just as THE STATIONER is going to press. Mr. Obpacher took a trip to Germany this summer for the purpose of regaining his health, which had become impaired. The business of the New York branch is at present in the hands of Samuel Garre, who has been connected with it since it was established.

The William H. Brett Engraving Company, 30 Bromfield street, Boston, does all kinds of engraving on steel, copper and stone, and plate printing. It makes a specialty of fine work in invitations, class-day cards, arms, crests, monograms, letter, note and bill-heads and business cards. The trade are invited to confer with this house as to samples, prices, &c.

As will be seen by their advertisement in another column, Samuel Hano & Co. have had to increase their facilities for manufacturing their manifold books, of which they claim they manufacture the largest, finest and most complete line in the world. They have offices in New York, Boston and Chicago.

The improved Sanborn "Gem" paper cutter is said to be meeting with a very large sale, and is highly spoken of by the trade here and in Mexico and other foreign countries. It is sold by Geo. H. Sanborn & Sons, New York and Chicago.

Scott & Le Crone, publishers of the *Democrat*, Effingham, Ill., have dissolved partnership. Owen Scott continues.

George F. King & Merrill, Boston, are now sending out as samples one hundred gross of office lead pencils. Their trade in these goods is increasing. They have also a new Nonpareil pen, which is very elastic, and which is said to be taking well. The trade are invited to send for samples.

C. C. Childs, 64 Federal street, Boston, manufactures the Acme paper cutter, which, in its improved form, is offered to buyers as one of the best machines in the market. Mr. Childs has lately supplied this cutter to Culver, Page, Hoynes & Co., of Chicago, and to the Syms & Dudley Paper Company, of Holyoke, and is very busy on orders.

T. Shriver & Co., manufacturers of copying presses, secured the award of the Melbourne International Exhibition. The peculiar feature of their presses will, it is thought, commend them to buyers generally, as in strength, facility of operation, and other requisites they combine qualities which are generally considered to be in every way desirable.

Carter, Rice & Co., Boston, say that trade is "rushing," and that they are doing a bigger business than ever before, being hardly able to keep up with book orders. They make a specialty of Russia linen papers. In their Manila department, added last January, they are equally busy. In their card department, their Boston Extension Card Album, which is another specialty, is having a good run.

It is unnecessary to mention that ordinary circulars are not read, and in recognition of this fact booksellers and stationers are in the habit of using novel folding cards; but now A. M. Collins, Cope & Co. have issued three designs especially for this purpose, having as part of each design the greeting, "A Merry Christmas and a Happy New Year," making a sort of advertising Christmas card in folding form, with plenty of space, inside and out, for business card and announcements of new books, holiday goods, &c.

A correspondent writes that during a recent visit to St. Louis, he enjoyed the hospitality of the new Southern Hotel, one of the most finished and largest hotels in the world. Every department, from kitchen to chambers, is perfect; and the veteran hotel manager, Captain Bates, thoroughly understands his business. Its principle features are light, air, and perfect safety from fire; the latter being so assured that Mr. Allen, the principal owner, refuses to insure anything but the heavy plate glass and mirrors on the first two floors. The parlor floor is finished throughout in polished mahogany, the furniture having been specially designed for the building. The frescoing is exquisite, that in the dining-room and ladies' ordinary consisting, appropriately, in the main, of game designs. The "ladies' ordinary," partitioned off from the round by glass, is a novel and pleasing feature. But the bijoux of the hotel are its two bridal suites on the parlor floor, which must be seen to be realized. Suffice it to say, the mantels are paneled with sardonyx. The building is supplied with eight furnaces, four boilers, a 60-horse engine, three electric circuits running 40 Heissler lights. The hotel, already stupendous, will be enlarged in the spring to 20 per cent. more than its present capacity. No one has seen St. Louis till he has visited the "Southern," and no one can appreciate "Southern" hospitality till he has dined at its table.

A new article, called the script ruler, is one of the latest and best auxiliaries for all who desire to learn to write according to the most approved styles of standard writing. The ruler may be used with or independent of any series of copy-books, charts, or other writing publications, and greatly shortens the time and process of mastering practical writing. The school script ruler embraces the capital and small alphabets; also the figures, elegantly printed on wood, showing in easy form the proportions of each letter and the measurement of the different classes of letters. The college or counting-house script ruler presents not only standard alphabets and figures, but a test sentence, embracing the entire small alphabet. The mastery of this sentence gives the key to all combinations of small letters in practical writing. The various scales of writing required in book-keeping, business forms and correspondence, as published on this ruler, makes it invaluable to college students, accountants and teachers. It is of complete commercial utility in every sense of the word; fifteen inches long, metal covered, with perfectly straight edges, and free from liability to warp or get out of shape. Ink or other spots will easily wash off without defacing or injuring the surface. Ivison, Blakeman, Taylor & Co. are the agents.

Henry Levy & Son, 477 Broadway, have received by late European steamer great additions to their stock of fancy holiday goods, notable among which is a great variety of dolls, dressed and undressed; china figures and vases, ornamental articles in Oriental crackled and frosted glass, some of which are extremely beautiful and not extravagant in price; odor cases, work-boxes, jewel cases in Russia leather, plush and silk, elegantly finished and well adapted for choice presents; Swiss carvings and new designs in olive-wood goods; Vienna and Parisian bronze and gilt wares of exquisite workmanship. They make a specialty of articles that can be retailed at low prices, leaving a good margin for profit to the dealer. Their variety in these is thought to be well worth the attention of the trade, who make presentable low-priced articles an object in their business. As the firm is closing out many of its lines an early call may save disappointment.

G. Lautenschlager, of Cincinnati, has perfected an improved figure movement for paging and numbering machines which will prove very valuable to persons who have such machines in use. He has overcome the severe and wearing strain upon the inside which so soon wears these figure heads out and renders their work imperfect. He adapts his improved figure heads to old machines of the Parrish, Sutcliffe and other makes. These figure heads have already been adopted by many large houses in the West, among others Woodman, Tierman & Hale and Charles Moritz, of St. Louis; Wilstach, Baldwin & Co., A. H. Pounsford & Co., and W. B. Carpenter & Co., Cincinnati; S. C. Toof & Co., Memphis, Tenn.; A. W. Hyatt, New Orleans.

Evans & Gardner report an exceedingly good season, notwithstanding the difficulties under which they have labored from lack of room in their factories. The past summer they have made large additions to their works, which were only completed a few weeks ago. They are now laboring hard, and running nightly, to catch up with accumulated orders and supply increased demands, and hope soon to be able to execute all orders for their specialties promptly.

The Texas News Company, El Paso, Texas, would like to receive the catalogues of stationers, booksellers, and paper and envelope manufacturers.

Stauffer & Hartman, dealers in notions, Ottawa, Ill., have dissolved partnership. John J. Hartman continues.

Fred. Sibell and Joseph Hyer, lately with C. M. Cornwell, have associated under the style of Sibell & Hyer, to do a general stationery and printing business at 206 Pearl street, this city. They ask for samples from the trade.

S. & E. M. Vernon, 534 Pearl street, who make a specialty of blank books, particularly adapted for the notion trade, have also a new line of composition books which they say they can offer at a lower price than any other in the market. They ask buyers to look at their stock before purchasing. They also make a specialty of manilla order books, which they are selling in car-load quantities.

John F. Stratton & Co., 49 Maiden lane, New York, carry special lines of autograph albums, scrap-books, photo-albums, photograph frames in great variety, musical boxes ("an awful lot of different kinds," as a member of the house remarks), opera glasses, French fans, &c. This house deals largely in musical merchandise, and in this line can supply the demands of the best trade. An illustrated catalogue, issued for the holiday season, will be sent to any dealer who asks for it.

A treatise on the "Law and Practice Concerning Patents and Trade Marks" has reached a second edition. It is by James A. Whitney, 140 Nassau street, solicitor of patents and president of the New York Academy of the Useful Arts. Mr. Whitney is an expert mechanical engineer and a well known counselor in patent cases. He has had long experience—upward of twenty years—in the preparation of specifications and applications for patents, and in conducting interferences before the Patent Office. His familiarity with foreign patent laws is derived not only from a study of their provisions, but from personal examination of their systems during a tour made to Europe for that express purpose.

Ward & Gay, 178 to 184 Devonshire street, Boston, are making extensive preparations for the holiday trade. Their card business has grown to such proportions as to necessitate very much larger space and additional help, and is said to have become the largest department in the line of Christmas, Easter, and birthday cards in New England. It is impossible to enumerate all the varieties, but they are in all styles, plain and painted, the latter by artists exclusively employed by the house. These are mounted in plush, velvet and satin, and prices of the different lines range from 25 cents to \$15. The folding cards are beautifully mounted, and do the house great credit. Their lines comprise the celebrated cards of Raphael Tuck & Son, London; Obpacher Brothers, Munich, for both of which they are the New England agents; also, Prang's, De La Rue's, Marcus Ward & Co.'s, Hildesheimer's, Lowell's engraved, and all of the leading manufacturers of cards, plain and fringed, of this and other countries, thus enabling their customers to see everything at one place, an advantage which will be appreciated. Orders given now will be delivered when wanted. Of advertising and birthday cards they claim to offer the most complete assortment of these goods to be found in Boston. This house also asserts that it has the largest assortment of papeteries in the East, and the heavily laden floors and shelves of its warehouses bear out this statement. It has also a varied and choice assortment of photograph albums, opened expressly for the holiday trade, together with writing desks in wood and leather, and a general line of all stationery goods.

The attention of the trade is invited to the advertisement of Liebenroth, Von Auw & Co. in another column. This house has been established in the manufacturing and importing business for about a quarter of a century, and it is well known as a leading house in both the American and European markets. The factory and sales-room occupy the whole of the three large buildings, 48, 50 and 52 Franklin street, this city. These buildings are constructed into one large edifice, which has a frontage of 75 feet and a depth of 120 feet, and contains six floors and basement. The latter is used as a packing and stock room, while the first floor is elegantly laid out in offices, and as a salesroom where a special department is set aside for the album display, which is said to be the largest and finest in the United States. The other floors are devoted to manufacturing purposes in which three hundred hands are constantly employed. The members of the firm as well as its representatives are so well known to the trade for integrity in their dealings that it is unnecessary to refer to them here. In addition to the display of albums above referred to, the wareroom exhibit of autograph and scrap books and other articles of the firm's manufacture surpass, it is said, those of any other house and everywhere meet with a ready sale. At present there is on hand an accumulation of orders, and it might be said that there is perpetual motion in the factory so as to fill them in time.

Among the visiting members of the trade in the city during the past week were H. Lee Mason, of J. R. Weldin & Co., Pittsburg, Pa.; George Des Forges, Milwaukee, Wis.; Thomas Fitzwilliam, New Orleans, La.; J. H. Medairy, of J. H. Medairy & Co., Baltimore, Md.; Byron Tift, Auburn, N. Y.; Henry Miner, Pittsburg, Pa.; T. E. Sewell, Abilene, Kan.; S. C. Swift, Chillicothe, Ohio; Thomas Groom, Boston, Mass.; Mr. McLellan, of Dresser, McLellan & Co., Portland, Me.; William Kurtz, representing Sharpless & Sons, Philadelphia, Pa.; Mr. James, of James & Webb, Wilmington, Del.; Mr. Heyer, of Heyer & Brother, Boston; W. H. H. Laley, of J. B. Lippincott & Co., Philadelphia; J. Sergeant Hoopes, New Brighton, Pa.; George Bishop, of George Bishop & Co., Montreal, Can., and Mr. Cunningham, of Cunningham, Curtis & Welsh, San Francisco, Cal.

Charles J. Cohen, Philadelphia, has recently landed one of the largest cargoes of Arnold's inks that have been received at the port of Philadelphia. The shipments to the patrons of the house in original and assorted casks have been heavy, as the approaching cold weather will soon prevent any safe transportation of this article. What with staple stationery, staple and fancy envelopes, and a very elegant assortment of fancy goods, Mr. Cohen has his time well occupied. The display of fancy articles for the holidays is very attractive, and embraces a much larger variety than is usual.

Leroy W. Fairchild made a shipment of gold pens and pencils to South Australia, with which the purchasers were so pleased that they entered them at the Adelaide Exhibition. The goods attracted much attention and secured the first award. As they were picked out of stock, and no effort was made with them, Mr. Fairchild has reason to be proud of the honor accorded him. The articles were of the usual design, including three new styles. Mr. Fairchild also took the highest award at the Sydney Exhibition in 1877.

The Chicago Toy Company, 84 Wabash avenue, Chicago, manufactures tin and wooden toys and deals largely in imported and American dolls. The trade are invited to send for illus-

trated catalogue, which will be sent free to any address.

Arthur Christy, Buffalo, N. Y., has got up a mailing packet for paper, cards, dry goods, samples of grain, &c., which seems to be well adapted to the purposes for which it is intended.

Aikin, Lambert & Co. report an excellent trade in their gold pens and pencils, &c. Their beautiful line is everywhere greatly admired and their agents have only to show samples to secure orders. The firm is rushed with business.

The Springfield City Paper Company, Springfield, Mass., deals in all kinds of papers, including parchment linen papers (five weights constantly in stock), Globe Mills ledger papers, and other well known brands. It makes a specialty of engine-sized flat and folded papers, and carries a fine line of wedding papers.

Simpson & Wright, paper dealers, 201 William street, New York, invite attention to their Spring Lake, Ledger Mills, Elevator Mills, and book and news papers. The Spring Lake brand, introduced about eighteen months ago, is said to be selling very rapidly, and the firm claims that it is the best paper, of its class, in the market.

Charles J. Cohen, Philadelphia, has recently opened a very large and complete assortment of English papier-maché writing desks in ten and eleven inch. sizes; these are all made in new and original designs, especially following Mr. Cohen's suggestions as applicable to the American market; they are very neat and attractive and at remarkable prices. There are some thirty styles in all.

A. & E. Wallach show this year a larger number of novelties than usual. Among them are bisque figures, barbedine wares, terra cotta, decorated plates in four patterns, a large line of plush goods, sixty different styles of odor cases, fifteen of work-boxes, nine of jewel cases, and four of glove and handkerchief boxes. The trade visiting the city are invited to call at the firm's warerooms and examine the elegant lines there exhibited.

Ralph Trautman, 312 Broadway, shows two elegant series of steel plate portraits on gold bevel edged ivory finished cards. One of them comprises all the presidents of the United States, and the other twenty eminent authors and poets. Both contain fac-simile autographs, accompanied by an index card giving the date and place of birth, and each is put up in a fine leather case. Although these goods are intended for the market at any season of the year they would make elegant holiday presents. Owing to the great demand for these goods new and desirable editions will be introduced each year.

John B. Davids & Co., 184 William street, New York, are said to be very successful in pushing the sale of their inks, which they claim are superior to any inks now in the market. These inks are the result of upward of ten years' experience and experimenting by John B. Davids, son of the famous ink manufacturer, Thaddeus Davids. Their list comprises black, blue and violet writing inks, together with specialties for banks and mercantile houses, chemical writing fluid, combined writing and copying ink, marking ink in colors—carmine, scarlet and green. All of the bottles are provided with a corkscrew so fastened in the corks as to make them ready for immediate use and prevent the annoyance of having to tear and punch out the cork, soiling the hands and spilling the ink. They have also put on the market a very superior quality of maulage. For the holidays they have gotten out a very neat and handsome casket containing four bottles of writing ink, for ladies' use.

William H. Walker, Rochester, N. Y., who deals in supplies for amateur photographers, has issued a price list which deserves consideration.

The Savannah paper mills, Savannah, Ga., have been sold to the Savannah Palm Paper Company, which will manufacture paper from palmetto.

A handsome sample of American hand-made drawing paper will be found in this issue of THE STATIONER. It is made by the L. L. Brown Paper Company.

"Tex," the newsdealer, Belton, Texas, was burned out on October 13. He was insured for \$2,700, but his loss was adjusted at \$1,800, there being a salvage of \$2,000. He has moved into the Black Building, "on the Avenue," and proclaims that he is "still in the ring."

"Wilson's Manual of Mining Laws," published by W. H. Lawrence & Co., Denver, Col., is a compendium of laws, decisions and general information concerning mining locations in the chief mining districts of the West. It seems to be a very valuable hand-book for every person whose interests or search for information lies in the direction mentioned.

J. H. Hamberger is very busy filling orders for Christmas cards, and also for a new line of birthday cards, which he sells fringed and plain. His money plates, showing American, English, French and German money, find large sales. This house receives by every steamer new goods in cards, both in relief and sheet styles. Of American advertisement cards, the house brought out this week two new ones, designated the "Old Maids" and "Dogs and Cats."

The Acme Stationery and Paper Company, 117 Fulton street, commenced business about three years ago by introducing its manilla paper tablets. The rapid growth of its business made it necessary to remove to its present quarters, and it has constantly added to its line of goods from time to time articles that have given satisfaction. The management of this concern seemed to know the wants of the trade, as indicated by the large demand for its portfolio tablets, which have been before the trade only three months, the sales amounting to one hundred thousand. Its tourists' tablets are also meeting with favor, being a cheaper grade of goods in a neat and convenient form. Its new composition book, entitled "Pretty Stories," is said to meet with the approval of all teachers and school boards who have had an opportunity of seeing it. The trade should send for catalogues and price lists of the company's goods before making up stocks.

Charles Carr, Granite street, corner First street, South Boston, Mass., manufactures a bookbinder's wire-stitching machine which is said to be the simplest and most effective yet produced. It has neither springs, ratchets nor pawls, and is practically free from complication, and while designed to be run by power, it can, with facility, be operated by hand. The stitch is novel. Flat steel wire is used, and is driven directly through the work before being severed from the coil, therefore neither forming, driving nor clinching staples, as in other machines for metallic fastenings, but cutting the wire as fed from the spool, after its passage through the book, and then bending the ends into an efficient and secure fastening. This machine will stitch pamphlets from one-sixteenth to nine-sixteenths of an inch in thickness, ninety stitches per minute. The operator can always stop the machine, in proper position, between each stitch. Printed directions accompany each machine, enabling any one to put it in operation.

Koch, Sons & Co.'s new line of scrap-book albums embrace the "Recherché" series, bound in silk plush, fine cream tinted Bristol board leaves, embossed in gold, with round corners and gilt edges. The same style comes bound in full Russia and Persian leather, and is also used for mounting photographs, paper clippings, &c. In autographs, their line includes about three hundred different styles, embracing all varieties of bindings, and having beautiful illustrations on the inside. They have introduced a new and elegant plush series for autographs, in a variety of colors, embracing old gold, cardinal, olive and blue. These have, on the front cover, the word "Autograph," cut in metal, in gold and nickel colors. These goods are made up in such a large variety of designs, and are finished off so artistically as to meet every possible taste. A new idea in the line of photograph albums is a style bound in plush, russa, calf, sealskin and morocco, having round-cornered covers and leaves, beveled openings and a new patent spring clasp. These clasps are said to be far superior to anything in the market, owing to their strength and beauty. These albums are made up in quarto and Victoria sizes, and contain cabinets or assorted openings. A line of music wrappers in rolls and cases made of leather, canvas, silk and plush, in various designs and nickel mountings, embraces about one hundred different varieties. They make a fine display of imported wood writing desks, in variegated colors of woods, in new patterns and designs, in sizes varying from 12 to 16 inches.

Eberhard Faber's well known Star pencils are now made with rubber-inserted nickel tips, and come in round and hexagon shape; the latter including tablet, gilt and silver styles. This firm has also added to its line of Union pencils, tablet, round and hexagon styles, having nickel tips, with rubber inserted, which makes them a very handsome pencil for ladies and for memorandum book use. The line of round bouquet tablet pencils, with metal tips and in the assorted colors, red, white and blue, is finding much favor with the trade. A new line called the "Monitor" pencils consists of two handsome styles, Nos. 135 and 136, the former being blue and the latter red, and contain A. W. Faber's red and blue colored leads. Among other recent introductions is a new cabinet, filled with A. W. Faber's pencils, black and colored, and rubber bands, and Eberhard Faber's penholders. The contents of this cabinet include the leading and most salable styles of the different lines of the firm. The case is made of polished black walnut, with a glass sign on each drawer, to show its contents. It is a handsome article, and is intended for the retail trade. A new discharging tip penholder, patented September 13, 1881, which is said to be the best of its kind in the market, is the latest addition to this line. It comes in two styles, black and red, numbered respectively 3,876 and 3,879.

J. H. Bufford's Sons have this week introduced four new designs in advertising cards and folders. Two of them represent horses' heads, each surrounded by a horseshoe, which is florally decorated, and the other two show children's heads encompassed in the same manner. The firm's line of New Year calling cards is very beautiful, and far surpasses any previous efforts of the house.

In addition to other visitors reported in town during the past week, may be mentioned Albert Allen, representing Jerome Allen, Greencastle, Ind.; James M. Brawner, Griffin, Ga.; A. C. Brechin, Charlottesville, Va., and Douglas Hapeman, of Osman & Hapeman, Ottawa, Ill.

Alvord & Co., stationers, Denver, Col., being unable to continue their business and meet their engagements, made an assignment for the benefit of their creditors, on October 9, to R. W. Woodbury, of that place. A meeting of their creditors was held on Tuesday at the rooms of the Stationers' Board of Trade, this city, at which one of the firm was present, who stated that its liabilities were about \$14,000, to pay which it made an offer of twenty-five cents on the dollar in cash, friends of the firm advancing the money necessary to do it. Some of the creditors have agreed to accept a settlement on this basis.

The firm of H. Griffin & Sons, which makes a specialty of bookbinding materials, either in the line of blank or printed books, reports a steady and satisfactory increase in business month by month, and its St. Louis branch makes the same report. This is said to be the oldest house in its line of business in the country, and its stock of goods for completeness of detail cannot be excelled. About ten years ago it established a branch house in St. Louis, and its business has made rapid growth in the West.

U. S. TREASURY DECISIONS.

The Treasury Department has made public the following decisions:

Shaving Boxes with Mirrors in Lids.

This department is in receipt of your letter dated the 23d of July last, submitting the appeal (5,422 g) of O. Strasburger & Co. from your decision assessing duties at the rate of 40 per cent. ad valorem on certain shaving boxes imported by them, per Nederland, April 26, 1881, and claimed by the appellants to be dutiable at 35 per centum only, as manufactures of wood. This claim is based upon the alleged fact that the mirrors, which are inserted in the hollow in the inside of the upper part of the shaving boxes, are intended for ornamental purposes only and not for use. The appraiser's report shows that the glasses may be used as mirrors; and that they were intended for such use is clearly shown by the fact that a cord is attached by which the lid can be hung on the wall. The mirror seems to be a prominent part of the manufacture; and the Department is of opinion that the boxes were properly classified under the provision of Schedule B, Revised Statutes (Heyl, 954), for all manufactures of which glass shall be a component material not otherwise provided for. Your decision is therefore affirmed. (Collector of Customs, New York, September 7.)

Duty on Shell Boxes and Dolls.

The Department is in receipt of your letter of the 30th ultimo, in relation to the appeals (6,034 g and 6,035 g) of George Borgfeldt & Co. from your assessment of duty at the rate of 40 per cent. ad valorem on certain shell boxes, and disallowing a portion of the discount claimed on certain dolls imported by them, per Frisia, February 23, and Ne Plus Ultra, May 19, 1881. The appraiser reports that the shell boxes were composed of shell and glass, glass being an important feature of the component materials, and that they were accordingly classified for duty at the rate assessed under the last clause of section 2,499, Revised Statutes. Shell boxes being specially provided for by name at the rate of 35 per cent. ad valorem in Schedule M, Revised Statutes, and being usually composed of other materials in addition to shells, the Department is of opinion that if the boxes in question do not differ materially from the ordinary shell boxes of commerce, they should be reclassified at the rate of 35 per cent. ad valorem. You will be governed accordingly. The appraiser reports that the disallowance of 15 per cent. of the discount specified in the invoice of the dolls was necessary to make their true market value. In the absence of an appeal for reappraisal, your assessment of duty on the value found by the appraiser was final and conclusive, and not subject to review by the Department. (Collector of Customs, New York, September 7.)

Duty on Printing Paper, Sized and Glued.

This Department is in receipt of your letter dated June 20, 1881, submitting the appeal (4,013 g) of Armstrong & Co., from your decision assessing duties at the rate of 35 per cent. ad valorem on certain so-called lithographic paper imported per Caledonia, May 11, 1881, and claimed by the appellants to be dutiable at the rate of 25 per centum ad valorem only as "book paper, sized and glued," and not to be dutiable as "plate paper." It appears that the paper can be used for all kinds of printing purposes, but that its general use is for the printing of illustrations for books or business cards, and not for the printing of reading matter. The question involved having been submitted to the customs

officers at New York and Philadelphia, respectively, and to manufacturers and dealers, they express the opinion that the appellants' claim is well founded, and it appears that Appraiser Rice, at your port, is now of the same opinion. In view of the facts and of the decision of the Supreme Court in *Arthur v. Moller*, relating to the printed matter, the Department decides that the merchandise should be classified under the provision of Schedule M (Heyl, 1368), for "paper, sized or glued, suitable only for printing paper," dutiable at the rate of 25 per cent. ad valorem. You will reliquidate the entry accordingly, and take measures for a refund of the duties levied in excess. * * (Collector of Customs, Boston, Mass., September 16.)

SHEPARD'S PATENT INVOICE BOOK.

George W. Shepard & Co., 213 River street, Troy, N. Y., are manufacturers of Shepard's patent invoice, scrap or music book, shown in the illustration. This book meets the requirements for books of its class, and is remarkable for strength, the back being made of wood and rounded in such form that the cover is not liable to be torn away, even with constant use. The

papers or leaves are interlocked on the wood back, and thoroughly fastened by wires (no thread being used). The back being of the proper width the cover will lie flat when the book is filled, and will not get out of shape. When filled the leaves can be readily removed from the book and replaced by others without the least injury. The book can, therefore, be used for a term of years.

PAINTING ON PORCELAIN.

In painting on porcelain many points are to be considered, and a proper acquaintance with the colors to be used and the nature of the fluxes is necessary to successful operations. The fluxes render the composition of the colors fusible, unite them to the wares, and, in many cases, impart brilliancy to their tints. The vehicle employed in laying on the colors must be looked to, and the course to be pursued in fixing them on the porcelain by means of heat must be understood.

Metallic oxides form the basis of all vitrified colors, but every metallic oxide cannot be employed in decorating porcelain; some are highly volatile, as the oxides of mercury and of arsenic; others part so freely with the oxygen they hold in combination that their color proves uncertain and varies with every application of heat; such are the peculiarities of the red oxide of lead, and the yellow oxide of gold. Black oxide of iron is not used alone for producing that color in porcelain. It affords a great

variety of tints, both in the various combinations of its own oxides and their mixture with those of other metals. Alone it affords a red, a brown, and a violet; and mixed with the oxides of cobalt, or oxides of zinc, it furnishes a black, a gray, sepia and yellow. The colors formed by the oxide of iron will not, however, stand the greatest heat of the furnace; it combines at a very high temperature with the flint of the body, and thus becomes a colorless silicate of iron. But if the quantity of the oxide of iron be increased considerably above the quantity that will combine with the silica of the feldspar, a reddish brown color is obtained, called technically brown-lake. By careful attention to calcining the sulphate of iron, orange-yellow, then red, carmine, lake and, lastly, violet can be obtained. The browns, grays and blacks, for porcelain, are produced with oxide of iron formed by precipitation from some persalt by ammonia, potash or soda. Emerald green is produced by employing a mixture of oxides of copper and iron.

Oxides, unaccompanied with other substances, are not susceptible of fusion; and although they may be attached in their strata to vitrifiable bodies by a very violent heat, yet their colors, with the exception of lead and bismuth, would, in such cases, become dull, and possibly be even destroyed. In order, then, to promote a fusion, a flux is added, the composition of which varies according to the means employed for diluting the colors at the time they are used. Where a volatile oil is chosen for the dilution, a flux composed of glass, nitre, and borax is most proper; but when, as in the Sèvres manufactory, gum-water is substituted, the flux must be varied, because borax cannot be properly diluted in gum-water. Glass, lead, and silex, is one compound recommended; and glass, calcined borax, and refined nitre, is another. It is indispensable, not only that the borax and nitre be as pure as they can possibly be rendered, but also that the glass shall not contain the smallest particle of lead in its composition. These ingredients must first be well triturated together in a glass mortar, and then exposed in a crucible to the heat of a charcoal fire, until the swelling, which for a time accompanies the fusion of the mass, has ceased. By means of this flux the colors are fixed upon the porcelain, and made to assume a resplendent appearance; the metallic oxides are enveloped by the flux, which preserves them from all contact with the air, and their color is rendered permanent, the fusion having been promoted at a temperature too low for their destruction.

Enamel is glass made opaque by the oxide of tin, and rendered fusible by the oxide of lead. All glazes that contain lead participate in the properties of enamel. Raw glazes, used for covering tender porcelain, are of this nature. The colors employed in painting this porcelain are those which serve for painting in enamel. They require less flux than others, because the surface to which they are applied becomes soft enough to be penetrated by them. Hard porcelain, identical with that of China and Saxony, has two kinds of colors applied to it. Those of the first kind, which are used in the representation of different objects, are baked in a heat much below that necessary for baking porcelain; while the other colors, which are few in number, must be exposed to the highest degree required by the porcelain itself. The glaze used for hard porcelain has little or no lead in its composition. The Sèvres manufactory, and some few in England, employ feldspar without any mixture of lead. This glaze, when exposed to the heat of the glass oven, dilates, and its pores are opened

without becoming soft, so that the colors are not absorbed by it, and do not undergo those changes which occur when applied to soft porcelain, when, by mixing with the body of the enamel, they become faint and indistinct. This effect is much increased when some particular colors are employed, and especially the reds produced from iron, which are exposed to the destructive action of the lead that is contained in the glaze.

Painting on soft porcelain must for this reason be several times retouched with the pencil in order to give to it the distinctness and brilliancy which follow the use of the same colors on hard porcelain, so that a high degree of ornament is seldom or never given to any but the latter description. In the embellishment of hard porcelain these retouchings are not required except for the most elaborate specimens of the art, which can by such means, however, be produced with the most admirable degree of perfection, so as to render painting on porcelain not distinguishable from the finest productions of the pictorial art, without reference to the body upon which it is performed or the means used for bringing out the colors. Natural objects, landscapes, portraits and historical pieces are represented with all the truth, as well as all the brilliancy of coloring, of similar subjects on canvas.

The service presented by the King of Prussia to the Duke of Wellington, in 1816, is said to be the finest specimen of Dresden porcelain in England. Each piece is exquisitely painted, and the battles represented and all the subjects are different.

One great inconvenience attending the repeated exposure to the heat of the oven of pieces thus retouched is, the colors are liable to peel off unless the greatest care has been used in their application. This defect has been remedied in the Sevres works by introducing a calcareous flux into the feldspar glaze, which softens it without at all affecting the body of the ware: Soda and potash are never used as fluxes, as their introduction causes the colors to scale; the reason for this is, they become volatile in a great heat, and abandon the color, which will not adhere to the glaze.

The liquid which serves as a vehicle for laying on the colors is rubbed with them on a glass palette, till the whole is entirely combined. Great care is used in the choice and management of diluent liquids, which must always be sufficiently volatile to be entirely dissipated in the heat to which the wares are afterwards exposed. In France the preference is given to oil of lavender as a vehicle; and in order to insure the proper degree of fluidity, the oil is divided into two parts by distillation, that which first comes out being the most volatile and having the least density, being used for diluting the colors when they become too thick; and, on the other hand, the por-

tion that remains in the retort having the opposite quality is reserved for thickening them when they run too freely. Oil of turpentine, which has been sometime in store, is more generally used in England, and is said to answer the purpose better than any other volatile fluid.

Edward Atkinson indulges in a vision to this effect: If we can send thought and light over a wire; and if we can attach to the same post another wire by which to transmit electric power, so that every farmer may keep a small thunder-storm on tap in his barn to cut his fodder, milk his cows, and churn his butter, split his kindling wood, and do all the heavy work and choring about the house; in short, if we are to accomplish here what is now being done in France, that is, operate an electrical machine by a small water-power on the farm, and run the plows, harrows, harvesters and threshers by electricity—if these things begin to be apparent, that are so bewildering that one even gets considerably mixed up in attempting to describe them, and is not quite sure what relation his parts of speech bear to each other—why, then, perhaps the millenium of the economist is nearer at hand than it has been supposed to be; "the time when intelligence and integrity and a very moderate amount of labor will insure so good a subsistence that it will not pay to be rich."

Common glue has most enormous strength and adhesive powers if it is good. But to be good it must not have been injured in the making by decomposition, to which the material and glue itself are peculiarly subject. If offensive, it cannot be trusted to hold wood. The strongest known glue is that made from the sounds and skins of fishes, and the strongest of this class is made in Lapland from the skin of a perch. The Laplanders use it in making their bows, which are both strong and durable. In making it their cold climate is greatly in their favor; here a fish skin will begin to undergo decomposition before it can be dried. In making it the skins are put into a bladder, which answers for a water bath, and heated in water until a sort of glue results.

M. Delafontaine, in 1878, communicated to the *Academie de Sciences* the discovery of a new metal in the mineral "samarskite," to which he gave the name "decipium." In the *Comptes Rendus* for July, M. Delafontaine states that he finds his "decipia" of 1878 to be a mixture of two new oxides, one of these being the radicle of the earth, found also by M. Loeq, and to which that chemist gave the name of "samarium," the other being his own "decipium." These names it is proposed to adopt in future.

MELBOURNE INTERNATIONAL EXHIBITION, 1880.

FOUR
FIRST-CLASS
PRIZES

PRINTING, ENGRAVING, ART, AND PERIODICALS,

— AWARDED TO THE —

LOCKWOOD PRESS

HOWARD LOCKWOOD, Proprietor, - - No. 74 Duane Street, New York.

These are the **HIGHEST HONORS** Awarded to any Exhibitor from any part of the World.

SYDNEY INTERNATIONAL EXHIBITION, 1879.

THE GOLD MEDAL

OF THE

Sydney International Exhibition,
1879,

— AWARDED TO —

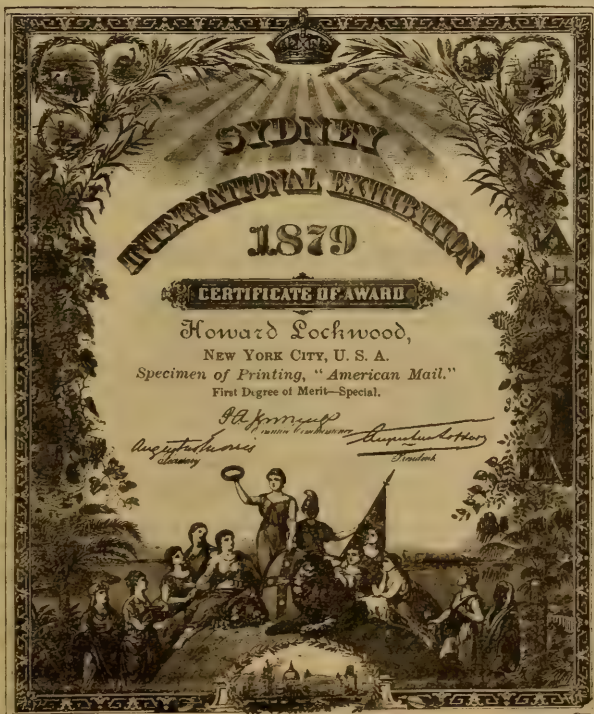

THE LOCKWOOD PRESS.

LANGUAGE OF JUDGES' AWARD :

"This exhibit is equal to anything produced in London or indeed anywhere else. The type is sharp and distinct; the wood-cuts so artistically brought up and worked that they resemble steel engravings; the paper has a beautiful glazed surface; and the ink, which is a copy black, is distributed with perfect uniformity."

FIRST DEGREE OF MERIT (SPECIAL).

THE SILVER MEDAL

OF THE

Sydney International Exhibition,
1879,

— AWARDED TO —

THE LOCKWOOD PRESS.

LANGUAGE OF JUDGES' AWARD :

"Specimens of photo-engraving in the shape of a small volume reduced to one-quarter of the size of the original publication—THE AMERICAN MAIL AND EXPORT JOURNAL—very clear, easily readable, and showing progress."

SECOND DEGREE OF MERIT.

The LOCKWOOD PRESS has been awarded High Honors at the several International Exhibitions where its work has been exhibited, including a Diploma and Honorable Mention at the Paris Int. Exhib., 1878, for Fine Printing.

A young fellow ought to be wiser than he should seem to be; an old man ought to seem wise whether he really be so or not.

THE STATIONER.

DEVOTED TO THE INTERESTS OF THE

Stationery and Fancy Goods Trades.
WEEKLY--\$2.00 PER ANNUM.

Single Copies - - - 10 Cents.

NEW YORK, THURSDAY, OCTOBER 27, 1881.

Advertisements cannot be received for insertion in the current week later than 12 m. on Wednesday. The charge for advertising is 25 cents a line, each insertion. Special terms for standing and displayed advertisements to be had on application.

This journal aims to be a medium of information for and a representative of the interests of every one connected with the stationery and fancy goods trades. It contains a full and trustworthy survey of the market for stationery in this country, in all cases giving the actual prices at which goods can be bought of importers and jobbers in this city, together with a detailed account of novelties in the trade, patents relating to stationery, and current items of interest. A review of foreign markets and accounts of movements abroad will also be furnished, and no pains will be spared to make THE STATIONER a thorough and complete exponent of the trade.

Subscription and postage for Great Britain, per annum..... 12s.

Any information our readers may wish to obtain shall be cheerfully given, and prompt replies will be made to all inquiries addressed to us on any subjects of interest to the trade.

Communications on all trade matters are earnestly solicited. Address

HOWARD LOCKWOOD, Pres. and Treas.

Subscribers to THE STATIONER can be supplied with the best cloth binder in the market. Deliverable at the publication office. Price, fifty cents.

Readers of this paper who avail themselves of the information obtained from its columns, by advertisement or otherwise, are requested to notify their correspondents of the source of their information.

GOOD as trade has been, the season bids fair to eclipse everything in the way of business that has ever been known in the stationery trade.

FROM the remotest part of the country comes this axiom: "We take THE AMERICAN STATIONER regularly; it is indispensable to the trade." Why, of course!

REFERRING to the letters from our correspondents which appear in this issue, it will be seen that the tide of successful trade sweeps all over the country. There is no drought in business.

IN a notice to the trade, which appears in another column, the American News Company makes a statement correcting its catalogue quotations of blotting paper. As the trade may have been led into some misapprehension on this score, they will do well to note the fact there stated.

WE herewith present the holiday number of THE STATIONER. We do not know that we have ever had more pressing demands upon our space, and we are sure that the appearance of this paper will justify us in the statement that it is the best exponent of the stationery trade that has ever been issued in this country.

A VERY nice sample of hand-made American drawing paper is given in this issue. If American paper makers would make more frequent use of THE STATIONER for displaying their samples, they would find that it would not only be the means of putting themselves in contact with the home trade, but of securing foreign orders. We invite further experiment.

MANY new inventions have been patented to the stationery trade, and not an issue of the weekly report of the Patent Office appears but there are things of more or less value to printers and stationers suggested. Inasmuch as many persons are ignorant of the laws relating to patents and the methods of procedure for securing protection here and in Europe, we have arranged with James A. Whitney, counselor-at-law and an expert in all matters relating to patents, to supply a series of articles bearing on the subject of patent rights. The first of these articles appears in this issue of THE STATIONER.

MANY new advertisements appear in this issue, and in others of longer standing there will appear some changes to which it will be well for the trade to direct their attention. This is a paper to be read "clear through," without missing a single notice. It is representative of every part of the country, and will be read wherever stationery goods find an outlet. We invite particular attention to the advertisements of our out-of-town patrons, and at the same time offer the suggestion that there are special features of usefulness and value to be found in the cards of the Metropolitan houses. The readers of THE STATIONER

should consult each page and study it in all of its details.

AN OLD FRAUD REVAMPED.

A CORRESPONDENT, whose letter, to which we invite particular attention, will be found in another column, discloses the fact that some of the paper mills are making short-weight papers on orders. That is, they are requested to manufacture paper of specified weights and to mark them, when put up, two to three pounds above the weight contracted for. The writer of the letter is the president of one of our largest and best known paper manufacturing companies, and it can safely be said that he speaks "by the card." We concur with him in the expression that this is a "petty swindle," and we therefore warn buyers of every degree to look out for such foul practices and pay for goods only at scale weight. It doesn't make any difference to us who does this sort of business. We speak in defense of business morality and commercial honor, and in the interest of those who are likely to be deceived by such frauds until they become too well known to be useful to those who plan them. Unfortunately our correspondent does not give names, but we would like to have authentic proof of the identity of individuals who are concerned in fostering such a wrong, and of the mills which abet them and help to carry it out.

Manufacturers have this thing largely in their own hands. An order from a dealer to make a lot of paper, 48 pounds, and to mark it fifty pounds, or even an order for paper to be made a few pounds under the ordinary weights of regular sizes, with a request *not to mark at all*, is *prima facie* evidence that a fraud is intended to be perpetrated. Paper makers should insist upon marking the proper weight upon every bundle of paper, and should run it just as closely as our improved machinery permits. If after this is done a fraud is committed, the dealer must do it himself by removing the old and substituting new figures. In cases like that mentioned by our correspondent the manufacturer becomes the "cat's-paw" of the dealer. He should not lend himself to any such practice. Those who refuse to become parties to these frauds honor themselves by their refusal, and help to repress such practices; but, as remarked, "all of the mills should unite in the refusal."

Experiments to determine the changes of color produced in flowers by ammonia have given these results: Over a dish of ammonia was inverted a funnel, in the tube of which were placed the flowers experimented upon. Blue, violet and purple flowers were found to change to a beautiful green; deep red flowers to black, and white to yellow. These changes are most striking when the flowers have several different tints, in which the red lines are turned dark, the white yellow, &c. If the flowers thus changed are placed in pure water they retain their new colors for several hours, gradually resuming their original tints after that time. Another observation made in this connection is that the flowers of the aster, which are naturally inodorous, acquire a very agreeable perfume under the influence of ammonia.

Communications.

[Correspondents are requested to write on only one side of their paper. No responsibility for the opinions of correspondents attaches to this paper.]

Short Weights.

To the Editor of The Stationer :

It is getting quite common now for buyers of book paper to order their paper made from one to three pounds under weight and ask the mills to brand the reams the full or nominal weight : for example, 24x38, 50 pounds, they will order 24x38, 48 pounds, and pay on the basis of 48 pounds, but have the mills mark the paper 50 pounds and sell the same to their customers at 50 pounds, &c.

This is a petty swindle, and should be stopped at once by all parties concerned. Some mills refuse to become parties to the fraud, but all the mills should unite in the refusal. It is due to the paper trade that the business be conducted in an honest manner. * * *

"St. James' Note."

12 GARLICK HILL, UPPER THAMES STREET, }
LONDON, E. C., October 10, 1881. }

To the Editor of The Stationer :

I notice in THE STATIONER of September 22 an inquiry for the maker of St. James' Note. I beg to inform you that I am the sole maker of that article, sample of which I send by this post. J. N. PRIMM.

ANSWERS TO CORRESPONDENTS.

W. E. & C. ask : Can you or any of your readers tell us what is the composition or glue used on the edges of pads; it is reddish in color and very elastic ?

Ans.—Any glue will do for the edges of pads; the inferior sorts are generally used. There may be some special manipulation by some manufacturers of pads, but, we presume, that they will not be willing to communicate their secret, if there is any. What says Blair ?

S. C. W. : Who are the makers of Ward's "Diamond-Point" steel pens ?

Ans.—They were originally brought out by Samuel Ward, of Boston, now of the firm of Ward & Gay, to whom all orders must be addressed. We believe that they are made by the Esterbrook Steel Pen Company only to the order of the house mentioned.

W. P. J. asks : Can you tell me what mill manufactures paper of the kind and quality of sample herewith sent ?

Ans.—Your sample is what is known as "English hardware." It is made by Vernon Brothers & Co., 65 Duane street, this city.

TELEGRAPHS IN JAPAN.

The telegraph system in Japan, which dates from 1871, comprised at the beginning of last year 3,929 miles of line, with 9,345 miles of wire. The total number of telegrams during the year was 1,272,756, of which about 96 per cent. were in Japanese, while international messages numbered 22,695. The Japanese language having no regular alphabet, it became necessary for telegraphic purposes to form a combination of Morse characters to represent the sound of the syllabary known as the Katakana. This was effected by using the letters of the international code, supplemented by others formed of five dots and dashes (figures excepted), to produce a total of forty-seven signs, and the alphabet thus constituted is stated by Mr. Morris, of the Telegraph Department, to have given tolerable satisfaction

during the nine years that have passed since its introduction. A telegraph school has been started for training Japanese youths as operators, and during the last year two hundred and twenty-seven were appointed to new offices or sent out as reliefs, leaving ninety-seven under tuition. They are taught to write and speak English and French, and receive the rudiments of an English education. The average rate for twenty characters of the Japanese language for a distance of sixty miles is about three sen, or rather less than a penny, taking the entire line from Tokio to Nagasaki as a basis of calculation; the average for shorter distances is higher, but messages between Tokio and Yokohama are transmitted for seven sen, or 2½d., for twenty miles. In 1880 there were one hundred and twelve offices open for general traffic, local and international, and seventy others connected with government departments, railways or police, while fifty-three are kept open day and night. There are three hundred and forty-eight Morse instruments in use, twenty-six single needle-blocks, and twenty-nine telephones of the Bell pattern. Seventy-one instruments of various patterns are used in the school for the students to practise upon. Including the five submarine cables across the Straits of Shimonoseki, the total receipts for the year were £108,323, and the total expenditure £101,674, this being the first year in which the revenue exceeded the working expenses. It may be mentioned that during the Satsuma rebellion in 1877 the telegraph was largely used in the field, and greatly contributed to bringing the war to a close. The Satsuma men were particularly active in forced marches, but in almost every case they found that the wires were before them, and gave information of their whereabouts in sufficient time to defeat their object. For this purpose five hundred and eleven miles of line were constructed, and fifty-three offices opened in the various villages at the rear of the victorious army.

The materials employed in construction were light portable posts, vulcanite insulators, and No. 11 wire, every use being made of natural supports in the way of trees, and it was surprising how very few interruptions occurred under the improvised circumstances.—*London Times*.

A NOTICE TO THE TRADE.

The American News Company, in its catalogue of stationery goods lately issued, quotes blotting paper as follows :

BLOTTING PAPERS.		Quire.	
Size,	20x24.	Warranted scale weight.	
Commercial white,	80 lbs. to the ream.....	\$0.66	
" colored,	100 " "	84	
" white,	120 " "	90	
Treasury	" 80 " "		
"	" 100 " "		
"	" 120 " "		

The News Company now desires to state to the trade that the above guaranty of scale weight as per weights quoted does not apply to Treasury blotting, which it intended to quote as of nominal weight, and in a supplement to its catalogue, now in press, that fact will be stated.

The government of Crete has, in accordance with a resolution of the General Assembly, offered a prize of 40,000 groschen for the best history of the island in modern Greek. To this sum the Governor-General, Johann Photiadis Pasha, a man of high culture, offers to add 10,000 groschen. The subject of the competition consists of two parts, the first of which is the history of Crete from the earliest times up to

the acquisition of the island by the Venetians in the thirteenth century; the second is the history of the island under the dominion of the Venetians and the Turks. The history must be based on a thorough study of original authorities. Manuscripts for the first part are to be sent in to the governor between the 1st and 13th of August, 1883. The prize for the best work is 20,000 groschen. Manuscripts for the second part are to be sent in between the 1st and 13th of August, 1885. The successful work is to receive a prize of 30,000 groschen.

Market Review.

OFFICE OF THE AMERICAN STATIONER, }
WEDNESDAY, October 26, 1881. }

THE MONEY MARKET.—There has been quite a measurable relief from the severe monetary stringency that has been more or less a disturbing element in trade for several weeks past. As a consequence of the increased supply of loanable funds, call loans have ruled easy, while the banks have been enabled to extend increased accommodation to the merchants. The stock market continues quiet, notwithstanding an increased supply of loanable funds and lower average rates. Prices have been irregular, but in the main firm. Government bonds are firm, with an advance in the fours and extended fives, with active dealings in both. Railroad bonds are also in increased demand, and prices have, for the most part, advanced. The market for foreign exchange was quiet but strong, the demand for remittances is not large, but the supply of commercial bills is very small. The posted rates of the leading drawers of sterling are up to \$4.81¼ and \$4.85¼. The actual rates are \$4.80¼@4.81¼ and \$4.84¼@4.85¼. Cable transfers are \$4.85¼@4.86¼, and prime commercial bills are \$4.79¼@4.79½.

THE PAPER MARKET.—Nothing has occurred during the week under review to interrupt the fairly active trade which has been gradually developing since the beginning of September. The continued drought appears to be the only reason for anxiety among the trade at present, and causes many manufacturers to fall behind in the execution of their orders. Our city dealers are also hindered to some extent in being able to keep up assortments of papers in sufficient quantities to meet the current wants of their customers, and are enabled to obtain very full prices. Prices throughout rule very firm, and business in every grade, without a single exception, is in a highly satisfactory condition. The advance in news and in the medium and lower qualities of book is well sustained, and nothing in the way of low grade book paper is to be obtained under 8c., or 6½c. for news. Straw wrapping has become very much reduced in supply, and dealers who have any stock to sell are very loth to part with it, even at the high prices they are enabled to obtain. There is comparatively little being made in the East, owing to the protracted drought, and prices are about as high as during the "boom" last year.

THE STATIONERY MARKET.—Activity is the prevailing feature not only of the staple and fancy goods lines at the present time, but of every branch of the stationery trade. Satisfaction is expressed on every hand, and almost every house deserving of a good trade is having a fair share of business. We noted last week the fact of some houses in the fancy goods line running short of stock, and we learn this week that this is also the case with some lines of staple goods, the demand having exceeded the most sanguine expectations of the dealers. There is more doing this week in orders from the city trade, who are beginning to make their purchases of holiday goods, and an increased number of orders is noted from the class of buyers intermediate between the jobber and consumer, or, more strictly speaking, the retail dealers. Orders by mail also constitute a large aggregate of business, and, taken as a whole, the stationery trade could scarcely be in a more satisfactory condition and on a more solid basis than at present. Prices are firm throughout, and any changes that are likely to occur will be on an upward scale.

NEW LINE OF PHOTOGRAPH ALBUMS,

SUPERBLY BOUND IN

Russia, Levant Morocco, Calf, Plush and Seal
Skin, with Round Corners, new PISTON
Clasp, and Cushion Sides.

QUARTOS.

No. 392, Full Russia,

SEASON 1881-1882.

SEASON 1881-1882.

L. PRANG & CO.'S

Christmas and New Year Cards

ANNOUNCEMENT.

WE hereby beg leave to announce to the trade the completion of our line of Christmas and New Year Cards for this season, for which our agents are now soliciting orders. The extent of our list, the originality, and especially the American character of our designs, together with the great care taken in their execution, will, we have no doubt, secure for our goods the popularity which they have enjoyed heretofore. The efforts we have made to secure the highest excellence, is attested by the names of some of the artists whose designs have been reproduced. We would only name Elihu Vedder, C. C. Coleman, Thomas Moran, Miss Rosina Emmett, Miss Dora Wheeler, Mrs. O. E. Whitney, W. H. Gibson, F. S. Church, R. G. Birch, &c. That a due regard has been paid for the quality of the literary matter, in connection with these designs, is shown by the fact that many of the designs are accompanied by original poems from writers of note, such as Mrs. Celia Thaxter and Mrs. Emily Shaw Forman.

The great increase of our manufacturing facilities, secured by additions to our building nearly doubling our floor space and by the adding of new machinery, will place us in a position to fill orders promptly. Still we would request dealers to place their orders as early as possible, so as to still further enable us to make timely preparation for prompt deliveries.

Our Cards will, as heretofore, be put up in envelopes containing twelve Cards, unless otherwise stated on our price lists.

We furnish envelopes without extra charge for all our Christmas and New Year Cards, for which the list price is \$1.80 per set, and over. Our silk-fringed Cards will no doubt be in great demand this season. We have made ample preparation to furnish these in time and have made arrangements with our manufacturers for the best quality of silk fringes. We would call special attention to the excellence of our fringed Cards and the novelties in colors and style of fringes we offer for this season.

A marked and attractive feature of our cards are the elegantly ornamented backs.

All our fringed Christmas and New Year Cards are furnished with envelopes and protectors, so as to insure safe transportation in the mails.

It will be impossible to embody our whole list in the space of the advertisement, and we will therefore merely give a general outline of the variety offered.

PRANG'S PRIZE CHRISTMAS CARDS. COMPETITION OF 1881.

These are the Cards selected by the judges in the second competition for four designs of Christmas Cards, for which we offered \$2,000 in prizes of \$1,000, \$500, \$300 and \$200 respectively. At the recommendation of the judges, Messrs. COLEMAN, LAFARGE, and WHITE, the prize for third best Card was increased to \$500. Mrs. CELIA THAXTER has written appropriate verses for each of the designs.

- 1st Prize Card (\$1,000), by Elihu Vedder. Size, $6\frac{1}{4} \times 9$ inches; price \$1 each. Same card with silk fringe, cord and tassels, price \$1.50 each.
 2d Prize Card (\$500), by Miss Dora Wheeler. Size, 7×9 inches; price 75c. each. Same card with silk fringe, cord and tassels, price \$1.25 each.
 3d Prize Card (\$500), by C. C. Coleman. Size, 7×9 inches; price 75c. each. Same card with silk fringe, cord and tassels, price \$1.25 each.
 4th Prize Card (\$200), by Miss Rosina Emmett. Size, $5\frac{1}{4} \times 9\frac{1}{4}$ inches; price 60c. each. Same card with silk fringe, cord and tassels, price \$1 each.

The Prize Cards can also be had mounted on heavy board with gilt beveled edges.

We beg to call attention also to the following publications for New Year and Christmas:

- "Goddess Fortune" New Year Card, by Elihu Vedder. Size, $6\frac{1}{4} \times 8\frac{3}{4}$ inches; price 75c. each. Same card with silk fringe, cord and tassels, price \$1.25 each.
 "Christmas Dove." Size, $7 \times 9\frac{1}{2}$. This card is in the same style as the success of the last Easter season, the "Easter Dove." Price 60c. each. Same card with silk fringe, cord and tassels, price \$1 each.

Our Regular Line of Christmas Cards consists, among others, of the following Series:

- Nos. 901, 902, 903, 906, 909, 910. Floral designs ranging in price from 20c. to \$1.20 per set of 12.
 Nos. 904, 905. Humorous Cat and Frog Designs, 60c. per set.
 No. 907 is a new series of Horseshoe designs, 75c. per set.

- Nos. 920 and 929. Children's designs, at \$2.40 and \$3.60 per set.
 No. 922. Shells of Ocean, with figures, \$2.40 per set.
 No. 924. Fans with silk fringes, \$3 per set.
 No. 933. Bric-à-Brac designs, very rich, \$6 per set, and many others.

We offer a similar assortment of New Year Cards, but would call special attention to No. 1320, a new folding calendar, at \$2.40 per set. Most of the Numbers can be had with silk fringes ranging in price from \$2.25 to \$12 per set. Stock will be ready for delivery September 15.

Besides the above, attention is called to our New Birthday Cards, Scripture Texts Cards, New Panels, New Water Colors, by Thomas Moran, and other publications. Our line of Thanksgiving Day Cards will also be shown by our agents.

ILLUSTRATED CATALOGUE SENT UPON APPLICATION.

CARVING FROM MODELS.

It must be observed that merely carving flowers and vegetation from models is not designing ornament, and that something more of thought, more of adaptation of the form to the circumstances and the material must be displayed to justify the claim of the work to be called ornamental design. This is what we do find to perfection in Greek and in early Gothic ornament, says an exchange; it is not the mere imitation of nature, but the application of natural form, retaining much of its original characteristics, to the production of ornament in a style suited to the peculiarities of the material in which it is executed, and the final form of which is the result of considerable thought, not of the mere cleverness of the hand and eye in the realistic reproduction. But it is remarkable how few natural types seem to have been used in the production of ornament of this thoughtful class, and how little attempt there has been to evolve any new ones in the same class of ornament. We have gone on reproducing the Corinthian capital over and over *ad infinitum*, without it having apparently even occurred to any one that the same general form would be susceptible of varied treatment by using other leaves instead of the beautiful, but well-worn, acanthus, and that this variation might even be carried out in the same building with good effect, preserving the general aspect of the capitals alike and varying the details. In the case of that beautiful production, the carved early English capital, again we have been content to go on copying and reproducing it (very seldom with anything like the success of the mediæval inventors), with no attempt to apply the same free yet conventional treatment, so admirably suited for execution in stone, to any other derivation from vegetable form. It may, we confess, be doubted whether the early English lobed foliage is adapted from any precise form in the vegetable world; whether it is not, in fact, evolved from a reminiscence of the volute of the classic capital, which took this lobed form in the Romanesque French capitals, which still retains its original angle position as in the classic capital, but which the later carvers, in England more especially, adopted as the prevalent feature in the carving of a capital, introducing it with the same freedom and absence of order as if it had been a natural growth. The feature is so complete in itself, and so individual in character, that it seems difficult to touch it without spoiling it, and perhaps any effort to adapt the early English capital with another form of detail could hardly be successful. But other forms of Gothic capital might be reproduced with foliage different from that which was used as their model by the mediæval carvers. And if the characteristic distinction of the classic and Gothic types of capital be kept in mind, there is no reason why the same type of vegetation might not be equally suggestive for either type of capital (or of ornament generally), and be used with totally different expression in the classic or the Gothic manner. The radical distinction, it must be remembered, between classic and Gothic floral ornament is, that the former is geometrically and symmetrically arranged; the latter is free and, for the most part, unsymmetrical, and imitates the irregular growth of nature, even when, as in the early English capital, it does not absolutely imitate nature in detail. This difference between symmetrical and unsymmetrical, in the relation between ornament and nature, is conveniently expressed in the terms "classic" and "gothic," the signification of which, in

relation to such a point, every one readily understands; but, in reality, the distinction is a much more typical one, since the whole of ornament which is based on natural foliage may be divided into these two great classes; that which is irregular and more or less naturalistic, of which Gothic work shows the best types, and that which, in adopting natural forms, compels them to assume an artificial and bi-lateral symmetry, and results in the type of ornament which we call classic, and of which Greek ornament furnishes the highest and most perfect examples.

Now, considering that we have always these two essentially different methods of treating a motif in ornament, and that behind these we have the almost infinite variety of nature to furnish us with types and suggestions, each of which may be treated not only in one or other of these two leading methods, but may be also susceptible of several sub-variations in character, arising out of the different natures and requirements of different materials, it seems strange that there has been so little effort, if not to evolve new forms of ornament, at least to give new character and treatment to old forms by taking fresh suggestions from nature.

CHINESE NEWSPAPER ENTERPRISE.

The Chinese newspaper proprietors of San Francisco manifested, on the arrival of the news of the death of President Garfield, a degree of enterprise not excelled by the most zealous of American journalists. In one of them bearing a name corresponding to the word *Record*, large sized portraits were given of the late President Garfield and President Arthur. The engravings were specially prepared in stone for the paper, and were, of course, done by one of the San Francisco engravers. The whole front page of the paper, in Chinese text, is devoted to a summarized history of the two Presidents, together with the details attending President Garfield's death. This particular newspaper is, it is said, edited by a French Canadian terming himself Professor Layres, and who is to some extent familiar with the Chinese language. He clips from the city newspapers such items as he considers of main interest to the Chinese, and hands them to his Chinese assistant editors for translation. Just now the Chinese newspaper business here is lively, the Chinese *Record* being strongly opposed by another newspaper edited by a native Chinaman, who views with unmitigated disdain and contempt the effusions of his white-blooded opponent. In the meantime the *Record*, it is said, is holding its own in point of circulation, boldly defying the other to reduce it a single subscriber.

One of the greatest luxuries of riches is that they enable you to escape so much good advice. The rich are always advising the poor, but the poor seldom venture to return the compliment.

THE WALNUT SUPPLY.

Our special correspondent, who has been traveling through Southeastern Kentucky for some weeks, furnishes us with some information which will be of general interest at this time, on account of the varied opinions expressed by journals all over the country as to the probability of the speedy exhaustion of the supply of walnut lumber. He states that the lumbermen of that section have heard of the scarcity of walnut in nearly all the sources of supply throughout the country, and are determined to utilize for market the immense forests of this valuable wood in their own section. In some portions of Eastern Kentucky the matter of transportation is the most serious drawback, it being almost impossible to ship the logs even as far as Louisville with a fair show of profit. There is an abundance of the wood in certain portions of that section, which could be worked to advantage here in the State if the short-sighted policy of those in authority did not prevent the much-needed and oft-demanded improvement of Kentucky River. The cost would be so small, in comparison to the advantages derived from opening up the rich section through which it runs, that thinking men are at a loss to know why it has not been completed long ago. Now, when the cry of scarcity all over the country is heard, is the time for opening up this rich field to the furniture markets of the world; for it is to the factory of the manufacturer of furniture that the bulk of this wood, from whatever source, finds its way. The supply in this city, while not large, is at present, we are told, sufficient for the demands of trade, but no delay should be allowed when it is procurable, and its non-production will result in such manifest injury to one of our largest manufacturing interests.—*Southern Mfr. and Builder.*

DISCOVERY AND USES OF WATER-GLASS.

Von Helmont, in 1640, found that when, in making glass from sand and alkali, an excess of alkali was used, the glass would dissolve in boiling water. In 1827, Von Fuchs utilized water-glass, soluble glass or silicate of soda, in stereochromy or solid color-painting, in monumental and mural decoration, and in the preparation of cements and artificial stones. London *Engineer* suggests that, although used for a large number of purposes in the arts, it is capable of more extended application when it becomes better known. A compact, marble-like stone is formed when it is mixed with chalk and is dried. Similar stones are formed by mixing water-glass with bone-ash, zinc-white and magnesia. Ransome's artificial stone is prepared by mixing sand with water-glass solution, to form a plastic mass, which is then pressed into the required shapes and placed in a solution of calcium-chloride; the silicate of calcium thus formed cements the grains together, and the chloride of sodium formed at the same time is removed by washing with water. With clay, lime, sand, cement, etc., soluble glass enters largely into the composition of many of the patented artificial stones, plastic tiles, slates, etc., and also of our common soaps, the detergent qualities of the glass making it an excellent scouring material. In cold water this glass is nearly insoluble, or dissolves very slowly, but in boiling water it dissolves with facility; and remains in solution after the water has cooled. If the water contains thirty per cent. of the glass in solution, we have a substance of a syrupy consistence, which may be used as a

transparent varnish on many substances; on drying, it forms a glassy coating that fairly resists moisture and change of temperature.

THE TELEPHOTOGRAPH.

Shellford Bidwell has of late made some mechanical improvements in the apparatus which he has designed for transmitting the picture of a luminous image along a telegraph wire. The principal one of these is the substitution of a small box inclosing the selenium cell for the cylinder formerly used. All light is excluded from this cell except such as can pass through a pin-hole drilled in the side of the box opposite to the cell. By means of a simple mechanical arrangement the box is connected with a horizontal spindle in such a manner that each revolution of the spindle causes the box to move perpendicularly up and down through a distance of two inches, and at the same time laterally through $\frac{3}{4}$ inch. If now a picture not more than two metres square is projected by a photographic lens upon that side of the box which contains the pin-hole, it is clear that by turning the spindle the pin-hole may be caused to pass successively over every point of the focussed image. The box while moving in the upward direction, travels through space at precisely the same rate as any point on the surface of the receiving cylinder, when the spindles of the two instruments are revolving synchronously; the downward movement is rapid and is not concerned in the transmission of the picture. With this arrangement, which Mr. Bidwell exhibits in the Paris Electrical Exhibition, images of butterflies and other animal figures are very successfully transmitted along a wire. It has the advantage over the old plan of allowing the light always to fall on the same part of the selenium cell. A more sensitive chemical paper for the telephotograph is, however, still a desideratum.—*Engineering*.

VENEERING.

The art of veneering originated about fifty years ago, and was most probably first practised in England. It originated in the high price of the rare and beautiful cabinet woods. This fact, and the actual scarcity of varieties of the fine cabinet woods, suggested to some ingenious mind the idea of sawing up the logs of those rare and beautiful woods into thin sheets and of covering furniture, doors, picture frames, &c., made of cheaper woods, with these sheets of the rarer lumber, so as to produce the same effect as though the articles were made of solid cabinet woods, thus gaining the appearance without the cost of the more valuable material. It is, in fact, another application of the process extensively used in other branches of the useful arts of covering an inferior material with a superior one, as in gold and silver plating, glass making, and the like. Though from a rigid artistic standpoint the use of veneers would not be approved, the high utility of the art has made their use absolutely indispensable, and its universal application has largely robbed it of the charge of being an attempt to palm off an inferior article for a superior one. No one supposes, for example, that a rosewood piano is made of solid rosewood; yet the rosewood veneer gives all the artistic effect to that very costly wood.

Never refuse to receive an apology. You may not revive friendship, but courtesy will require, when an apology is offered, that you will accept it.

"THE GREAT ROCK ISLAND ROUTE"

Calls your attention to the following REASONS WHY, if about to make a Journey to the **GREAT WEST**, you should travel over it:

As nearly absolute safety as is possible to be attained. Sure connections in **UNION DEPOTS**, at all important points. No change of cars between **CHICAGO, KANSAS CITY, LEAVENWORTH, ATCHISON or COUNCIL BLUFFS.** Quick Journeys because carried on Fast Express Trains. Day cars that are not only artistically decorated, but furnished with seats that admit of ease and comfort. Sleeping cars that permit quiet rest in home-like beds. Dining cars that are used only for eating purposes, and in which the best of meals are served for the reasonable sum of seventy-five cents each. A journey that furnishes the finest views of the fertile farms and pretty cities of Illinois, Iowa and Missouri, and is afterwards remembered as one of the pleasant incidents of life. You arrive at destination rested, not weary; clean, not dirty; calm, not angry. In brief, you get the maximum of comfort at a minimum of cost.

That the unremitting care of the Chicago, Rock Island & Pacific Railway for the comfort of its patrons is appreciated, is attested by its constantly increasing business, and the fact that it is the favorite route with delegates and visitors to the great assemblies, political, religious, educational and benevolent, that assemble from time to time in the great cities of the United States, as well as tourists who seek the pleasantest lines of travel while en route to behold the wonderful scenes of Colorado, the Yellowstone and Yosemite. To accommodate those who desire to visit Colorado for health, pleasure or business, in the most auspicious time of the year, the Summer season and months of September and October, the Company every year puts on sale, May 1st, at all coupon ticket offices in the United States and Canada, round trip tickets to

DENVER, COLORADO SPRINGS AND PUEBLO,

At reduced rates, good returning, until October 31st. Also to San Francisco, for parties of ten or more, good for ninety days, at great reduction from regular fares.

REMEMBER, this is the most direct route for all points **WEST** and **SOUTHWEST.** For further information, time-tables, maps or folders, call upon or address

LETTERS PATENT FOR INVENTIONS.

BY JAMES A. WHITNEY, COUNSELOR-AT-LAW.

I.

ORIGIN OF PATENT LAWS.

The word "letters," meaning a chirographic message, and the word "patent," meaning "open," taken together constitute a generic term for special grants made by a government. These are commonly executed under the seal of the granting authority, and their origin is remote.

Letters patent, for the exclusive use of inventions, were of later date than letters patent for many other rights or privileges. They were originally issued under the same general principles as those for other objects; but in progress of time became the subject of a special branch of jurisprudence. Historically, this latter had its origin only four or five centuries ago, and the earlier patents were loosely defined. The principle, however, is identical with one of the laws of ancient Persia, a land composed, in great part, of barren and arid stretches of country, interspersed with ponds and watercourses. By the Persian law it was provided, that whoever should reclaim a piece of desert land by irrigation, should have the exclusive right of tillage during the period of two generations. The analogy between the work that produces harvests where none would grow before, and that which produces wealth by the elaboration of an idea, is close and manifest.

The Romans secured to writers the exclusive use of their manuscripts, which, to a certain limited extent, resembled the modern protection to inventors, although no letters patent were granted. The Chinese, in the ninth century, offered rewards for excellence in handicrafts, but it is not known that they rewarded the introduction of novelties in industries. In Europe the latter practice was first adopted with reference to the introduction of arts and manufactures from abroad; the introducer and the inventor of new processes and implements being regarded as of equal merit. This idea is inherent in the patent laws of Great Britain, of Russia, and some other countries to this day. The rewards offered for such improvement varied in character. In Nuremberg they were patents in the modern sense of the term, and it was by this means that the manufacture of wire, including gold wire for the fabrication of cloth-of-gold, became one of the great industries of that famous city. In France, the manufacture of silk was encouraged by an edict that the artisans should have the privilege of wearing swords, a distinction previously accorded only to nobles.

In England, from the time of Edward III., the granting of exclusive privileges for limited periods to inventors and introducers of new improvements was in vogue. The first of these grants of which there is any record was to "two monks and an alderman," who alleged that they had discovered a method for transmuting base metals into gold. The crown seems to have doubted whether this was a proper subject for protection, and appointed a commission to determine whether such transmutation was possible. The report was in favor of the projectors, and the patent accordingly issued under the great seal. The next is recorded several reigns later, and the earliest case cited as authority in modern patent practice bears date in the time of Elizabeth. It is worthy of remark that some of the first patents were granted to the authors of books, in precisely the same manner as like patents were granted to inventors for new and useful improvements in manufactures. This de-

monstrates that the modern copyright law and patent law are substantially identical in origin, as they are in principle.

As before remarked, the granting of letters patent was not restricted to the protection of new inventions, but was extended to many other things, and among these latter were many prejudicial to the public welfare. Of such especially were the monopolies granted to individuals during the time of Elizabeth and of James I., for the sale of many of the necessities of life, such as salt, herrings, potash and numerous other things. These monopolies were contrary to the common law of England, and as such were bitterly opposed by the people. The antagonism to them rose to such a height that, in 1621, the twenty-third year of the reign of James I., the famous statute of monopolies, so called, was enacted. This prohibited all manner of monopolies, with the exception of exclusive privileges granted to inventors or introducers, within the realm, of new and useful improvements in manufactures. These exceptions, in no case, were to exceed a period of fourteen years. The term "manufactures" has been broadened by judicial interpretation to include every variety of improvement in any art or industry which, in its production, calls for the exercise of the inventive faculty, and which is not injurious to public morals. It is common, with many writers on the law of patents to date the patent system from the passage of this statute. This, however, is not correct, for, as before stated, patents for inventions had been granted long before, not only in England, but in other countries, while, as a matter of law, the statute of monopolies made no change whatever as concerns patents granted for new and useful improvements in the arts. The only change which it effected was the prohibition of unlawful monopolies which sought to take from the people what had before belonged to them, while it distinctly recognized the old-time right of the crown to grant exclusive privileges during limited periods, an improvement not previously known in the realm. But even this was not a change in the law, for the statute itself was framed to re-assert and re-establish the ancient rights of the people, and was not only prohibitive as to some things, but it was also declaratory as to others. The statute merely distinguished between patents granted for new and useful inventions, and patents granted for monopolies in articles previously known and used by the public, permitting the former and denying the latter.

It is clear that this method of rewarding inventors by grants of exclusive privileges from the crown, grew originally out of the lawful authority of the latter under the Common Law of England, and rested on this foundation until about thirty years ago, when the practice became the subject of a new act of parliament, under which patents have since been granted, and which has remained unchanged to the present time, but which left their ethics and principle unchanged.

The patent law of England, therefore, is to be found in the decisions of the English courts, and these show a constant progress, refining and explaining the principle on which patents should be granted from the time of the Tudors until something more than a century ago when the litigation concerning Arkwright's spinning machinery, Watt's steam engine, and other great improvements which made their appearance about that time, formulated the jurisprudence on this subject in a clear and comprehensive manner. It was undoubtedly from this that the framers of the Constitution of the United States

derived their convictions as to the justice and propriety of protecting property in ideas, both as regards arts and literature, and which were embodied in the 119th clause of that instrument.

The origin and development of the patent law of this country will require the space allotted to another article.

THE MECHANICAL ORGUINETTE.

Among the many musical instruments of recent introduction, there is, perhaps, none more noteworthy than the mechanical orguINETTE, which is a reed musical instrument, constructed somewhat on the principle of a cabinet organ, and adapted to be automatically operated by simple sheets or strips of perforated paper, each sheet representing one or more tunes. There is no limit to either kind or quantity of music. It will play hymn tunes, popular airs, sets of quadrilles, polkas, waltzes, reels and hornpipes with a clearness, accuracy, and degree of execution which but few performers can equal. A mere child can play it. The music-box and all kindred instruments are not only expensive luxuries enjoyed by a few, but they are limited to a few set tunes, and so soon become tiresome, and as means of enjoyment to their owners, entirely worthless. The orguINETTE, with its automatic music sheets, represents both organ and organist, music, musician and music teacher, and so is admirably adapted for singing parties, dancing parties, winter evenings' entertainments, and educational purposes, and is therefore not only the latest musical wonder, but, the price considered, the most marvelous mechanical musical instrument of the age!

The appearance of the orguINETTE is that of a square box, about two feet long and a foot wide, with four legs, which are fixed to a frame, at either end of which is fastened upright holders for the rolls of music.

The music sheets are then drawn across the reeds, as in the cabinet orguINETTE already described. Each roller contains twenty or thirty tunes, and is classed under the head of, first, sacred music; second, popular airs; third, hornpipes, reels, waltzes, polkas, etc. The provision for repeating the sacred music and popular airs is perfect. The tunes under the third head, viz., hornpipes, reels, etc., of the same class, are arranged upon the sheets in consecutive order, so that the time is kept up, while a pleasing variety of tunes is produced. The sets of quadrilles are complete in quantity, and mathematically correct in time; and, as all the changes of figures are printed on the sheets, any one, even a child, without ear for music, or musical knowledge, can provide the music, do the prompting, and so far take the place of professional musicians as to call forth the lament, "our occupation is gone." Musicians are not everywhere available. Very few can afford to engage them when they are available. The amount usually paid them for one night will buy the orguINETTE and music enough for every night in the year, without the unpleasantness and restraint caused by the presence of strangers.

The orguINETTE, since it has been brought to the notice of the public, has met with unprecedented success, and, although it is eclipsed by the cabinet orguINETTE, it will, no doubt, still continue to be in demand, as there is room enough for both in the market, and, as the orguINETTE is cheaper, it will command its share of the trade.

These instruments are now finding their way into every civilized country in the world, and the present demand upon the manufacturers is said to be very great. Further information can be had by communicating with The Mechanical OrguINETTE Company, 831 Broadway.

T. W. & C. B. SHERIDAN, 25 Centre St., New York.

I WILL INSURE YOUR HOGS.

Dr. Jos. Haas' Hog Poultry Remedy.

THE ONLY SCIENTIFIC SWINE REMEDY COMPOUNDED.

Read My Propositions!

First—When my remedy is used as a preventive, I will insure hogs by the head for a year, and will make a deposit of money to make such insurance good. If any hogs die, they will be paid for from such deposit; you can refer to my bankers, Messrs. Fletcher & Sharpe, Indianapolis, Ind., for my standing financially.

Second—Where my expenses are paid, I will visit herds of not less than 100, and I will arrest the disease among them, or forfeit \$500.

Third—After hogs have been regulated with my remedy, I guarantee that the annual cost of feeding will not exceed 25 cents per head. Furthermore, that the increase of actual flesh will far more than pay for the remedy used.

SEND FOR IT!

It is not an experiment, but an established success. Remember, it is the only remedy that is used and indorsed by the great breeders of this country and England. It owes its great fame to its genuine merits, and every mail brings tidings of its good work. The evidence in its favor is so strong the most scientific men of the country have pronounced it the conqueror of this disease. It is gaining ground daily, and no hog raiser up with the times can do without it. It is not only a protection against disease, but it is a powerful appetizer.

Inquire of my Bankers, Messrs. Fletcher & Sharpe, Indianapolis, Ind., for my standing. Will make a deposit of necessary money, and will pay for all that die.

SEND FOR IT! I GUARANTEE IT WILL STOP THE COUGH AMONG HOGS

and put them in fine condition for fattening. It will expel the poison from their system, tone them up, and invigorate them generally. It will make them thrive so as to astonish you. It will pay such a large per cent. on the investment, that no one can afford to be without it.

REFER TO ANY WELL KNOWN BREEDER OR SHIPPER IN ANY PART OF THE COUNTRY.

J. H. Whetstone, druggist, Iowa City, says: "The Haas Remedy sells better and with less effort than any proprietary medicine I have ever undertaken to sell of any kind. We have nothing in stock to-day but what I would rather do without than the Haas Remedy."

C. H. Klauenburg, druggist, Carlinville, Ill., says: "The Remedy sells well, and is the best on earth."

O. A. Elliott, druggist, Russell, Ia., says: "The Remedy has given good satisfaction here."

J. N. Penn & Sons, druggists, Sydney, Ia., say: "We hear good reports from what we have sold."

Ed. J. Brown, druggist, Edina, Mo., says: "It has given general satisfaction in this county. Have sold \$1,000 worth in three months. Have tested its merits myself."

J. M. Kufer, druggist, Macomb, Ill., bought \$400 lot of Haas' Remedy and sold \$300 of it in seven weeks.

SEND FOR IT. LIBERAL TERMS TO THE TRADE. you. Terms, Circulars, &c., on application.

W. Harris, druggist, Storm Lake, Ia., says: "It has given splendid satisfaction."

J. C. Eacker, druggist, Elliott, Ia., says: "Have sold several orders and in every case satisfaction given."

A. P. Gano, druggist, Missouri City, Mo., says: "It will be a popular article in our drug market."

J. W. Wyman, druggist, Unionville, Ia., says: "It cures chicken cholera every time."

Smith & Thomas, druggists, Platte City, Mo., say: "It gives good satisfaction here."

Duffield & Harlan, druggists, Centerville, Ia., say: "It is entirely satisfactory."

Dr. S. S. Clayberg, druggist, Avon, Ill., says: "It gives good satisfaction here."

WHAT IS A HELIOTYPE?

The Heliotype process is the application of the well known principles of photography to the art of printing and the practice of the printing press. Photography is purely a chemical (or actinic) process, as the name ("writing by light") implies. Printing, on the other hand, is purely mechanical. The heliotype process is both chemical and mechanical, combining the chemical principles of photography with the mechanical methods of printing. In short, the heliotype process may be described as photography in the printing press.

The product of the heliotype process is called a heliotype. It is both a photograph and a print. It is a photograph mechanically produced, and it is at the same time a print having a chemical origin. The ordinary photograph is produced in evanescent materials, and will fade; the heliotype is printed with permanent ink, and can never fade. The heliotype, therefore, may be defined as a photo-mechanical print, possessing the exact features of a photograph, together with the permanent qualities of ordinary printing.

To appreciate the full bearing of the heliotype process in working out its results, it is necessary to understand a little of photography, and how the ordinary photograph is made. Almost everybody has sat for a photograph, and knows that there are two steps in the process: first, obtaining the image on a glass plate by means of a camera placed in front of the subject; and, second, producing its counterpart on a sheet of paper. The glass plate is called a "negative;" its counterpart on paper is technically termed a "positive," and is what in ordinary phrase we call "a photograph." In both these steps the photographic operator is dependent on light—both of the results are chemical. The "negative" is produced by light acting upon the sensitive material with which the glass plate in the camera is coated. As soon as chemistry has firmly fixed the light-produced image on the glass plate, the plate is placed in contact with a sheet of sensitive paper, and the action of light is again invoked to impress the image upon the paper, and produce the "positive," or "photograph." Each one of these "positives," or "photographs," requires a fresh use of the negative and a fresh exposure to light to produce it, thus making the method of production slow, cumbrous, and uncertain. It is at this point that the heliotype process begins to separate from chemical uncertainties, and take to the surer ground of mechanical methods. How is it to proceed then? It already has its "negative," which is taken precisely as the photographic negative is taken; what it now needs is to produce its positive by rapid and sure means. To do this, it must first procure a "positive" plate or matrix capable of mechanically producing other "positives," and thus dispensing with the continued use of the "negative," and the continued use of light in every impression.

It has been shown that the "negative" is made in the ordinary manner. The next step is the preparation of the "positive" plate. Ordinary cooking gelatine forms the basis of this plate, the other ingredients being bichromate of potash and chrome alum. It is a peculiarity of gelatine, in its normal condition, that it will absorb cold water, and swell or expand under its influence, but that it will dissolve in hot water. In the preparation of the plate, therefore, the three ingredients just named, being combined in suitable proportions, are dissolved in hot water, and the solution is poured upon a level plate of glass or metal, and left there to

dry. When dry, it is about as thick as an ordinary sheet of parchment, and is stripped from the drying-plate, and placed in contact with the previously-prepared "negative," and the two together are exposed to the light. The presence of the bichromate of potash renders the gelatine sheet sensitive to the action of light; and whenever light reaches it, the plate, which was at first gelatinous or absorbent of water, becomes leathery or waterproof. In other words, whenever light reaches the plate, it produces in it a change similar to that which tanning produces upon hides in converting them into leather. Now, it must be understood that the "negative" is made up of transparent parts and opaque parts; the transparent parts admitting the passage of light through them, and the opaque parts excluding it. When the gelatine plate and the "negative" are placed in contact, they are exposed to light with the "negative" uppermost, so that the light acts through the translucent portions, and waterproofs the gelatine underneath them; while the opaque portions of the "negative" shield the gelatine underneath them from the light, and consequently those parts of the plate remain unaltered in character. The result is a thin, flexible sheet of gelatine, of which a portion is waterproofed, and the other portion is absorbent of water, the waterproofed portion being the image which it is wanted to reproduce. The repulsion which exists between water and any form of grease is well known. Printers' ink is merely grease united with a coloring-matter. It follows, that the gelatine sheet, having water applied to it, will absorb the water in its unchanged parts; and, if ink is then rolled over it, the ink will adhere only to the waterproofed or altered parts. This flexible sheet of gelatine, then, prepared as described, and having had the image impressed upon it, becomes the heliotype plate, capable of being attached to the bed of an ordinary printing press, and printed in the ordinary manner. Of course, such a sheet must have a solid base given to it which will hold it firmly on the bed of the press while printing. This is accomplished by uniting it, under water, with a metallic plate, exhausting the air between the two surfaces, and attaching them by atmospheric pressure. The plate, with the printing surface of gelatine attached, is then placed on an ordinary platen printing press, and inked up with ordinary ink. A mask of paper is used to secure white margins for the prints; and the impression is then made, and is ready for issue.—*Heliotype Printing Company, 211 Tremont street, Boston.*

The *Jewish World* says that an interesting discovery of MSS. belonging to the Mendelssohn family has just been made at an antiquary's in Berlin. The "find" consists of two thick volumes. The first is an *Excerpt-book* of Moses Mendelssohn, containing notes and studies having reference to his work on Rousseau, and sketches or copies of two letters addressed to Lessing. In addition, there are all sorts of stray thoughts and occasional notes jotted down, evidently for subsequent use; transcriptions of several French poems; notably, too, incomplete translations into German of some of the amatory poems of the Abbé Bernis. The addresses of many high-born personages with whom Mendelssohn carried on correspondence, and scraps from his friend and business-connection Bernard, are also contained in this collection. The second of the MS. volumes is headed *Kollektanenbuch für das Jahr 1783 von Joseph Mendelssohn*, eldest son of the philosopher and littérateur. The book, notwithstanding the superscription, belonged to Mendelssohn himself, and contains in his own handwriting philological notes and brief sketches as well as copies of a number of letters.

THOS. DE LA RUE & CO.'S IMPERIAL TREASURY

WRITING PAPERS

AND ENVELOPES.

THIS POPULAR STATIONERY is made from the very best rags, and is tub-sized with the purest animal size by a process which strengthens it throughout its entire texture. It is supplied with a rough, mill rolled, or highly finished surface. Each sheet of paper bears the watermark, "Imperial Treasury, De La Rue," and the Imperial Crown and Monogram. Both paper and envelopes are packed in neat, ornamental boxes, with hinged lids and fall-down flaps—the paper in five quires and the envelopes in boxes of one hundred. This paper combines the excellences of hand-made paper, with the best characteristics of machine-made paper, and we can with confidence recommend it to all stationers who deal in first-class stationery.

Samples and prices on application to our American representative, **Mr. A. J. PULSFORD**, P. O. Box 1590, New York.

DE LA RUE & CO.'S

ANTI-STYLOGRAPH

(HEARSON'S PATENT).

DOLLS.

It is rather comical to see a boy with a doll, yet it was only a few days ago that a lad of about six years entered a car on the elevated railway, and bestowed such care and affection, rude in its way, upon his "dolly," as to excite the smiles and even the sympathy of all who saw him. Such instances of masculine juvenile taste are rare, but it is long ere the mind feminine parts with its love for dolls, and girls in their teens are not beyond the disposition to pet and cherish the much-loved and inanimate counterfeits of diminutive humanity. But dolls will break and soil; they will wear out their lives like their prototypes, and having served in their generation, are succeeded by later favorites. It is not surprising, therefore, that there should be a constant demand for dolls at all times, but especially at the festival season, when each new doll, decked in the freshest of wardrobes and supplied with all of the miniature appendages of the toilet, makes her debut with an éclat which enhances the importance of the occasion. To meet this demand, whether for cheap or costly dolls, to suit the purchasing capacity of the poorer or wealthier classes, is the business of more than one house. To illustrate some of the dolls which will please many a young person

UNDRESSED BISQUE
DOLL.

THE NEW LEEDS
ART FAIENCE.

The Leeds correspondent of the *Artist* gives some interesting particulars of the advance in the new art pottery of that place. The ware, he says, has almost changed its character, and has attained more originality.

We quote: "A great many experiments have been going on with regard to body, colors and firing; and considering the recent establishment of the pottery (that is, the fine art portion of it), with a marked success. Upon the degree of heat employed depends, of course, the perfection or the reverse of the color, a trifle more or less being a great consideration; but, as a result of these trials, the regulation of heat is now well understood and under command, and consequently the effect certain. In looking round the workrooms crowded with ware, one is struck by the infinite variety combined with individuality. As I said before, each piece is unique, and what might cause a pang in the heart of some whose perception of 'balance' is strongly developed, there are no 'pairs.' Vases of a similar size and shape there are, but it would be rather hard to find any two which it would suit the taste of such a person with respect to duplicate decoration.

"The body of the ware has undergone a change too. It is now made of a fine red clay, which, if baked without glaze, would produce a very fine red and close terra-cotta. On this base, the artist, with his range of colors, has great scope for effect; for by using opaque colors he can entirely cover the ground, or by the same colors used rather thinner, and in places leaving the ground, the rich red of the body comes well into

the general decoration. New colors and combinations, too, have been found; no trifling matter this, considering the limited range of colors capable of standing the heat required to fuse the

WAX DOLL HEAD.

glaze; for all decoration is here under the glaze, and till these last few years various blues from oxide of cobalt formed the only underglaze color known to potters which was not precluded, by its price, from extensive use. What seems a rather new idea, and is found to answer well, is

DRESSED BISQUE DOLL.

the using of the colors on the ware while it is yet in a soft state. It is then dipped in the glaze, and in some of the experiments baked in a 'green' state with good results.

"It is a rather difficult task to describe the appearance of the ware. One of the best batches

JOINTED DOLL.

turned out is a series of bottles and jars in the African style; gourd-shaped bottles, and some quaint looking nests of small jars fastened together. Then there are some pilgrim-shaped bottles for hanging up. All these are richly colored and glazed with apple and yellow greens, with patterns incised, sometimes through the glaze, showing the red body underneath. In a higher style of art are some well-proportioned

vases decorated with a blending of colors; grays, browns, purples, here and there streaked with yellow, and the whole forming an exquisite agate-like effect. Other pieces are covered with well-modeled flowers in high relief, blended backgrounds, the flowers naturally colored. The principal artist, M. Kreimer, is very successful in this as well as in modeling large plaques with figure subjects."

POWERFUL EXPLOSIVE COMPOUND.

Berthollet's fulminating silver is a very dangerous substance, which results from the action of ammonia on oxide of silver. A very good receipt for producing it is as follows: Digest freshly precipitated oxide of silver in strong liquor of ammonia for twelve or fifteen hours, then pour off the liquid and cautiously dry the black crystalline powder which remains and which is the fulminate. Also the decanted ammonia contains some fulminate, and this will be deposited on cooling after gentle warming of the liquid or on spontaneous evaporation. Only a few grains of oxide of silver should be used in a single operation. This is an exceedingly powerful and dangerous explosive, the properties of which are but little known though it was discovered in the last century. It is mentioned in but few of the books on chemistry.

—:O:—

A new metal is proposed in which to construct pipes to lay telegraph wires underground, and is described as very light—only about one-sixth the weight of iron—and being composed almost entirely of pure carbon, is indestructible. Whether in the air or underground, it does not rust or

change by exposure, and is not affected by heat or frost. The most important characteristic claimed for it, however, in connection with underground wires, is its being a perfect insulator. The pipes of the metal need not, it is stated, be buried very deep in the ground, as they may be of a semi-elastic character, adjusting themselves to the slight upheaval and depression of the ground through the action of frost.

INDESTRUCTIBLE BABY
CRY DOLL.

The authorities of the Royal Public Library at Dresden, which is especially rich in old German and Oriental MSS., have decided to publish with Teubner, of Leipsic, a new catalogue of their treasures. The Oriental MSS. will be excluded, having been adequately described by H. O. Fleischer in 1831; but the existing catalogues of the rest are entirely inadequate or out of date. The work has been intrusted to Dr. Schnorr von Carolsfeld, secretary of the library, who will give a full account of each single codex and its contents by the light of the most recent publications on the subject. The total number of codices to be catalogued is about 6,000, and the printing of the work has already begun.

Rest, that is permanent, is not to be expected on the road, but at the end of the journey.

THE MARVELOUS ORGUINETTE

Every Stationer in the Country should keep them. They sell from \$8 to \$14. Apply for an Agency, also for Price List and Catalogue.

STYLE H.

Length, 27 in.; width, 12 $\frac{1}{4}$ in.; height, 8 in. Weight, boxed for shipment, 22 lbs.

Every Stationer in the Country should keep them. They sell from \$8 to \$14. Apply for an Agency, also for Price List and Catalogue.

THE ORGUINETTE is a reed musical instrument, constructed somewhat on the principle of a cabinet organ, and adapted to be automatically operated by simple sheets or strips of perforated paper, each sheet representing one or more tunes. There is no limit to either kind or quantity of music. It will play **Hymn Tunes, Popular Airs, Sets of Quadrilles, Polkas, Waltzes, Reels and Hornpipes**, with a clearness, accuracy and a degree of execution which but few performers can equal. A mere child can play it. The music box and all kindred instruments are not only expensive luxuries en-

STYLE L.

joyed by a few, but they are limited to a few set tunes and, so, soon become tiresome and, as a means of enjoyment to their owners, entirely worthless. The Orguinette, with its Automatic Music Sheets, embodies in itself the expert musician and graphic music teacher. It is the singer's accompanist and the dancer's quadrille band. It is adapted to Families, Schools, Halls and Churches. It enables nature's musicians without the knowledge of music to play most elaborately and with a degree of taste and expression which could not be excelled by the most cultured artist.

It is an endless source of pleasure to both young and old. Its reputation and success are without a parallel in the history of musical instruments.

Mention Am. Stationer.

INDIA-RUBBER.

A name often attaches to an article with slight reason, and clings to it long after it has ceased to be in any way descriptive.

This seems to be the case with india-rubber. It was first known in Europe early in the sixteenth century, soon after the voyages of Columbus, but it was one hundred years before any particular attention was paid to it, and only after the lapse of two centuries was it brought into prominence.

About 1740, a report to the French Academy of Sciences, made by M. de la Condamine, classes it as caoutchouc, and describes its nature, as far as then known, and the method in which it was gathered.

About this time it was discovered to be a desirable substitute for bread-crumbs in erasing pencil-marks; hence the name; and probably the earliest reminiscence of it by the older people of to-day is in connection with this use.

Somewhere about 1800 attempts were repeatedly made to apply this strange product of nature to other and broader uses, but very little progress was made, articles manufactured of it being too susceptible to atmospheric changes. They broke in the cold and "ran away" when subjected to heat.

When, in 1842, the process of "vulcanizing" was discovered, an immense future was opened for caoutchouc, or, as it has now come to be called, "rubber."

When we come to consider the almost innumerable articles of which it is, in various mixtures, the chief component part, the almost accidental name appears to be a misnomer.

Although it has wedged its way into so many new fields and been put to such varied uses, nothing has crowded it out of its earliest home, and, to-day, in the hand of the artist, architect and, in fact, of all who use a lead-pencil, it is still the eraser. Mixed and manipulated in various ways, it is found on every desk in every office, workshop and school in the civilized world, and, perhaps, it is not too much to say, that the quantity so used at present equals the total product of the gum fifty or sixty years ago.

Leaving out entirely the large quantity used in the form of hard rubber, most persons would be astonished to know the immense use of rubber in channels supplied by the stationery and artists' material trade.

Erasers of all sorts and shapes, from the large block on the accountant's desk, to the small bit in the end of the lady's pencil case; elastic bands which bind packages of documents in every safe in every land; thread rings, which take the place of twine on so many retail counters; cushions for slate frames—that boon to the nerves of the weary school teacher! these are only a few of the many ways in which the stationery trade sends out its no mean share of this useful vegetable product. For this branch of the trade only the very finest (Para) rubber can be used, the other and lower grades producing goods that are short-lived.

In larger fields, as in this, rubber has become an absolute necessity, and few of us realize how much of the world's progress has been rendered possible by it; in fact, it and its half-sister, gutta-percha, have literally "chained the lightning" and harnessed it to the car of every man's daily life.

If we were wiser we should be more discriminating in our criticism of the past, and, in shedding from us the husk of old-time error, we should not recklessly throw away the kernel which they have hidden.

FRANG'S HOLIDAY PUBLICATIONS.

A hurried glance at the various lines of holiday goods exhibited at the New York office of L. Prang & Co., 38 Bond street, gave assurance of the steady advance made by this noted house in beauty of design not less than in perfection of execution. Among the Christmas cards the beautiful designs of Thos. Moran (No. 933) are reproduced so exquisitely that they will be accepted as veritable works of art, so also of the characteristic design of Hamilton Gibson (No. 928), the charming flower pieces of Mrs. O. E. Whitney (No. 925), and the beautiful vases and flowers numbered 913 and 931. There can scarcely be any question as to the great beauty of two children's heads (No. 929), of which the originals attracted very great attention in the competition of last February.

The new line of birthday cards, now coming in, offers abundant variety of style and ornamentation, ranging from a very pretty square floral card (No. 43) at 25c. per dozen, up to the elaborate double cards with dainty fringe which so readily command prices from three to twelve dollars per dozen.

Thanksgiving, too, has now its little line of pretty cards, chiefly intended for use at the family reunion that so generally marks the old New England feast, and the graceful verses of Whittier most happily accompany the clever and appropriate designs.

The issue of birth announcement cards is a new feature this season and is said to be a very successful one. They serve as a charming intermediary between the happy parents and their friends on certain auspicious occasions, and the only wonder is that they were not thought of long ago.

One of the most ornamental productions of this season is a pair of 12-inch plaques representing, the one an orchid, and the other a pelargonium. These are so carefully mounted on papier-maché that they bear the closest resemblance to their china sisters. Max Griebel, the wide-awake representative of the house, has had prepared for these plaques some exquisite stands or mats of rich old-gold plush, relieved by a bronzed frame. The setting is worthy of the art-workmanship of the picture, and congratulations may be extended both to the house which offers such goods and to the customers who display a real sense of the beautiful in purchasing.

In the spring allusion was made to the additional facilities which Mr. Prang had found necessary in order to keep up with his ever-growing business, and now it is stated that, despite the new presses and enlarged factory, the house is driven to its utmost in order to fill even the initial Christmas orders. Of course this is easy to explain when one considers the wonderfully artistic work produced; for the art-culture developed by the publications of Mr. Prang has been gradually spreading over the length and breadth of this country, until now the demand comes in constant increasing volume from every hearth and every home.

Transcripts of manuscripts can, it is found, be obtained in any ordinary thin copying book without using a press by the use of any ordinary ink reduced from ten volumes to six and to which four volumes of glycerine have afterwards been added. When a sheet of paper has been written over with this ink, it is placed under one of the sheets of the book, and then a piece of blotting-paper laid over the thin paper takes up, when pressed in the common way, any excess of ink which may come through.

INK RACK.

Davis' New Circular Ink Rack and "Treasury" Assorted Writing Ink is an article designed for the convenience of the book, stationery, notions, fancy goods and other trades. It is a circular rack, made from strong braided lustral wire, neatly and securely fastened together, having three shelves, lined with heavy fancy-colored board, with gilt edges and ornamental handle, with space in the same for a show-card, which is furnished with every rack. The lower shelf contains twenty 1-oz. bottles, the second twelve and the third four, making a total of thirty-six bottles, nicely assorted from six salable, brilliant and lasting colors, as follows, viz.: Violet, blue, green, crimson, carmine and black. A dealer may have a good variety of colored ink in stock, stowed away on his shelves, in his bins, under his counter, or anywhere except before the eyes of his customers. With this invaluable article, his stock, as the rack stands on his show-case, counter or in his window, attracts the attention of customers, thereby creating a sale for the goods, which he, perhaps, otherwise would not have sold. This article is now handled very extensively by dealers in all parts of the United States, and is very highly spoken of as being one of the best and most novel articles ever introduced to the trade. The goods are packed in compartments, with clean excelsior, in wooden boxes, containing three dozen bottles of ink and rack, four boxes to one gross. The manufacturer, William A. Davis, Boston (who also makes the celebrated United States Treasury mucilage), has had an experience of twenty-one years in the stationery business, and is consequently well informed as to the wants and requirements of the trade. He will quote prices for the various lines of inks and mucilage manufactured by him on being addressed for that purpose.

PATENT PAPER COUNTER.

The cheap, simple and useful tool herewith illustrated, is one of the many excellent labor-saving devices lately invented by E. P. Donnell & Co., Chicago. The instrument consists of a handle, from which extends a broad, flat-pointed plate, and having a second adjustable plate parallel to it. In operation, the tool is grasped in the hand, and the upper projecting plate is laid on the surface of the paper or tablets to be gauged or counted, and the whole being pushed forward, the lower plate inserts itself between the sheets of paper, the plates including between them the paper or tablet, which is easily raised. The width of separation between the plates is adjusted as desired, and secured by a set-screw. Nothing more simple and effective could be conceived for gauging paper and handling tablets, the counting of which is usually such an awkward job. The device will prove equally useful to printers, stationers, bookbinders, and for mailing and office use, as it will count and gauge to given weight. For further particulars the manufacturer may be addressed at 182 Monroe street, Chicago.

He hath a good judgment that relieth not wholly on his own, nor wholly on that of others.

LONGEVITY.

In an interesting paper by M. de Solaville on great longevity the author has brought together some of the most recent data on the subject. He analyzes the results of recent European censuses by ages, and the registers of deaths also by ages. If we strike a mean of the censuses from 1869 to 1872, we find that Europe (exclusive of Russia, Turkey and some small southern states) possessed in 1870 a mean population of 242,940,376, classed as follows from the point of

INK RACK.

view of advanced ages: 17,313,715 of more than 60 years; 79,859 of more than 90, and 3,108 of more than 100 years—i. e., 1 inhabitant in 12 of more than 60; 1 in 2,669 of more than 90, and 1 in 62,503 of more than 100. The women, M. Solaville finds, are more numerous in extreme old

tries. Is great longevity increasing or diminishing for the same number of inhabitants? We have information on this subject only for France. If we take two periods sufficiently distant from each other to allow a change of any importance to be produced, in the 14 years of the period 1824-37 we find a mean annual number of deaths among centenarians of 152, or 1 in 217,105 inhabitants. In the eight years of the period 1853-60, we only find a mean annual number of 111 deaths in a population which has increased 20 per cent. But if great ages

appear to have diminished, the mean life has very sensibly increased—a result much more favorable. A certain number of centenarians have made known their regimen. Notwithstanding some very rare examples to the contrary, we must place in the first rank temperance, sobriety and regular habits; then come heredity, relative comfort, the absence of strong and frequent emotions, as far as possible a country life, and finally a healthy and quiet calling.

The eminent but somewhat witty German physiologist, Hoffman, sums up as follows the means of attaining a great age:

"Avoid excess in everything, respect old habits, even bad ones, breathe pure air, adapt the nourishment to the temperament, avoid drugs and doctors, have an easy conscience, a merry heart, a contented mind."

MONEY.

The principles of right, as applied to money matters, afford the only hope of extracting from money that happiness which it is capable of affording. There is but little vital and practical belief in this truth. People still object to the equitable exchange of honest methods of transferring the money they crave from others' pockets to their own. The idea that happiness can thus be procured is the secret cause of speculation, gambling, fraud, and all kinds of dishonorable transaction. If our youth were intelligently instructed in these things, and made to see the real misery which flows from dishonest gains, if they were grounded in the principles of truth and justice, not merely as duties, but as the only true foundation of business and the road to permanent prosperity, instances of folly and crime would be rare. There should be no sentimental disparagement of money; its true value should be clearly presented, and every encouragement given to acquire it by honorable method, but it should be ingrained into the minds of the young that only as it is rightly won and rightly used can it bring the happiness they desire.—*Exchange*.

A treasure-trove of great value, and not a little historical interest, is reported from Niedersteinbrunn in Alsace. An earthenware jar has been dug up on the site of an old house, containing about 4,000 gold coins of the aggregate weight of nearly 20 pounds. They are all of the same mintage, bearing dates from 1617 to 1623. On one side is the effigy of a double eagle, with the name of Berchtold V., Duke of Zähringen founder of the city of Berne, and also of Friburg-im-Breisgau. On the reverse are the arms of Berne, a bear on a mown field.

PATENT PAPER COUNTER.

age than men, and the difference increases with the age. Thus, at 60 years the advantage is with the women in the proportion of 7 per cent.; at 90 and above, it rises to 45; and with centenarians to 60 per 100. It is in France that we find the greatest relative number of inhabitants at the age of 60 and upwards; but it is not so for centenarians, of whom France has less than all the other states of Europe, except Belgium, Denmark and Switzerland. From a calculation of deaths by ages the result is reached that to the total deaths those at the age of 90 and upwards bore the following proportions in the countries named and arranged according to the decreasing order of importance: Great Britain, 9.73; Sweden, 7.39; France, 6.58; Belgium, 6.07; Switzerland, 6; Holland, 4.47; Italy, 3.76; Bavaria, 3.42; Prussia, 3.06; Austria, 2.61. This result is in accordance with what we know of the mean age of the deceased in the same coun-

CULVER, PAGE, HOYNE & CO.

ONE OF CHICAGO'S OLDEST HOUSES.

The stationery, printing, bookbinding and blank book trades East and West are thoroughly familiar with this house, and its large building at 118 and 120 Monroe street is a familiar landmark of the city. There is probably no better known house, in its own particular line, in the whole country. Coming in contact with the trade at many points—printing, binding, lithographing, binders' tools and machinery, paper and stationery—the house is known and successful in every province.

But Culver, Page, Hoyne & Co. are too well known to need any especial recapitulation of their business and building, unless it be to say, the first floor is occupied by the retail department, offices, &c.; the second floor is packed from floor to ceiling almost the year round with their varied stock; the third floor is devoted to lithographing and county work; and the fourth floor, which is extended through the next building all the way to Clark street, is devoted to the printing department. Nearby in the rear is the manufactory, in which are made Brown's Secretary File, a well known office requisite, which the firm manufactures, as well as the National Numbering and Pacing Machines also controlled by it, and the general line of bookbinders' tools, &c., sold by the house.

It cannot fail to interest the trade generally, especially in the West, to hear what goods this house is offering for the fall and holiday demands. With the object of ascertaining all about the matter, your correspondent paid them a special visit, with the following observations.

The selection of glove and handkerchief boxes offered this year is finer and more varied than ever before, and the exquisite taste and finish displayed in most of these goods, clearly evidences a rapid progress in Western luxury and culture. There is nothing tawdry or flashy to be seen, but even the cheapest goods are chaste and beautiful. They are offered in every conceivable design and combination of plush, brocade, silk and satin, plain or painted; and in leathers, there are Russia, Turkey, English, calf, seal and English morocco. One line in Indian tan, trimmed with gold, is a neat novelty, and another in painted feathers, also trimmed, is very tempting.

Odor cases and toilet sets are to be had in the same variety. An odor case in the shape of a pyramid is exquisitely finished and very convenient, while there is a beautiful toilet set in a Russia case, shaped like a writing desk, which should take well.

In jewel cases the same improvement over last year's goods is noticeable. A neat novelty in this line is the "tree-calf" morocco goods.

The same general observations apply to the dressing-cases shown, which are to be had of any dimensions, for ladies and gentlemen. One of these finished in crimson satin, having brushes, &c., "buffalo," has a very pretty effect.

In albums there are some very fine goods in various leathers, plush, &c.; and some handsome novelties in olive-wood, and real seal with the fur on. Another very ingenious novelty consists in padding the covers of albums, so that a blow or fall cannot injure them. A new and ingenious improvement also consists of a clasp having a spring, which allows it to extend, so as to accommodate pictures without straining the back. A large album is shown, to accommodate 235 photos; it measures 13 x 16 inch., and is very fine. Malachite and coral bead paneling is also

a novelty in ornamentation of this class of goods.

The same infinite variety is shown in portfolios, pocket-books, cigar cases, cigarette cases, and opera glasses, in some of which the painting and the engraving on clasps, hinges and rims is very tasteful. Filigree in gold and silver, and combinations of the two, plays an important part in all these goods.

But the triumph this year, is in the painting on satin and leather, some of which is of a high order of merit. On a toilet case, for instance, there is a combination of clover, wheat, daisies and butterflies, which would be an ornament anywhere, and so with many others.

Inkstands are shown in many styles of glass, bronze, silver, brass, ebony, olive, and onyx—the latter being engraved *intaglio*.

There is also a great variety of mantel ornaments, desk and library goods, etc., which admit of no description.

This year Culver, Page, Hoyne & Co. have a specially fine selection of Xmas and New Year cards. They carry a full stock of Prang's finest, as well as those of Farmer, Livermore & Co., American Bank Note Engraving Company, Raphael Tuck & Sons, and others, as well as a

line of their own importation. Fringed goods hold their own.

Of Prang's cards, the new dove—of which the house has a large supply—is much better than the attempt of last year.

In inks, etc., the house carries Stevens', Antoine's, Thomas', Arnold's, Carter's, and Sanford's goods; in gold pens, their own make, the "C. P. H.," Mabie, Todd & Bard, and the Livermore Stylographic.

Their stock of "Excelsior" diaries is very heavy, these having been always made a specialty by them.

From this hasty resumé any one will see that it is well worth the while of any dealer passing through Chicago, to visit the house; and for the public at large, it may be said that probably a finer selection of exquisite fancy articles is not to be found in the West.

For the rest, the house always carries a heavy stock of blank books, paper, papeteries, and heavy and light stationery, as well as book-binder's tools, &c.

Altogether the house is one of commendable enterprise, carrying the best home goods, while manufacturing largely, and being direct importers of several foreign lines. H.

THE BAY STATE PAPER COMPANY,

HOLYOKE, MASS., were among

the pioneers in the W. C. Paper trade,

and their goods, from the start, were

distinguished for their fine quality and the superior style in which they were wrapped. Their example has been approved and imitated by a swarm of competitors, who have flooded the market with inferior goods, put up in packages of 600 to 800 sheets, misleading the unwary, and sold at apparently lower figures; but the trade and consumers generally recognize the fact that a good article, honestly put up, in 1,000 sheet packages, is the most profitable both for use and for sale. Their goods are all guaranteed 1,000 sheets to package, and no short count. No wood is used in any of these papers, but they are made of the very best stock in the market.

THE "MEDICATED BOUDOIR" BRAND

Has no equal for weight, strength, softness, and color, and commands the front place with "fine retail trade." Present reduced quotations furnished on application.

CALENDARS FOR 1882.

BYRON WESTON

DALTON, MASS., U.S.A.,

HAS BEEN AWARDED THE

GRAND PRIZE GOLD MEDAL

AND RECOMMENDED THE

Medal of Honor and Perfection

At PARIS, 1878,

This being the HIGHEST and ONLY AWARD given for

LINEN RECORD & LEDGER PAPER.

—A SPECIALTY.—

THIS Paper has received THE HIGHEST PREMIUM over all others from the Cincinnati Industrial Exhibition, Massachusetts Charitable Mechanics' Association, Franklin Institute of Philadelphia, Louisville Exposition, Medal and diploma from United States Centennial Commission, Medal of Progress American Institute, 1877, and Medal of Improvement and Progress, Boston, 1878. Its

PRINCIPAL ADVANTAGES

are as follows:—1. It contains more LINEN than any other Ledger Paper, has a longer fibre, and is, consequently, tougher. 2. Having a harder and better body, it frays less in erasure, so that by simply using the rubber after the eraser, the ink is prevented from spreading. 3. It is more uniform in Weight Color and Finish. 4. It never creaks if properly bound. 5. Its chemical action upon ink is such that it both writes and rules up better. For proof of the foregoing, refer to a large number of Stationers, Bookbinders, Bookkeepers, and Recorders, who have given it, after a severe test, the preference over all others. This paper is Double Sized, and will stand any climate or the most acid of fluid inks.

Each sheet is water-marked with name and date.

Send for sample sheet, ERASE and REWRITE FOUR TIMES on same spot.

LOCKWOOD PRESS, 74 Duane Street, New York.

The American Stationer

A JOURNAL DEVOTED TO THE INTERESTS OF THE STATIONERY & FANCY GOODS TRADES

"The Stationer"—Every Thursday—\$2.00 Per Annum.

VOL. X.—NO. 18.

NEW YORK, NOVEMBER 3, 1881.

WHOLE NO. 332.

Correspondence.

CHICAGO CHAT.

[FROM OUR REGULAR CORRESPONDENT.]

WESTERN OFFICE LOCKWOOD PRESS, }
8 LAKESIDE BUILDING, CHICAGO, Ill., Oct. 29, 1881. }

From the appearance of the last—the holiday number—of *THE AMERICAN STATIONER*, one must indeed be hard to convince if he doubts the prosperity of the trade at the present season. Besides, there is another fact equally important, evidenced in this number, i. e., that *THE STATIONER* is a strength in the trade, for among the advertisers in this number I notice some whose names it would be hard to find connected with an advertisement in any other journal, trade or general. While upon the subject, I might as well give a fact or two, illustrative of the wide-spread influence of *THE STATIONER*.

In the July quarterly number, a certain little novelty was described and illustrated, and following upon inquiries from all parts of the country, about two weeks back, after the manufacturers had almost forgotten the publication of the article, came an order for one of the machines, dated from Valparaiso, Chili, and citing *THE STATIONER*.

One of my friends advertised to take the agency of some stationery novelty, and among other replies came one from Aberdeen, Scotland. These as instances; I could cite many others, but modesty forbids.

The stylographic pen war has at last invaded Chicago. Taylor has long smelt the battle afar off, but it was only yesterday that he "stripped to the waist and sailed in in dead earnest." "Take a tumble," said Mr. T., and they took, dropping from \$3 to \$1.50, and in that proportion through the list. This I am inclined to think a mistake, for the pen has work enough on it, and is sufficiently useful to be worth all that was asked for it.

An instance of Chicago enterprise is to be found in the business of Mr. Sutherland, of the post-office news-stand. He has built up probably the liveliest business of the kind in town, and not satisfied with the "insolence of office and the law's delay," so to speak, has cut himself free from the mediation of the News Company, and now has the Eastern papers direct, many of them a day ahead of anyone else.

In my letter of last week I notice several errors, which deserve correction. In the case of Fairbanks, Palmer & Co., there is an error in naming them "Fairbanks, Morse & Co." Whether this was a *lapsus calami* or a *lapsus*

typographical, I am not prepared to say [Lay it to "cal."—Ed.], as the latter firm is a good friend of the Lockwood Press, and I may have written its title by mistake. But in the case of my friend, H. H. Unz (?) I am sure I did not nickname him "Uny" in my copy. [Yes, you did, and you gave us no end of bother. It was finally decided to be a conundrum, and we gave it up.—Ed.]

A last error is mine. Mr. Whiting is secretary of the Western Sunday School Publishing Company, not of Fairbanks, Palmer & Co. The two are separate concerns, although intimately related, and occupying the same building.

All through the summer the New York and Philadelphia trade has been bragging of their base-ball nines. Now, Chicago has not been idle, but simply lying on her oars, until she had something to pull for. Now, this something has developed among the more æsthetic arts in the shape of music! Baird & Dillon have among their office employees in Lakeside Building one of the best trained quartets, with four of the finest voices it has been my good fortune to hear, either on or off the stage for some time past. New York and Philadelphia, what have you to say to that?

Mr. Dillon, of Baird & Dillon, is now in town. It is his first visit to Chicago since the opening of the Western branch. He reports trade good at both ends, and all along the lines. After a stay of a few days, he will return to New York, whence his business can hardly spare him.

G. B. H.

ST. LOUIS STYLOGRAPHS.

[CORRESPONDENCE OF THE STATIONER.]

ST. LOUIS, October 29, 1881.

The holiday number of *THE STATIONER*, just in, is pronounced on all hands the finest number, both typographically and otherwise, yet issued of that favorite trade journal. St. Louis feels a personal interest in *THE STATIONER*, and is well pleased with its every success.

Since my last writing there has been no let-up in the grand rush of business; but the freight delays are still a source of annoyance. It was thought that the trouble was about over, but the hope was a fond delusion. Some apparent relief was afforded, indeed, by switching off incoming freight on to side tracks at different points along the road; but this was a relief that benefited the railroad company, and in nowise aided the merchants. Some new arrangement must be made with the Transfer Company.

The Wabash road has now taken control of the Union Depot. This road also now runs its own engines across the bridge, avoiding delays; and

this probably points to a relief to the merchants in the near future.

The dissatisfaction in the school-book trade seems to be general. Your Chicago correspondent cites instances of this in his last, but the trouble is not confined to that city. Our St. Louis firms are also complaining, and are withdrawing as rapidly as possible from this losing business. There ought to be some remedy for the trade, but they are universally discouraged, and know not where to look for it, unless to the constant championship of *THE AMERICAN STATIONER*.

The Williamson-Stewart Paper Company has recently taken the sole agency for Derby Bristol boards, and has now in stock amber, black, blue, canary, corn, chocolate, gray, green, lilac, magenta, pink, salmon, and tea. These boards are very celebrated, and the colors are brighter than in ordinary Bristols, making them preferable for many purposes. This firm is also handling in large quantities the Elwood file.

A novelty of the St. Louis Type Foundry is Piner's Mustang Mailer. Its chief advantage is that it prints directly upon the wrapper or paper, and does away with pasting. It is undoubtedly very convenient, and cheap at \$10. H.

LETTERS PATENT FOR INVENTIONS.

BY JAMES A. WHITNEY, COUNSELOR-AT-LAW.

II.

AMERICAN PATENT LAWS DURING THE COLONIAL AND EARLY STATE PERIODS.

The American patent system resulted in two direct but distinct ways from that of Great Britain. During the colonial period there was, to a degree, concurrent jurisdiction between the crown and the local government. In some instances English patents were granted to include the colonies as well as the mother country. In others the power was exercised by the colonial authorities. The former is illustrated by the patent granted to Sybilla Masters, who, so far as the record goes, was the first feminine patentee, for improvements in the manufacture of straw hats, which included the American colonies as well as England.

The first colonial patent was that granted by the General Court of Massachusetts, in 1641, to Samuel Winslow, for a method of manufacturing salt. This excluded others from practicing the process of the patentee during a period of ten years, provided he set up works within twelve months from the date of the patent. Eleven years later a qualified privilege was granted by the same authority to one John Clark, the act allowing him ten shillings for

three years from every family who should use his invention "for saving wood and warming houses at little cost." At the end of the three years he was granted the same privilege during life, this being the only American patent ever granted for a life period. About a hundred years before one had been granted in Germany of a like tenure. Probably the actual term of Clark's patent was equalled by the entire period covered by Thomas Blanchard's United States patent for a lathe for turning irregular forms, which was extended until its aggregate term equaled forty-two years. In 1656 Massachusetts granted to John Winthrop, son of the celebrated governor, a patent of twenty years' duration for making salt after his "particular method."

Special privileges and premiums were also offered by the same colony for the manufacture of pitch, tar and turpentine, hats, duck and linen, cotton cloth and the raising and manufacture of hemp. In the printed statutes of Connecticut for the year 1672, we find it, "Ordered, That there should be no monopolies granted among us, but of such new inventions as shall be judged profitable to the country, and for such time as the general court shall judge meet, which was simply a reaffirmance by the local government of the doctrine enunciated by the statute of monopolies in England half a century before. Connecticut granted patents for the sole manufacture of steel and of iron, manifestly upon the principle of the English law, that the person introducing a new manufacture was to be considered, so far as that locality was concerned, as the inventor.

In 1747, Thomas Darling was granted the exclusive privilege of making glass in Connecticut for twenty years; the penalty of one thousand pounds sterling being imposed on infringers. The grant included the condition that the works were to be put in operation within four years, and that five hundred feet of good window glass was to be made each year thereafter. In 1774, the Assembly granted to John Shipman a patent on a plan and construction proposed of a grist mill, to be worked by the tide. The privilege was limited to the town of Saybrook and ten miles westward of the Connecticut River, and conditioned upon the completion of the mill within five years, and its being thereafter kept in repair, and all persons "were prohibited from erecting or improving any tide grist mill for the term aforesaid, within the limits aforesaid, without the liberty of the memorialist, on the penalty of fifty pounds." The term aforesaid was forty years, the longest period stated in any original patent ever granted in this country. This grant, like those of Darling and some others, was based upon the idea that the introducer should be treated in the same manner as the original inventor. This was also the case in the patent granted in the same colony in 1753, to Jabez Hamlin and Elihu Chauncey, avowedly for the introduction of a "new water machine for dressing flax, brought from abroad;" the term allowed being fifteen years.

Although the right to grant colonial patents was not exercised by all of the colonies, yet it undoubtedly inhered in them. This right continued in the United States after the Declaration of Independence, and after the adoption of the Federal Constitution. There can be no doubt that every State in the Union has power to grant valid patents for inventions within its borders, although on grounds of expediency and general public welfare this right has been discouraged, and for the past eighty years has been disused. It was, however, exercised by several, from the date of the Declaration of Independ-

ence to a period several years later than the adoption of the Constitution.

Thus, for example, in 1783, Connecticut granted a patent to Joseph Hawks for a clock "that winds itself up by the help of air," the same being a new invention. Maryland, in 1786, granted to Robert Lemmon the exclusive "right, benefit and privilege of making, constructing and selling within the State," two novel machines for carding and for spinning wool, and about the same time granted similar protection to Oliver Evans for his improvement of an elevator for grist mills, and for the so-called hopper-boy, both of them inventions of great importance, and in use to this day. Fulton's first steamboat was brought into existence under the stimulus of a patent from the State of New York.

It will thus be seen that the practice as well as the ethics of granting letters patent for invention was well known to the statesmen of the colonial period, and the years which immediately succeeded. It was, therefore, only necessary to give to the federal government the same power that had been separately exercised by the individual States. There can be no doubt, however, that the advantages developed from the system of England had much to do with its incorporation into the organic law of this country, and it is certain that our patent system as it now exists is derived much more directly from English precedents, than from any afforded by the colonies or States. The manner in which English ideas were transfused into American practice in this branch of jurisprudence is of necessity of great importance, as it leads us to the consideration of the immediate sources of the present law and practice concerning patents in the United States.

HOW THE ANCIENTS EMPLOYED COLOR.

Some remarks on the subject of color as employed by the ancients, were addressed to a London audience by John C. Grace recently. He said:

In Egypt, examples of decorative coloring done nearly 3,000 years ago are still in fine preservation, and excite the warmest admiration. The interior walls of the temples are often covered with historical representations brought out in color; the main architectural features were also painted. The Greeks, I have no doubt, carried the art of colored decoration to the same perfection as the other arts in which they so excelled. Their descendants show us, by their decorative works executed in a provincial Roman city 1,800 years ago, how beautifully the art was still practised in their day. I say their descendants, because it is generally understood that the art works of Rome were carried on by Etruscans and Greeks. The Romans were soldiers.

The city of Pompeii, buried, almost forgotten, during 1,800 years, and now brought to light again, shows us all the details of Roman life as it existed at that distant period. The walls of the houses and public buildings, though roofless, are still glowing with colors, fresh as the day on which the awful calamity overtook the city. It is, indeed, a mine of wealth to the art student. Here he will find wonderful combinations of color and the utmost elegance, fancy and beauty of ornament. I wish I could place before you many examples of these exquisite works; but I have had a few colored drawings made to explain to you the art of these Pompeian house painters, and I bring with me two books containing illustrations.

One of my favorite subjects from Pompeii is

that yellow frieze, treated so simply and yet so harmoniously; the brilliance of the yellow, quieted and toned by the white and gray, and force given to it by the black medallion with its surrounding color; the whole resting on the chocolate-brown plinth. Under it is the frieze in black, forming part of the same decoration, relieved by light gold-color stems, with brown medallion in centre, a red one on each side, and the lilac-gray birds between. The walls below these have yellow panels, with black margins, ornamented with slender columns in white and red. Another very clever bit is that frieze in black, with a light stem, and leaves branching in a graceful form and letting in portions of yellow ground above the line and red below it, and the little bits of green and brown in the centre; the green birds, too, with gold-color and lilac wings, perched on the branch on either side, all combined form a perfect piece of harmony.

My next example is in the Casa del Labirinto. Here the red walls are relieved with black pilasters, on which are birds and light foliage, with openings of bright yellow most cleverly introduced. In another room of the Casa del Labirinto the walls are full green, relieved with delicate white pilasters and columns; in the centre is a panel of yellow, framed by light lilac. The dado is black, relieved with fine white lines and ornament. Above, in the cornice, is maroon. In a room in the Casa del Poeta Trajico the walls are white. Pilasters are formed by green margins, and in them are slender spiral columns. There are gold-color margins to the panels, and small subjects in them. The dado is black, divided by white lines, and green plants springing from the base—so little work, and yet so great result. In the Casa del Gran Duca there is a black wall, with a red plaster, on which are light gold-colored ornaments, with suspended masks, birds, &c. The black panels are relieved with diagonal stems, with leaves and flowers; above is a frieze colored maroon.

A COMPLICATED CLOCK.

Amos Nixon, a resident of Harrison county, Ohio, recently constructed a wonderful clock, which for mechanism bids fair to rival the renowned cathedral clock at Strasburg. This curious piece of mechanism has eleven dials, the first of which, on the top of the clock, shows when Venus is morning and evening star. The second dial gives the position at any time in the year of the twelve signs of the zodiac, and the third is a daily calendar. The fourth dial is the solar dial and gives the dominical letter for each day in the year, and the fifth is a Julian calendar giving the Roman indications and golden letter. The sixth gives the moon's phases, and the seventh shows the time of any eclipse, either of the sun or moon. The eighth and ninth show the exact time at any place on the globe by placing the recording index over the longitude of the place. The tenth gives the sign of the zodiac in ascendancy, and the eleventh is an ordinary time-piece. Mr. Nixon was at work on this wonderful piece of mechanism four years, and will add several more dials in course of time.

Iron has sometimes to be bronzed for domestic use. The following is a very simple way of obtaining a very good bronze: Mix an equal quantity of butter of antimony and oil of olives; put this mixture on the iron which is required to be bronzed with a brush, the iron having been previously brightened with emery and cloth, and leave it for several hours; then rub with wax and varnish with copal.

OLD BERKSHIRE MILLS

DALTON, MASS., U. S. A.

One party writes: "The two hundred RECORD BOOKS, for 88 of the 99 Counties, now on exhibition at the Iowa State Fair, at Des Moines; and all, but four (!) of them, made from your 'OLD BERKSHIRE MILLS LINEN LEDGER,' Medium, 40lb., make a splendid show."

[The above cut is a fac-simile of the wrapper used on the Linen Ledger Paper.]

We will pay for any book rejected on account of fault in the paper. Send for Samples, test them in comparison, and see that your books are made from paper thus water-marked.

L. PRANG & CO.'S

Christmas and New Year Cards

ANNOUNCEMENT.

WE hereby beg leave to announce to the trade the completion of our line of Christmas and New Year Cards for this season, for which our agents are now soliciting orders. The extent of our list, the originality, and especially the American character of our designs, together with the great care taken in their execution, will, we have no doubt, secure for our goods the popularity which they have enjoyed heretofore. The efforts we have made to secure the highest excellence, is attested by the names of some of the artists whose designs have been reproduced. We would only name Elihu Vedder, C. C. Coleman, Thomas Moran, Miss Rosina Emmett, Miss Dora Wheeler, Mrs. O. E. Whitney, W. H. Gibson, F. S. Church, R. G. Birch, &c. That a due regard has been paid for the quality of the literary matter, in connection with these designs, is shown by the fact that many of the designs are accompanied by original poems from writers of note, such as Mrs. Celia Thaxter and Mrs. Emily Shaw Forman.

The great increase of our manufacturing facilities, secured by additions to our building nearly doubling our floor space and by the adding of new machinery, will place us in a position to fill orders promptly. Still we would request dealers to place their orders as early as possible, so as to still further enable us to make timely preparation for prompt deliveries.

Our Cards will, as heretofore, be put up in envelopes containing twelve Cards, unless otherwise stated on our price lists.

We furnish envelopes without extra charge for all our Christmas and New Year Cards, for which the list price is \$1.80 per set, and over. Our silk-fringed Cards will no doubt be in great demand this season. We have made ample preparation to furnish these in time and have made arrangements with our manufacturers for the best quality of silk fringes. We would call special attention to the excellence of our fringed Cards and the novelties in colors and style of fringes we offer for this season.

A marked and attractive feature of our cards are the elegantly ornamented backs.

All our fringed Christmas and New Year Cards are furnished with envelopes and protectors, so as to insure safe transportation in the mails.

It will be impossible to embody our whole list in the space of the advertisement, and we will therefore merely give a general outline of the variety offered.

PRANG'S PRIZE CHRISTMAS CARDS. COMPETITION OF 1881.

These are the Cards selected by the judges in the second competition for four designs of Christmas Cards, for which we offered \$2,000 in prizes of \$1,000, \$500, \$300 and \$200 respectively. At the recommendation of the judges, Messrs. COLEMAN, LAFARGE, and WHITE, the prize for third best Card was increased to \$500. Mrs. CELIA THAXTER has written appropriate verses for each of the designs.

- 1st Prize Card (\$1,000), by Elihu Vedder. Size, $6\frac{1}{4} \times 9$ inches; price \$1 each. Same card with silk fringe, cord and tassels, price \$1.50 each.
 2d Prize Card (\$500), by Miss Dora Wheeler. Size, 7×9 inches; price 75c. each. Same card with silk fringe, cord and tassels, price \$1.25 each.
 3d Prize Card (\$500), by C. C. Coleman. Size, 7×9 inches; price 75c. each. Same card with silk fringe, cord and tassels, price \$1.25 each.
 4th Prize Card (\$200), by Miss Rosina Emmett. Size, $5\frac{1}{4} \times 9\frac{1}{4}$ inches; price 60c. each. Same card with silk fringe, cord and tassels, price \$1 each.

The Prize Cards can also be had mounted on heavy board with gilt beveled edges.

We beg to call attention also to the following publications for New Year and Christmas:

- "Goddess Fortune" New Year Card, by Elihu Vedder. Size, $6\frac{1}{4} \times 8\frac{1}{4}$ inches; price 75c. each. Same card with silk fringe, cord and tassels, price \$1.25 each.
 "Christmas Dove," Size, $7 \times 9\frac{1}{4}$. This card is in the same style as the success of the last Easter season, the "Easter Dove" Price 60c. each. Same card with silk fringe, cord and tassels, price \$1 each.

Our Regular Line of Christmas Cards consists, among others, of the following Series:

- Nos. 901, 902, 903, 906, 909, 910. Floral designs ranging in price from 20c. to \$1.20 per set of 12.
 Nos. 904, 905. Humorous Cat and Frog Designs, 60c. per set.
 No. 907 is a new series of Horseshoe designs, 75c. per set.

- Nos. 920 and 929. Children's designs, at \$2.40 and \$3.60 per set.
 No. 922. Shells of Ocean, with figures, \$2.40 per set.
 No. 924. Fans with silk fringes, \$3 per set.
 No. 933. Bric-à-Brac designs, very rich, \$6 per set, and many others.

We offer a similar assortment of New Year Cards, but would call special attention to No. 1320, a new folding calendar, at \$2.40 per set. Most of the Numbers can be had with silk fringes ranging in price from \$2.25 to \$12 per set. Stock will be ready for delivery September 15.

Besides the above, attention is called to our New Birthday Cards, Scripture Texts Cards, New Panels, New Water Colors, by Thomas Moran, and other publications. Our line of Thanksgiving Day Cards will also be shown by our agents.

NEW PATENTS.

No. 248,227. Paper-Hanging Machine and Rack.—Henry Staib, New York, N. Y.

No. 248,233. Type.—Henry H. Thorp, New York, N. Y.

Types made of runningwise widths that are multiples of a measure of which the runningwise width of the narrowest letter body represents the unit, said widths being also regular fractions of the height of the type bodywise.

No. 248,259. Mounting Terrestrial Globes.—Howard H. Gross, Englewood, assignor to Alfred H. Andrews, Herbert L. Andrews, and Thomas S. Hayden, Chicago, Ill.

No. 248,275. Ticket Printing and Numbering Machine.—Marcus Bebro, Kilburn, County of Middlesex, England. Patented in England May 11, 1880.

No. 248,323. Device for Tearing Wrapping-Paper from Continuous Rolled Sheets.—Alonzo W. Jerome, Paxton, Ill.

No. 248,353. Label Holder.—August Schilling, San Francisco, Cal.

1. In combination with a polygonal label arranged to contain names and other descriptive matter on its several sides or faces, a holder of corresponding shape, adapted to be fixed and secured on the outside of a portable box, case, or other receptacle for containing merchandise, and having an opening arranged to expose one of the names or other matter on the label, and to cover and conceal the remaining ones when the label is placed therein. 2. In combination with a portable box, case, or other receptacle for containing merchandise, having a pocket or holder upon the outside thereof, in which is an opening, a removable and changeable label, of a shape to fit and be received into said holder, provided with a number of names or other descriptive matter arranged around the outer edge, each of which can be brought and retained in front of the opening, to be exposed in succession, while the remainder of the sections are covered and concealed from view.

No. 248,388. Toy House.—Wesley W. Barnes, New York, N. Y., assignor to Charles C. Shepherd, Passaic, N. J.

1. The combination, in a toy house, of a front door that can be opened, a front railing and gate, a lever and a connection from the gate to the lever and to the door. 2. The combination, in a toy house, of a front door, a gate, a lever, connections to the door and gate, respectively, and a toy figure moved by the lever. 3. In a toy house, a door that can be opened, imitation shades to the windows and connections, whereby the shades are drawn up simultaneously with the opening of the door.

No. 248,413. Compound of Celluloid and Luminous Material.—Isaac W. Drummond, New York, N. Y.
A compound composed of celluloid and luminous or phosphorescent material.

No. 248,453. Stamp Canceled.—Freeman Hanson, Hollis, Me.

No. 248,487. Coin-Trap for Toy Safes, &c.—Louis Messer, New York, N. Y., assignor to Zinn & Messer, same place.

The nosing-peg and its adjuncts are feathered upon the supporting-bar, permitting them to be moved longitudinally thereon, but at the same time preventing them from being turned around upon said bar. The ratchet-wheel loosely surrounds the bar and is inclosed in a fork formed

in the hub of the nosing-peg. The ratchet-wheel is screw-threaded upon its interior and engages the feed-screw (which is much smaller in diameter than the central opening of the wheel) upon one side only. The feed-screw is mutilated upon one side, which permits it to be turned out of engagement with the ratchet-wheel, by which the peg and its connected devices may be slid from one extremity of the bar to the other. The ratchet is operated by the contact of the pawl-carrier with the winding-on chain. To prevent the vibration of the chain from advancing the peg faster than is desired, a drop-latch is provided, which holds the pawl-carrier in its elevated position after contact with the winding-on chain until the quadrant arm rises to a perpendicular position. A friction-plate is also provided, which prevents the pawl from dragging the ratchet-wheel back after the same has been advanced.

No. 248,489. Toilet-Article Holder.—William H. Miles, Jr., Brooklyn, N. Y.

No. 248,520. Automatic Pencil Case.—Daniel M. Somers, Brooklyn, assignor to Joseph Beckendorfer, New York, N. Y.

A pencil case consisting of a handle and a lead-containing tube fixed to said handle, in combination with a sliding carrier which is spring-seated with respect to said handle and is movable lengthwise relatively thereto, and toggle jaws which are pivoted to said carrier and enter openings in said lead-holding tube.

No. 248,527. Method of Forming and Applying Ornamented Plastic Material to Passe-partout Mats.—Charles Taber, William C. Taber, Jr., Charles M. Taber and Frederic Taber, New Bedford, Mass.

No. 248,542. Ornamental Comb.—Vincent W. Wilson, Fort Edward, N. Y., assignor to the Aldrich Cook Manufacturing Company, Leominster, Mass.

No. 248,549. Lead Pencil.—Phillips Abbott, Brooklyn, assignor, by mesne assignments, to Joseph Reckendorfer, New York, N. Y.

In a lead pencil, or similar utensil, a lead-holding device pivoted to the inner tube and with an extending end which engages in a depression or other confining device on the outer tube, the parts being so adjusted and located that when the tubes are slid past one another the inner part of the lead-holding device will be thrown outwardly away from or inwardly toward the centre of the inner tube, according as the tubes are slid on one another in one direction or the other.

No. 248,564. Envelope Machine.—Abram A. Rheutan, Worcester, Mass., assignor to Wade H. Hill, same place.

REISSUES.

No. 9,902. Lead and Crayon Holder.—Joseph Hoffman, New York, N. Y., assignor to Joseph Reckendorfer, same place. Original No. 223,512, dated January 13, 1880.

DESIGN.

No. 12,534. Wall Paper.—Eduard Leissnér, New York, N. Y., assignor to Leissnér & Louis, same place. Term of patent $8\frac{1}{2}$ years.

No. 12,536 to 12,539, inclusive. Wall Paper.—Eduard Leissnér, New York, N. Y., assignor to Leissnér & Louis, same place. Term of patent $8\frac{1}{2}$ years.

German telegraphic engineers, it is said, have lately been making some promising experiments with aluminum as a material for telegraph wires. This metal can easily be drawn out to a much finer gauge than is possible with iron, and its conductivity is twice as great; but its greater cost has prevented its use for this purpose. It is now found, however, that an alloy of aluminum and iron can be readily made which will produce a wire much superior to iron as a conducting medium, while it is both finer and stronger, and also less susceptible to atmospheric changes.

COLORED PRINTING INKS.

The manufacture of colored printing inks has been carried to such a state of perfection that, in the large cities, printers have little or no trouble to procure just what they need in the way of colors for special classes of work. There are places, however, that are not thus favored; and to the printers thus isolated, it is our aim to assist, by a few hints, where emergency arises for special colors.

It is not desirable to rely upon make-shifts, but there are occasions when printers are from circumstances obliged to decline work, not from a want of knowing how to produce it, but from a lack of material to do it with. We all know how small quantities of colored ink dry in cans. Provide yourselves with a can each of good, thick, middle and thin varnish, which will keep for years, and which, like good liquor, improves with age.

Red Ink.—If for fine work, procure a few ounces of the best vermilion powder, and mix well with the thick varnish, allowing the varnish to carry all the color it possibly can; when you commence grinding with the color stone and muller, do not despair if you find the mixture form itself into a ball resembling a lump of india-rubber; if this should follow, add plenty of muscle to the muller, and it will assume the consistency required. If, when you attempt to work it, you find the color adhere to the inking table, and the varnish attaches itself to the roller and the printing look poor and without body, add a little of the thin varnish. If you require the red ink for surface printing, use the middle varnish, and for poster or show work use the thin varnish by itself.

Dark Blue Ink.—This may be produced in the same way, by purchasing a few ounces of dark Chinese blue, but requires a hundred per cent. more grinding than the vermilion, and must be ground in very small quantities at a time; by simply spreading with a palette knife you will see if it has a rough or smooth appearance—it will recover its smoothness instantly; do not be deceived by it without this test.

Light Blue Ink.—A very pretty blue may be made by substituting a few ounces of Antwerp blue; proceed as in the former directions, but it will take more grinding than the vermilion, but less than for the Chinese.

Light Green.—To make this very little grinding is required, if the color obtained is of the best quality. In other respects proceed as with the vermilion.

Dark Green.—Add to the above a small quantity of dark Chinese blue.

Crimson.—Use the purest carmine, well ground to a thick consistency; a very small portion of this added to the vermilion will give it "fire," and kill the brick-dust appearance.

Pink.—Lower the carmine with pure flake white.

Common Brown.—Add a small quantity of black to the vermilion.

A printer, who has a stock of yellow carmine, blue and black inks on hand, may multiply his assortment of colors as follows:

Yellow and carmine mixed will produce.....	Vermilion.
Carmine and blue.....	Purple.
Blue and black.....	Deep Blue.
Carmine, yellow and black.....	Brown.
Yellow and blue.....	Green.
Yellow and black.....	Bronze Green.
Yellow, blue and black.....	Deep Green.

A well seasoned roller is best for working with the above described colors. The type should be well cleaned with benzene.—*Exchange.*

THE ACME STATIONERY AND PAPER CO.,

No. 117 Fulton and 52 Ann Street, New York,

—MANUFACTURERS FOR THE TRADE OF—

PADS, TABLETS AND PORTFOLIOS,

From White, Linen and Manilla Writing Paper.

FINE WHITE PAPER IN
LEATHERETTE.

No. 40—4 x 6 in., Billet.
No. 41—4½ x 7 in., Octavo Note.
No. 42—5 x 8 in., Commercial Note.

No. 46—8 x 10 in., Congress Letter.

LINEN PAPER IN STAMPED
COVERS.
No. 141—4½ x 7 in., Octavo Note.
No. 142—5 x 8 in., Commercial Note.
No. 143—5½ x 9 in., Packet Note.
No. 144—7 x 8½ in., Bath Letter.
No. 145—8 x 10 in., Congress Letter.

The above cuts show our new method of putting up *Fine White Writing and Linen Papers*, for general use, in *Portfolio Style*, with a sheet of the best Blotting Paper attached to the cover as represented, making it the **BEST** and **MOST CONVENIENT** form for writing tablet in the market, which will only need to be seen to be appreciated.

TOURISTS' TABLETS.

This is a line of *Fine White Writing Paper*, handsomely bound in Tablets, with flexible covers to keep the paper compact and prevent it from being soiled. They will be found very convenient for the use of travelers and others where a less expensive tablet than our "Portfolio" is desired. The covers are printed with a neat design, making them a very attractive as well as convenient article for general use. They are put up in packages with ten tablets of eighty sheets each, of the following Nos. and Sizes:

No. 121.—Commercial Note.

No. 122.—Packet Note.

No. 123.—Congress Letter.

TWELFTH YEAR OF PUBLICATION.**THE PRINTING TIMES AND LITHOGRAPHER,**

An Illustrated Technical and Fine-Art Journal of
Typography, Lithography, Paper-Making,
and the Auxiliary Trades.

THE NEW SERIES COMMENCED JANUARY, 1875.

THE PRINTING TIMES AND LITHOGRAPHER is a high class journal, devoted to the Printing and Graphic Arts, in all their various forms. It derives its information from, and circulates in, all parts of the world. No pains are spared to insure the accuracy of its intelligence and to render it in every respect worthy of the support of Letterpress Printers and Lithographers, as well as Artists, Antiquaries, and Literary Men generally.

Published on the 15th of each month, 4to, in wrapper, price 6d. Annual subscription (payable in advance), 8s., post free to the United States. Rates of Subscriptions for foreign countries on application. Post-office orders to be made payable at the West Central District Post Office, High Holborn, to **WYMAN & SONS**, 74 and 75 Great Queen Street, London, W. C., England.

THE

Paper & Printing Trades Journal

[QUARTERLY.]

Subscription—2s. PER ANNUM, Post Free.

POSTAGE STAMPS RECEIVED IN PAYMENT.

IT is simply the best got up and most ably edited journal of the kind which is published. The general reader will find much in it that will amuse at the same time that it instructs, while the printer will be astonished by the great variety and excellence of the type with which it is printed.

The Clerkenwell (London) Press.

Every Printer, Stationer, Paper Maker, Book-seller, Author, Newspaper Proprietor, Reporter, in fact everyone interested directly or indirectly (and who is not?) with Printing and Paper, ought to subscribe.

"I consider this the best paying investment I have entered into this year." (From F. W. TALBOT, Printer, 19 Sussex Street, Cambridge.)

Thousands of letters of this character have been received.

Useful Trade Tables, Trade Information, Heaps of Wrinkles, Sprightly Articles, Amusing Gossip, in every issue.

**** OVER 400 APPLICATIONS** for goods have been received by an extensive manufacturing firm in London from a single advertisement in **THE PAPER AND PRINTING TRADES JOURNAL**.

FIELD & TUER, Publishers,

50 LEADENHALL, ST., LONDON, E. C.

Trade Gossip.

All new goods and designs which are not, strictly speaking, "Novelties" will be noticed under this head. The trade are requested to forward descriptions with samples in order to secure proper notice.

A. A. Goetting is as busy as he possibly can be.

Herman Kimm, bookbinder, New York city, is dead.

L. B. Pease, publisher, Woonsocket, R. I., has been burned out.

H. Bailey, paper-stock dealer, Santa Rosa, Cal., has sold out.

T. J. Moorhouse, bookseller, stationer, &c., Goderich, Ont., has sold out.

Isaac Ellis, newsdealer, &c., Lockport, N. Y., has been sold out by the sheriff.

E. M. Reed, publisher of the *Journal*, Walla Walla, Washington Territory, has sold out.

Dwight Chapin, bookseller and stationer, Oneida, N. Y., has admitted Clark A. Frost to partnership.

Beldin & Westwood, bookbinders, Springfield, Mass., have dissolved partnership. H. L. Beldin continues.

Garretson & Caldwell, booksellers and stationers, Russellville, Ky., have dissolved partnership. D. C. Caldwell settles.

C. F. Coons has removed from Madalin and Tivoli, N. Y., to Philmont, N. Y., where he will continue the business of job printing and stationery.

William H. Pumphrey, bookseller and stationer, Seattle, Washington Territory, has admitted J. D. Lowman to partnership. Style Pumphrey & Lowman.

W. L. Stork & Co., stationers, &c., Baltimore, Md., have dissolved partnership. F. W. Koch, having bought the entire interest, will continue the business, assuming all liabilities of and collecting all debts due to the old firm.

Edward H. Stone, for nine years with Fairbanks, Brown & Co., and James B. Forsyth, for eight years with Wilder & Co., have formed a partnership under the style of Stone & Forsyth, for the purpose of transacting a wholesale and retail business in paper and twine of all descriptions, at No. 60 Federal street, Boston.

Wm. A. Haines, Philadelphia, reports having met with unexpected success in several new styles of combination handkerchief and glove boxes with odor bottles, also with jewel caskets covered with plush. In fact, the trade seems to be demanding that almost all styles, hitherto covered exclusively with leather, shall be covered with plain and fancy plushes. At the beginning of the season the demand exceeded the supply, but by increasing his force Mr. Haines has almost caught up with his orders.

Among the visiting members of the trade in the city during the week were: J. W. Morgan, Great Barrington, Mass.; C. E. Morris, of C. E. Morris & Co., Rochester, N. Y.; Mr. Hopkins, of Hopkins Brothers, Washington, D. C.; Frank Wilson, Warsaw, N. Y.; A. H. Caughey, Erie, Pa.; Mr. Youngs, Bridgeport, Conn.; Charles Greene, Brookville, Mo.; James Dwyer, Salt Lake, Utah; C. Bergheim, of C. & M. Bergheim, Cincinnati; R. M. Fairfield, Holyoke; J. S. Taft, Waco, Texas; Wesley W. Hosier, Norfolk, Va.; Mr. Ingham, Meadville, Pa.

Last week reference was made to the stock of B. F. Wade & Co., Toledo, Ohio, having been in the sheriff's hands and a receiver appointed. It has since been learned that a short time ago dissensions arose between the partners, whereupon B. F. Wade and F. W. Bainbridge organized the B. F. Wade Company, leaving out of the new organization two of the partners in the old firm, and giving notes and a chattel mortgage in settlement of the interest of the parties who withdrew. Afterward, these two parties becoming dissatisfied with the settlement, instituted legal proceedings, alleging fraud, and secured the appointment of a receiver. The B. F. Wade Company has now secured financial aid, and having in its hands funds sufficient to take up its notes and pay off the chattel mortgage, which is not due until April 14, 1882, will, in a few days, it is believed, cause the discharge of the receiver, and will have the business placed in its hands again. The new company is organized with B. F. Wade as president; A. M. Thompson, vice-president; F. W. Bainbridge, treasurer, and Frank Munroe, secretary.

James & Holstrom's pianos are said by all who have used them to be excellent instruments, and they are everywhere becoming very popular. The house gives prompt and careful attention to all orders entrusted to it, and guarantees everything as represented. It calls particular attention to its three styles of upright pianos, the advantages of which in economizing space are well known, and the objection so long existing in pianos of this class—viz., their failure to stand in tune and the inferior quality of tone—are said to be entirely removed. The firm says that it is prepared to furnish upright pianos that will stand in tune as long as any grand or square pianos ever manufactured, and which, in point of quality and quantity of tone, strength and durability, are beyond all doubt and question.

Samuel S. Stafford has been confined to his house for a week or more suffering from bronchitis; but his business goes on, and he is in receipt of such large orders that buyers would do well to allow ample time to get the goods in by ordering ahead. The entire force in his manufactory is compelled to work at night. It is claimed that his Philadelphia trade prefer his combined violet black copying ink to any in the market.

The Springfield Printing Company, Springfield, Mass., has just issued its descriptive catalogue and price list of patent calendars for 1882. Two sizes of new brass-head calendars, which were added last year, are on the new list. These goods are well known. A new lithographic calendar is offered this year.

J. H. Bufford's Sons have just introduced a new series of French gilt ground cards, in six designs, all of which represent little maidens engaged in different pastimes. These goods are well executed in design and finish.

The Acme Stationery and Paper Company is getting out a very handsomely designed valentine, which it hopes to have ready to offer to the trade early in December.

The office and factory of the Fountain Ink Company have been removed to 75 John street, New York, where all orders should be directed.

T. A. Worley, of the firm of T. A. Worley & Son, stationers, Covington, Ohio, has been buying goods in Philadelphia this week.

Frederick J. Levy, of Henry Levy & Son, is on his way to Paris to superintend the designing of novelties for next year's trade.

Ferguson & Brother, fancy goods dealers, Washington, D. C., are offering to compromise.

Gerald S. Potter, stationer, &c., Hampton, Va., has failed.

A. P. Ingraham, dealer in notions, Meadville, Pa., has been closed by the sheriff.

Owen & Axtell, booksellers and stationers, Franklin, Pa., have sold out to E. E. Smith & Co.

Newson & Curry, Baltimore, Md., have issued a new catalogue of school stationery and school furniture.

William Graham, of Liebenroth, Von Auw & Co., is now in Boston, and is forwarding large orders to the firm.

The Robinson Engraving Company, Boston, is crowded with orders for its beautiful Christmas cards. This was to be expected. The company is running its factory nightly to meet the demand.

John Aikenhead, of John Gibson's, has returned after a three months' trip, it being the most successful trip he ever made. He is now getting ready to make his last Western trip for the season. Mr. Gibson, on account of the unusual rush, has got a little behind in filling his orders, and trusts that his customers will not get impatient.

McCarty & Hasberg's novelties in leather goods are very suitable for stationers' holiday trade. They have been specially made to order for this purpose, and are said to be different from anything else in the market. They come in great variety, and range from fair quality up to the finest manufacture. The designs were selected by J. B. McCarty, the senior member of the firm, from samples of the rarest European productions while he was on his transatlantic visit, and he had the goods made up to suit the American market. The firm guarantees all of the articles to be superior.

A. & E. Wallach show a very elegant and extensive line of plush and leather goods, such as glove and handkerchief, jewel and work boxes, odor cases, cigar, cigarette and card cases, &c. They have a large assortment of glass inks and paper-weights in different colors and all possible shapes. Their display in fancy porcelain and glassware is very fine. This house makes a specialty of desks, of which they show an immense variety in all kinds of wood, with beautiful inlaid decorations. A. & E. Wallach's line of albums, ebony, olive and gilt goods, is very large and attractive. They always carry a complete assortment of chess, dominoes, dice, chips, cribbage-boards and boxes. Buyers should not fail to visit the salesroom before purchasing, as they are beginning to close out goods at very low prices.

Oscar Strasburger & Co. show a complete line of stationers' holiday goods, which include fine plush work-boxes and dressing cases, two hundred and fifty styles of photograph albums, a large variety of autograph albums, rare lines of pearl card cases, fine inlaid writing desks, opera glasses, fancy paper and glass boxes, Scotch wood writing sets, and fancy glass inkstands in assorted colors. Among other things shown is a large line of glass thermometers, bronze card trays, and full lines of Japanese writing desks, card plates, brackets, wall-pockets, waste baskets, fancy lacquered boxes, and paint boxes from the lowest grades to the very finest goods. Full lines of checker-boards, dominoes, and chessmen, in ivory and wood, are also offered. The firm recommends its German slate pencils as being first-class in every respect, and invites attention to its glove and handkerchief boxes, which come both in plush and pearl inlaid. The fine line of Vienna purses in Russia, Morocco,

and plush also deserve attention. The trade should see these goods.

Stephen J. Cox, wood engraver, New York city, has made an assignment.

Harvey & Shumway, dealers in fancy goods, Fall River, Mass. are in insolvency.

The Doerflinger Book and Publishing Company, Milwaukee, Wis., is closing up.

J. A. Tichnor, of the firm of Tichnor, Dunlap & Co., printers, Atlanta, Ga., is dead.

Turner Buswell, bookseller and stationer, Solon, Me., has sold out to L. McIntire.

E. W. Pampbell & Co., dealers in notions, Crestline, Ohio, have dissolved partnership.

J. B. Courtney & Son, dealers in notions, Penfield, Ill., have sold out to Clark & Vandoren.

Joseph Session, publisher of the *Times and Comet*, Georgetown, S. C., has sold out to Josiah Doar.

An advertisement, over the signature of "Opportunity," is thought to present a first-rate chance for some one who wants to buy a book, stationery and fancy goods store. Read it.

The J. W. Butler Paper Company, Chicago, Ill., forwards its catalogue. This is very full and complete, comprising over one hundred pages of a price list of all kinds of papers, envelopes, staple and fancy stationery goods.

Among the many nice things for holiday presents, the photographic outfits for amateurs will probably attract much attention and sell readily. The readers of *THE STATIONER* are invited to examine the advertisement of these goods, which appears in another column.

Barber & Ellis, Toronto and Montreal, publish "L'Epitome" card scale, prepared by W. F. Mathews. This scale represents all of the sizes of cards as if they were placed over each other, from the fourth part of a sheet until the four-hundredth part is reached, and attached is a table of inches for quick reference.

H. A. Brooks & Co., Meriden, Conn., have just got out a new pencil sharpener, made on the jack-plane principle. The sharpener is $2\frac{3}{4}$ inches long by three-quarters of an inch wide, hollow, and having a knife or small cutter, with its edge turned to the interior of the sharpener. The pencil is pushed into the instrument and a spring presses it against the planing edge. By alternately withdrawing the pencil and returning it the wood is cut down.

Henry Levy & Son have just received a new and elegant line of goods for the holiday trade. It includes enameled gilt Milanese ware, which comprise some exquisite works of art, and consists of thimble cases, pin-cushions, jewel cases, bon-bon boxes, odor cases, puff boxes and other articles; also an elegant line of aqua-marine, crystal and iridescent glass inks, pyramids and paper-weights and artistically hand-painted china plaques in floral, piscatorial, game, and landscape designs, and manufactured in Worcester, England, and Dresden, Germany. These are masterpieces of art for wall ornaments, and are offered at prices that, it is said, will command a ready sale. Among other things shown by this house are water-colored paints, which include all grades from a cheap toy box to those adapted to the use of artists. In jointed dolls a new and large variety in indestructible bisque wax is offered, and they come dressed and undressed. There are also other desirable articles suitable to the holiday trade, which can be seen at the store, where buyers may find it to their advantage to call and inspect the elegant lines there offered.

EVANS & GARDNER, 43 Elm St., New York,

Manufacturers of Rubber and Metal Stationery Specialties.

SOLE AGENTS FOR EXCELSIOR PENCIL SHARPENERS.

THE BAY STATE PAPER COMPANY,

HOLYOKE, MASS., were among the pioneers in the W. C. Paper trade and their goods, from the start, were

distinguished for their fine quality and the superior style in which they were wrapped. Their example has been approved and imitated by a swarm of competitors, who have flooded the market with inferior goods, put up in packages of 600 to 800 sheets, misleading the unwary, and sold at apparently lower figures; but the trade and consumers generally recognize the fact that a good article, honestly put up, in 1,000 sheet packages, is the most profitable both for use and for sale. Their goods are all guaranteed 1,000 sheets to package, and no short count. No wood is used in any of these papers, but they are made of the very best stock in the market.

THE "MEDICATED BOUDOIR" BRAND

Has no equal for weight, strength, softness, and color, and commands the front place with "fine retail trade." Present reduced quotations furnished on application.

THE STATIONER.

DEVOTED TO THE INTERESTS OF THE

Stationery and Fancy Goods Trades.

WEEKLY--\$2.00 PER ANNUM.

Single Copies - - - 10 Cents.

NEW YORK, THURSDAY, NOVEMBER 3, 1881.

Advertisements cannot be received for insertion in the current week later than 12 m. on Wednesday. The charge for advertising is 25 cents a line, each insertion. Special terms for standing and displayed advertisements to be had on application.

This journal aims to be a medium of information for and a representative of the interests of every one connected with the stationery and fancy goods trades. It contains a full and trustworthy survey of the market for stationery in this country, in all cases giving the actual prices at which goods can be bought of importers and jobbers in this city, together with a detailed account of novelties in the trade, patents relating to stationery, and current items of interest. A review of foreign markets and accounts of movements abroad will also be furnished, and no pains will be spared to make THE STATIONER a thorough and complete exponent of the trade.

Subscription and postage for Great Britain, per annum..... 12s.

Any information our readers may wish to obtain shall be cheerfully given, and prompt replies will be made to all inquiries addressed to us on any subjects of interest to the trade.

Communications on all trade matters are earnestly solicited. Address

Subscribers to THE STATIONER can be supplied with the best cloth binder in the market. Deliverable at the publication office. Price, fifty cents.

Readers of this paper who avail themselves of the information obtained from its columns, by advertisement or otherwise, are requested to notify their correspondents of the source of their information.

THE STATIONER returns its acknowledgments for the many pleasant and complimentary expressions which have followed its issue of last week.

PURSUANT to notice, the American News Company has made a correction of its catalogue in connection with blotting paper, and the trade are asked to note the correction as it is stated in another column.

AN interesting advance statement from the Census Office, which appears in this issue, shows the "returned quantity" of print papers used in the publication of newspapers and periodicals during the last census year.

VERY remarkable concord prevails in the opinion of stationers as to trade. It is hard to find any one who would try to look dismal. Even the most pronounced of croakers is obliged to yield to the logic which forbids unhappiness.

A CORRESPONDENT directs attention to the fact that lead pencils are selling at dry-goods stores in his town for less than cost. The same thing is said of slate pencils. Now, if the manufacturers most interested in this have any explanation to make, it is time for them to tell us how it is that haberdashers can sell stationery goods for less than stationers can buy them?

ANOTHER complaint comes to us that the representative of a house doing business in one of our largest cities, failing to sell a "job lot" of poor goods to a regular stationer, struck up a trade with the keeper of a grocery store, who forthwith announced "great bargains." It does not appear that in this case the trade were undersold, and we therefore assume that the competing grocer probably sold the goods for about the same price which his stationery friend and rival would have charged. To this we cannot take exception; but we do agree with the unexpressed declaration of one correspondent, that the drummer had no business to start up a cheap rivalry at the expense of the trade.

IN the September statement of the exports and imports of the United States, we find that the excess in the values of exports for the month ended September 30 was nearly \$7,000,000 as compared with the imports, although the exports are about \$9,000,000 less than for the corresponding month of last year, the imports remaining about the same. The decline in export values is largely due to the falling off in shipments of food products. The export values for the twelve months ended September 30, 1881, show an excess of \$240,270,615 against \$163,857,613 for the corresponding period of last year. It is satisfactory to know that the exports for the twelve months show an increase of about \$16,000,000.

THE communication concerning the falsification of weight marks, which appeared

in THE STATIONER last week, should caution the trade, in all cases where they order paper by weight, to make sure that the goods when delivered are of the weight demanded. Call for a warranty of weight, and tell the seller that he must sustain his warranty or go without orders. Practise the same thing in the matter of counts, and make it a business principle to insist that goods must meet samples and fill orders. It will not take many examples of such resolution on the part of the trade to convince frauds who want to take advantage of their carelessness or ignorance that such sharp dealing is unprofitable. But at no time should vigilance be relaxed.

Communications.

[Correspondents are requested to write on only one side of their paper. No responsibility for the opinion of correspondents attaches to this paper.]

Wants to Retire.

To the Editor of The Stationer:

The beauties of the stationery business in even country towns may be seen from the following facts: We have been twenty years in business, and keep a full stock and sell at reasonable prices. Every store in town sells stationery to a certain extent—except, perhaps, shoe, clothing and tin shops. We buy our groceries of a certain dealer—buy largely and pay cash. Recently a drummer, failing to "stick" us a second time with his "job lots" of imperfect goods, went to the dealer above referred to, and, as a result, the latter is now offering "great bargains" in cheap trash. Of course we have and can sell similar goods, but our customers want first-class articles at the grocery-man's price for his "job lot" damaged stock. If you hear of any one desiring to go into the book and stationery business, send them this way. We have all the money we need, and will make room for others to amass fortunes.

H. & Co.

Killing the "Legitimate."

To the Editor of The Stationer:

Knowing that your journal is and has always been the champion of the rights of business men in the stationery line, I take the liberty of occupying a few lines of your space in asking a question: Whether it is proper for the firms comprising the lead pencil combination to sell to parties who retail their pencils below cost, thus permitting the consumer to purchase lower than the regular jobbers, who are compelled to lay in large stocks and are completely at a loss to satisfy their customers that they are not overcharging them?

The firms in the combination agree to purchase all merchandise of their manufacture offered or sold at cost or below cost, but these catchpenny dry-good stores sell by the dozen and refuse to sell in quantities. For instance, there is a certain house (retail dry goods, millinery, &c.) in our city, which is selling chalk at seven cents per gross, pencils eight cents a dozen, slate pencils nine cents per hundred, &c., less than cost.

Now, Mr. Editor, cannot any one suggest some means of remedying this evil? If you agitate this question it may help to improve the regular legitimate stationery trade throughout the United States.

THE TEXAS TAX ON COMMERCIAL TRAVELERS.

One of the most objectionable features of the Texas law imposing a tax on traveling salesmen is the requirement that the salesman must go to the county seat and secure a license before he can solicit orders in any town in the county. The following is the full text of the provision in question:

"Every commercial traveler, drummer, salesman or solicitor of trade, before he solicits orders or makes any sales of any article whatever, in any county of the State, shall file with the county clerk of such county the comptroller's receipt for the occupation tax therein prescribed, and the clerk shall immediately record such receipt and return the same to such commercial traveler, drummer, salesman or solicitor of trade on his payment of twenty-five cents therefor; and every commercial traveler, salesman, drummer or solicitor of trade who shall solicit orders or make any sales without first having the receipt of the comptroller for his occupation tax duly recorded as herein prescribed, shall be deemed guilty of a misdemeanor, and fined in any sum not less than twenty-five nor more than one hundred dollars."

A CORRECTION TO BE NOTED.

In accordance with its notice given last week the American News Company has inserted in the supplement to its Catalogue of Stationery the following:

Correction.

OBITUARY.

W. O. HICKOK, JR.

The Harrisburg, Pa., *Daily Patriot*, of October 25, announces the death of W. O. Hickok, Jr., on October 23. It says: His ailment was a consumption of the throat that caused him at times intense pain and suffering. Every effort was made by his friends and relatives to restore him to health and to society as well as to the world of business to which he was so deeply attached. Nothing was spared that wealth or thoughtfulness could suggest that would have a tendency to make him well and strong. A trip to Europe was taken by him at the instance of his father several years ago, in the hope that a transatlantic voyage and change of scenes would be beneficial; this proved of no avail. A tour of the South was equally valueless, although he was much better on his return home. The fell destroyer had too firm a hold upon him and finally launched its fatal dart and robbed his family of a noble son, husband and father. Mr. Hickok was a business man of more than ordinary abilities, and bid fair to stand at the head of the manufacturing element in this community. He had long been associated with his father in the machine business at the well known Eagle works, and was well thought of by all in the employ of the firm. He represented the Fourth Ward in the Select Council, having been elected on the Democratic ticket to succeed the late William Calder, Esq., for his unexpired term at the election in February last, also at the same time for the new term. When his health permitted he was ever ready to champion the cause of his constituents. His place will be hard to fill.

TO TEST GILDING.

You may find out whether gilding is genuine or not by the fact that on the latter a weak solution of protochloride of copper produces a black precipitate, which it does not on the former. In the case of gilt paper, the simplest method consists in slowly burning the paper in a bright flame, that gives out no smoke; in the incinerated remains of good gilt paper there are traces of the gold left behind, which are quite perceptible to the naked eye, in the shape of glittering spots, while vile metal on paper oxidizes in burning, and leaves nothing but a sort of red spots behind. This method, however, is scarcely accurate enough; a very much safer test is to be found in the use of mercury, either in metallic shape, or in solution of salts of mercury. The former test is performed by putting a few drops of pure quicksilver on the gilt article, and either rubbing it in or slightly heating it. If the gilding is genuine, though ever so thin, the mercury combines itself with it, producing white spots on the surface. This does not occur in the case of sham gilding, and in rubbing mercury in, no change of color whatever is to be noticed. Another test consists in the application of a watery solution of nitrate of mercury. In this case the exact opposite takes place as in the former, for genuine gilding remains intact, while a "duffer" at once takes a white color when brought in contact with the precipitate of mercury.

Many novelties in fans have been introduced this season. Among some of the most noticeable are those painted with large flowers, generally on a black ground; some of these are exquisite specimens of skillful flower painting. Roses and sunflowers seem to be the favorite subjects, and the fans showing sunflowers on a black ground painted by pupils of the Cooper Institute art classes, are creditable to the young

artists. The white silk fans are painted in the same style, and on some fans the sprays of flowers are painted trailing over the sticks as well as the top of the fan. Some pretty fans are shown in which the decoration is embroidered instead of painted, and in some of these gold thread is introduced. Feather fans continue in vogue. The Vienna fans, in red or black russia leather, with red satin tops painted with flowers, are very handsome. Red is still a very favorite color. Ombre silks are used for many fans, both plain and painted.

Among the visiting members of the trade during the week were: B. H. Owen, of Owen & Moore, Clarksville, Tenn.; S. Hunt, Baltimore, Md.; J. McKinney, St. Louis; A. Lissner, Washington, D. C.; C. J. Cohen, Philadelphia.

Market Review.

OFFICE OF THE AMERICAN STATIONER, {
WEDNESDAY, November 2, 1881. }

THE MONEY MARKET.—The money market shows increasing ease, through an accumulation of loanable funds and a less urgent demand from speculators. Call loans since our last have ranged from 3 to 6 per cent., and discount rates for prime mercantile notes $5\frac{1}{2}$ to 7 per cent. The speculative and investment demand for railway and miscellaneous stocks continues moderate and prices variable. The government bond market was strong through the week and very active for extended fives, which were in good demand by national banks to replace extended sixes on deposit. There was a very active speculation in several of the railroad mortgages and a more extended purchasing movement generally during the week at better prices. The sterling exchange market was very strong during the entire week, more in consequence of a limited supply of bills than of any extraordinary demand.

THE PAPER MARKET.—The market during the past week has not developed any new feature. The consumption of paper, or rather the demand, during the past month has been gradually gaining upon the supply, and there are undoubtedly lighter stocks in the hands of dealers now than there was a month ago; in fact, the market is almost bare of some special grades, and prices have appreciated from $\frac{1}{4}$ to $\frac{1}{2}$ c. on the low and medium qualities of book and news. Straw wrapping continues in very light supply. Manufacturers not only have the drought to contend with, but have to pay advanced prices for straw. Just subsequent to the gathering of the new crop they were able to buy at \$8 to \$10 per ton, but the supply running short, are now compelled to pay on an average \$15 to \$16, thus considerably enhancing the cost of manufacture.

THE STATIONERY MARKET.—There has been no falling off from the active condition of the stationery trade reported last week. Orders continue to be received by mail, and out-of-town buyers are making purchases to a large extent for the holidays, which now constitutes the chief business being done, as the orders yet to come in for the regular fall trade are only to complete assortments and to duplicate. The present season is said to be the best ever experienced by the trade in this city, particularly with the West, the number of buyers from that section having been very much larger than ever before. Merchants are unanimous in the expression of their opinion that goods have been bought with greater liberality than for a great many years, owing, no doubt, to the drought and the unsatisfactory cotton crop of the South, the buyers from there have generally been cautious in their purchases, but the aggregate of their buying yields a large amount. The greatly increased facilities for transportation, the cheap freight rates, and a marked increase in the price paid the producer, has been an offset for the large falling off in the grain crops of the West, which might otherwise have had a depressing influence upon business. Some of our fancy-goods houses report a larger trade for the season than they ever had, and there is a corroboration of this in almost every branch of the stationery trade. There are no new features in prices, and the market generally is firm and steady,

TO PAINT LEATHER.

Select leather that has been thoroughly well dressed, draw upon it with a chalk pencil the subject to be painted, and size all over the design. Use the common size, melted over the fire and used warm. Paint with ordinary tube oil colors, mixing the colors as for oil painting, and adding to each some japanners' gold size as a dryer. When it is only required to turn the leather black, and it has been previously well dressed, it will be so well impregnated with the astringent parts of oak bark as only to need rubbing over two or three times with a solution of vitriol. A gloss can afterward be given to this black leather by rubbing it over with a mixture of gum arabic and size melted in vinegar. Should the black produced by the vitriol not be deep enough, grind up some lampblack in linseed oil and rub it on before putting on the glazing. When small places in the painting require gilding, go over these parts with the white of an egg, and attach the gold leaf to them, having previously waxed a piece of tissue-paper, taken up the gold leaf on it, and cut it to the size required. When a large surface of the leather requires gilding, take some brown red, grind it in a muller, and mix it with water and chalk, and when the chalk is dissolved rub it over the leather until the whole surface has a whitish look. Attach whole sheets of gold leaf to the tissue-paper, and lay them upon the leather before it is dry, taking care that the edges of the leaves overlap each other. Allow the leather to dry and harden, and then polish the gold by well but lightly rubbing it with an ivory polisher.

THE FATE OF MANUSCRIPTS.

The rage for manuscripts first broke out in Italy in the fifteenth century, and thence spread to the studios of Holland, France and England. The Italians, with southern enthusiasm and with a zeal which we may value for its results, often beggared themselves for their precious collections. The capture of Constantinople by the Turks in the fifteenth century, and the consequent break-up of the Eastern Empire, brought quite a flood of manuscripts into Italy. Besides this source of supply, however, it was soon discovered that the barbarous monks of the Middle Ages had chalked over with pumice-stone, or otherwise erased, manuscripts containing the works of classical authors, and had written over the surface thus prepared legends of the saints or other literary garbage. It happened, very unfortunately, that the same authors were thus dealt with in almost all cases, not because the monks entertained any peculiar hostility toward them, but because the length was such as to allow the inscription of a goodly collection of saintly legends. This is why the short authors, such as Terence, Juvenal, &c., have come down to us complete, whereas of Livy and Tacitus very large portions are even now wanting. The most famous palimpsest discovery in recent times was that of the Vatican librarian, who, at the beginning of the present century, found a long-lost treatise on Cicero beneath an ecclesiastical commentary.

The Roman Emperor Tacitus, knowing by experience how soon manuscripts disappeared, was determined that the great work of his ancestor should be handed down to posterity. He therefore ordered a copy to be placed in every library of the empire, and ten copies to be yearly transcribed. Nevertheless, we owe what we have of Tacitus to one imperfect stray copy which had found its way into a German monastery.

Manuscripts have often fared not much better

in modern than in ancient times. Ignorance of their value, carelessness, family pride, ecclesiastical bigotry, and the demon Time, have all been their enemies. Dishonest plagiarists have sometimes even been known to destroy them to prevent discovery of their pilferings. Dishonest historians have been known to excise them to conceal their own unfaithfulness to fact. Even the precious writings of distinguished literary ancestors have been allowed by their own descendants to rot unknown. Thus, although Montaigne fortunately published his Essays in his lifetime, yet the journal of his tour through Germany, Switzerland, and Italy remained unknown for nearly two centuries—until 1774,

when it was discovered by a stranger moldering in a chest in the author's own château.

Let anyone examine the back of a binding about three and a half centuries old, and the chances are that he will discover portions of some mutilated mediæval MS., as the binders of Elizabeth's time took stern revenge on the monks and all their works. The application of spirits of wine and a little nutgall, which is recommended as a recipe for making faded manuscripts decipherable, might reveal many an interesting inscription upon scraps of old parchment; indeed, it is said that a manuscript of Livy's was once found to have been appropriated by a battledore manufacturer—a fact which

calls up reflections as to the base uses to which noble things are too often put.—*Paper and Print.*

LIQUID GLUE.—A product which is better than that obtained by treating solid glue with nitric acid, can be prepared by dissolving good glue in a water bath containing the same quantity of strong vinegar, one-fourth part of alcohol, and very little alum. It is very applicable to such work which does not need a very strong adhesive power. It is always ready for use, and keeps for any length of time. The manufacturers of artificial pearls use it in pretty large quantities; it also serves for fastening mother-of-pearl, horn, &c., on wood and metal.

GUARANTEE CHEMICAL CO.,

2130 Race St., Philadelphia, Pa.

A SUBSTITUTE FOR BLACK WALNUT.

Black birch is rapidly coming into favor. Black birch is a close-grained, handsome wood, and can be easily stained to resemble walnut exactly. It is just as easy to work, and is suitable for nearly, if not all, the purposes to which walnut is at present applied. Birch is much the same color as cherry, but the latter wood is now scarce, and consequently dear. It is with difficulty that cherry can be obtained at fifty dollars a thousand feet, while birch wood can be purchased at any saw-mill for one dollar per thousand feet. When properly stained, it is almost impossible to distinguish the difference between it and walnut, as it is susceptible of a beautiful polish, equal to any wood now used in the manufacture of furniture. In the forests throughout Ontario birch grows in abundance, especially if the land is not too boggy. There is a great difference in the wood of different sections. Where the land is high and dry the wood is firm and clear, but if the land is low and wet the wood has a tendency to be soft and of a bluish color. In all the northern regions it can be

found in great abundance, and, as the tree grows to such a size, little trouble is experienced in procuring a large quantity. The forests of the Manitoulin Islands abound with it, as well as those of the Peterborough and Haliburton districts. Muskoka district also contains a plentiful supply. During the past few years, large quantities of this wood have been exported from the province of Quebec at a low figure. It is very easily detected among other trees, by its height, large trunk, and the peculiar color of its coarse bark. Most of the perforated chair bottoms now in use are manufactured from it. There is a species of bird's-eye birch, but it is very scarce. An evidence of the weight and solidity of the wood is the fact that it will sink after being a few days on the water. This is a slight drawback to the work of having it conveyed to saw-mills. One of the principal means resorted to is binding it together with pine logs, and thus it is brought to the mill, but pine cannot always be found where birch grows, and it is then necessary to haul it, sometimes a great distance, with the aid of horses.—*Toronto Globe.*

EBONIZING WOOD.

Take a pint of water that has been boiled, put in a handful of logwood chips, and simmer till you have a strong decoction—about a quarter of a pint. Apply this liquor hot to the wood to be stained, two or three times, according to the nature of wood, letting each coat dry thoroughly. Add about half a pint of boiled water to the remainder of the solution, and place in it some rusty nails or some sulphate of iron, and a couple of bruised nutgalls; boil, and apply two or three coats hot. This solution should be black, so the right quantities are easily ascertained. The stains should be prepared in a glazed pipkin, and be applied with a sponge or clean brush; but each coat of both liquids must thoroughly dry before putting on another, going over the work also with a very fine sand-paper. When the stain has become dry, get some French polish and add sufficient thumb-blue (any oil-shop) to slightly color the polish; apply in the usual manner, doing the work in a dry and warm room. This method produces an appearance equal to that of ebony. Beware of grease.

CENSUS RETURNS.

The following table, showing the average and aggregate pounds and aggregate reams of paper used per issue on newspapers and periodicals in the United States, with total pounds and reams of paper used during the Census year, is supplied by the Census Office of the Department of the Interior:

SLATES. SLATES.

Low Freight Rates.

Having anticipated the recent cut in freight rates I have accumulated in New York a very large stock of "D" Slates, and can give immediate shipment of any order.

Slates are lower than they have ever been, and the ruling rates of freight will enable buyers to put these goods in stock at extremely low cost.

D. C. PRATT, 16 New Church Street, New York.

As these rates are liable to change at any time, buyers will do well to order without delay.

AMBERG'S PATENT NEW "PEERLESS" LETTER FILE.

THE PAPER TRADE OF IRELAND.

Our woollen manufacture has well-nigh disappeared, and as for our cotton trade, the less said about its prospects the better. We had, however, twenty-five years ago, an Irish manufacture which was a credit to the country, and which, with energy, would have been still retained for us. We allude to the paper manufacture of Ireland, which, at the period we refer to, was chiefly centred in Dublin, where no less than fourteen mills were busily engaged at work, employing on an average 2,400 hands, a considerable number of whom were girls. Now we have two of moderately decent dimensions, manufacturing white paper for other purposes than newspapers, and some four or five doing a not very extensive business in browns, of qualities more or less coarse.

More paper is now consumed in Ireland than at any former period, and yet scarcely a single Irish journal is produced from Irish-made paper. English and Scottish industry has managed to take the trade from us. Still it might be worth while to consider whether Ireland is so completely out of the running in this respect as to render a revival hopeless. We hold she is not, and that if practical Irishmen with the requisite capital would only take the matter earnestly in hand, the difficulties would disappear. Twenty-five years ago the paper mills of Dublin were capable, not alone of supplying the wants of Ireland, the literature of which was much more contracted than it is at present, but of invading, in some instances, the English markets. We have even sent paper to Belgium and France, where the Irish article, made purely from rags, always commanded a ready market and a higher price than that of the production of any other nation. We are now largely reduced to the necessity of providing for our everyday wants from the mills of Great Britain, while every accessory of a prosperous national trade stands idly disregarded.

Why should not paper mills be erected on the banks of the Liffey—in the neighborhood of Ringsend, for instance, thus doing away with the heavy cost of cartage to such remote districts as Tallaght, Rathfarnham and Clondalkin? The lower cost of labor in Ireland, as compared with the wages paid in England and Scotland, should also count for something as against the price of coal. Rags we unfortunately have in abundance; straw is as plentiful as ever; no country in the world of the same area produces greater quantities of vegetables, so many of which are used in the manufacture of paper; and if our cotton mills are few in number (there being, we believe, three at work in Ireland), there united refuse would add largely to the raw material stock of the paper mills.

But even cotton refuse is not a necessity. As we have said, straw and the various vegetables are with us in profusion; and a cargo of esparto grass, which makes paper of the finest quality, could be as cheaply landed in Dublin as in Liverpool or Glasgow. The strong alkalies and other chemicals necessary in the manufacture of paper come almost entirely from North Wales; and surely their transmission to the Liffey would not be a much more costly proceeding than the forwarding of them to Lancashire or Derbyshire or distant Kent, while it should be much less than the rate at which they could be delivered in Glasgow. One other feature might be mentioned in favor of the Irish trade, and as tending still further to equalize the disproportion in the relative prices of coal in the two countries—the freight of the manufactured article from England and Scotland to Ireland.

Water carriage is, of course, the cheapest

mode of transit known, and a ton of paper from Lancashire or Lanarkshire costs a wonderfully small sum to have landed in Dublin; but still it is an item to be taken into the account. We have, then, arrived at this position, that Glasgow, Aberdeen, various towns in Lancashire, Kent and Derbyshire supply nearly the whole of Ireland's wants in this respect, while our own country remains apparently helpless either to assist herself or to compete in the markets of the world. Great Britain gives us the article we require at a cheaper rate than it can be produced for here; and this is largely, if not entirely, owing to the absence of the requisite machinery and enterprise. —*Irish Times, Dublin.*

One of the sights of Paris, in the eighteenth century, was a life-sized doll in a famous shop in the Rue Saint-Honore, which was always dressed

in the latest fashion. Reproductions of this doll were sent over land and sea to England, Germany, Italy and Spain, and penetrated even into the seraglios of the East. When the first fashion journals were founded, they counted more on other parts of Europe than on France for subscribers. Their ambition and hope was to replace the doll of the Rue Saint-Honore. The prospectus of the *Cabinet des Modes* (1786) announces that, "thanks to the fashion journals, foreigners will no longer be obliged to make dolls and manikins, which are always imperfect and very dear, and give at best but an incomplete idea of our fashions." The fashion journals have not yet succeeded in replacing the famous "poupée de la Rue Saint-Honore." Now, as in the last century, the Parisian *marchandes de modes* send their dressed dolls all over the old world and the new.

"THE GREAT ROCK ISLAND ROUTE"

Calls your attention to the following REASONS WHY, if about to make a Journey to the GREAT WEST, you should travel over it:

As nearly absolute safety as is possible to be attained. Sure connections in UNION DEPOTS, at all important points. No change of cars between CHICAGO, KANSAS CITY, LEAVENWORTH, ATCHISON or COUNCIL BLUFFS. Quick journeys because carried on Fast Express Trains. Day cars that are not only artistically decorated, but furnished with seats that admit of ease and comfort. Sleeping cars that permit quiet rest in home-like beds. Dining cars that are used only for eating purposes, and in which the best of meals are served for the reasonable sum of seventy-five cents each. A journey that furnishes the finest views of the fertile farms and pretty cities of Illinois, Iowa and Missouri, and is afterwards remembered as one of the pleasant incidents of life. You arrive at destination rested, not weary; clean, not dirty; calm, not angry. In brief, you get the maximum of comfort at a minimum of cost.

That the unremitting care of the Chicago, Rock Island & Pacific Railway for the comfort of its patrons is appreciated, is attested by its constantly increasing business, and the fact that it is the favorite route with delegates and visitors to the great assemblages, political, religious, educational and benevolent, that assemble from time to time in the great cities of the United States, as well as tourists who seek the pleasant lines of travel while en route to behold the wonderful scenes of Colorado, the Yellowstone and Yosemite. To accommodate those who desire to visit Colorado for health, pleasure or business, in the most auspicious time of the year, the Summer season and months of September and October, the Company every year puts on sale, May 1st, at all coupon ticket offices in the United States and Canada, round trip tickets to

DENVER, COLORADO SPRINGS AND PUEBLO.

At reduced rates, good returning, until October 31st. Also to San Francisco, for parties of ten or more, good for ninety days, at great reduction from regular fares.

REMEMBER, this is the most direct route for all points WEST and SOUTHWEST. For further information, time-tables, maps or folders, call upon or address

R. R. CABLE,

Vice-Pres't and Gen'l Man'gr, Chicago.

E. ST. JOHN,

Gen'l Ticket and Pass'r Agent, Chicago.

COMPOSITE PORTRAITS.

At the last meeting of the Photographic Society of Great Britain, Francis Galton, F. R. S., read a paper on "Composite Portraiture," in which he stated that his attention was first directed to the subject some years ago, when he found that by taking two or more portraits of different individuals under exactly the same conditions, and superimposing them, the features, if not absolutely dissimilar, blended together and formed an idealized portrait which could be well seen when the image was thrown upon a magic-lantern screen. The register he adopted, so that the features should be identically superimposed, was by drawing a horizontal line through the eyes, another parallel to this through the mouth, and a third perpendicular to and bisecting these horizontal lines through the nose. The point of bisection between the eyes was that which he was especially careful to maintain in the same position in each portrait. Mr. Galton's first method of producing composite portraits was by means of a copying camera, paper positives being used. He now, however, used transparencies, and he exhibited and described the apparatus which he had adopted for the purpose. One purpose for which he believed composite portraits would be valuable was that of producing a standard physiognomy of disease. With this object he had taken the portraits of a number of consumptive persons, male and female, and had combined them; and it was remarkable how a certain average of faces was found to be almost identical. Mr. Galton also exhibited a number of what he called typical portraits. One was the face of an idealized criminal, formed from a combination of seven portraits of criminals, others were the faces of consumptive patients, and a third series was that of the portraits of officers and men of the Royal Engineers. In one case he had combined the portraits of twelve officers, in another the portraits of eleven privates, and in a third he had combined the portraits of officers and privates. In each instance, Mr. Galton said, the individuality marking each class was strongly brought out and idealized. He also pointed out how, in every case, the idealized portrait was better looking than the faces from which it was made.

In conclusion, Mr. Galton referred to the use which photographers might make of composite portraits. He thought the process could be turned to a most interesting account in the production of family likenesses. Artistic excellence was of no consequence in the negatives, and all that was necessary was that the portraits should be taken under the same aspect, either as a perfect profile or a perfect full face, and under the same conditions of light and shade. The result of the combination of a number of faces of the same family was often very curious, not the least singular point being the circumstance that there was often a difference of opinion as to whom the idealized portrait was most like. Mr. Warnerke said, that when Mr. Galton first described his method, some years ago, he had tried the production of composite portraits, and found the result exceedingly interesting. Captain Abney expressed surprise at the result of an experiment which Mr. Galton had made to show that repeated exposures on the same plate made no difference in the result. Had not Mr. Galton proved that he was right, he should have expected some difference. After a remark from Colonel Wortley, Mr. Galton observed that one curious result he had noticed was in the case of a combination portrait of two criminal boys. This portrait

was given to an artist to copy, and, singularly enough, although the artist had never seen either of the boys, the picture he drew was a portrait of one of them rather than a copy of the composite.

BACKGROUND FOR STATUARY.

Considerable discussion has occurred in late years as to the proper background for statues—whether it should be a quiet neutral tone of gray, or a more decided color, such as maroon red. The decided color is strongly championed. John C. Grace, a London architect, says: "There may be special circumstances making the light neutral tone desirable for one or two statues; but, taken as a rule for a gallery, or for even a single statue, I prefer the deep color. This must be modified, of course, according to the condition of the marble; if the statues are old and stained, the coloring must be lowered in tone accordingly."

The hue for walls where prints or photographs are to be hung should be a rich yellow-brown or a leather color. This gives lustre to the black of the print or the tone of the photograph.

"Occasionally," says Mr. Grace, "there may be some special object in a room requiring a corresponding modulation of the coloring, such as an allegorical painting in a ceiling much darkened and obscured by age. I will give an example. In an old castellated house there was a room in which was to be arranged a series of family portraits. As the room faced the south, it was desired that the walls might not be red: so it was decided to have a bold damask pattern, green flock upon a brown leather and gold ground. The ceiling was divided by projecting beams into fifteen compartments, in each of which was a large oval painting of a cardinal virtue in chiaroscuro on a dark olive ground; these ovals were surrounded by low relief framing, and outside that by very light foliage ornament. We made the framing deep vellum color, relieved with gilding, and in the margin put a tone of maroon red, the light ornament vellum, and the ground of the surrounding panel was painted blue, sufficiently modulated. The beams which were enriched we painted a brown color, and the ornaments on them were picked out vellum color, and relieved with maroon red and gilding. The curtains of the room were dull red, and the carpet a Turkey pattern in subdued colors."

BLEACHING GUM ARABIC.—The solution of gum is first strained through linen in order to remove earthy matters, fragments of wood, &c., and is then mixed with freshly prepared hydrate of alumina, which must not be allowed to dry up. The mixture is poured upon a linen strainer, and thus a clear, colorless solution of gum is obtained, while all the coloring matters are kept back by the alumina. It is generally sufficient to pour the solution of gum through a moist layer of hydrate of alumina. The more slowly the gum-water is filtered the more colorless it becomes. If perfect whiteness is to be obtained the filtration is repeated through fresh portions of hydrate of alumina.—*Muster Zeitung für Faerberei.*

A veteran compositor is employed at the printing office of Herr Hasse, at Prague. The career at case commenced before he was twelve years of age, and he is now seventy-eight; in other words, he has been working for sixty-six and a half years as compositor, and during the greater part of that time—viz., forty years—at his present employers.

PERFECTED STYLOGRAPHIC.

The original and genuine Pen. Warranted the best made. Thirteen Patents granted to A. T. CROSS, the last, June 20, 1880, being the most important and giving the name **Perfected**.

MAXIMUM.—Holds most ink of any pen made; tires the hand less than smaller barrels. Fits Hamble's Pocket. Same price as Long.

LONG.—The famous Desk Pen. Extra Long. Holds most ink, except the **Maximum**.

SHORT.—Most widely known and sold heretofore; but **Maximum** and **Long** are much better for desk or Hamble's Pocket. So this will be largely superseded.

GIANT, with Cord and Gold Ring, same price as Short.

LITTLE GIANT
Plain, \$3.00.
All Styles up to
\$4.50.

LITTLE GIANT,
The Ladies'
Favorite.

Thirteen patents granted; seven more applied for; more genuine improvements; better record; more styles; larger stock; more thoroughly protected by patents than all rivals combined. Dealers and agents supplied with wood, glass and paper signs, placards, circulars, leaflets and cuts. We make both largest and smallest Pens, all of which will have the new improvements. Sole Agents for the World. See Descriptive Circulars.

I WILL INSURE YOUR HOGS.

Dr. Jos. Haas' Hog AND Poultry Remedy.

THE ONLY SCIENTIFIC SWINE REMEDY COMPOUNDED.

Read My Propositions!

First—When my remedy is used as a preventive, I will insure hogs by the head for a year, and will make a deposit of money to make such insurance good. If any hogs die, they will be paid for from such deposit; you can refer to my bankers, Messrs. Fletcher & Sharpe, Indianapolis, Ind., for my standing financially.

Second—Where my expenses are paid, I will visit herds of not less than 100, and I will arrest the disease among them, or forfeit \$500.

Third—After hogs have been regulated with my remedy, I guarantee that the annual cost of feeding will not exceed 25 cents per head. Furthermore, that the increase of actual flesh will far more than pay for the remedy used.

SEND FOR IT!

It is not an experiment, but an established success. Remember, it is the only remedy that is used and indorsed by the great breeders of this country and England. It owes its great fame to its genuine merits, and every mail brings tidings of its good work. The evidence in its favor is so strong the most scientific men of the country have pronounced it the conqueror of this disease. It is gaining ground daily, and no hog raiser up with the times can do without it. It is not only a protection against disease, but it is a powerful appetizer.

Inquire of my Bankers, Messrs. Fletcher & Sharpe, Indianapolis, Ind., for my standing. Will make a deposit of necessary money, and will pay for all that die.

SEND FOR IT! I GUARANTEE IT WILL STOP THE COUGH AMONG HOGS

and put them in fine condition for fattening. It will expel the poison from their system, tone them up, and invigorate them generally. It will make them thrive so as to astonish you. It will pay such a large per cent. on the investment, that no one can afford to be without it.

REFER TO ANY WELL KNOWN BREEDER OR SHIPPER IN ANY PART OF THE COUNTRY.

J. H. Whetstone, druggist, Iowa City, says: "The Haas Remedy sells better and with less effort than any proprietary medicine I have ever undertaken to sell of any kind. We have nothing in stock to-day but what I would rather do without than the Haas Remedy."

C. H. Klauenburg, druggist, Carlinville, Ill., says: "The Remedy sells well, and is the best on earth."

O. A. Elliott, druggist, Russell, Ia., says: "The Remedy has given good satisfaction here."

J. N. Penn & Sons, druggists, Sydney, Ia., say: "We hear good reports from what we have sold."

Ed. J. Brown, druggist, Edina, Mo., says: "It has given general satisfaction in this county. Have sold \$1,000 worth in three months. Have tested its merits myself."

J. M. Kufer, druggist, Macomb, Ill., bought \$400 lot of Haas' Remedy and sold \$300 of it in seven weeks.

SEND FOR IT. LIBERAL TERMS TO THE TRADE. \$1.00, \$2.50, and \$5.00 packages. I can work up a trade for you. Terms, Circulars, &c., on application.

W. Harris, druggist, Storm Lake, Ia., says: "It has given splendid satisfaction."

J. C. Eacker, druggist, Elliott, Ia., says: "Have sold several orders and in every case satisfaction given."

A. P. Gano, druggist, Missouri City, Mo., says: "It will be a popular article in our drug market."

J. W. Wyman, druggist, Unionville, Ia., says: "It cures chicken cholera every time."

Smith & Thomas, druggists, Platte City, Mo., say: "It gives good satisfaction here."

Duffield & Harlan, druggists, Centerville, Ia., say: "It is entirely satisfactory."

Dr. S. S. Clayberg, druggist, Avon, Ill., says: "It gives good satisfaction here."

Melle Williams, druggist, Taylorville, Ill., says: "Have a good trade. It gives splendid satisfaction."

BYRON WESTON

DALTON, MASS., U.S.A.,

HAS BEEN AWARDED THE

GRAND PRIZE GOLD MEDAL

AND RECOMMENDED THE

Medal of Honor and Perfection

At PARIS, 1878,

This being the **HIGHEST** and **ONLY AWARD** given for

LINEN RECORD & LEDGER PAPER.

—A SPECIALTY.—

THIS Paper has received THE HIGHEST PREMIUM over all others from the Cincinnati Industrial Exhibition, Massachusetts Charitable Mechanics' Association, Franklin Institute of Philadelphia, Louisville Exposition, Medal and diploma from United States Centennial Commission, Medal of Progress American Institute, 1877, and Medal of Improvement and Progress, Boston, 1878. Its

PRINCIPAL ADVANTAGES

are as follows:—1. It contains more LINEN than any other Ledger Paper, has a longer fibre, and is, consequently, tougher. 2. Having a harder and better body, it frays less in erasure, so that by simply using the rubber after the eraser, the ink is prevented from spreading. 3. It is more uniform in Weight Color and Finish. 4. It never cockles if properly bound. 5. Its chemical action upon ink is such that it both writes and rules up better. For proof of the foregoing, refer to a large number of Stationers, Bookbinders, Bookkeepers, and Recorders, who have given it, after a severe test, the preference over all others. This paper is *Double Sized*, and will stand any climate or the most acid of fluid inks.

Send for sample sheet, **ERASE** and **REWRITE FOUR TIMES** on same spot.
Each sheet is water-marked with name and date.

A JOURNAL DEVOTED TO THE INTERESTS OF THE STATIONERY & FANCY GOODS TRADES

"The Stationer"—Every Thursday—\$2.00 Per Annum.

VOL. X.—NO. 19.

NEW YORK, NOVEMBER 10, 1881.

WHOLE NO. 333.

Correspondence.

CHICAGO MUSINGS.

[FROM OUR REGULAR CORRESPONDENT.]

WESTERN OFFICE LOCKWOOD PRESS,
8 LAKESIDE BUILDING, CHICAGO, ILL., NOV. 5, 1881.

"The quality of mercy is not strained" to-day any more than it was in the days of Portia. But there appears to exist a class of nondescript merchants in the world of business who have never felt the dropping of this "gentle dew from heaven." They are usually of the wealthier and more successful class, who could well afford to be merciful, or just—yet are not. Not content with accumulating rapid fortunes in their own legitimately chosen lines of business, they insidiously practice a high-seas piracy upon the trade of their neighbors. Such are the houses called "catch-penny" by your correspondent of last week, and they are plentiful east and west, north and south.

Here in Chicago, for instance, during the holiday season last year, three or four of our largest dry goods and notion houses sold unabridged dictionaries far below cost, and other standard books in proportion—not to mention the fearful onslaught made by them upon the holiday cards and fancy goods trade. This happened last year, and it will happen again this year, and will go on happening for years to come unless these tradesmen receive a check from conscience or from the trade. Now, as conscience will not be likely to interfere much in the matter, the check must come from the trade itself. But how?

The holiday season should be the most lucrative of the year to the bookseller, and would be were it not for these pirates from without, who slaughter books to catch customers in dry goods, so that the legitimate dealer must ruin himself or starve. This thing cannot go on forever; either the booksellers will be driven wholly from the business, or the trade will so arrange it that books shall be a luxury too expensive for outside parties to use for baiting traps. There seems to be no other way but this—that the publisher shall refuse any discount whatever on one or many books to any but an actual bookseller; then, if outsiders choose to indulge themselves in a little amusement of the usual kind, why, let them do it, and the expense of the amusement will soon right the wrongs of the trade.

Further than this little can be done. Legislatures cannot enact that a haberdasher shall not sell dictionaries, or a grocer sell poems; it is a matter between the wholesale and the retail

trade, and of an equal interest to both. Let them see to it.

I have said more than I intended, and probably more than any one wishes to hear upon the subject; but letters from all parts of the country, and complaints from almost every second man I meet, have decided me to say my say about the matter, and relieve my mind once for all. The same remarks will apply with equal force to the stationery and school-book trade.

C. M. Ward, representing the Springfield Printing Company, paid this office a pleasant call during the week. Mr. Ward reports a successful trip, in blank books and patent calendars.

L. W. Noyes, in his latest circular, thinks "a dictionary without a holder is a hidden treasure. To be of service, it must be used. To be used, it must be at hand when wanted; and, to be at hand when wanted, it must be placed in a holder. Every one who uses a dictionary should use the Noyes Dictionary Holder, and have the unwieldy Unabridged always ready for reference." That is just what I have been thinking for a long time, and would have said had I possessed the "gift of tongues." The holder is certainly a great convenience. Mr. Noyes is anxiously waiting for the first snow—we had a little one here the other day, but "that don't count"—when he will put his last and neatest, the wire sled, upon the market.

George H. Taylor & Co.'s new and handsome building is rapidly approaching completion, and will be ready for occupancy about January 1. The lease of the old store, having seven years yet to run, is offered for sale. G. B. H.

CINCINNATI CHIT-CHAT.

[FROM OUR REGULAR CORRESPONDENT.]

CINCINNATI, O., November 7, 1881.

How shall I begin this letter? Mine often infirmity is in not knowing how to quit a letter; but just now the tables have turned on me and I didn't know how to begin. But, you see, I've accomplished the feat—I've begun. It was done by taking up a pencil and going right along. But what next? How will the state of trade in Cincinnati do to go on with? That's just the thing; for I must give Chatfield & Woods and John Holland, and so on, "a rest." The state of trade's the thing. The state aforesaid, as touching the paper, the book and the stationery business, including stationers' hardware, slate pencils, paper barrels, illustrated books, and so on to the end of the list.

Well, the state under consideration is good; but that is not saying that it is better or worse than last week. It might be a great deal, a very

great deal worse and not be bad. It might be a great deal better, say ten-fold—nay a hundred-fold better, and then be only "good" in the estimation of these business people who are never satisfied. We have that sort right here, within a mile, some of them of the Garden of Eden—a real garden, with walks and lakes and subterranean rivers! No doubt the serpent is there too; and for convenience in getting rid of the subject, as well as for charity sake, we'll lay all this mischievous grumbling on him. Oh, you army of grumblers! remember it was the grumbling spirit, kindled and fanned into flame by the most ancient of serpents, that led to the expulsion from Eden and to the entailment upon us all of a large inheritance of woe.

But let us look the state of trade squarely in the face. Don't you see it in the figures? Why, last week, by the measure of her clearing-house exchanges, Cincinnati stood firmly at her post of fifth city in the Union, and Chicago stepped up third, with Boston for her file leader, and leaving Philadelphia at her back. Look out, ye cities of the sea coast, for see! the Star of Trade is following the Star of Empire, and now with their twin blazes cast loving rays into the great valley of the Father of Waters, as if they contemplated moving over and making a permanent settlement in the zenith above the centre of population? Do you say that is honey for Cincinnati? Very good. But I have some genuine vinegar for Cincinnati, which I shall proceed to administer presently, with the addition of a few drops of gall.

I might as well proceed with this sour-bitter business right away, and be done with it. I called on a large manufacturer and dealer in machinery, implements and materials which lie at the foundation of the book-maker's business. He has also a branch house in Chicago, which he established there about fifteen years ago. He actually told me that his sales to single individuals from his Chicago house were frequently—very frequently, if not usually—on a single order, greater in volume and value than those of all the single orders of all his customers in Cincinnati. And he has the frankness to say that it is not on account of any competition he has in his line of business in Cincinnati, but that in the business of map-making and book-making and bookbinding Chicago has gone away ahead of Cincinnati. But now I must salve this wound a little. It must be borne in mind, that while Cincinnati is right at the centre of population and Chicago is nearly three hundred miles away from it, Chicago is in the middle of a region of first-class common schools. Go east, go west, go north, go south, and Chicago's school-house region

is bounded by British America on the north, by the Alleghenies on the east, by the Rocky Mountains on the west, and alas! by the Ohio river on the south. Just think what correlatives the paper and stationery interests and the educational interests of the country are. Go north, go east, go west, from Cincinnati, and in the school-house you'll find the finest piece of architecture, the temple as it were in every hamlet. Go south, and the minute you leave the Ohio river you'll be struck with the contrast.

There are many worthy exceptions in Kentucky, but if you penetrate the country the contrast in some portions of the State becomes painful. The farther south one goes the stronger the contrast becomes. Communities that don't build school-houses everywhere and use them don't want books, and they patronize the gunsmith more than they do the printer or stationer. Right there is what chiefly makes the difference between Cincinnati and Chicago in the matter which has been considered. But the South is now shaking off the benumbing, deadly slumber of indifference to the matter of popular education and waking to its vast importance. Ten years will show great progress, and twenty will bring a revolution in this matter, and then Cincinnati will occupy not only the centre of the population, but the centre of the popular intelligence of this nation. Then the comparison between her and Chicago, as a consumer of machinery and material for book-making, will be flattering to our local pride.

I fear that I am following these vagaries, which I score up as I go along, too far. Let me get down to solid business.

The universal testimony here is that trade never was better—never so good. Hear a man say trade is bad, and set that man down as a bad tradesman, and you hit the nail on the head. The general testimony is that collections are easy and that payments are prompt, that country stocks have been absorbed by consumers, and that country dealers are laying in and have laid in replenishments never so generously. In fancy stationery, in toy books, in Christmas cards, in all sorts of stationery notions, the demand and the sale never was so great from country dealers as this year, and I have this from testimony.

Another circumstance is the fewness of failures. I recorded the assignment of H. H. Brennenman *et al.* of the Comango Wall Paper Company in my last. They are at it again—got a new set of books a day or two later, and are going right along.

There are not many traveling men from the East on the road in this part of the country—at all events not many of them call here. Among those who have given Cincinnati a call in the last fortnight are Frank Louders, with Tower Manufacturing Company, New York. Mr. Pomeroy, of Pomeroy & Son, Newark, N. J.; Leon Isaacs, Mr. Marks, of Dixon Pencil Co., a representative of A. & E. Wallach, N. Y., and a large number of men representing pocket-book houses.

PRINCE WILLIAM.

A patent has been applied for for an invention in telephones which, it is said, will do away with the "central office." The invention consists of a kind of "switch-board," which is attached to each telephone. When the subscriber wishes to put himself in communication with another subscriber, an indicator on the "switch-board" is set to a certain point, when the call is made and the conversation takes place.

LETTERS PATENT FOR INVENTIONS.

BY JAMES A. WHITNEY, COUNSELOR-AT-LAW.

III.

ORIGIN AND DEVELOPMENT OF THE FEDERAL PATENT LAW.

A hundred years before the Revolution, it had been remarked by European travelers in America that the inhabitants of the English colonies, beyond the people of any other country, were familiar with the study of the law. It was in this manner that the principles of English constitutional law were popularized; and it is safe to assume that those tendencies which recognized property in ideas as something to be fostered and protected, were familiar to the framers of the constitution. The paragraph of the latter, by virtue of which our present patent laws exist, was reported from the committee by Pinckney of South Carolina, and its liberal spirit is in accord with the high ethical ideas which actuated the architects of our written organic law. The language of the constitution on this head is as follows: "That Congress shall have power * * * to promote the progress of science and useful arts, by securing, for limited times, to authors and inventors, the exclusive right to their respective writings and discoveries."

This power, however, was not exercised until the year 1790, when an act was passed authorizing the granting of patents for new inventions. This statute was rigid and harsh, and modeled closely upon the severe practice of the English courts. It was only slightly ameliorated by succeeding acts, until that of the year 1836, which superseded the previous statutes and introduced striking and novel changes. This act of 1836, although since amended in many material respects, has never been absolutely superseded, so that the interpretation given to its provisions is still a matter of moment in the construction of recent laws. It differed from what had gone before principally in providing for governmental examinations as to the novelty of all applications for patents, whereas previously the applications were granted without examination, as was and still is the practice in England. This provision itself was not, as many supposed, a thing of American origin. It was taken almost bodily from a project propounded by an English lawyer before a committee of Parliament, from twelve to fifteen years before. That it has, to a certain extent, prevented the granting of invalid and futile patents, is undeniable; but it is equally true that the difficulties of the system have resulted in injustice to hundreds and thousands of inventors, and have led to complications in the administration of the law which are much to be regretted. Under the laws as they stood prior to July 4, 1836, the Patent Office, in the words of an old writer, "was merely a place of registry." One patent was issued on top of another of the same kind as fast as inventors chose to claim them. The law only declared that the inventor should give a description of his invention, and did not specify precisely how. Thus the old patents were for all sorts of things, and whether the invention was novel or not, ten chances to one if it was not lost in an action at law. The perfect ease with which infringers could kill old patents, caused it to be held in very light esteem.

This statement, however, is only measurably true. Some of the strongest patents that were ever granted were issued under this old order of things, and some of the best inventions that have ever been made have been strangled for years under the difficulties presented by the imperfections of governmental examinations. It may be

remarked, however, that having existed for more than 45 years, the latter practice is too firmly fastened upon the patent system to be dispensed with, and efforts should be directed, not to sweep it away, but to ameliorate the many difficulties which it presents in its practical applications.

As previously remarked, the principles of the English patent law were formulated in certain leading cases toward the end of the last century. The principles thus laid down became the guide of American judges in applying American law. They afforded, in fact, the only precedents from which any light could be obtained; and it is due to the memory of our own jurists to say that they much improved the doctrines of the foreign courts in applying them to American patent cases. It is related in the biography of Judge Story, that at the beginning of his judicial career, he had more apprehension of his success in the trial of patent cases than of any other; but finding that the lawyers knew much less of the subject than himself, he became encouraged to enlarge upon the law and to lay down precedents. He was the first of our jurists to take a comprehensive view of the ethical rights of inventors in their relation with those of the public, and although not uniformly infallible, his decisions, in the main, furnish an excellent digest of the foundation ideas upon which the law is at present administered.

The English practice, until comparatively recent years, has been to test patents for inventions by the strictest technical interpretation, and many valuable inventions were formerly thrown open to the public before the expiration of the patents upon them, upon objections more ingenious than just. This is now ameliorated. The American practice, however, had from the start a different tendency, and regarded the inventor as a public benefactor, to be encouraged by a liberal application of the principles of equity, a doctrine now also liberally established in Great Britain. This tendency, first enunciated by the courts, had a direct effect in modifying the harshness of the earlier statutes, and led to changes, most of which were beneficial. The principal of these was the amendment permitting an inventor to use his invention publicly for a short time before applying for a patent, that providing for the reissue of defective patents, and that providing for the determination of interfering applications in the Patent Office by a definite procedure based upon the doctrines and practice of equity. Each of these may properly form the subject of a future article.

SUBSTITUTE FOR PLATED METAL.

An inexpensive substitute for bell metal, silver, or electro-plated metal, used for various purposes in the arts and manufactures, is said to be produced as follows: 45 to 60 parts by weight of refined copper, 20 to 30 parts of zinc, 18 to 25 parts of nickel, and if the castings are required to be turned, 2 or 3 parts of lead. The proportions can be varied according to the purity of the metals used, and the color or quantity of the alloy to be produced. The copper and nickel are first melted together in a crucible, when the temperature is allowed to fall. When the zinc or zinc and lead are added with a small quantity of potash, soda and borax, the whole is covered with finely powdered charcoal. The temperature is then rapidly raised, and the whole well stirred, then skimmed, and immediately poured into the molds; or it may be cast into ingots first, in which case a greater percentage of zinc is added to make allowance for waste of metal in remelting. Articles made from this alloy, it is said, take a brilliant polish, and in appearance resemble silver or nickel.

OLD BERKSHIRE MILLS

DALTON, MASS., U. S. A.

One party writes: "The two hundred RECORD BOOKS, for 83 of the 99 Counties, now on exhibition at the Iowa State Fair, at Des Moines; and all, but four (!) of them, made from your 'OLD BERKSHIRE MILLS LINEN LEDGER,' Medium, 40lb., make a splendid show."

[The above cut is a fac-simile of the wrapper used on the Linen Ledger Paper.]

We will pay for any book rejected on account of fault in the paper. Send for Samples, test them in comparison, and see that your books are made from paper thus water-marked.

CARSON & BROWN CO., Manufacturers.

Extra Fine Papers

Manufactured by

Z. CRANE, JR., & BRO.,

DALTON, MASS., U. S. A.

These Papers, which are acknowledged to equal the finest foreign manufactures, are presented in the following styles and qualities:

REGULAR QUALITY.

In handsome Light Blue Packages containing one-quarter of a ream of Note Paper each, and bearing in blue letters description of contents.

In a separate Package of uniform size, is one-eighth of a thousand Envelopes corresponding in tint and quality to the paper.

EXTRA QUALITY.

In attractive Lavender Colored Boxes containing one-quarter ream of Extra Fine Paper each, with contents printed in red. Corresponding to this, in like Boxes, are Envelopes to match.

All this Stationery may be relied on to be according to representation. It is suited to the tastes of the most select trade.

In addition to the above lines, our other Specialties are put up with care, in attractive and substantial form. Goods can be seen at the Mill, or New York Office, 47 Beekman Street. GEO. B. HURD, Gen'l Agent.

FACTS.

From Paper Trade Journal, November 5.

In a late issue of a contemporary we find an article on "American Blotting Paper: Some Facts about its Origin and its First Manufacturers."

This article is a biographical sketch of Joseph Parker, with some particulars about the introduction of blotting paper as made by Parker's firm. He is asserted to be the first man to make blotting paper in this country.

It seems that in 1856 Parker was present at the opening of a case of English blotting

as their book and other papers, each lot being numbered in course, without reference to weight, and so continued until 1860, when their customers, who acknowledged the paper to be superior to the English make, requested them to establish their Treasury by numbers, for four thicknesses, viz.: # 60, # 80, # 100, and # 120. Later on, a heavier paper was called for, which the old machine could not produce, and in 1866 they erected a new machine, and in 1868 they made their first order for blotting-pad weighing 140 pounds to the ream, the thickest sheet of blotting paper in use, and which has steadily gained in favor, and, with the

Having determined to grant this request, the Parkers selected the same figures—viz., 60, 80, 100, and 120—which were before supposed to represent the *weight* of their paper. They stenciled these figures on the *end* of the packages, in the exact place where *weight* marks usually appear on most kinds of paper, and they *allege* that they always put in front of these figures the sign or emblem, a double cross, #, to represent *number*.

This sign is used for this purpose at times, but it is also used to designate *pounds*, and this fact does not seem to have deterred the Parkers from adopting a system which

MEMORANDUM.

THE AMERICAN STATIONER.
STATIONERS' PRICE BOOK.

From

HOWARD LOCKWOOD,

PUBLISHER,

No. 74 Duane Street,

NEW-YORK.

Feb 21 1876
To Mr. Willy Wallach
City-

Dear Sir: Will you kindly inform me the real price of "Parkers Treasury Blotting". and whether there is any discount. also what do jobbers usually get for it. By so doing you will emphasize me in

Treasury Blotting cost 23^{cts} per lb. Howard Lockwood
scale weight 3 months or 1 1/2% for Cash. The paper is
made short weight, say 100 lb weigh 90 lb and the
jobbers sell long weight say \$100 for \$23.

paper in a stationer's store in this city. He chanced to have with him a thick sheet of paper made for a manufacturing concern to attach samples of its goods to. An examination and comparison showed that Parker's sheet was equal as an absorbent to the English board.

To this incident Parker owed the idea of making American blotting board, and he began its manufacture.

Up to 1860 there was very little used, "the entire demand for four years exceeded by only a trifle the sale of a single month now."

Quoting further from this article, which shows on its face the source from which it was produced, we are told: "At first, their blotting was prepared for the market same

Commercial, continues with the weight marked on each bundle to the present time."

The statement that the Parkers' customers requested them to establish their Treasury by numbers, for four thicknesses, agrees with the statement made by Parker, Son & Co. in their letter to the *Publishers' Weekly*, under date of April 4, 1876, when they said: "It was at this period the dealers requested our paper to be put up by numbers and sold to them by scale weight."

According to both our contemporaries and the Parkers, as above quoted, it was in 1860 that the dealers (i. e., the *jobbers*) asked that this system should be inaugurated, and to this day the Parkers make and mark their goods in accordance with this "request."

might mislead the retail trade. Nor did they adopt the abbreviation "No." for number, or better still, some figures other than old weight marks; for instance, No. 5, No. 10, No. 15, No. 20, instead of # 60, # 80, # 100, # 120.

Years after, they made a *poorer* quality of blotting, about which, strange to say, the dealers had no "requests" to make; they stenciled it with the same figures, as used on their Treasury, viz., 60, 80, 100, 120, with no signs, but ran the *poorer* paper in *weight* to *equal* the marks on the packages.

Now, it is conceded by the Parkers, and all who buy their "Treasury," that it runs uniformly about 10 per cent. short in actual weight of the so-called number marks on

the packages, *i. e.*, 60 weighs 56 pounds, 80 weighs 72 pounds, 100 weighs 90 pounds, and 120 weighs 108 pounds.

Again, referring to the extract above, we learn that a heavier weight was required, and a new machine had to be built. The result was the production of a blotting-pad, weighing 140 pounds to the ream, *actual weight*. This heaviest weight of "Treasury" is marked 140, its actual weight, and we fail to find the # sign. Why this peculiar change was made no one explains, but it is to be presumed that the jobbers did not care much about this weight, or they would have asked that it should be marked like the others, and that it should weigh 126 pounds instead of 140.

They had every right to suppose that the Parkers would have acceded to such a request. The latter had been persuaded before to make this distinction with the other weights; but the jobbers failed to ask that this slight change should be made, and the result is, therefore, that the principal product of the Parkers is sold to the trade by two different systems, *i. e.*, up to 140 "Treasury" weighs on the scales about 10 per cent. short of the so-called number marks; 140 weighs full, and all of the Commercial or second grade weighs full, as represented by the figures on the bundles, *the same figures being used on "Treasury" blotting as so-called numbers*.

Six years ago the Parkers addressed a letter to the publisher of this paper asking him to correct the quotation of 21 cents *mill* price of Treasury. We had quoted in this paper and in the *American Stationer*, for years, Treasury blotting in different colors, 60, 80, 100, 120 *pounds* to the ream—*per pound* 23 cents. We knew the Parkers had seen these quotations, because they had asked and secured certain changes in the phrasing of them. They next asked us to say that they had not sold their paper for fourteen years for less than 23 cents per pound at the mill. We could not see how the mill and jobbing price could be the same, and immediately on receipt of their letter we wrote a note to Willy Wallach, President of the Stationers' Board of Trade, and a leading jobber and retailer. His reply is appended to our memorandum, and we present our readers with a fac-simile of the document.

This was a revelation to us and explained why the mill and jobbing prices of "Treasury" were apparently the same.

We were asked by the Parkers—in fact, they demanded it of us as a matter of "simple justice"—to correct a so-called mistake. We had been informed that the margin to the jobbers was about 10 per cent. Not knowing that this discount was given them in the shape of "short weight," and having the jobbing price quoted at 23 cents, we quoted mill price at 21 cents.

We had been deceived by the Parkers' system, and they themselves had misled us by allowing us for years to quote their paper at 23 cents per pound, when the true jobbers' price was 25½ cents.

Our columns had for years misquoted the price of one of the standard articles in the trade, and it was through and by means of this system of marking "Treasury" that we were led into error and had advertised for years to the trade in every section of the country what were really false and deceptive quotations.

Mr. Wallach's memorandum, couched in clear, concise terms, told in a few words the exact situation. Our first feeling was one of amazement—that a firm of the general reputation of the Parkers should have adopted a system of marking its goods, which was, at least, likely to deceive, and which could be easily used to deceive the unwary buyer.

That a standard article of merchandise, branded with the manufacturer's name and address—and also with a trade mark, an arbitrary symbol, which should guarantee the perfectness of the article on which it is stamped—should be placed on the market, under a system by which purchasers, other than those who buy directly of the mill, obtain, or are likely to obtain, a paper about 10 per cent. less in weight than they had ordered or agreed to take, seemed to us incredible.

Investigation among all classes of dealers confirmed the statement that while the manufacturers sold "Treasury" at scale weight, the jobbers uniformly quoted it as weighing according to the so-called number marks on the packages, and so billed it to their customers. All of the jobbers' invoices to their trade, which we examined, showed in every instance that they billed it at 60, 80, 100 or 120 pounds to the ream. The price lists and catalogues of all of the leading jobbers, with two or three exceptions, in this and other leading cities, all quoted "Treasury" so many *pounds to the ream*.

Under these circumstances we felt that there was sufficient evidence to prove that the trade, outside of those dealing directly with the Parkers, had been and were likely to be deceived. We, therefore, thought that it was the duty of THE JOURNAL, devoted as it is to promoting the interests of all branches of the trade, to explain exactly how the Parkers put their paper on the market.

We were asked to correct a so-called mistake. We did so, by publishing the language of Mr. Wallach's memorandum, without using his name, and by giving the whole matter a full explanation.

Knowing how easy and usual it is for manufacturers of staple goods to protect the jobbers, by establishing a certain uniform line of discounts, we thought that this system of cutting in weight, in lieu of discount, was wrong and unfortunate, and we so denounced it.

Now that the Parkers are again before the trade in the columns of a contemporary with a repetition of their sophistical and specious statement regarding a system of marketing their goods, and which we are safe in saying that the whole trade join us in condemning, we again consider it our duty to call the at-

tention of every merchant in the trade to the facts as they exist undisputed by the Parkers.

The Parkers, even after their attention had been called to the fact that their system was not only likely to deceive, but had deceived many dealers and consumers, adhered to it, and as yet show no signs of changing their method.

We have said that the Parkers know that their system is likely to deceive, and that it has misled buyers. We will now show how they know these facts by making a brief examination of the testimony of three leading New York stationers, given under oath: Edward R. Wilbur, of the old and responsible firm of Wilbur & Hastings, Fulton street; Willy Wallach, President of the Stationers' Board of Trade, and Stephen A. Tower, head of the well-known firms of Cutter, Tower & Co., Tower, Gildersleeve & Co., and the present Tower Manufacturing Company.

The depositions of these gentlemen were taken before a commissioner in this city, to be used in the Connecticut courts in a civil suit for alleged libel, brought against the publisher of THE JOURNAL by the Parkers in July, 1880. In their complaint the Parkers swear that they never put "short weight" paper on the market; that we libeled them in making such a statement, and also by saying that the claim that their "Treasury" was made by some secret process was "arrant humbug." The Parkers have done nothing in this case since beginning the action and have only very recently joined formal issue.

The important feature of Mr. Wallach's testimony was in reference to the memorandum, a fac-simile of which we have presented. Mr. Wallach acknowledged having written it, and explained that the characters after the figures 100 and 90 were abbreviations of the word *pounds*. He explained that in former years he had bought "Treasury" of the jobbers, and that when Parker called on him to request his direct orders, he told him that there was no object, inasmuch as he offered no better price than the jobbers did. Parker then described the nature of the *discount* which he gave the jobbers and his method of protecting them, and thereafter Mr. Wallach sent his orders direct to the mill. He said that some of his customers had complained of short weight about the time of the *American Stationer's exposé*, and that he had explained that his house sold the paper by the ream. According to Mr. Wallach's memorandum, the so-called number marks on "Treasury" represent the "long weight." He further testified that he determined the ream price by multiplying the so-called number or "long weight" marks by a pound price, generally the price per pound paid for the short or net weight to the Parkers.

Edward R. Wilbur testified that for many years he had been a retail stationer, and had always bought an English blotting paper, until his attention was called to Parker's, and it being, as he thought, cheaper, he

adopted it for regular sale. He bought it of the jobbers, of whom he had regular quotations, by the *pound*. He identified several invoices of different lots of "Treasury," bought by him of various jobbers. These invoices called for different quantities of "Treasury," 100 pounds to the ream. He always took the figures on the end of the packages to be *weight* marks, and never noticed the small double cross #. He never knew that the paper weighed 10 per cent. short of the marks on the bundles and was first informed of it by the publications in the *Stationer*, to which paper he was a subscriber. He never knew Mr. Lockwood or met him until he called on him and requested him to testify in this case. When asked how he designated a system of selling paper, when the ream by actual weight was lighter by 10 per cent. than the figures on the end of the bundles, prefixed by a double cross, #, indicated, and when the ream price was determined by multiplying these figures, preceded by the said sign, by a certain price per pound, he replied: "I call it a short-weight system."

Stephen A. Tower testified that he first bought "Treasury" of the jobbers, and that it "was put up by weights on wrappers and sold to us by the pound, if I am not mistaken. If we wanted a 100-pound blotting, an 80-pound blotting, we so ordered it. It was billed to us so much a pound." He had bought of the Parkers' firm for about twelve or fifteen years. When ordering it of the Parkers, "we order by the weight and by the color we want; it is put up, some of it in quarter reams and some in half reams, and marked the corresponding weights ordered." He had weighed "Treasury," and stated: "If my memory serves me right, what is marked 140, weighs plump 140 pounds; the other weights, I think, fall short about 10 per cent." He had known the fact just stated since 1864 or 1866. When asked under what circumstances he found out the facts as stated, he testified: "This was called to my attention by selling 140-pound and billing the same to a stationery house in Buffalo—the name I can't recall; and, I think, I asked the manufacturers to send it direct; and bills previous had been made to us with a discount; and, not observing the bill, I billed it the same as Mr. Parker had billed it to me, supposing that the same discount would follow that weight as it does the other weights of blotting, which averages about 10 per cent., I believe; I therefore lost my profit; did not make any profit on the transaction." When asked to explain the nature of the manufacturer's discount, Mr. Tower said: "I think it is about 10 per cent. difference in weight—that is, the manufacturer bills the paper to us net weight; this paper, this 'Treasury' blotting, is known in the market and in the trade as being about 10 per cent. lighter than the numbers or marks marked on the bundles of the weight under 140, and we sell it as marked—that is, if you come to

me to buy 100 pounds 'Treasury' blotting, I'd give it to you marked 100 pounds—that is, I would tell my clerk to get down a 100-pound package of blotting—i. e., 'Treasury,' and sell it. In connection with that where we sell to retail trade, we sell it the marked weight. Now we job the paper at a discount, as we can agree." Again he stated: "It is our custom to retail the paper at the marked weight, or the number that is on the paper. If it is a 100, we call it a 100; a 120, we call 120 pounds."

On cross-examination Mr. Tower stated:

"I have observed the numbers 60, 80, 100 and 120, and the rest of the printing that designates Mr. Parker's paper, except the prefix before the figures. If I should order to-day from Mr. Parker, I should order by the number on his paper the weights I wanted." Plaintiffs' counsel gave notice that they should move to have this answer stricken out. Farther on Mr. Tower said: "We sell some of our trade the paper as indicated on the wrapper—that is, 80 we sell for 80 pounds, 120 we sell for 120 pounds, that is, the consuming trade. Plaintiffs' counsel then asked.

Q. In so selling to consumers, do you regard yourself as guilty of imposition upon your customers or of immoral practices in the conduct and transaction of your business?

A. "No sir, I do not. I sell the paper to my customer just as Mr. Parker sells it to me; that is, when I sell a retail customer I sell it as marked; don't give any discount off; I sell it as it is marked on the packages."

When asked whether his customers were posted as to the actual weights of "Treasury," or if he had advised them on the matter, he replied: "The jobbing trade, as far as my knowledge goes, understands the representations of these numbers, as weights of Parker's blotting paper 'Treasury.' I have never so advised them as to actual weights, but filled their orders as represented by them, corresponding with Mr. Parker's figures on his 'Treasury'—I don't know as to whether they are posted as to actual weights."

When asked how he sold legal cap paper, he answered: "We sell legal cap as marked on the wrapper, and other papers the same way. When these goods come from the mills we weigh them."

Q. Do you find some of these short weight?

A. Rarely from established manufacturers.

He knew Mr. Lockwood, but was not well acquainted with him. "I did not know him the other day; I have had about ten minutes' conversation with Mr. Lockwood."

On re-direct examination Mr. Tower was asked:

Q. You say in your cross-examination, in answer to the question "whether you have ever known of any immoral or deceptive practices of Joseph Parker & Son or their predecessors in your business intercourse with them," you answer "No, I have not; nothing, only the trade object to their marks put on their paper." Why do the trade object?

A. Their objection is to the figures put on their "Treasury" blotting which they consider weight, is not weight but Mr. Parker's number.

Q. As a dealer what objection is there to that system, if any?

A. As a dealer, speaking of myself, that system

being so long established, we know what the figures indicate and no objection to us.

Q. What objection to anyone in the trade?

A. Some complain of Mr. Parker numbering the same as the weights indicate to parties who don't know the difference. I would say that some trade take the figures for weight.

Q. You have stated what they objected to; now I ask why they object to it?

A. Because the figures there were not correct, as they supposed the paper weighed. I mean to say that they take the figures on the bundles to represent weight.

Q. Is there any portion of the trade deceived thereby?

A. Some of the trade complain of the numbers not corresponding with the weight.

Q. What did they say when they complained?

A. That the weight, as they suppose these numbers represented on our bill, when weighed, did not agree.

When asked in regard to the sale to the Buffalo party and the loss of profit on the sale of 140-pound "Treasury," and as to whose fault it was, Mr. Tower answered as follows: "I attribute it to the Parkers not carrying out their system of numbers on this particular weight, which I don't ever have any recollection of buying before, and supposed the same percentage of short weight followed that as his other numbered paper, viz., 60, 80, 100 and 120."

When asked who the other party was who claimed shortage, and the circumstances of the transaction, he replied: "I can't give the number of reams nor the weight; it was the Western Union Telegraph Company sold to; we billed it the same as the numbers on the bundle indicated, which I took to be pounds, and so billed it. Mr. Beach or Mr. Hunter acted for the company; they claimed shortage." Having written the Parkers, they replied they only sold scale weight. The Parkers made no allowance.

Defendant's counsel showed Mr. Tower a catalogue of stationery goods. He identified it as being one published by his firm in 1867, and stated that the list of first quality blotting paper on page 31, which read 60, 80, 100 and 120 pounds to the ream, referred to Parker's "Treasury."

Q. You said on your cross examination that you went down and examined your stock yesterday, and found a number mark preceding the figures on end of wrappers, corresponding with Exhibit B. When did you purchase that stock?

A. Last month.

Q. Can you swear whether or not you have ever seen on packages of "Treasury" received from manufacturers the abbreviation "lbs." in writing or print after the figures?

A. To the best of my knowledge when I first commenced buying Parker's Treasury blotter it did have "lbs." in script after the figures.

Q. Have you ever seen it (the sign #) printed on any package of stationery or paper other than Parkers' to indicate the abbreviation "No."?

A. To the best knowledge, I never did.

Q. Please look at that paper; what is it?

A. It is a bill of blotting paper, bought of Melvin Hard & Son; bought August 19, 1874—one ream, 120 pounds, "Treasury" blotting at 23 cents, less 2½¢.

Q. Did your firm receive and pay for that blotting?

A. Yes sir; I think we did. It has the check on it.

Q. How much more did you pay for that than you would have done if you had bought it direct of the Parkers?

A. In one case, that of Melvin Hard, we paid for

the 120-pound paper as per mark or figures, put on by the manufacturer and billed as pounds by the said Melvin Hard & Son—the other case, if bought of Joseph Parker & Son we should have had it billed to its actual scale weight, which is on an average from 8 to 10 per cent. less than the figures on said paper.

On re-cross examination counsel for plaintiffs, after a number of questions relative to the marks on "Treasury," asked the witness:

Q. Do you mean to say those figures 60, 80, 100 and 120 on the wrapper with the prefix to which I have called your attention, conveyed to your mind that those packages weighed respectively 60, 80, 100 and 120 pounds to the ream?

A. The prefix to the figures on the respective weights of paper was never called to my mind (or number) till this suit was commenced, and the number or figures on the respective papers have passed by me, and by the trade, as weights, and have done so to this day.

Last question was repeated.

A. So it is established in the trade, and passes current with it.

Question was again repeated.

A. We have so called them, and so bought them of dealers dealing in Mr. Parker's blotting, but not of Mr. Parker.

Question repeated again.

A. We have so called them and so sold the goods.

Question again repeated.

A. They did up to the time that I was called here as a witness.

Q. How long, Mr. Tower, have you been of the impression that bundles of Parker's "Treasury," marked 60, 80, 100 and 120, with the prefix that I have called your attention to, weighed respectively 60, 80, 100 and 120 pounds to the ream?

A. They have been bought and sold in that way since I was in the trade and have sold blotting—outside of Mr. Parker.

Question repeated.

A. As long as I have been in business it has passed so among the trade. I have bought it and sold it so, not of Mr. Parker.

Question repeated.

A. I can't state the time that my attention was called to the fact that Mr. Parker sold us the paper scale weight, but we were accustomed to buying the paper of dealers in the market by the figures on the end of such bundles respectively 60, 80, 100, and 120 as weights.

Farther on he testified that he always ordered "Treasury" of the Parkers by weights, and never knew anything about numbers till this suit commenced. Also, that he had never received any samples, advertisements, circulars, or advices explaining how "Treasury" was put up.

Q. You say, "As the bundles indicated weight" on your previous examination, and yet you say you are fully posted that they did not indicate weight, but that you sold as if they did indicate weight. How do you reconcile all that?

A. I never said bundles indicated weight. I said the figures on bundles indicated weight to the trade generally, outside of the Parkers, and were so bought and sold.

Q. Is it not incorrect or rather misleading to say that the numbers on Parker's "Treasury" indicate pounds weight?

A. To me it never was before this trial commenced. It shows by these letters I ordered so from the Parkers'.

Q. When you bought of other parties than the plaintiffs or their predecessors, who sold to you, as I understand you, as if the figures on the wrappers in every instance indicated weight, were you deceived or in any wise imposed upon, and if so by whom?

A. I never was deceived or imposed upon, after I

knew the custom of the trade handling his blotting, and that was from ten or twelve years ago.

The deposition of Mr. Tower, from which we have made the above extracts, is dated February 25, 1881. Those of Messrs. Wallach and Wilbur were taken during a few weeks previous to that date.

Joseph Parker was personally present at most of these examinations.

If the Parkers had any doubt that their system might mislead the trade, they certainly cannot be ignorant that this is the case after hearing this testimony.

When we first called attention to this matter in 1876, the *Publishers' Weekly*, in whose columns a letter from the Parkers, before referred to, appeared, pronounced the system "an unfortunate one, which should never have been adopted, and ought now to be abandoned." The Parkers have not acted on the suggestion, and still continue to follow a practice which is not yet fully understood by all and is still likely to deceive.

If there is one thing an American merchant likes, it is to be met by fair, manly competition.

Our first point in this controversy, that Parker's "Treasury" is not offered fairly in competition with other papers, on account of this system, we still claim to be well taken. Parker's "Treasury" is the only blotting paper now offered to the trade that does not scale the weight as indicated on its bundles. All other brands are stenciled with the same figures, 60, 80, 100 and 120, and weigh full up to these marks; and yet, Joseph Parker & Son swear to legal papers, alleging that they have never put short-weight paper on the market.

This whole question is one of vital interest to every member of the trade. The system is either right or wrong. If wrong, the trade can no longer afford to allow a single firm to compromise them. The jobbers excuse themselves by the statement that they know others will deliver the goods if they do not, and by the feeling that possibly their customers may know that they are paying $2\frac{1}{2}$ cents per pound more than quoted to them, or that they might know that they are buying "short-weight" paper.

It seems that the Western Union Telegraph Company, a very large consumer, did not know this fact, and had it bought of any other jobber besides Mr. Tower it would have had the same cause of complaint.

The paper and stationery trades cannot afford to be thus compromised in the estimation of other lines of business. Short-weight and short-count practices have always brought disrepute on the trade. Why can't they be stamped out at one blow? If they are so well known as merchants who practise them claim, where is the object of keeping them up? A time will never arrive when these practices shall be so well known that some one will not be deceived.

Time is infinitely long, and each day is a vessel into which a great deal may be poured, if one will actually fill it up.

NEW PATENTS.

No. 248,579. Atomizer for Coloring Pictures.—Leslie L. Curtis, Cape Elizabeth, Me.

No. 248,605. Adding Machine.—William Perry, Santa Barbara, Cal.

In a calculating machine, finger guides by means of which a rotating wheel can be operated by the finger, guided by the sense of feeling.

No. 248,617. Match Box.—William Simonds, Hartford, Conn.

No. 248,627. Portable Writing Desk.—Hawley C. White, North Bennington, Vt.

A portable writing desk having the halves and the two lids united by a compound hinge, made of cloth or analogous flexible material, tucked in grooves in both the halves of the desk and in the edges of the lids.

No. 248,630. Toilet Article.—Isaac N. Arment and Allen E. Scott, Dayton, Wash.

The combination, with a hair brush having a chamber formed in its upper side and its sides or edges provided with guide grooves, of a removable glass back or top plate sliding into the guide grooves, and a support hinged at one end to and folding against the under side of the back or top plate and sliding with the latter into the chamber in the brush.

No. 248,659. Object Teaching Frame.—Diedrich C. Luening, Milwaukee, Wis.

A frame for teaching children objectively, composed of a front and back separated from each other by vertical and horizontal strips or partitions and the front cut out to exhibit the outlines of figures and objects, in combination with variously colored strips adapted to be thrust between the front and back and bring out the figures by contrast.

No. 248,692. Former for Pulp Pails.—John W. Bartlett, Grand Rapids, Mich.

The combination, with a conical former, of an expandable head having plates provided with flanges to form the crease and chine of the pail.

No. 248,739. Paper-Bag Machine.—Charles Harris and Joseph Fletcher, Manchester, county of Lancaster, England. Patented in England March 14, 1877.

After the tube is formed it is fed between shears having paste-conveying cords on each blade, which, as the tube is cut off, apply a line of paste to the outside of the upper and lower plies of the tube. A tongue supported on a reciprocating follower within the tube swings down, and thus partly opens the tube, when diagonally disposed folding-leaves lay the under ply back into the diamond form. The back edge of said folders forms a guide, over or against which a transverse back-point folder forms the second fold. A similar front-point folder swings down and under, folding the front point and completing the bag.

No. 248,741. Temporary Binder.—Frederick S. Hasbrouck, New York, N. Y.

A box or case having an open top and front side, and provided with a flexible cover attached to the front edge of the bottom wall flush with the lower surface of the same, and constructed to fold over the open front and top, and overlap and bear against the edges of the end walls of the box or case, and to open and spread out on a plane flush or coincident with the lower surface of the bottom wall and throughout its extent on the same support as the box or case.

No. 248,756. Twine and Thread Cutter.—Frederick Kampfe and Otto Kampfe, New York, N. Y.

REISSUES.

No. 9,910. Dating, Canceling, and other Stamps.—George E. Emerson, San Francisco, Cal., assignor, by mesne assignments, of one-half to Joe Emerich and Amos Burr, same place. Original No. 224,660, dated February 17, 1880.

Sole American Agents of the Clothiers' Pens.

Trade Gossip.

All new goods and designs which are not, strictly speaking, "Novelties" will be noticed under this head. The trade are requested to forward descriptions with samples in order to secure proper notice.

J. W. Cree, fancy goods dealer, Meadville, Pa., has failed.

W. E. Keirney, printer, Sutton, Ont., has sold out to John Amos.

William Baughan, bookseller and stationer, Greenbury, Pa., has sold out.

The Globe Publishing Company, Cincinnati, O., have made an assignment.

S. E. Eddy has succeeded S. E. Eddy & Co., stationers, &c., Fort Collins, Col.

The Muldoon Printing Company, Ouray, Col., has made an application for a receiver.

Schmolze Brothers & Wilhelms, lithographers, New York city, have dissolved partnership.

Chalfant & Parker, publishers of the *Independent*, Independence, Cal., have dissolved partnership.

Durisse & Daley, publishers of the *Edgefield Chronicle*, Edgefield Court House, S. C., have been burned out.

The firm of Charles F. Peck & Co., printers, Pittsburgh, Pa., has been dissolved by the retirement of A. A. Jackson. Chas. F. Peck continues.

The firm of Eugene Ely & Son, paper-stock dealers, New York city, has been dissolved by the death of Eugene Ely. Cheever N. Ely continues under the old style.

Rudolph & Sentman, manufacturers of and wholesale dealers in paper, Philadelphia, Pa., have dissolved partnership. Philip Rudolph continues alone. Robert A. Sentman & Son also continue in business.

The firm of Cosack & Clark, lithographers, Buffalo, N. Y., has been dissolved by the death of Edwin A. Clark. Herman Cosack, H. T. Koerner and Charles E. Hayes have formed a new partnership, and will continue under the style of Cosack & Co.

Rosenbaum & Co., Philadelphia, have an extraordinary large sale for their small fancy easels, which they manufacture in great quantities. Their assortment is said to be one of the best to be found. They have also as much as they can do to attend to the orders they receive for fringing Christmas and holiday cards for the trade.

Langfeld, Turner & Andrews, Philadelphia, the great manufacturers of fine leather goods, are working twenty hours a day, and are yet behind with their orders. They would take any number of skilled hands in their trade. The amount of business they will have done this year will exceed any figure they anticipated.

A meeting of the creditors of Abel Brothers, Denver, Col., dealers in fancy goods and general merchandise, was held on Thursday of last week, at the Astor House, in this city, several of our city houses who are creditors being present, or represented. A statement was offered showing liabilities of about \$60,000, and assets nominally of about the same amount. The firm proposed to pay in settlement 40 per cent.—part cash, part time, and secured. This the creditors refused, whereupon the firm increased its offer to 50 per cent., which was finally accepted, and a settlement was agreed upon on this basis.

McLoughlin Brothers have just published another book of the New Aunt Louisa Series, called "The Lightning Express." It contains nine full-page illustrations, printed in oil colors, and representing the wonderful exploits of the lightning express train. This firm has also the following named books in stiff board covers, profusely illustrated, viz.: "Afternoon Tea" and Hans Hucklebein's "Batch of Odd Stories from the German;" Kate Greenaway's "Painting Book;" "Little Folks' Painting Book;" a new edition of "Robinson Crusoe" in words of one syllable, in imitation cloth, with gilt side, and two new sets of Criss-Cross spelling slips; "Three Little Kittens" and "Three Good Friends." The house has also introduced a new set of building blocks known as "Cob-house blocks"—which make five houses and six picture-puzzles, and a new Japanese game of cash, which is gotten up in a very handsome and showy style.

The elaborately executed steel engravings produced by Ralph Trautmann, 312 Broadway, meet with the highest commendation everywhere they are seen. As previously mentioned these engravings include cabinet sized portraits of all the presidents of the United States and of eminent authors and poets. The correctness of these portraits and their excellent execution are much spoken of, and every lover of art should possess them. At present they are meeting with a large sale. All stationers ought to have them.

Charles J. Cohen, Philadelphia, has just received the new "Mammoth" block lately introduced by Crandall. It is admirably designed to amuse and interest the little ones, and is a marvel of compactness, when opened being 4 to 5 feet high and closed not more than 8 inches. Mr. Cohen is also introducing to his trade a new line of gold-plated pencil cases fitted with copying leads. These are in great demand, having been sought by consumers for a long while.

The Springfield City Paper Company, Springfield, Mass., is the originator of a very handsome papererie it calls the Universal Papererie. It combines neatness of style as well as many other more substantial points. The demand already for this new style of papererie is said to be very great, as it recommends itself to the trade.

A. M. Collins, Cope & Co.'s list of advertising novelties in business cards and of folding cards or covers presents many novelties. The trade are invited to send for the latest price list. Some of new designs are quite original in style and fresh in idea, and will attract attention.

Theodore Leonhardt & Son, Philadelphia, have received a new invoice of French puzzle cards, which sell very rapidly. They are printed in blue, and are composed of ten different designs. They are said to excel anything of the kind so far imported.

James W. Nagle, of the firm of Nagle & Ryckman, publisher of the *Textile Record*, Philadelphia, Pa., has sold out his interest to William V. Christie.

R. Fideau, 16 Beekman street, has made a contract with a leading house of this city to deliver by May 1 next two hundred gross of his "Union" school bags.

T. H. Butler & Co., publishers of school-books, Philadelphia, Pa., have dissolved partnership. E. H. Butler continues under the style of E. H. Butler & Co.

Corse, Woodbury & Smith, dealers in paper hangings, Boston, Mass., have dissolved partnership. Corse & Woodbury continue.

S. W. Green's Son forwards a sample book of type and tables which will be found useful to printers, stationers, &c.

W. H. Hill, Worcester, Mass., is turning out 1,250,000 envelopes per day.

Jansen, McClurg & Co., Chicago, announce the publication of "Maurine, and other Poems," by Ella Wheeler.

The style of E. P. Howbert & Co., booksellers and stationers, Colorado Springs, Col., has been changed to Howbert Brothers.

Daugherty, Gordon & Thurston, wholesale and retail booksellers and stationers, Wabash, Ind., have sold out to Linn & Leedy.

Punderson & Crisand, lithographers and printers, New Haven, Conn., have dissolved partnership. L. S. Punderson continues.

Jansen, McClurg & Co., Chicago, announce "Tales of the Caravan, Inn and the Palace," translated from the German of William Haupf, by Edward L. Stowell, with original illustrations.

W. H. Hill, Worcester, Mass., is authority for the statement that he and the Holyoke Envelope Company are not working together for the stamped envelope contract, notwithstanding reports to the contrary.

The Springfield City Paper Co. has undergone a change, E. C. Le Bourgeois having bought out the other members of the company. The style of the firm will be retained, and both Mr. Franklin and Mr. Birnie will continue in the service of the company.

The game of "Old Maid Improved," patented and published this season by Milton Bradley & Co., is so popular that the first large edition was exhausted some weeks ago, and a second edition is just out. The designs in oil colors are very attractive, and the combinations outside of the merits of the game proper are pleasing.

Milton Bradley & Co., claim to have made a special effort this year to adapt their novelties largely to the wants of the stationery trade, and they show a fine line of new games, &c., which cannot be objectionable to any class of trade, while their larger toys are so well finished and so ornamental that they are not out of place in any holiday stock, even where they are not carried regularly through the year.

The Beacon Publishing Company, Akron, O., forward specimens of printing in the form of a card and bill-head which present a brilliant and attractive appearance, displaying eight different colors, the prevailing colors being red, blue, black and gold, and no less than three different tints are used for a background. Both card and bill-head are well designed, the prominent feature of each being an illustration of a ledger in five colors, and especially well registered. As a whole it reflects great credit on the firm for the taste and skill displayed.

Central Office Detectives Radford and Darcy took to police headquarters on Tuesday, Sproule Magee, aged 27, of No. 17 Dey street, and No. 26 West Fifteenth street, who is accused of forgery by John H. Greene, a note broker of No. 77 Cedar street. Recently the prisoner obtained \$900 from Mr. Greene, on two notes, dated September 14 and October 1, for \$375.82 and \$535.40, at four months, in favor of S. Magee, and signed R. H. Forestal & Co., who are paper dealers at No. 22 South Fifth street, Philadelphia. The notes were dated from that city, and were payable at the Commercial National Bank. Magee was negotiating for the discount of a third note for \$583.45, of a similar character, when Mr. Greene discovered that the signature of Forestal & Co. was forged, and a report at Inspector Byrne's Wall street bureau led to Magee's arrest. Magee's office at No. 17 Dey street is a poorly furnished room on the third floor. A

sign on the door has Magee's name as the agent of the Blackwater Paper Mills.

Solomon Levy, dealer in notions, Baltimore, Md., is closing out.

Thomas Doak, bookseller and stationer, Cameron, Mo., has sold out.

David Bumburger, dealer in notions, Baltimore, Md., is closing out.

J. H. Wintersteen, bookseller and stationer, Wahoo, Neb., has sold out.

Hard & Parsons show a line of goods now suitable for the holiday trade.

A. Quimby, bookseller and stationer, Manchester, N. H., has sold out to Goodman & Gorman.

Clark & Glendinning, printers, Denver, Col., have dissolved partnership. Charles A. Clark succeeds.

William C. Clark, wholesale paper dealer, Chicago, Ill., has sold out to the J. W. Butler Paper Company.

The firms of J. D. Decker and Lizzie Campbell, booksellers and stationers, Wellington, Kansas, have been burned out.

S. Alexander has retired from the firm of J. H. Dunn & Co., stationers, &c., Clarksburg, W. Va. J. H. Dunn continues.

Myers Brothers are very busy. The different articles of their fine line seem to meet with much approval from all who see them.

Obpacher Bros. are making extensive preparations for the valentine and Easter seasons, and will submit samples to the trade soon.

Clark, Friend, Fox & Co., wholesale paper dealers, Chicago, Ill., have dissolved partnership. The business has been sold to William C. Clark.

W. A. Wheeler has just filled a government order for D. Webster Clegg's concave rulers and check cutters. These rulers have been out of the market for some time, but Mr. Wheeler can now supply them.

Lowell's Christmas cards are being much admired everywhere throughout the country, and large orders have been received for them. In fact, they have only to be shown to command a trade. M. A. Reay is the agent.

W. F. Murphy's Sons, Philadelphia, have already repaired the damage occasioned by fire last week, chiefly to their printing and binding departments. They are now working day and night to make up for the lost time, as they are loaded down with orders.

A. M. Collins, Cope & Co. have just issued a set of folding cards in imitation of steel-plate work, colored by hand. Their novelty and low price will, it is thought, insure them a large sale. They are in five designs—No. 1,105 to 1,109, inclusive—and are sold separately or assorted.

McCarty & Hasberg are opening large quantities of holiday goods, and are prepared for the expected rush which comes every year after election. The trade ought to see this line at once, as, from present appearances, there will be very few articles of this class of goods left in the market by December 1.

A. & E. Wallach have this week received a new line of leather goods; some of them come in light-colored calf, containing insertions of velvet, on which are painted heads representing distinguished persons; others, in calf, are inlaid with birds, including parrots, hens and peacocks. These goods come in the shape of portfolios, cigarette and cigar cases, portmonnaies, lap-tablets, &c., they are very handsome, and are worth the attention of buyers.

THE STATIONER.

DEVOTED TO THE INTERESTS OF THE

Stationery and Fancy Goods Trades.
WEEKLY--\$2.00 PER ANNUM.

Single Copies - - - - 10 Cents.

NEW YORK, THURSDAY, NOVEMBER 10, 1881.

Advertisements cannot be received for insertion in the current week later than 12 M. on Wednesday. The charge for advertising is 25 cents a line, each insertion. Special terms for standing and displayed advertisements to be had on application.

This journal aims to be a medium of information for and a representative of the interests of every one connected with the stationery and fancy goods trades. It contains a full and trustworthy survey of the market for stationery in this country, in all cases giving the actual prices at which goods can be bought of importers and jobbers in this city, together with a detailed account of novelties in the trade, patents relating to stationery, and current items of interest. A review of foreign markets and accounts of movements abroad will also be furnished, and no pains will be spared to make THE STATIONER a thorough and complete exponent of the trade.

Subscription and postage for Great Britain, per annum..... 12s.

Any information our readers may wish to obtain shall be cheerfully given, and prompt replies will be made to all inquiries addressed to us on any subjects of interest to the trade.

Communications on all trade matters are earnestly solicited. Address

HOWARD LOCKWOOD, Pres. and Treas.
American Stationer Association,
74 DUANE STREET, NEW YORK.

Subscribers to THE STATIONER can be supplied with the best cloth binder in the market. Deliverable at the publication office. Price, fifty cents.

Readers of this paper who avail themselves of the information obtained from its columns, by advertisement or otherwise, are requested to notify their correspondents of the source of their information.

ENVELOPE makers are talking of another advance. What it means we do not know, but it is asserted that higher prices are probable.

A VERY good idea of the trade situation at the West can be gathered from the letter of our Cincinnati correspondent, to which we refer our readers.

WE have received a telegram from our Australian correspondent stating that he will attend the New Zealand Exhibition. Those who want to take advantage of this opportunity for representation should notify at once.

AS for business in this city it is good—specially good, and the indications point to an extraordinary holiday trade. If the demand holds out, as it is likely that it will, the stationery and book trades will have to avow that they have never done so well.

In answer to a recent publication bringing up a subject with which the readers of THE STATIONER are somewhat familiar, and which presented excuses for a system which has been condemned, the *Paper Trade Journal*, in its issue of last Saturday, presented a statement of "facts" relating to the subject referred to. We reproduce the *Journal's* article in this issue, and invite attention to it.

WE have received a letter from a correspondent at the South, in which it is stated that some mills are offering jobbers in that territory "news paper, 28 lbs., marked 30 lbs. and billed as 28." The writer of the letter says that he cannot say who started it, the jobbers or the mills, but that two of the paper-making firms in his section have refused to enter into this kind of business. If every mill owner in the country acted on the principle of refusing to make short-weight papers or to put fictitious numbers on the packages, the promoters of such frauds would find it pretty hard work to carry it out by themselves. But we are sorry to have to admit that there are paper makers who persist in making short-weight papers, or in marking them with a false weight. We have now had two recent complaints referring to different grades of paper, and it may be assumed that the practice of putting fraudulently marked paper on sale extends farther. The only thing for the retail trade to do is to insist upon getting full weight, and to avoid being cheated into paying a higher price than they are calculating on in the purchase of paper which runs short of the weight ordered. We advise our readers, therefore, to be on their guard against further impositions of this sort. Pay for paper according to its scale weight, and not as it is billed when fraudulently marked. We have found it necessary to give this caution to our readers more than once, and we will urge it again and again lest it should be forgotten. This is something in which the whole retail trade are interested, and is one of the evils

of which they have it largely in their power to compel the remedy.

BUT there is one thing which merchants must consider. In the rush for goods, and, with the unusually large purchases, there may be—indeed, we have been told that there is—a demand for the extension of credits. Now, there is just a suggestion of possible trouble in this. It is true that dealers don't want to be run out of a taking novelty, or a particularly acceptable line of goods, but there is a possibility of ordering too much, and after that there may be stock which will have to be carried a long time before it is worked off. We should hardly incline to suggest a great possibility of dead stock, inasmuch as there is so much attention paid to the production of pleasing goods that novelties of this year and the accepted favorites of two or three past seasons would be likely to find buyers sooner or later. But fashions change, and the fact should be borne in mind. So, if our merchants are inclined to give six months' credit, it would be better for them to pause and ask if this was not one of the weakening defects in trade during the latest period of stagnation. To those who are inclined to take a chance on the brightness of the future, and are inclined to buy more goods on the offer of an extended credit, we say—halt, and think it over before you take it up. It is certainly better to buy for cash or on short time, even if orders are reduced and have to be sent in oftener. The advantage is not one-sided. It affects the manufacturer, the jobber and the retailer, and is a sort of mutual insurance business, which will be found most satisfactory in the long run.

ANSWERS TO CORRESPONDENTS.

B. asks: Can you tell where I can buy paper like the sample I inclose?

Ans.—Such paper is made by the Seymour Paper Company, and Wilkinson Brothers & Co. It can also be bought of J. E. Linde, W. P. Dane and Henry Lindenmeyr, paper dealers, all of this city. We think that you can also obtain it of J. G. Ditman & Co., Philadelphia.

M. says: I would like to ask you for information. Which is the largest house carrying the most stock and heaviest business among the following: I have been dealing with — and would like to be convinced that I am dealing with the best house in stationery, — ample facilities, &c. B. Lawrence & Co., Henry Bainbridge & Co., Baker, Pratt & Co.

Ans.—We send you by mail an answer to your inquiry.

NOTE.—In reply to a correspondent we said that Ward's diamond steel pens were sold by Ward & Gay, of Boston, and that we thought they were manufactured by Esterbrook & Co. Ward & Gay write to us, saying: "These pens have been on the market for the last ten years, and have always been manufactured in England by one of the leading houses of the world, and are sold exclusively through us."

Jansen, McClurg & Co., Chicago, announce a "Sketch of Edward Coles, Second Governor of Illinois, and of the Slavery Struggles of 1823-4," by E. B. Washburne.

John F. Fletcher, Woodstock, N. B. (B. S.)	2,000
--	-------

Among the visiting members of the trade in the city during the past week were: Thorndyke Nourse, Detroit, Mich.; E. L. Horney, of Horney & Son, Chillicothe, Ohio; C. A. Leavens, of Leavens Brothers, Bay City, Mich.; B. H. Owen, of Owen & Moore, Clarksville, Tenn.; Charles Green, Brookfield, Mo.; George D. Brown, of Brown & Pilcher, Jackson, Mich.; Mr. Sterling, of Sterling & Mosher, Watertown, N. Y.; Frank B. Mohun and William H. Dempsey, Washington, D. C.; Mr. Huntingdon, of Olds & Huntingdon, Sandusky, Ohio; C. W. Sears, Binghamton, N. Y.; R. H. Burnham, of R. H. Burnham & Co., Rockland, Me.; W. R. Keys, Auburn, N. Y.; H. C. Foster, of Canandaigua, N. Y.

Henry Levy & Son, 477 Broadway, have just received a splendid line of Rococo work in baskets, tastefully ornamented and elegantly lined in assorted colored satins. The wicker-work of these goods is extremely durable, and is said to be far superior to any similar article hitherto imported. They have also received a very desirable line of mediæval china and glassware, expressly made from their own designs, which are tasteful, elegant and inexpensive, and consist of card receivers, flower holders, vases, trays, &c. Terra cotta figures in grotesque groups and illustrious characters artistically painted, and a new and elegant line of Florentine painted fans, for which this house is the sole agent in the United States and Canada, and which are said to be much superior to any imported from France or Vienna in point of workmanship and appearance, are also shown in these articles, the blending of the colors on the satin, the artistic design of paintings, which include landscapes, figures and flowers, are marvels of art; the sticks are of real ebony, ivory and pearl, with handsome cords and tassels. Buyers of fans are particularly invited to inspect this fine line. The firm has just completed a new design of a combination brush and toilette set, which it proposes calling the "Victoria;" it contains a hair brush, comb, mirror, nail and tooth brushes, cologne bottles and a set of nail trimmers, scissors and other articles, the whole forming a most complete case for a lady's toilet, and it comes in russet and silk plush, and it is said to be the most complete article of the kind in the market.

GILDING.

Carved wood may be gilded by the following process: Some size is dissolved in water by heat, and a little whiting mixed with it. This composition is brushed over the picture frame or other article to be gilded. The holes or cracks which may be in it are then filled up with a mixture of the same ingredient in different proportions, and of about the consistency of putty. A composition of the same sort, but containing more whiting than the first, is then brushed over it and allowed to dry. This is repeated until a sufficient thickness is laid on. The plain parts are then moistened and smoothed down with a Dutch rush, pumice-stone, old file, or anything similar, and the corners and moldings are squared and shaped by proper tools. A composition similar to the last, but in which yellow ochre is substituted for whiting, is then laid on in a thin coat by a brush. This coating is covered with another of oil varnish, and when this is almost dry, or, as it is technically called, "luggy," the gold leaf is applied, and pressed down into the moldings by clean cotton. This is afterward rubbed over with a clean cotton wad to polish it, and when the varnish is quite dry it becomes extremely hard and solid. When the ability to perform this operation is attained, no difficulty will be experienced in gilding letters, illuminations, decorations, &c., for the rather laborious preparation of surfaces is partially omitted, and less dexterity is therefore requisite in the manipulation of the process.

Cyrus H. Loutrel returned home this week from a visit of about a fortnight to the West, during which he visited, among other places, Chicago, St. Louis and Cincinnati. Mr. Loutrel was highly pleased with his trip, and was astonished at the wonderful growth of the West, particularly of Cincinnati and Chicago. He took the opportunity of calling on some of his old friends in the trade in these two places, and was very cordially received by them.

The Nippon Mercantile Company, 310 Broadway, New York, shows a line of Japanese goods suitable for stationers' holiday trade. Among them are paper lanterns in a large variety, including all sizes, from the largest to the smallest, bamboo table and veranda mats, lawn parasols, fans from the largest to the smallest sizes, screens of all descriptions, including those of silk, satin, paper and cloth; porcelain goods in large variety; lacquered wares, including writing desks, cigar stands, handkerchief boxes, glove boxes, paper cutters, cigar and cigarette cases, &c. This firm has published a neat catalogue of all the goods it handles. It is a very useful and necessary publication for persons desiring this class of goods. The trade can have it on application.

At a meeting of the committee of creditors of D. & J. Sadlier & Co., publishers, held at No. 31, Barclay street, last week, it was agreed to offer fifty cents on the dollar to merchandise creditors, payable in six, twelve, eighteen, and twenty-four months, secured, with interest. Mrs. M. A. Sadlier's claim, secured by chattel mortgage, is first disposed of as follows: She is to receive \$50,000 and to have the claim of \$84,500 wiped out; is to have the plates mentioned in her chattel mortgage—on these the committee place a market valuation of \$28,000; is to have \$5,000 cash, and to have notes amounting to about \$17,000 secured by the assignee and outside friends of the firm. She gives the firm the use of the plates now held by her, at 6 per cent. on the valuation of \$28,000, with the privilege of

buying at the end of five years. The merchandise indebtedness is said to be \$120,000, which will require \$60,000 to pay it. Security for this will be on plates, not enumerated in Mrs. Sadlier's mortgage, valued at about \$12,000; on tools and machinery, valued at \$6,000; on stock in store and on real estate held by Dennis Sadlier, with whom his wife joins and consents in placing in the hands of trustees as security for the compromise. All these securities are to be held by three trustees, to be appointed by the creditors, until the compromise has been all paid. The assignee, John W. O'Shaughnessy, is to be one of the trustees. By this arrangement, if ratified by the creditors, the firm will be left with all their present stock of books, machinery and bills receivable with which to go on with the business.

If an untruth is only a day old, it is called a lie; if it is a year old, it is called a falsehood; but if it is a century old, it is called a legend.

Market Review.

OFFICE OF THE AMERICAN STATIONER.
WEDNESDAY, November 9, 1881.

THE MONEY MARKET.—The money market is easier than it has been in two months. There is an increasing supply of loanable funds and the rates for call loans are generally below the legal figure, while discount rates for prime mercantile paper vary from 5½ to 7 per cent. The stock market has shown a fair degree of strength. The late advance in freight and passenger rates by the trunk lines leads to the belief that a still higher tariff will be adopted in the early future, and, following this, the difference between the roads will be amicably adjusted. The dealings in the better class of railroad bonds have been unusually large, and the market strong, especially for the low-priced bonds. Government bonds have shown increased strength, and larger dealings in the four and extended five per cents., and the general market closed strong. Sterling exchange is in light supply, and rates are a fraction higher than a week ago. Continental bills are dull, and rates steady.

THE PAPER MARKET.—There is a more cheerful feeling in the trade at the prospect of an ample supply of water and an early resumption of many mills which have been comparatively idle for some time past. Although most of our dealers report store trade as only moderately active, business in a large way or orders for goods to be made up is very good. The scarcity of paper is so great that it is difficult to get an order of any size filled from stock in store, and the mills are all so busy on orders ahead that dealers are unable to promise very early fulfillment of orders. It is needless to state that during this condition of things very firm prices rule, and the signs at present indicate that even should prices advance no higher during the ensuing two months there is very little likelihood of any decline.

THE STATIONERY MARKET.—Although business has been somewhat interrupted this week by rainy weather and the elections, trade keeps up to good proportions. Large orders continue to come for goods for the holiday season, and, to judge from the character of the goods in quality and quantity, very extraordinary preparations are being made this season for this class of goods, and an unprecedented demand is anticipated everywhere. In the fancy goods line a little slackening off has been shown in some branches; but this is only regarded as temporary, and is due chiefly to seasonable influences, while the elections have kept a great many buyers from the city. Stocks of some lines of staple as well as fancy goods are becoming depleted, rendering additions necessary. Some of our fancy goods houses are receiving from abroad fresh importations of new goods especially adapted to the holiday trade. Prices continue very steady and firm. The manufacturers of envelopes are agitating the subject of a further advance in prices of some grades, and it is more than probable that this will be effected before another week.

chance to secure a pretty and profitable business at a
low figure.

Address OPPORTUNITY,
Office of American Stationer.

HEAT AND VENTILATION.

The causes of the loss of heat in ventilated rooms are (1) units of heat required to warm the passing air, (2) units of heat absorbed by walls, (3) units of heat absorbed by ceiling, (4) units of heat absorbed by floor, and (5) units of heat absorbed by windows. The sources of heat in rooms are (1) units of heat generated by the occupants, (2) units of heat generated by lights, and (3) units of heat generated by fires or heating apparatus. An adult man requires for respiration and transpiration hourly 215 cubic feet of atmospheric air, or $215 \times 0.077 = 16.5$ lbs., and generates about 290 units of heat, 100 units of which goes in the formation of vapor, the other 190 units being dissipated by radiation to the surrounding objects and contact with the colder air. The amount of air required and the heat generated by gaslights may be approximated sufficiently near for practical purposes, thus: The specific gravity of gas is about half that of atmospheric air, or 0.038 lbs. per cubic foot, and requires for complete combustion

$$0.038 \times 17 = 0.65 \text{ lbs. of air, or } \frac{0.65}{0.77} = 8.44 \text{ cubic feet.}$$

Each cubic foot of gas burned emits about 600 units of heat. An oil lamp with a good wick consumes about 154 grains per hour = 35 lamps per pound. Each pound of oil requires 150 cubic feet of air for complete combustion, and generates about 16,000 units of heat, or 460 per lamp. Candles six to the pound may be reckoned the same as a lamp consuming oil, each candle burning about 170 grains per hour.

TABULATED IN ROUND NUMBERS.

An adult man vitates per hour.....	215	cubic feet.
Each cubic foot of gas burned.....	8.5	"
Each pound of oil burned.....	150	"
Each pound of candles.....	160	"
Units of heat generated by a man per hour.....	190	
Units of heat generated by one cubic foot of gas.....	600	
Units of heat generated by one pound of oil or candles.....	16,000	

An average gas burner consumes about four feet of gas per hour.—Builder.

COPPERING AND BRONZING ZINC.

The following recipes for coppering and bronzing zinc are said to produce excellent effects: Prepare a solution of fifteen parts of blue vitriol and one of nineteen parts of cyanide of potassium, then mix both solutions together. Incorporate this liquid well with one hundred and sixty parts of pipe-clay, and rub the resulting semi-fluid mass, by means of a linen rag, on the previously cleaned object. For bronzing, take fifteen parts of verdigris, nineteen of cream of tartar, and thirty parts of crystallized soda; reduce them to powder, and dissolve them in the necessary amount of water. Mix this liquid together with one hundred and sixty parts of pipe-clay, and then proceed as above directed. Another process is as follows: Take fifteen grammes of blue vitriol, twenty of calcined soda, and mix them well with thirty-two cubic centimetres of glycerine, and mix the paste obtained with eighty grammes of pipe-clay. It is then ready to be applied as before stated.

At a meeting of the envelope manufacturers, in the early part of this week, the question of a further advance in the prices of certain grades of goods was agitated, but nothing definite was agreed on. An adjourned meeting will occur in a few days, when the question whether there shall be an advance in prices will be settled.

INFRACTUOUS MILLIONS.

In a dark cellar of the Julius Tower at Spandau, Prussia, lies a vast bulk of gold coin equal to about \$30,000,000, laid aside from Germany's gains by the war of 1870-'71, as a provision of hard cash wherewith to defray the mobilization and other preliminary expenses of the next campaign undertaken by the empire. This fund is absolutely unproductive, and may be said to have cost the German nation half its total amount in foregone interest since it was first lodged in its subterranean repository. A few days ago the annual inspection of the treasure by the imperial commissioners took place. A specially detailed section of the Prussian guard assisted the two commissioners in the laborious task of counting over the contents of 1,200 canvas bags, each containing 100,000 marks, or \$25,000. The massive iron door closing the domicile of all this wealth can only be opened by the simultaneous action of two keys, masterpieces of the locksmith's art, one of which is in the possession of either commissioner. The exact times at which the door is unlocked and relocked, as well as every circumstance, however minute, connected with the process of revision, are registered on the spot in a protocol signed by the officials before leaving the fortress, and attested by the governor in person. During the inspection the tower guards are doubled; at its conclusion the commissioners turn their keys in the locks at one and the same moment, are escorted to the gates of the fortress, and take their departure for Berlin, leaving the infructuous millions to darkness and seclusion for another year.

"THE GREAT ROCK ISLAND ROUTE"

Calls your attention to the following REASONS WHY, if about to make a Journey to the GREAT WEST, you should travel over it:

As nearly absolute safety as is possible to be attained. Sure connections in UNION DEPOTS, at all important points. No change of cars between CHICAGO, KANSAS CITY, LEAVENWORTH, ATCHISON or COUNCIL BLUFFS. Quick journeys because carried on Fast Express Trains. Day cars that are not only artistically decorated, but furnished with seats that admit of ease and comfort. Sleeping cars that permit quiet rest in home-like beds. Dining cars that are used only for eating purposes, and in which the best of meals are served for the reasonable sum of seventy-five cents each. A journey that furnishes the finest views of the fertile farms and pretty cities of Illinois, Iowa and Missouri, and is afterwards remembered as one of the pleasant incidents of life. You arrive at destination rested, not weary; clean, not dirty; calm, not angry. In brief, you get the maximum of comfort at a minimum of cost.

That the unrelenting care of the Chicago, Rock Island & Pacific Railway for the comfort of its patrons is appreciated, is attested by its constantly increasing business, and the fact that it is the favorite route with delegates and visitors to the great assemblages, political, religious, educational and benevolent, that assemble from time to time in the great cities of the United States, as well as tourists who seek the pleasant lines of travel while en route to behold the wonderful scenes of Colorado, the Yellowstone and Yosemite. To accommodate those who desire to visit Colorado for health, pleasure or business, in the most auspicious time of the year, the Summer season and months of September and October, the Company every year puts on sale, May 1st, at all coupon ticket offices in the United States and Canada, round trip tickets to

DENVER, COLORADO SPRINGS AND PUEBLO.

At reduced rates, good returning, until October 31st. Also to San Francisco, for parties of ten or more, good for ninety days, at great reduction from regular fares.

REMEMBER, this is the most direct route for all points WEST and SOUTHWEST. For further information, time-tables, maps or folders, call upon or address

THE BAY STATE PAPER COMPANY,

HOLYOKE, MASS., were among the pioneers in the W. C. Paper trade and their goods, from the start, were

distinguished for their fine quality and the superior style in which they were wrapped. Their example has been approved and imitated by a swarm of competitors, who have flooded the market with inferior goods, put up in packages of 600 to 800 sheets, misleading the unwary, and sold at apparently lower figures; but the trade and consumers generally recognize the fact that a good article, honestly put up, in 1,000 sheet packages, is the most profitable both for use and for sale. Their goods are all guaranteed 1,000 sheets to package, and no short count. No wood is used in any of these papers, but they are made of the very best stock in the market.

THE "MEDICATED BOUDOIR" BRAND

LIPMAN'S PATENT EYELET MACHINES.

P. P. McHUGH (late with Roby & Cole), manufacturer of Blank Cards and Card Boards, No. 51 Ann Street.

New York. Card Stock by the case at special low rates. **SPECIALTY.**—Fine Translucent Goods for Lithographic Printing or Steel-plate Work. Warranted to stand printing in ten colors. Engravers' Super Bristol, White and Cream, the very perfection of fine finished stock. Gilt Bevel-Edge Panels for Artists' and Photographers' use, and other artistic novelties.

EBONIZING.

Brazil-wood, powdered nutgalls and alum are boiled in water until a blackish color is obtained; the liquid is filtered and applied to the wood, which is next washed in a liquor made by digested strong vinegar and a little oil of vitriol for sometime with excess of iron turnings; thoroughly wash the wood, dry and oil. For staining fine woods the following is applicable: 4 oz. of gall nuts, 1 oz. powdered logwood, $\frac{1}{4}$ oz. green vitriol, and $\frac{1}{2}$ oz. verdigris are boiled with water, and the solution, filtered hot, is applied to the wood, which is then coated with a solution of 1 oz. fine iron filings dissolved by digestion in a small quantity of hot wine vinegar.

Another recipe is as follows: Take a quart or more of good strong vinegar, put in a lot of iron filings or old scrap iron, let it stand two or three days, then get some logwood, boil it and put in a little soda. Take your work and give it a coat of the logwood mixture first, with a brush. It does not matter how moist you make the work. When this is done, apply a coat of the vinegar, first making it warm. Of course the logwood mixture must be allowed to dry on the work, which will appear red, but which will turn black as soon as the vinegar mixture is applied. When the work is dry it will have a rusty look; it should then be smoothed, varnished or polished.

WOOD DECORATING.

If the work has to be polished, size the same all over with Russian glue, and let it be well strained through a fine linen cloth prior to using. When dry, slightly rub the same down with fine spent sand-paper; but on no account across the grain, because this will be manifest after polishing. Then get some white polish and mix up the color you desire to use with it, but not too stiff; be quick and expeditious with your lining, &c., as this material dries quick. It is accomplished with an ordinary sable writing pencil. But if unacquainted with the work, try what is termed "spirit color" (turpentine and japanner's gold-size), in place of white polish, but see that the work be sized over again prior to polishing. If this is not attended to you will be disappointed, as polish will not agree with the gold-size. The size must not be used too strong nor yet too weak; this may be easily tested prior to commencing operations on the large job. If the size be too weak the color will spread from each side of the line into the bates of the wood. If stencils are to be used on the work, put no black-lead marks upon it, as this is a bad fault and always disfigures the work. Use a little soft chalk and chalk line. White polish is made in the following manner: One pint of alcohol, four oz. of white shellac, and one oz. of sandarac; shake up the bottle occasionally. When the gums are dissolved it is ready for use. In putting on the stencils be careful to work them dry enough, and if required clean up the edges with a writing-pencil immediately.

GERMAN MASTER PRINTERS' ASSOCIATION.—The annual meeting of this society was held recently at Bremen, under the presidency of Dr. E. Brockhaus, of Leipsic. The chairman dwelt, in his opening address, upon the excessive competition that obtains among printers, and he held that the most effectual means for combating this competition were a strict adherence to the terms of the scale mutually agreed upon between the masters and men, and a limitation of the number of apprentices.

AN INDIAN PAPER.

There is a unique little newspaper published once a month at the Indian school at Carlisle barracks, Pennsylvania, by Kihega, an Iowa Indian boy. Its contributors are children of the school and the articles, being printed just as they are written, indicate the progress that the Indian youth have made in learning English since the school was established, two years ago. Here is a "local item" of a late issue: "The lady who has charge of the little boys ask one of them why don't you try to keep your shirt clean when you go down to dining hall to eat. The little boy said why not we have white things like handkerchiefs not handkerchiefs like white boys and girls have then we not get shirt dirty when we eat." Another: "Problem.—A train of cars going in to Buffalo took 429 passengers. It brought back 178 passengers. How many more were taken in to Buffalo than were brought back? Teacher told a boy to solve it and give a full answer. His answer: 'The train brought back 251 buffalos.'" Some of the larger boys assist in keeping order, and wear the chevrons and stripes of sergeants and corporals. "One day a lady teacher told one of her boys to do something, but the boy did not want to mind her at that time, and the lady said to him you must do what I told you to do, but the boy would not speak. So she kept telling him that he should mind his teacher at last he look up, he look at her arms, he look at her dress and he look at her eyes and said, Where are your stripes?" Here is the editor's reference to a recent visit of Virginian ex-Confederates at Carlisle: "The soldiers of the South came to visit Carlisle. They used to fight against the North soldiers twenty years ago but now they coming in and no more fight, good friend to each other." Some of the children are sent away among the farmers "to learn white man's ways," and occasionally the letters they send to their friends at the school are published. Davis, Cheyenne, writes that he had been at church, where he saw "the minister put water on ever so many little white babies." Mattie Reed, a little Pueblo girl, ten years old, who arrived at the school February 4, 1881, writes: "You like sweet apples, yes, Im like sweet apple has good to eat and do you like sour apple? No Im do like, sour apple has not good to eat she sour me write in the paper." Cheyenne Harvey tells this story: "I ask Mrs. to spell tomorrow for me. I forget how to spell tomorrow I will never forget tomorrow how to spell again I will keep spell in this way tomorrow, tomorrow, tomorrow and tomorrow and tomorrow."

"The Golden Book of Tales," a series of "readings in the legendary lore of all nations," is one of the handsomest books of the season, and one of the most attractive for young people. In its preparation, the wide domain of folk-lore of all nations has been explored, and those beautiful creations that have delighted and instructed successive generations have been selected and edited with refined literary taste and the greatest care. Ivson, Blakeman, Taylor & Co., 753 and 755 Broadway, New York, are the publishers.

Experiments made by Dr. William Siemens, of London, proves that it is possible to smelt metal by electricity without the aid of fuel. The metal is introduced into a crucible fitted with a carbon pole through the bottom, while another is placed in the mass of metal, and the whole is covered with fire-clay or other refractory substance. The two poles are then put in connection with those of a dynamo electric machine capable of producing a powerful current, and this is passed thereby through the mass in the crucible.

IRIDIUM FOR ELECTRIC LAMPS.

A promising improvement has been made in electric lighting by substituting electrodes of iridium for the carbon pencils hitherto almost exclusively used as poles in exhibiting the voltaic arc. Iridium is fusible only in the arc from a very powerful battery, and by keeping the intensity of the current below a given point the metal can be maintained at a temperature of about 4,000° F., which is far below its melting point, though high enough to add the light of an intense incandescence to the brilliancy of the arc itself. At this temperature the iridium points remain completely unchanged, and the variations and flickerings due to the rapid wearing away of carbon pencils are entirely absent in the new light; while the consistency with which the source of the illumination keeps its place peculiarly adapts it for use in the focus of the Fresnel lenses, or the parabolic reflectors which, in lighthouses or in similar situations, take their place. The process by which the iridium, naturally a gritty and intractable powder, is formed into pencils for use in lamps is an ingenious adaptation of a patent issued long ago for making the same metal into points for gold pens, and depends upon the property which iridium possesses of forming a compound with phosphorus, which can then be melted at a temperature of about 3,000° F.—about the fusing point of iron,—and molded into masses which can be subsequently dephosphorized, and regain the original infusibility of the pure metal.

POINTS OF THE COMPASS CARD.

Captain A. Delon of the steamship Belgrano, has drawn up a new method of dividing the points and degrees. The present compass card is divided into 64 parts (points and half points), and likewise in degrees in each quadrant from 0 deg. to 90 deg. But these two different divisions of the compass card do not coincide, as fractions of the degrees must be used to obtain almost every point. There is a great tendency on board of steamers to give the course to the man at the wheel in degrees, which scarcely ever correspond with one of the apparent divisions of the compass, and they often cause errors in steering of 2 deg. to 3 deg. Captain Delon considers it necessary to omit the whole partition in points and half points, and only to conserve the eight chief points to name the wind, *i. e.*, N., S., E., W., N.E., N.W., S.E., S.W., as corresponding with the whole number of degrees. He afterwards divides each octant by every 5 deg. with points well marked, and still makes the points by every 15 deg. a little larger than usual. By dividing the compass in this manner the number of divisions are augmented by eight only (*viz.*, 72 instead of 64), and between all these divisions there is left almost the same space as the half points (*viz.*, 5 deg. instead of 5 deg. 37 min. 30 sec.), and all the fractions are rejected, and the ambiguity also, which is the result of giving a course in two different ways at the same time. There will likewise be more clearness in the card, and one can see better, he states, and more plainly how the ship is heading.

TINNING SMALL ARTICLES.

Make a saturated solution of chloride of zinc, by dissolving zinc scraps in muriatic acid until the acid will take up no more. Allow the solution to settle, decant off the clear portion, and keep for use. Next take a strong iron vessel of suitable shape for your use, set it over the fire, place the tin therein and melt it. Then put on

the surface as much mutton or beef tallow as will suffice to cover the molten tin to the depth of a quarter of an inch, taking care that the tallow shall not catch fire. This covering prevents the oxidation of the tin. The objects to be tinned must first be thoroughly cleansed of all scale or oxide, which is generally done best by immersion in dilute sulphuric acid. They should next be rinsed in fresh water, then dipped in the zinc solution, dried, and finally carefully immersed in the melted tin. The objects are quickly covered with a bright coating of tin, when they may be removed, and the operation is complete.

SPANISH MARBLING.

There are many conjectures concerning the origin of Spanish marbling. Some persons have imagined that some one with a trembling hand, or in a state of agitation, by mere accident discovered the secret; but such is not the fact. A man in his workshop was proceeding with his work, had put on all his colors, and had just commenced the process of laying on the sheet of paper, when just as the corner touched the liquid, another one came and drove violently against the trough, by which the surface of the solution, with the colors then floating upon it, was instantly put in violent motion, like the waves of the sea, and the effect thereby produced excited further study and research, which eventually terminated in the production of the Spanish marble. This description brought a very high price when it first came out, and the first was made in the following manner: One person got under the trough, which was placed on a frame of wood, so made as to admit of it; and when the colors were all put on and the paper ready to be laid down, he shook the trough so as to agitate it with some violence, when the paper was immediately put upon it, and the wavy appearance produced; those waves were, however, very broad when compared with those done in the present simple manner, and required two persons to accomplish what is now done by one, in a superior manner. *Printers' Gazette.*

VARNISH FOR IMITATING GILDING.

A very perfect imitation of gilding on brass and bronze articles, it is said, may be made by means of a varnish composed of 160 grains of gumlac, 40 grains of dragons' blood, 10 grains of tumeric, and 3,320 grains of alcohol. The metal should be brushed with the varnish in all directions by means of a sponge, and then immediately warmed over a gentle charcoal fire. The surface at first will appear dead, but will soon resemble the finest gilding. The varnish should be kept in well-corked bottles.

Among the visiting members of the trade to the city during the past week were: L. Stork, Baltimore, Md.; J. Morrison, Washington, D. C.; Jansen McClurg, of Jansen McClurg & Co., Chicago; J. Guggenheimer, Baltimore; C. Lehman, Chicago; B. Bugbee, Bangor, Me.; J. A. Brassaban, New Orleans; F. Monheimer, St. Paul, Minn.; A. Sands, Helena, Montana; O. Butler, Savannah, Ga.; Mr. Solomons, of Solomons & Co., Savannah; Robert T. Moir, Schenectady, N. Y.; A. Bool, Ithaca, N. Y.

Hyposulphite of soda is recommended by B. F. Davenport for cleansing tarnished silverware. It is applied simply with a cloth or brush dipped into a saturated solution of the salt, no powder of any kind being necessary. In two or three rubs all tarnish is removed.

SEASON 1881-1882.

SEASON 1881-1882.

L. PRANG & CO.'S

Christmas and New Year Cards

ANNOUNCEMENT.

WE hereby beg leave to announce to the trade the completion of our line of Christmas and New Year Cards for this season, for which our agents are now soliciting orders. The extent of our list, the originality, and especially the American character of our designs, together with the great care taken in their execution, will, we have no doubt, secure for our goods the popularity which they have enjoyed heretofore. The efforts we have made to secure the highest excellence, is attested by the names of some of the artists whose designs have been reproduced. We would only name Elihu Vedder, C. C. Coleman, Thomas Moran, Miss Rosina Emmett, Miss Dora Wheeler, Mrs. O. E. Whitney, W. H. Gibson, F. S. Church, R. G. Birch, &c. That a due regard has been paid for the quality of the literary matter, in connection with these designs, is shown by the fact that many of the designs are accompanied by original poems from writers of note, such as Mrs. Celia Thaxter and Mrs. Emily Shaw Forman.

The great increase of our manufacturing facilities, secured by additions to our building nearly doubling our floor space and by the adding of new machinery, will place us in a position to fill orders promptly. Still we would request dealers to place their orders as early as possible, so as to still further enable us to make timely preparation for prompt deliveries.

Our Cards will, as heretofore, be put up in envelopes containing twelve Cards, unless otherwise stated on our price lists.

We furnish envelopes without extra charge for all our Christmas and New Year Cards, for which the list price is \$1.80 per set, and over. Our silk-fringed Cards will no doubt be in great demand this season. We have made ample preparation to furnish these in time and have made arrangements with our manufacturers for the best quality of silk fringes. We would call special attention to the excellence of our fringed Cards and the novelties in colors and style of fringes we offer for this season.

A marked and attractive feature of our cards are the elegantly ornamented backs.

All our fringed Christmas and New Year Cards are furnished with envelopes and protectors, so as to insure safe transportation in the mails.

It will be impossible to embody our whole list in the space of the advertisement, and we will therefore merely give a general outline of the variety offered.

PRANG'S PRIZE CHRISTMAS CARDS. COMPETITION OF 1881.

These are the Cards selected by the judges in the second competition for four designs of Christmas Cards, for which we offered \$2,000 in prizes of \$1,000, \$500, \$300 and \$200 respectively. At the recommendation of the judges, Messrs. COLEMAN, LAFARGE, and WHITE, the prize for third best Card was increased to \$500. Mrs. CELIA THAXTER has written appropriate verses for each of the designs.

- 1st Prize Card (\$1,000), by Elihu Vedder. Size, $6\frac{1}{4} \times 9$ inches; price \$1 each. Same card with silk fringe, cord and tassels, price \$1.50 each.
 2d Prize Card (\$500), by Miss Dora Wheeler. Size, 7×9 inches; price 75c. each. Same card with silk fringe, cord and tassels, price \$1.25 each.
 3d Prize Card (\$500), by C. C. Coleman. Size, 7×9 inches; price 75c. each. Same card with silk fringe, cord and tassels, price \$1.25 each.
 4th Prize Card (\$200), by Miss Rosina Emmett. Size, $5\frac{1}{4} \times 9\frac{1}{4}$ inches; price 60c. each. Same card with silk fringe, cord and tassels, price \$1 each.

The Prize Cards can also be had mounted on heavy board with gilt beveled edges.

We beg to call attention also to the following publications for New Year and Christmas:

- "Goddess Fortune" New Year Card, by Elihu Vedder. Size, $6\frac{1}{4} \times 8\frac{1}{4}$ inches; price 75c. each. Same card with silk fringe, cord and tassels, price \$1.25 each.
 "Christmas Dove," Size, $7 \times 9\frac{1}{2}$. This card is in the same style as the success of the last Easter season, the "Easter Dove" Price 60c. each. Same card with silk fringe, cord and tassels, price \$1 each.

Our Regular Line of Christmas Cards consists, among others, of the following Series:

- Nos. 901, 902, 903, 906, 909, 910. Floral designs ranging in price from 20c. to \$1.20 per set of 12.
 Nos. 904, 905. Humorous Cat and Frog Designs, 60c. per set.
 No. 907 is a new series of Horseshoe designs, 75c. per set.

- Nos. 920 and 929. Children's designs, at \$2.40 and \$3.60 per set.
 No. 922. Shells of Ocean, with figures, \$2.40 per set.
 No. 924. Fans with silk fringes, \$3 per set.
 No. 933. Bric-à-Brac designs, very rich, \$6 per set, and many others.

We offer a similar assortment of New Year Cards, but would call special attention to No. 1320, a new folding calendar, at \$2.40 per set. Most of the Numbers can be had with silk fringes ranging in price from \$2.25 to \$12 per set. Stock will be ready for delivery September 15.

Besides the above, attention is called to our New Birthday Cards, Scripture Texts Cards, New Panels, New Water Colors, by Thomas Moran, and other publications. Our line of Thanksgiving Day Cards will also be shown by our agents.

PERFECTED STYLOGRAFIC.

The original and genuine Pen. Warranted the best made. Thirteen Patents granted to A. T. CROSS, the
last, June 30, 1890, being the most important and giving the name **Perfected**.

MAXIMUM.—Holds most ink of any pen made; tires the hand less than smaller barrels. Fits
Hambler's Pocket. Same price as Long.

LONG.—The famous Desk Pen. Extra Long. Holds most ink, except the **Maximum**.

SHORT.—Most widely known and sold heretofore; but **Maximum** and **Long** are much better for desk
or Hambler's Pocket. So this will be largely superseded.

GIANT, with Cord and Gold Ring, same price as **Short**.

LITTLE GIANT
Plain, \$3.00.
All Styles up to
\$4.50.

LITTLE GIANT,
The Ladies'
Favorite.

Thirteen patents granted; seven more applied for; more genuine improvements; better record; more styles;
larger stock; more thoroughly protected by patents than all rivals combined. Dealers and agents supplied
with wood, glass and paper signs, placards, circulars, leaflets and cuts. We make both largest and smallest
Pens, all of which will have the new improvements. Sole Agents for the World. See Descriptive Circulars.

READERS AND WRITERS ECONOMY CO., 25 to 33 FRANKLIN ST., BOSTON.
4 BOND STREET, NEW YORK.

TO IMITATE MAHOGANY.

This could be best effected with burnt sienna
and Vandyke brown, ground in water and
thinned with weak size, so as to flow very freely.
Then take a damp cloth or rag and wipe off the
way of the grain. The depth of the color will
be given by the appearance after wiping. When
the rag gets wet squeeze it out into the color,
and so effect a great saving of it; when dry, size
and varnish, or polish. In some cases the color
must be left on, and softened with a badger, in-
stead of wiping off. For oak: 7 lb. yellow ocre,
1 lb. English umber, and a little Venetian red,
as above. A more difficult process is as follows:
Upon an orange ground rub in with Vandyke
brown, burnt sienna, and rose pink (ground in
water), thinned with beer to about the depth of
color required. Soften it slightly all over with the
badger's hair softener; then take a piece of Tur-
key sponge, and wipe some light streaks the
way of the wood, and let them slightly fold
over each other so as to have somewhat of an
Honduras appearance; then soften up and down
rather smartly at first, and gently after, to
give somewhat of a finished appearance, and
when to be left for Honduras stipple all
over with the ends of the badger, and it is done.
But if Spanish is intended, after wiping out with
the sponge, and softening gently the way it is
sponged, then very gently soften across; then
take a chisel-edged camel-hair mottler, well
soaked and wiped clean on the dry sponge, and
dot it with the corner down the edges of the
sponge marks, and here and there; then, holding
the mottler between the thumb and fingers, roll
it between two or three of the dotted parts, and
soften immediately, and observe the effect,
avoiding the objectionable parts next time, but
keep the figure toward the centre of the panel
and the sides plainer. Take care that it is all
left soft. When dry take a mahogany hog's
hair overgrainer, about 4 inches wide, and a lit-
tle of the same color, thinned with water, and
work up together in a saucer and pat it at the
side so as not to take too much color; then with
a coarse hair-comb comb the overgrainer out,
and draw over the work, carefully following the
sponging; then very slightly soften toward one
side, so as to raise the grain very slightly, and
when dry it is ready for varnishing.

HOME ART IN JAPAN.

Art at home in Japan penetrates beyond the
mere heirlooms and treasures rarely seen; the
living rooms, gardens and even outhouses exhibit
an artistic good taste suitable to the position of
the family. The interior decoration is always
chaste; the family cognizance usually forms an
integral part of the design of the pattern of the
paper, the metal fittings and other details. Partitions
are sliding panels, six feet high, in pairs
and fours, filling spaces of six, nine or twelve
feet; the inner slides are often decorated by
hand, while the outer slides are covered with a
thin paper; glass has only very recently been
used to any extent. The space between the slides
and the ceiling is, between suites of rooms, filled
with carved ornamental woodwork. Furniture
proper there is none; the mats form bed and
lounge. There is in each room an alcove in
which to hang a picture and place a vase of
flowers, and a recess with shelves is sometimes
added. Chests of drawers are placed in recesses
in the woman's apartments, while in the smaller
houses cupboards are concealed by neatly
papered sliding doors.

The decoration of costumes of the ladies of
the palace, and the gala robes of the young girls

of all classes, but more especially of dancers and singers, give ample room for the display of the arts of the dyer, embroiderer and painter. Some of these robes are elaborate and beautiful works of artistic skill. The family crest is sometimes figured in either three or five places, the chieftain wearing it about the size of a florin, and the retainer much larger on the back, sleeves and breasts. Nude art has had no place in Japan; robes are worn as an ornament rather than as something to conceal the figure. The fancy articles of personal wear or ornament are not numerous, costly rings and jewelry not being in use. The ladies delight in amber-colored tortoise shell hairpins and a comb, and in beads of pure pink coral and of amber, worn on silver or silver-gilt hairpins. It is in the tobacco pipe, pouch mountings and pocket-book clasps that display is most common.

POINTS IN A PRINTING PRESS.

It is highly desirable that a printing press shall be capable of high speed. Of course the smaller sizes will run faster in proportion than the larger. It should not stand very high; should be solid and durable; should be well placed upon a solid foundation. The bed should stop and start without jar or noise. The press should run so nicely that it can be turned backward and forward by hand easily. The bed friction rollers should be of tool steel, and not of machine steel, and the bed friction ways should have positive motion, instead of being allowed to run free. The gearing should be especially accurate. The roller stocks ought to be hollow—wrought iron pipe is as good as anything to make them of. The bearings of the rollers should be of good material—phosphor-bronze or case-hardened wrought iron. The finger-motion should be as noiseless as possible, and the fly ought to be quickly and readily removable. One very important point that should be seen to is, that the pulley shafts (and, in fact, all shafts) should have bearings in independent boxes and not in the bed of the side frame. By this means, when the boxes are worn, they may be renewed without trouble or much expense. Shafts ought to be of steel; cams should be as large as possible; working parts should be of hardened steel. It is well that the bed should be shod with hard steel.

PLATEN.

The blurring of india-ink in working drawings of machinery has been the source of much trouble and annoyance, and can be easily remedied by making use of the following process to fix india-ink on paper, first mentioned in the *W. D. V. Ingenieur*: It is a fact well known to photographers that animal glue, when treated with bichromate of potash and exposed to the sunlight for some time is insoluble in water. It has been found by analysis that india-ink contains such animal glue, and consequently, if a small quantity of bichromate of potash be used with it, the lines drawn with such prepared ink will not be affected by water, providing that they have been exposed to the sunlight for about one hour.

To ascertain if water contains iron, take a glass of water and add to it a few drops of the infusion of nutgalls, or suspend a nutgall in it by means of a thread for twenty-four hours. If iron be present, the water will become of a dark brown or black color. Prussiate of potash is a still more delicate test for detecting iron. If a crystal or a drop of it, when dissolved, be added to a glass of water containing iron, it will immediately become of a blue color.

The Oldest Established House in the United States for the Manufacture of Machine-Made Envelopes and Envelope Machinery.

I WILL INSURE YOUR HOGS.

Dr. Jos. Haas' Hog AND Poultry Remedy.

THE ONLY SCIENTIFIC SWINE REMEDY COMPOUNDED.

Read My Propositions!

First—When my remedy is used as a preventive, I will insure hogs by the head for a year, and will make a deposit of money to make such insurance good. If any hogs die, they will be paid for from such deposit; you can refer to my bankers, Messrs. Fletcher & Sharpe, Indianapolis, Ind., for my standing financially.

Second—Where my expenses are paid, I will visit herds of not less than 100, and I will arrest the disease among them, or forfeit \$500.

Third—After hogs have been regulated with my remedy, I guarantee that the annual cost of feeding will not exceed 25 cents per head. Furthermore, that the increase of actual flesh will far more than pay for the remedy used.

SEND FOR IT!

It is not an experiment, but an established success. Remember, it is the only remedy that is used and indorsed by the great breeders of this country and England. It owes its great fame to its genuine merits, and every mail brings tidings of its good work. The evidence in its favor is so strong the most scientific men of the country have pronounced it the conqueror of this disease. It is gaining ground daily, and no hog raiser up with the times can do without it. It is not only a protection against disease, but it is a powerful appetizer.

Inquire of my Bankers, Messrs. Fletcher & Sharpe, Indianapolis, Ind., for my standing. Will make a deposit of necessary money, and will pay for all that die.

SEND FOR IT! I GUARANTEE IT WILL STOP THE COUGH AMONG HOGS

and put them in fine condition for fattening. It will expel the poison from their system, tone them up, and invigorate them generally. It will make them thrive so as to astonish you. It will pay such a large per cent. on the investment, that no one can afford to be without it.

REFER TO ANY WELL KNOWN BREEDER OR SHIPPER IN ANY PART OF THE COUNTRY.

J. H. Whetstone, druggist, Iowa City, says: "The Haas Remedy sells better and with less effort than any proprietary medicine I have ever undertaken to sell of any kind. We have nothing in stock to-day but what I would rather do without than the Haas Remedy."

C. H. Klauenburg, druggist, Carlinville, Ill., says: "The Remedy sells well, and is the best on earth."

O. A. Elliott, druggist, Russell, Ia., says: "The Remedy has given good satisfaction here."

J. N. Penn & Sons, druggists, Sydney, Ia., say: "We hear good reports from what we have sold."

Ed. J. Brown, druggist, Edina, Mo., says: "It has given general satisfaction in this county. Have sold \$1,000 worth in three months. Have tested its merits myself."

J. M. Kufer, druggist, Macomb, Ill., bought \$400 lot of Haas' Remedy and sold \$300 of it in seven weeks.

SEND FOR IT. LIBERAL TERMS TO THE TRADE. you. Terms, Circulars, &c., on application.

W. Harris, druggist, Storm Lake, Ia., says: "It has given splendid satisfaction."

J. C. Eacker, druggist, Elliott, Ia., says: "Have sold several orders and in every case satisfaction given."

A. P. Gano, druggist, Missouri City, Mo., says: "It will be a popular article in our drug market."

J. W. Wyman, druggist, Unionville, Ia., says: "It cures chicken cholera every time."

Smith & Thomas, druggists, Platte City, Mo., say: "It gives good satisfaction here."

Duffield & Harlan, druggists, Centreville, Ia., say: "It is entirely satisfactory."

Dr. S. S. Clayberg, druggist, Avon, Ill., says: "It gives good satisfaction here."

Melle Williams, druggist, Taylorville, Ill., says: "Have a good trade. It gives splendid satisfaction."

\$1.00, \$2.50, and \$5.00 packages. I can work up a trade for

BYRON WESTON

DALTON, MASS., U.S.A.,

HAS BEEN AWARDED THE

GRAND PRIZE GOLD MEDAL

AND RECOMMENDED THE

Medal of Honor and Perfection

At PARIS, 1878,

This being the **HIGHEST** and **ONLY** AWARD given for

LINEN RECORD & LEDGER PAPER.

—A SPECIALTY.—

THIS Paper has received THE HIGHEST PREMIUM over all others from the Cincinnati Industrial Exhibition, Massachusetts Charitable Mechanics' Association, Franklin Institute of Philadelphia, Louisville Exposition, Medal and diploma from United States Centennial Commission, Medal of Progress American Institute, 1877, and Medal of Improvement and Progress, Boston, 1878. Its

PRINCIPAL ADVANTAGES

are as follows:—1. It contains more LINEN than any other Ledger Paper, has a longer fibre, and is, consequently, tougher. 2. Having a harder and better body, it frays less in erasure, so that by simply using the rubber after the eraser, the ink is prevented from spreading. 3. It is more uniform in Weight Color and Finish. 4. It never cockles if properly bound. 5. Its chemical action upon ink is such that it both writes and rules up better. For proof of the foregoing, refer to a large number of Stationers, Bookbinders, Bookkeepers, and Recorders, who have given it, after a severe test, the preference over all others. This paper is *Double Sixed*, and will stand any climate or the most acid of fluid inks.

Send for sample sheet, **ERASE** and **REWRITE** **FOUR TIMES** on same spot,
Each sheet is water-marked with name and date.

Correspondence.

BALTIMORE BRIEFS.

[FROM OUR REGULAR CORRESPONDENT.]

BALTIMORE, Md., November 15, 1881.

The elections here passed off very quietly, and but for the killing of Dr. T. Clay Maddux at the polls of Anne Arundel County, Maryland, we could boast of perfect peace on the 8th instant. Maddux was widely known throughout the country, especially in the South, by reason of his shooting scapes and his participation in duels, and it surprised no one here that he died with his boots on. He was shot in the back while guarding a polling place in a district where he had no business; and, although every one admits that his awful punishment served him right, there is no one who will not confess that the city has lost one of her most experienced and skillful surgeons.

The Christmas business is already looking up, and the windows of the Baltimore News Company, W. E. C. Harrison, Cushings & Bailey, Guggenheimer & Weil, M. L. Stork & Co., and other well known book and stationery stores are showing attractive signs of the approaching holidays. The Christmas card business is a little in advance of former years. Most of the houses here opened and marked their stocks, and customers are beginning to make their selections. The designs of the season are novel and chaste, surpassing those of last year. A good business is looked for on all sides.

J. H. Medairy & Co. have been awarded the contract for supplying the State Legislature with stationery and printing for the session of 1882.

J. C. Moran, traveler for John B. Piet, has been on the road for the past month, and will remain out some six weeks longer. He is sending in satisfactory orders for Father Ryan's poems, and other popular publications of the house. Mr. Piet was fortunate in securing the Ryan poems, for no book published south of New York has ever had such a successful run. The sales this season are even better than those of last.

The firm of M. L. Stork & Co. has dissolved. F. W. Koch, the junior member, has bought out the interest of Mr. Stork in the business, and will hereafter conduct the business in his own behalf. Mr. Koch is a young and enterprising man, and will no doubt retain all the trade of the old house, besides adding much new custom.

W. E. C. Harrison is doing a larger business

than ever of late; only last week he filled a big order for books and stationery for Texas.

Robert Goldsborough Bordley and William J. C. Dulany have formed a special copartnership, under the firm name of Bordley & Co., for the purpose of conducting a general printing business.

A large assemblage collected in Grace M. E. Church, Lafayette Square, last Wednesday, to witness the marriage of Dr. W. H. Curry, of the popular firm of Curry, Clay & Co., stationers and printers, to Annette M., daughter of the Rev. R. G. Chaney, of Baltimore. Organist Saunders welcomed the arrival of the bridal party with a beautiful wedding march. Rev. Mr. Muller officiated at the ceremony, and was assisted by Rev. Mr. McAllister, of Bethany Church. Dr. Curry is very popular with the trade as well as in social circles, and the congratulations he received were many and hearty.

The following named representatives of the trade have recently been in town: Robert Snider, New York; Charles H. Iéhle, of Loeb & Brother, New York; Z. A. Devolle, of the Nescochague Manufacturing Company, Philadelphia; James M. Brown, of Brown & Sanson, New York; and J. P. Patterson, of Steiner Brothers & Patterson, New York. W. P. M.

CHICAGO CHIT-CHAT.

[FROM OUR REGULAR CORRESPONDENT.]

WESTERN OFFICE LOCKWOOD PRESS,
8 LAKESIDE BUILDING, CHICAGO, ILL., NOV. 12, 1881.
Some stirring events have recently taken place in the trade here which deserves chronicling. Among others, the Shannon File suit, so long pending, has been decided at last in favor of the plaintiff, Shannon, giving him, as a just reward, the fruit of his inventive labors. I inclose the decision, which may be of interest to the general manufacturing trade.

For some years past the J. W. Butler Paper Co. has been making itself prominent in Western business by constantly extending its facilities and adding to the variety of its lines. Last spring it bought out the old card firm of T. S. Gillett; recently it has taken the agency for the U. S. Ticket and Tablet Co.'s fancy cut cards; and now, finally, the stock of the old house, Clarke, Friend, Fox & Co., has been added to its long list of acquisitions. Where the J. W. B. Paper Co. will find its next "world to conquer" who may tell! The following concerning the dissolution of the late firm, and the purchase of its stock and good-will by the Butler Co., has been issued by the latter house:

DISSOLUTION.

Thos. Fox and the estate of Chas. W. Friend, deceased, both of Cincinnati, Ohio, having this day dis-

posed of their interest in the firm of Clarke, Friend, Fox & Co., of Chicago, to Wm. C. Clarke, the said firm is dissolved, and Wm. C. Clarke is authorized to sign the firm name in settlement of its affairs.

WM. C. CLARKE.

Thos. Fox, by Geo. B. Fox, Att'y.

Geo. N. Friend,

Executor of estate of Chas. W. Friend, deceased.

CHICAGO, November 1, 1881.

I have this day disposed of the stock, fixtures, and good-will of the business of the late firm of Clarke, Friend, Fox & Co. to J. W. Butler Paper Company, and take pleasure in recommending them to our customers.

WM. C. CLARKE.

We acknowledge the correctness of the above, so far as the action of the J. W. Butler Paper Company is concerned. The addition to our stock of that of Clarke, Friend, Fox & Co. gives us enlarged facilities for transacting business, also the products of several new mills; and with the ability and disposition to furnish the best goods manufactured in the paper line, at close margins, we are confident of being enabled to meet the just anticipations of the trade.

J. W. BUTLER PAPER COMPANY,

184 and 186 Monroe street, and

150 and 152 Clark street, Chicago.

No doubt the members of the old firm will carry with them the good wishes of all who have known them as they are—square-dealing, courteous, obliging and full of enterprise. However, their business could not have fallen into better hands than those of their successor, to whom long life and their merited patronage! Chas. P. Willard & Co. have received some of the most flattering testimonials from printers, to the efficacy of their engines and boilers. It cannot but be of interest for printers to hear what others in their line have to say of a good thing. I reprint one.

OFFICE OF THE LUDINGTON DEMOCRAT,
LUDINGTON, Mich., Nov. 10, 1881.

Messrs. Chas. P. Willard & Co.:

In reference to the 2-horse power acme engine and boiler, purchased of you in July, we have this to say: that it exceeded our expectations in capacity, and runs with less noise than a sewing machine. We run a 28x40 power printing press and a quarto medium Gordon at the same time, with twenty pounds of steam. The machines have run almost constantly since the engine arrived, and we would not do without it in the future. We carry on an average, however, eighty pounds of steam, although it is not necessary. The Hancock inspirator is immense. It does away with the old foggy pump, and is always ready to do its work. For fuel we use soft coal, which costs us \$6 per ton. One ton lasts us thirty days, when the engine is in constant use. The engine would run four presses easily with forty pounds of steam. We consider the Acme ahead of anything yet for a printing office. It is simple and durable.—Yours respectfully,

MARSH & Co.

The "Chicago Book and News Company" is announced as on the tapis.

The printers' machinery house of Rose & Hodge has just taken in a third partner—Sanford

T. Gully, of Detroit. The firm is to be known henceforth as Rose, Hodge & Co.

A new wholesale paper house is that of A. F. Hodge, recently with the late firm of Clarke, Friend, Fox & Co. The new store is located at 115 Dearborn street.

The Doerflinger Book and News Company, Milwaukee, Wis., is closing out.

Tuerk Bros. & Johnston have just furnished Notre Dame College, of this city, with a motor for running a large organ. The same firm has recently shipped some heavy orders to Australia and New Zealand.

The firm of Gerge W. Emerson & Co. has dissolved, Mr. Emerson buying out the interest of Charles W. Halloway, his partner. Mr. Emerson's headquarters are 71 Randolph street, where all communications should be addressed. This firm is noted for the variety of its goods and as the proprietor of the "Home" binder.

Among recent visitors in the trade were: Samuel Hano, of Samuel Hano & Co., Boston; A. S. Alfred, representing Hard & Parsons, New York; Mr. Bentley, of Farmer, Little & Co., New York; Mr. Dillon, of Baird & Dillon, New York; and C. M. Ward, representing the Springfield Printing Company, Springfield, Mass.

I was about to close without mentioning a most important acquisition, both socially and commercially, to Lakeside Building—i. e., Reed & Co., publishers of the *Leading Industries of the Northwest*, a most useful and interesting series of commercial, statistical and historical pamphlets. The same firm is also proprietor of the *New York Age*, which will soon be transplanted to this city. The firm is situated at 9 Lakeside—next-door neighbors—and from the push and industry visible in the faces and manners of the firm, Chicago is likely to feel their presence ere long. *Bon voyage!* G. B. H.

DAYTON DOINGS.

[FROM OUR REGULAR CORRESPONDENT.]

DAYTON, O., November 7, 1881.

Since my last letter I have only the same old story to repeat, i. e., trade was never so good. I speak particularly of jobbers; the retailers have a little lull just now, but are getting ready for a big holiday trade. A few years ago it was the custom to decorate the stores only a few days before Christmas, but now I find many have already done so; and a look at pretty novelties in the windows pays for the trouble.

Some of your correspondents are making complaints that they are being undersold by dry goods dealers and others, and take manufacturers of stationery to task for selling to that line of trade. The trouble cannot be stopped in that way. You know the old proverb about fighting the skunk. You must meet them with their own weapons. Let some retail stationer offer gloves at cost, or corsets a little below, and I think that a compromise will soon be effected. You cannot keep a responsible merchant from obtaining whatever goods are in the market. He will buy indirectly through business friends.

Since my last letter, C. E. Hopkins has been here, and is as good-natured and enthusiastic as ever. He says that this is his best year on the road.

Stanley Morrell, of Weill, Livingston & Co., put in an appearance to-day; J. H. Black's pleasant visage was also apparent. He had not been in our city for three years, and has changed his line since then. He showed a very pretty line of valentines. I always wonder who the buyers of the high-priced lace valentines are; but, as long as the "fool and his money are

soon parted" holds good, it is not much use to inquire.

Mayor Means, of Cincinnati, intends to enforce an old statute charging a license fee for commercial travelers in his city. The amount is \$300, I believe. The reason given is that the oily drummers, by their plausible talk, have inveigled the innocent Cincinnatians into buying goods that they could not sell. Such innocence as this is phenomenal, and should be strictly guarded—hence the fence to be put around the city. I would invite all the travelers to make our city their base of operations, and to write their Cincinnati customers to come up and see them here. I have no doubt, judging from their actions in the past, that the Stationers' Board of Trade will take the matter in hand, and get the law repealed.

The Art Decorative Society of our city is now holding an exhibition of its products in the City Hall, and I will be on the safe side in saying that better work of amateurs was never shown in this country. Professor Broome, an artist of marked ability, has charge of the school, and has succeeded in transfusing some of his enthusiasm and ability into his pupils. Some of the vases made at their pottery will decorate New York windows this winter.

All of the mills throughout the valley are busy. Wrapping papers have advanced about $\frac{1}{4}$ c., manillas the same; book and news show no material change. Abundant rains and warm weather have again located the Garden of Eden in the

MIAMI VALLEY.

TORONTO TRADE.

[FROM OUR REGULAR CORRESPONDENT.]

TORONTO, Ont., November 12, 1881.

I can only repeat at this writing what your correspondents from all parts of the Union have to say about your own trade, viz., that it is good. Every body congratulates every body, and every body wears a cheerful countenance. There is no drawing down of the facial muscles. No grumbling about hard times or dull trade. Prices are good, money abundant and every one busy, which state of things, we hope, may continue for ever, or say, during our time. Too much prosperity is said to make men proud and arrogant. Perhaps it does. At the same time, we would like to try it for awhile and see how it goes. There is only one exception to be made to the above. It is said we have more politics to the square mile in Canada than any other country. I am not sure about that, and think perhaps you could compete successfully with us. Anyway, the "in's" with us are jubilant, while the "out's" say we are going to — as fast as we can jump; and unless they get hold of the papspoon very soon we shall certainly find ourselves landed in Tophet, or some other place not much better. Politics has become a business, and, so far as my experience goes, a very dirty kind of business as a rule, indeed; and those who go into it, with few exceptions, are like those who handle pitch, they come out with the marks of their trade plastered on them.

We are having delightful weather for the time of year. There has been snow, hurricanes, and floods in all directions, but we enjoy a happy immunity from all these. The fact is, our climate has been reviled and misrepresented abroad. We have really one of the finest in the world, and nothing could be more enjoyable than our Indian summer. The only drawback just now is—the streets are horribly muddy. As one of our city papers puts it, it is very bad underfoot, but exceedingly pleasant overhead. Unfor-

tunately, there are only a few of us going the latter way.

James Bain & Son, booksellers, &c., who have occupied their present store over thirty years, will move across the street on December 1 into much larger premises. This change has been forced upon them by an increase of business.

The Dominion Blank Form Printing Company has also moved into much more commodious premises, the necessities of its business requiring more room than it had in the old place.

R. Duncan, of R. Duncan & Co., Hamilton, was in town to-day and reports business as being first-rate in that city.

The York Envelope Manufacturing Company has more orders on hand than it can execute, and Mr. Bailey, the manager, has just returned from New York, where he has been to get more machines built, so as to be able to meet the increasing demand.

I was shown to-day, by Mr. Williamson, of Willing & Williamson, some plaster casts of Sir Jno. A. Macdonald and the late Hon. George Brown, by Mr. Dunbar, a young and promising artist. Both are remarkably truthful representations of these eminent Canadian statesmen.

Willing & Williamson are the agents for "The Improved Newtonian or Combined Astronomical and Terrestrial Globe," by M. Turnbull. This is one of the most complete and correct globes made. Full particulars in their catalogue, which can be had on application.

Robert Marshall reports business with him first-class. He has a fine store elegantly fitted up, and in addition to his book and stationery trade he carries a very large stock of juvenile books and toys of every description, imported direct from Germany, Switzerland and the United States, also photo and autograph albums in great variety both foreign and American.

It is hardly worth while to say anything about Christmas goods. Everybody has them, and every maker under the sun, and they are not few in number, is represented. If the sales are good this season, there will be a good demand next year. If not, no card makers need apply for orders over here.

There are several changes among our smaller booksellers. R. O. Smith & Co. are moving into larger premises. Mr. Lorimer has moved into a new store and has now a very tasty shop. These, with other changes noted, are indications of prosperity.

The extra number of THE STATIONER was a capital one—so are all the numbers, in fact, and should find their way into every bookseller's and stationer's store; and yet, do you know, there are a great many who say they can't afford to take it, and if they did, they, have no time to read such things. Is it not sad that men are so driven by the urgencies of business. Of course, we all have our opinions, and mine are that men who have no time to read, are men no one need envy. C. H.

WATER GLASS.—The *Génie Civil*, in a recent article on water glass, gives the following as the proportions used by English manufacturers for producing that article by fusion in crucibles: Pure quartz, 45 parts; powdered alkaline carbonate, 23 parts; charcoal, 3 parts. Another recipe is: Quartz sand, 100 parts; caustic soda or potash, 48 parts; and charcoal powder, 5 parts. Or washed quartz sand, 65 parts; anhydrous alkaline carbonate, 34 parts; and charcoal powder, 4 parts. The mixture is heated to redness until entirely fused, and the contents are cast on tin plates for cooling, and finally crushed.

OLD BERKSHIRE MILLS

DALTON, MASS., U. S. A.

One party writes: "The two hundred RECORD BOOKS, for 83 of the 99 Counties, now on exhibition at the Iowa State Fair, at Des Moines; and all, but four (4) of them, made from your 'OLD BERKSHIRE MILLS LINEN LEDGER,' Medium, 40lb., make a splendid show."

[The above cut is a fac-simile of the wrapper used on the Linen Ledger Paper.]

We will pay for any book rejected on account of fault in the paper. Send for Samples, test them in comparison, and see that your books are made from paper thus water-marked.

OLD
BERKSHIRE
MILLS

LINEN LEDGER PAPER

Will stand the severest
test of COLOR, CLIMATE,
INK OR WEAR.

Being Triple Sized (a process entirely our own) and Loft Dried, can be erased and written upon the fifth time distinctly. None genuine without the water-mark and date, thus—Old Berkshire Mills Linen Ledger, 1881.

CARSON & BROWN CO., Manufacturers.

THOS. DE LA RUE & CO.'S IMPERIAL TREASURY

WRITING PAPERS

AND ENVELOPES.

THIS POPULAR STATIONERY is made from the very best rags, and is tub-sized with the purest animal size by a process which strengthens it throughout its entire texture. It is supplied with a rough, mill rolled, or highly finished surface. Each sheet of paper bears the watermark, "Imperial Treasury, De La Rue," and the Imperial Crown and Monogram. Both paper and envelopes are packed in neat, ornamental boxes, with hinged lids and fall-down flaps—the paper in five quires and the envelopes in boxes of one hundred. This paper combines the excellences of hand-made paper, with the best characteristics of machine-made paper, and we can with confidence recommend it to all stationers who deal in first-class stationery.

Samples and prices on application to our American representative, **Mr. A. J. PULSFORD**, P. O. Box 1590, New York.

L. PRANG & CO.'S

Christmas and New Year Cards

ANNOUNCEMENT.

WE hereby beg leave to announce to the trade the completion of our line of Christmas and New Year Cards for this season, for which our agents are now soliciting orders. The extent of our list, the originality, and especially the American character of our designs, together with the great care taken in their execution, will, we have no doubt, secure for our goods the popularity which they have enjoyed heretofore. The efforts we have made to secure the highest excellence, is attested by the names of some of the artists whose designs have been reproduced. We would only name Elihu Vedder, C. C. Coleman, Thomas Moran, Miss Rosina Emmett, Miss Dora Wheeler, Mrs. O. E. Whitney, W. H. Gibson, F. S. Church, R. G. Birch, &c. That a due regard has been paid for the quality of the literary matter, in connection with these designs, is shown by the fact that many of the designs are accompanied by original poems from writers of note, such as Mrs. Celia Thaxter and Mrs. Emily Shaw Forman.

The great increase of our manufacturing facilities, secured by additions to our building nearly doubling our floor space and by the adding of new machinery, will place us in a position to fill orders promptly. Still we would request dealers to place their orders as early as possible, so as to still further enable us to make timely preparation for prompt deliveries.

Our Cards will, as heretofore, be put up in envelopes containing twelve Cards, unless otherwise stated on our price lists.

We furnish envelopes without extra charge for all our Christmas and New Year Cards, for which the list price is \$1.80 per set, and over. Our silk-fringed Cards will no doubt be in great demand this season. We have made ample preparation to furnish these in time and have made arrangements with our manufacturers for the best quality of silk fringes. We would call special attention to the excellence of our fringed Cards and the novelties in colors and style of fringes we offer for this season.

A marked and attractive feature of our cards are the elegantly ornamented backs.

All our fringed Christmas and New Year Cards are furnished with envelopes and protectors, so as to insure safe transportation in the mails.

It will be impossible to embody our whole list in the space of the advertisement, and we will therefore merely give a general outline of the variety offered.

PRANG'S PRIZE CHRISTMAS CARDS.

COMPETITION OF 1881.

These are the Cards selected by the judges in the second competition for four designs of Christmas Cards, for which we offered \$2,000 in prizes of \$1,000, \$500, \$300 and \$200 respectively. At the recommendation of the judges, Messrs. COLEMAN, LAFARGE, and WHITE, the prize for third best Card was increased to \$500. Mrs. CELIA THAXTER has written appropriate verses for each of the designs.

- 1st Prize Card (\$1,000), by Elihu Vedder. Size, $6\frac{1}{4} \times 9$ inches; price \$1 each. Same card with silk fringe, cord and tassels, price \$1.50 each.
- 2d Prize Card (\$500), by Miss Dora Wheeler. Size, 7×9 inches; price 75c. each. Same card with silk fringe, cord and tassels, price \$1.25 each.
- 3d Prize Card (\$500), by C. C. Coleman. Size, 7×9 inches; price 75c. each. Same card with silk fringe, cord and tassels, price \$1.25 each.
- 4th Prize Card (\$200), by Miss Rosina Emmett. Size, $5\frac{1}{4} \times 9\frac{1}{4}$ inches; price 60c. each. Same card with silk fringe, cord and tassels, price \$1 each.

The Prize Cards can also be had mounted on heavy board with gilt beveled edges.

We beg to call attention also to the following publications for New Year and Christmas:

- "Goddess Fortune" New Year Card, by Elihu Vedder. Size, $6\frac{1}{4} \times 8\frac{3}{4}$ inches; price 75c. each. Same card with silk fringe, cord and tassels, price \$1.25 each.
- "Christmas Dove." Size, $7 \times 9\frac{1}{4}$. This card is in the same style as the success of the last Easter season, the "Easter Dove" Price 60c. each. Same card with silk fringe, cord and tassels, price \$1 each.

Our Regular Line of Christmas Cards consists, among others, of the following Series:

- | | |
|---|--|
| Nos. 901, 902, 903, 906, 909, 910. Floral designs ranging in price from 20c. to \$1.20 per set of 12. | Nos. 920 and 929. Children's designs, at \$2.40 and \$3.60 per set. |
| Nos. 904, 905. Humorous Cat and Frog Designs, 60c. per set. | No. 922. Shells of Ocean, with figures, \$2.40 per set. |
| No. 907 is a new series of Horseshoe designs, 75c. per set. | No. 924. Fans with silk fringes, \$3 per set. |
| We offer a similar assortment of New Year Cards, but would call special attention to No. 1320, a new folding calendar, at \$2.40 per set. Most of the Numbers can be had with silk fringes ranging in price from \$2.25 to \$12 per set. Stock will be ready for delivery September 15. | No. 933. Bric-à-Brac designs, very rich, \$6 per set, and many others. |
| Besides the above, attention is called to our New Birthday Cards, Scripture Texts Cards, New Panels, New Water Colors, by Thomas Moran, and other publications. Our line of Thanksgiving Day Cards will also be shown by our agents. | |

LINEN PAPER IN STAMPED
COVERS.

The above cuts show our new method of putting up *Fine White Writing and Linen Papers*, for general use, in *Portfolio Style*, with a sheet of the best Blotting Paper attached to the cover as represented, making it the **BEST** and **MOST** CONVENIENT form for writing tablet in the market, which will only need to be seen to be appreciated.

TOURISTS' TABLETS.

This is a line of *Fine White Writing Paper*, handsomely bound in Tablets, with flexible covers to keep the paper compact and prevent it from being soiled. They will be found very convenient for the use of travelers and others where a less expensive tablet than our "Portfolio" is desired. The covers are printed with a neat design, making them a very attractive as well as convenient article for general use. They are put up in packages with ten tablets of eighty sheets each, of the following Nos. and Sizes:

No. 121.—Commercial Note.

No. 122.—Packet Note.

No. 123.—Congress Letter.

SAVE THIS PAPER.

A Revolution in Paper Fastener Tools.

The Philadelphia Novelty Manufacturing Company take pleasure in offering the Trade the best Paper Fastener Tools, the best Wire Staples, and the **only** machine-made Wire Suspension Ring Staples, for Show-Cards and Pamphlets, at prices which absolutely defy competition.

WE are the patentees or exclusive licensees and the sole manufacturers of all hand-stamp staple driving and clinching paper fastener tools under the original Heyl Patent of September 25th, 1877, and the reissue of the same, July 12th, 1881; the Heysinger Patent of April 13th, 1880; and the Betts Patent of August 7th, 1886, the latter of which covers all forms of spring-feed staple drivers. We are also inventors and sole proprietors of the special machinery for making looped wire staples, and which is now being secured by letters patent in the United States and Europe.

We warn the Public and the Trade that all hand stamp staple driving and clinching tools, including the McGill (made by Holmes, Booth & Haydens of N. Y.), Somers, and Brown machines; and all combined clinching clips and staple drivers, all stamped metal staple drivers, all suspension ring staple drivers and clinchers, and all spring feed self-feeding staple drivers, are infringements upon our patented rights, and we propose to bring suit against all persons financially responsible, who manufacture or deal in these pirated inventions. We have already commenced action against one of the above named parties, and have, through our counsel, notified another that we are about to proceed against them. To show the grounds upon which we are acting, we reproduce from our letters patent the following:

(Description of invention, original Heyl Patent, No. 195,603, Sept. 25th, 1877.)

"My invention consists of an implement of the form of a hand stamp, by which metallic staples may be forced through sheets of paper documents and secured by clinching the legs on the reverse side.

"Claim 4.—The combination of the stationary staple support or anvil A, with the reciprocating slotted or recessed hammer, operating to insert a staple through layers of stock to be united and simultaneously bend over its projecting ends."

(Heyl Re-issue, July 12th, 1881, of the above patent.)

"Claim 2.—In a device for inserting metallic staples, the combination of the staple guide B, anvil A', spring D, and reciprocating driver provided with the

knob G, the whole arranged to operate substantially as and for the purpose set forth.

"Claim 4.—An implement for inserting metallic staples, consisting of two opposite jaws, one of which is provided with a staple-bending recess, and the other with staple-guiding grooves and an anvil fitted thereto. in combination with a knob to receive the blow of the hand and insert a staple by a sudden percussion, substantially as described.

"Claim 6.—An implement for inserting metallic staples, consisting of two opposite jaws, one of which is provided with a staple-bending recess, and the other with staple-guiding grooves and an anvil fitted therein, the said jaws being arranged to be separated and stand apart to admit the requisite manipulation for conveniently placing a staple in the open end of the said staple-guiding grooves, substantially as set forth.

"The 3d claim of the patent covers the mechanism for retracting the anvil or plunger in the staple grooves; the 5th claim, the mechanism for inserting suspension ring staples; and the 8th claim, the combination of the elements of a staple driving and clinching tool in the form of a desk tool generally."

(Heysinger Patent, No. 226,402, April 13th, 1880.)

"Claim 3.—In combination with the detachable staple driver A, the slotted clamping arm D L, together with the base B, having the recessed block J, the whole constructed, etc.

"Claim 5.—A means for filing and binding papers, consisting of a base-board, C, upon which are mounted one or more paper clips, B D, having clinching blocks, J, and slots, L, with or without the pins F, together with the staple driver A, the whole constructed, etc."

The 1st claim of the patent covers the Novelty clincher; the 2d, the Novelty

staple driver; the 4th, protecting the mechanical construction of the clincher, which is put together without screws, pins or rivets.

For further information regarding legal questions involved, we refer to our counsel, Joshua Pusey, Esq., 903 Walnut Street, Philadelphia.

HAVING thus made clear our legal rights, which we fully mean to protect, we now say further, that our large sales both in America and elsewhere, and excellent manufacturing facilities, have enabled us to produce a much better paper fastener tool than has ever been produced, which we offer at just one-tenth the selling price of those previously in the market. That is to say, we offer the **NOVELTY PAPER FASTENER**, with nickel plated staple driver, Tucker bronzed clincher, and 500 staples, assorted, handsomely boxed, and the staples packed in hundreds, at the **RETAIL PRICE OF FIFTY CENTS**.

(As the 500 staples are worth 25 cents, this leaves just 25 cents for the driver and clincher.)

We also offer the **SUSPENSION RING PAPER FASTENER**, with nickel plated staple driver, Tucker bronzed clincher, 1,000 assorted staples, and 250 steel wire suspension rings, warranted to drive and clinch at one blow, through a pamphlet of more than one hundred pages, handsomely boxed, with a separate compartment for the rings, at the **RETAIL PRICE OF ONE DOLLAR**.

(The staples and rings are worth 81¼ cents, leaving for the box and tools 18¾ cents.)

The Novelty staples fit any of our tools, and are sold separately, put up in packages of 100, and each 1,000 boxed in a handsome slide box, at **FIFTY CENTS PER THOUSAND**.

Suspension Rings in boxes of 500 each, **SIXTY-TWO AND A HALF CENTS PER BOX**, or, **\$1.25 PER 1,000**.

We will mail samples for examination, post paid, at above prices.

We propose to place these tools within the reach of everybody, and make them a household and office necessity in every part of the world.

Dealers will be supplied at the following rates, **CASH WITH ORDER**:

Novelty Paper Fastener (with 500 staples),	Per Gross, \$48.00
Suspension Ring Paper Fastener (with 1,000 staples and 250 rings),	" " 96.00
Novelty Staples,	Per Thousand, .33¼
Steel Suspension Rings,	" " .83¼

As these tools have driven all rivals out of the market wherever offered, and pay the retailer fifty per cent. upon his investment, we can take no risk, nor give time at the above low prices. Strangers are referred for our standing to the Publisher of this Paper, to any of the Express Companies, or to Bradstreet's Mercantile Agency.

TWELFTH YEAR OF PUBLICATION.

THE PRINTING TIMES AND LITHOGRAPHER,

An Illustrated Technical and Fine-Art Journal of *Typography, Lithography, Paper-Making, and the Auxiliary Trades.*

THE NEW SERIES COMMENCED JANUARY, 1875.

THE PRINTING TIMES AND LITHOGRAPHER is a high-class journal, devoted to the Printing and Graphic Arts, in all their various forms. It derives its information from, and circulates in, all parts of the world. No pains are spared to insure the accuracy of its intelligence and to render it in every respect worthy of the support of Letterpress Printers and Lithographers, as well as Artists, Antiquaries, and Literary Men generally.

Published on the 15th of each month, 4to, in wrapper, price 6d. Annual subscription (payable in advance), 8s., post free to the United States. Rates of Subscriptions for foreign countries on application. Post-office orders to be made payable at the West Central District Post Office, High Holborn, to **WYMAN & SONS, 74 and 75 Great Queen Street, London, W. C., England.**

Trade Gossip.

All new goods and designs which are not, strictly speaking, "Novelties" will be noticed under this head. The trade are requested to forward descriptions with samples in order to secure proper notice.

Liebenroth, Von Auw & Co. are exceedingly busy.

E. Boles, bookseller and stationer, Paisley, Ont., has sold out.

The stock of J. K. Hall & Co., paper dealers, Haverhill, Mass., has been attached.

The Massachusetts Paper Company, wholesale paper dealers, Springfield, Mass., has failed.

Torres & Brooks, printers, New York city, have made an assignment.

James A. Orr, printer and publisher, Trenton, Ont., has sold out to Graham & Hurley.

E. A. Flint & Co., booksellers and stationers, Yarmouth, N. S., have made an assignment.

The Winstead Paper Box Company, Winchester, Conn., has sold out to J. G. Wetmore.

Charles E. Glines, bookseller and stationer, Marietta, O., has changed his style to Glines & Snyder.

Smith's printers' ink manufactory at Toronto, Can., was burned on Sunday. Loss, \$2,000; partly insured.

C. D. Williamson, of the firm of Bowen, Troth & Williamson, publisher of the *Evening News*, Chester, Pa., is dead.

Matthews & Co., Philadelphia, have sold out their stock and good-will to John Wannemaker, dry goods dealer, of that city.

W. W. Brewer, for many years with John J. Daly & Co., has engaged with the Buxton & Skinner Stationery Co., St. Louis.

Ralph Trautmann received this week orders for his Presidential and literary series of portraits from London, England, South America, and Mexico.

Hildersheimer & Faulkner, London, have written to a firm in this city denying that they have any agents in this country for the sale of their cards; they assert that those who sell them do so on their own responsibility.

Moss & Co., Philadelphia, report an excellent fall trade—better than for any previous season. Their Christmas and New Year cards, photograph albums, and also their extensive line of staple articles, are in very good demand.

Among the members of the trade visiting this city during the week were: J. Palmer of J. Palmer & Co., Providence, R. I.; S. Levy, of R. & S. Levy, Buffalo, N. Y.; E. Mansbach, San Francisco; Wm. A. Zinn, of "The Connecting Stores," Boston; Robert Beall, Washington, D. C.; J. W. Grove, Pittsburg, Pa.; B. Wolf, Providence, R. I.

Charles J. Cohen, Philadelphia, has just received a fresh lot of plush bags, purses and card cases, in the newest shapes and colors. An invoice of repoussé brass art pieces will be received next week, and Mr. Cohen states they will be received by his trade with much favor. All of the novelties as issued are certain to appear in Mr. Cohen's stock, that gentleman's aim being to stand at all times in the front rank. The house has been taxed to its fullest resources to ship goods in time, night work having been the rule both in the warehouse and factories for many weeks.

Among the visiting members of the trade in the city during the past week were: L. A. Ridgway, Mansfield, Pa.; James Youngs, Bridgeport, Conn.; A. O. Very, Wellsville, N. Y.; J. A. Jones, of J. A. Jones & Co., Boston; H. B. Jadin, Carbondale, Pa.; Mr. Crittenden, of Crittenden & Coles, Glens Falls, N. Y.; Mr. Abdill, of Mills & Abdill, Des Moines, Iowa; Mr. Green, Baldwinville, N. Y.; C. H. Windsor, Norfolk, Va.; Mr. Skinner, of Skinner Brothers, Massillon, Ohio; Mr. Hoyt, of Clarke & Hoyt, Stamford, Conn.; L. S. Tilton, Williamsport, Pa.; F. Williams, Palmyra, N. Y.; Mr. Rowley, of Rowley & Horton, Utica, N. Y.; Mr. Jones, of Hudson Valley Paper Company, Albany, N. Y.; A. L. Hall, Titusville, Pa.; Dr. Curry, of Curry, Clay & Co., Baltimore, Md.; W. O. Osborne, of W. O. Osborne & Co., Cuba, N. Y.; R. J. Oliphant, Oswego, N. Y.; Mr. Jones, of Jones & Armstrong, Rome, N. Y.; F. M. Swan, Natchez, Miss.

Henry Levy & Son, 477 Broadway, are offering great inducements to buyers with the view of closing out their stock of fall importations of fancy goods to make room for the spring trade. Among the articles offered is a choice selection of glass and china both useful and ornamental, a large variety of articles in silk plush and russia leather, antique and modern wall pockets and brackets, ornaments for personal and room decorations, bric-a-brac, grotesque sentimental and descriptive figures in teroline, terra cotta busts and figures, odor cases, necessaires gilt and bronze ornaments, work boxes and work baskets, writing desks, dolls dressed and undressed, fans with pearl, ivory and ebony sticks, opera glasses, card receivers, &c. The trade will have a rare chance in taking advantage of this opportunity to lay in a choice holiday stock at exceptionally low prices.

J. H. Bufford's Sons show a large variety of elaborately finished panels, which include a great many new subjects. They have also just introduced a new series of advertising cards in four designs, each of which represents a season of the year. The illuminations of each include a robin perched upon the bough of a tree, and the seasons are indicated by budding and full-blown flowers, seared leaves and frosted boughs. The designs are tastefully gotten up, and the finish is excellent.

The exhibition of drawings in the competition instituted by L. Prang & Co. for designs of Christmas cards, &c., is now open. A private view was given last Saturday night to a number of guests invited by the firm. The daily papers have commented on the designs, but as THE STATIONER has not yet found an opportunity to examine them, it reserves its opinion.

Members of the book and stationery trade visiting New York are requested to send to THE STATIONER a memorandum of their arrival, where they may be found and probable date of departure. Address the Editor. Advance notice might be given.

Among the members of the out-of-town trade in the city this week were: A. J. Cox, of A. J. Cox & Co., Chicago, and Frank J. Black, of Black & Son, Reynoldsville, Pa.

J. B. Lippincott's "Monthly Bulletin" for November has been received. It contains some interesting announcements.

A. L. Shinn, publisher of the *Lassen Advocate*, Susanville, Cal., has sold out.

It is reported that Walter F. Wheaton, printer, New Bedford, Mass., has left that town.

S. S. Gleason, publisher of the *Enterprise*, Wadsworth, Mass., has sold out to F. H. Barker.

W. C. Plummer, publisher, Meadville, Pa., has been closed out by the sheriff.

A. H. Goetting is working late at nights so as to fill in time the requisitions on hand.

Morris Dennis, bookseller and stationer, Syracuse, Neb., has sold out to J. F. Diener.

Anglin & Morrison, fancy goods dealers, Winnipeg, Manitoba, have dissolved partnership.

The stock of R. C. Polkington, book and job printer, Washington, D. C., has been damaged by fire.

A. & E. Wallach have received a large line of new paints made by Winsor & Newton, London, England.

Sensenman Bros., printers and manufacturers of paper bags, Philadelphia, Pa., have compromised at 50 per cent.

Hamilton & Rockfellow, booksellers and stationers, Deadwood, Dakota, have dissolved partnership. F. Hamilton continues.

Ralph Trautmann has just placed on the market the first steel engraving of President Garfield. It is 19 by 12 inches, is magnificently executed and is a very faithful likeness.

Leroy W. Fairchild has got out a handsome steel engraved card (the work of John A. Lowell & Co.) for an advertisement of his gold pens and pencils. A fancy portrait embellishes the card.

A. & E. Wallach's stock is rapidly decreasing on account of the large sales recently made, and buyers wanting the firm's lines might find it to their advantage to forward their orders promptly so as to secure the desired articles.

E. & H. T. Anthony & Co. have this week placed on the market new pictures of Adelina Patti, the famous prima donna. They come in cabinet and panels. These pictures will be somewhat more expensive than those of many other artists, as the photographer, Sarony, at great expense secured the sole right to control the sale of them.

Myers Brothers show an exceedingly pretty line of satin glove and handkerchief sachets, and card wall pockets, all of which are tastefully decorated with De la Rue's satin pictures. The firm is now introducing an elegant line of satin and plush covered jewel cases, richly embellished with embroidery. One design (No. 89) of this line is ornamented with De la Rue's picture No. 452½, and is said to be one of the most exquisite articles of the kind ever produced. The firm reports an immense sale of its fine plush cabinets, which are articles that have only to be shown to sell. The sale of the firm's Christmas cards has been much larger than in any previous year, and members of the trade wanting them should forward their orders at once. Some of the designs in this line are solely controlled by this house.

The Massachusetts Paper Company, Springfield, Mass., has failed. Attachments against the company were served on Saturday last by the Springfield City National Bank and also by McArnold & Hart, of New York and Newburg, the Kansas City Paper Company, of Kansas City, Mo., and the Russell Paper Company, of Lawrence. The liabilities, including contingents, will probably amount to about \$300,000, while the assets cannot be known till an inventory has been taken. The company has several warehouses in Springfield, and dealt chiefly in paper stock, but also sold cardboard, papers, envelopes, sheathing, and carpet lining. The employees were paid in full on Saturday and discharged. The number of creditors is large, there being perhaps 75 or 100, but it is thought

there will be no claims exceeding \$3,000 or \$4,000.

Trayser Brothers, printers, Milwaukee, Wis., have dissolved partnership. Frederick Trayser succeeds.

T. S. James returned home this week from a very satisfactory trip in the West for Daniel Slote & Co.

Henry Levy & Son, 477 Broadway, are offering great inducements to the trade so as to close out their holiday stock.

C. S. Plummer will appear at the Park Theatre, Newark, N. J., in "Scrap of Paper" on December 6, playing the leading character of *Monsieur Prosper*.

John Gibson is very busy filling his orders for Christmas and New Year cards. He expects to have all his orders that are now on hand out in about two weeks.

A. Weidmann & Co. are closing out job lots—remnants and odds and ends generally, and parties wanting bargains had better call at once at the firm's warerooms.

R. Fideau has lately received quite a number of orders from the trade for his "Union" school bags, which are particularly adapted for the holidays, owing to their variegated colors.

McCarty & Hasberg are very busy and are working late at night so as to fill in time the large requisitions on hand. All of their available force is now in the store waiting upon the trade.

It is reported that a well known stationer of Buffalo, N. Y., intends to enter into matrimonial relations in January. The same can be said of one in Chicago. Both of these parties are prominent in the trade.

Doctor Curry, of Curry, Clay & Co., Baltimore, Md., with his wife, was in the city this week buying goods, and left here for Springfield, Mass., to make arrangements with the Southworth Paper Company, to take the agency for its papers at Baltimore.

An entirely new edition of "Helen's Babies" is in press, and will be published in a few days by T. B. Peterson & Brothers, Philadelphia, Pa., with a very handsome illustrated cover, having portraits of Budge and Toddie, Martha, Mary, and the goat upon it.

McLoughlin Bros. have just issued a new series of pantomime toy books, which include five numbers, viz., "Sleeping Beauty," "Aladdin, and the Wonderful Lamp," "Cinderella," "Puss in Boots" and "Blue Beard." Each number contains five set scenes and nine changes, making fourteen transformations, which are among the best of the kind yet devised. It also contains ten pages of descriptive letter-press, printed in colors, and bound in fancy illuminated board covers.

"The Initials, A. Z.," is one of those charming stories which never fails to interest, and which can be read and read again. The characters are well drawn, the incident is lifelike and vigorous, while the information which the book gives about German manners, and the descriptions of German life and scenery, are plainly gathered from intimate association and knowledge. The story abounds with details most interesting in character, and there is a strain of romance and a tale of love which any one who reads the book will concede to be natural. T. B. Peterson & Brothers, of Philadelphia, have issued it uniform with their other publications of the 75 cent class. People who, like the writer of this paragraph, have read the story years ago, will welcome it gladly as an old and dearly-loved friend, and those who take it up for the first time will be loth to bid it adieu.

Considerable strata of bluish solid chalk have been discovered in what is known as a "white chalk" bed at Longinowska in Galicia. Some lithographers at Lemberg are using the new stones.

THE STATIONER.

DEVOTED TO THE INTERESTS OF THE

Stationery and Fancy Goods Trades.

WEEKLY--\$2.00 PER ANNUM.

Single Copies - - - 10 Cents.

NEW YORK, THURSDAY, NOVEMBER 17, 1881.

Advertisements cannot be received for insertion in the current week later than 12 m. on Wednesday. The charge for advertising is 25 cents a line, each insertion. Special terms for standing and displayed advertisements to be had on application.

This journal aims to be a medium of information for and a representative of the interests of every one connected with the stationery and fancy goods trades. It contains a full and trustworthy survey of the market for stationery in this country, in all cases giving the actual prices at which goods can be bought of importers and jobbers in this city, together with a detailed account of novelties in the trade, patents relating to stationery, and current items of interest. A review of foreign markets and accounts of movements abroad will also be furnished, and no pains will be spared to make THE STATIONER a thorough and complete exponent of the trade.

Subscription and postage for Great Britain, per annum..... 12s.

Any information our readers may wish to obtain shall be cheerfully given, and prompt replies will be made to all inquiries addressed to us on any subjects of interest to the trade.

Communications on all trade matters are earnestly solicited. Address

HOWARD LOCKWOOD, Pres. and Treas.

Subscribers to THE STATIONER can be supplied with the best cloth binder in the market. Deliverable at the publication office. Price, fifty cents.

Readers of this paper who avail themselves of the information obtained from its columns, by advertisement or otherwise, are requested to notify their correspondents of the source of their information.

THE anticipated advance in the prices of envelopes has been made.

Now, if the envelope manufacturers will bear in mind that they are not the head and front of the stationery trade, they will be wise.

STATIONERS who want to be represented at the Auckland Exhibition can send goods thither in charge of our general Australian agent, and can arrange to that effect through this office.

It is not to be expected that the makers of envelopes should sacrifice themselves or dutifully let their customers make prices for them; but they should remember that they are equitably bound to deal fairly, and that they ought not to undersell their customers, or in any way compete with them.

OUR Australian correspondent telegraphs us that twenty-four medals were awarded at Adelaide to Americans who had their exhibits in the Lockwood Press pavilion. Eighteen of these medals are of gold, four of silver and two of bronze. Among those honored with gold medals were the Lockwood Press, Juvet Time Globe Company, Byron Weston, H. D. Wade & Co., Moses Warren, Orestes Cleveland, Leroy W. Fairchild, and Eberhard Faber. Silver medals were given to Williams & Stillings and Galt & Hoy; bronze to Holmes, Booth & Haydens, and E. Remington & Sons.

We have a report of a stationery house that has sold out, "bag and baggage," to a dry goods dealer. This in Philadelphia! A lively competition at the expense of the stationery trade of that city is likely to follow. No relief can be expected, for, as one of our correspondents remarks, the dry goods men will get the goods in one way or another. The most effective way of fighting fire is to meet it with fire. Wherever this competition exists we advise the trade to form a syndicate and buy up a lot of miscellaneous dry goods cheap—we know that if well bought they can be had low enough—and then set up a retail department where they can sell at cost. Trade will crowd upon those who venture on this counter-irritant, and perhaps the effect will bring about an understanding to let each other alone. Should this experiment be made, we caution those who attempt it not to sell in lots, nor to permit purchases of laces, gloves, &c., to be made in any greater quantities than ordinary retail lots. It will be a big thing for the general public and—let us hope—for those who engage in it.

APROPPOS to what we have said concerning the competition of manufacturers with the distributing trade we print a letter from a subscriber, in which he sets forth facts which illustrate some of our remarks. The offense is not so extreme as in cases where sales are made to consumers at trade prices, but it is certainly a sorry showing. We believe that all of our envelope

makers have large factories, and that they are supposed to conduct business on a scale which raises them above the practice, not to say necessity, of retailing envelopes; but in this instance it would seem to be different. Does the manufacturer understand that he is bringing his business standing into question and disrepute by such an action? It certainly gives rise to comment when he undertakes to supply consumers with printed envelopes in small lots. Aside from this, if he does not care for the position it gives him with the trade, can he not see that it works to his disadvantage and to the injury of the envelope manufacturing trade generally. People must be impressed with the idea that there is a surplus stock, which must be worked off "by hook or by crook," and, therefore, are chary of giving orders, expecting that necessity will force a decline in prices. This is too small a business for the manufacturer to engage in. We condemn it unqualifiedly. Instead of being at odds with each other, the different branches of the trade should sustain each other in all just demands, and manufacturers should accord that equitable protection which they would claim and expect were they differently situated.

Communications.

[Correspondents are requested to write on only one side of their paper. No responsibility for the opinions of correspondents attaches to this paper.]

A Question of Policy.

To the Editor of The Stationer:

We have seen a good deal in our daily journals about President Arthur's policy, but, to tell the truth, we are more interested at present in the envelope manufacturers' policy. Do they or do they not intend to monopolize the consumers' trade? If, as we judge from what we see and hear, they say yes, we will give them a clear field, and trust they will enjoy the exchange of customers. As jobbers, we try to have some faint idea of what is our duty to our trade, and, if a consumer brings to us an order to print envelopes or paper, we inform him that we do not printing, and refer him to his stationer or printer, although we might take his order and make a good profit on it.

But the manufacturer of over a million envelopes a day takes a different view; he does not object to the consumers' 5,000, but takes the trouble to give him a quotation, which we will admit is a little higher than trade price. We have before us an envelope on which present combination price is \$1.50 printed, and freights to be added to that. This envelope was offered to a consumer for \$1.75. We cannot with justice to our trade sell the consumer, so we sell the stationer or printer, and they sell the consumer. If we are too avaricious and there is ample protection, and it seems to you perfectly right for the manufacturer to sell the consumer, frankly say so, or, if you think it a small way of doing business for a large manufacturer, we know you will say so with equal frankness, for you have not the reputation of being afraid to express your opinion.

"C."

A meeting of the envelope manufacturers took place last Friday, at Springfield, Mass., and resulted in an advance of prices of from five to ten per cent. with a few exceptions.

H. A. Schmook celebrated the anniversary of his birthday on Monday, at his residence, 1232 Third avenue, this city. Among the numerous guests entertained in right royal manner by the genial host and his wife were a good many representatives of John Gibson's establishment, 82 Beekman street. One of the pleasantest features of the evening was the presentation to Mr. Schmook, by I. R. Bamber, on behalf of his fellow-employees, of an elegant silver ice pitcher and goblet, which bore the following: "Presented to H. A. Schmook, on the anniversary of his birthday, November 14, 1881, by John Gibson and employees, of 82 Beekman street, as a token of respect and esteem, and of their heartfelt wishes for his future success."

The firm of Parmenter & Walker, Waltham, Mass., which dissolved partnership in September last, and which was succeeded by the firm of A. H. Walker & Co., of which notice has heretofore been given in THE STATIONER, has now been joined by other parties, and formed a joint stock company under the title of the Parmenter Crayon Co., of Waltham, Mass., and will continue to carry on the manufacture of the celebrated Waltham crayons. The business of the American Crayon and Slate Company, 43 Dey street, in this city, will be carried on as heretofore, the principals being the Parmenter Crayon Company, of Waltham, Mass., and the Western School Supplies Company, of Sandusky, Ohio.

Charles T. Bainbridge's Sons show a very handsome line of plush cabinets, decorated on the outside with flowers, &c., painted by hand, and having nickel fastenings. One, particularly handsome, is in variegated plush, with a design painted by hand on the inside of the cover. Another has the appearance of being made of solid bronze, showing beautiful carved figures, while around the centre is a strip of plush. The contrast of color between the plush and the bronze produces a very handsome effect. This firm's line of goods for the holiday trade is this year handsomer and of greater variety than it has heretofore produced.

ANSWERS TO CORRESPONDENTS.

A. asks: Who has German birthday, Xmas and New Year cards in stock at present?

Ans.—J. H. Hamburger, 324 Broadway, N. Y., and Obpacher Brothers, 338 Broadway, N. Y., can, we think, supply you. We presume that you mean cards with salutations in German.

JAPANESE DECORATION.

The invariable truth of drawing and color in Japanese decoration of the genuine kind, particularly in the treatment of living beings, proves that this small and until lately isolated nation possesses a race of art workmen, to which the nations of the West, with all their boasted civilization, can as yet lay no claim. It is, said J. W. Tonks, in a recent lecture at Birmingham, the intense appreciation of the life and habits of the creature, the result of long and loving study, which gives the Japanese workman such pre-eminence. If it is a dragon-fly, it is not a bad copy of some drawing by an eminent artist, such as it would be in an English manufactory; but it is the result of personal knowledge of the insect itself. It is not, therefore, given invariably in one special attitude, but in every variety of position—now flying, now creeping up a leaf, now foreshortened walking down a stem toward the spectator. So with a fish. It is but few workmen—strictly such—who can copy a fish accurately in side view. But the Japanese workman has so intimate a knowledge of his fish that he depicts him twisting, now turning on his back so that his two eyes are seen at once; in fact, performing all those endless varieties of motion which are so interesting to watch in the aquarium. It is, in fact, the mastery of his art which renders the Japanese so supreme and daring a decorator. In the treatment of that most mobile and changeable of members, a bird's wing, the Japanese artist has attained an eminence which it is difficult to make the ordinary British art workman understand. The spreading out of the feathers in fan-like projection, the countless beautiful forms which the wings assume in different positions, are almost inexplicable to the Western artisan, who is too much disposed to treat the wings as solid masses of feathers, retaining a set form in every position. Who, for instance, but a Japanese art workman would think of employing, as a picturesque centre to a large dish, the flight of a flock of geese? Yet a beautiful centre they make. Every goose has a character as distinct from that of its fellows as a hound would have in a Sneyders or a Landseer. There is every variety of position and color, although there is all the unity of flight; and the correctness of drawing is as remarkable as the intensity of action in the birds, which have evidently been startled from their place of feeding. With the exception of the dragon, a few symbolic genii and religious creations, the Japanese draws all his art from his native country. He watches the birds, animals, fishes and insects around him in his own village or its surroundings, and thus the book of nature is translated into decorative art with the freedom and fidelity which has so astonished the Western world.—*London Pottery Gazette.*

HOW TO MAKE A MAGIC LANTERN.

A simple magic lantern, from the construction and use of which a good deal of instruction and amusement may be derived during winter evenings, is described in an exchange. A small box, a kerosene lamp with an argand burner, a little fish globe filled with pure water and a common double or plano convex lens are all the materials

necessary to make it. A hole is bored in the top of the box to permit the chimney of the lamp to pass through and allow the heat and the products of combustion to escape. In the side of the box a round hole is cut large enough to admit a portion of the globe, which is suspended inside the box close to the lamp. A piece of common window glass is then moistened with a strong solution of sulphate of soda, and placed on a stand or clip so that the light from the lamp will be focussed on it by the globe. The image of the glass will thus be thrown upon a screen when the lens are properly adjusted. The formation of the crystals of the sulphate of soda will be seen clearly on the screen, and appear like the magical growth of a forest. Any ingenious family can readily devise a great number of interesting experiments with this inexpensive lantern.

Market Review.

OFFICE OF THE AMERICAN STATIONER.
WEDNESDAY, November 16, 1881.

THE MONEY MARKET.—The money market has been subject to very little change since our last, the banks, as a rule, having no surplus accumulation of funds, while the demand in some departments of business is more active. The rates for prime business paper are 6 to 7 per cent., while call loans vary from 4 to 6 per cent. The stock market has been alternately firm and depressed, in accordance with rumors and reports having a stimulating or depressing effect. The undertone of the market is apparently strong, but awaits an incentive for buying on the part of outsiders. Government bonds continue firm, while railway mortgages are irregular, in sympathy with the share list. Foreign exchange is strong, and as the imports largely exceed the exports, there are apprehensions of a drain of gold to Europe.

THE PAPER MARKET.—While it is true that most manufacturers yet have orders in hand sufficient to keep their mills actively employed, there are many who show some anxiety about securing contracts. This anxiety increases as the water supply grows larger. Dealers begin to show some disappointment at the demand for paper not continuing as full as they had expected at this time. While this may serve to arrest any further advance in prices, the production is so evenly balanced by the demand that current prices will continue steady, and will not be likely to undergo any decline, at least for the remainder of the year, if not longer. Fine writings and manillas, particularly tissue manillas, are more marked for their slower movement than any other grades, but in these values are very well held, and very little disposition is shown to cut prices. Book and news hold their own very well, both as regards the demand and prices, and the same can be said of straw wrappings, which are still in small supply.

THE STATIONERY MARKET.—There is no falling off in the active condition of the trade noted last week, but, on the contrary, mail orders continue fully as large, while there has been quite an increased number of out-of-town buyers in the city who appear to be ordering quite liberally, of goods to meet the wants of the holiday trade. It is quite a common thing now to hear our dealers say that they have no lack of buyers, and that their greatest drawback is an insufficiency of stock. While it is true that very extensive preparations were made to meet the demands of a heavy fall and holiday trade, there were very few who had any idea that it would reach the enormous proportions that it has; consequently, many concerns are experiencing a scarcity of goods before the holiday season is half over, and are compelled to turn away orders to be filled by their more fortunate competitors. Orders for Christmas and New Year cards continue to come in on a very large scale, and out of the large variety of designs offering, buyers cannot fail to be suited. Prices of all goods continue very firm. The only change to be noted during the week is an advance of from 5 to 10 per cent. in the prices of envelopes, which covers very nearly every grade, with few exceptions.

THE BAY STATE PAPER COMPANY,

HOLYOKE, MASS., were among the pioneers in the W. C. Paper trade and their goods, from the start, were

distinguished for their fine quality and the superior style in which they were wrapped. Their example has been approved and imitated by a swarm of competitors, who have flooded the market with inferior goods, put up in packages of 600 to 800 sheets, misleading the unwary, and sold at apparently lower figures; but the trade and consumers generally recognize the fact that a good article, honestly put up, in 1,000 sheet packages, is the most profitable both for use and for sale. Their goods are all guaranteed 1,000 sheets to package, and no short count. No wood is used in any of these papers, but they are made of the very best stock in the market.

THE "MEDICATED BOUDOIR" BRAND

Has no equal for weight, strength, softness, and color, and commands the front place with "fine retail trade." Present reduced quotations furnished on application.

LETTERS PATENT FOR INVENTIONS.

BY JAMES A. WHITNEY, COUNSELOR-AT-LAW.

IV.

VALUE OF PATENT LAWS IN PROMOTING INDUSTRIES.

Having set forth in general the nature and history of the system of granting patents, it remains, before passing to the minutiae of the subject, to explain the technical or rather the legal interpretation of the term "letters patent for invention," and also to determine in what an invention consists. This term cannot be correctly applied to every novelty in arts and industries. It may, however, add interest to the subject if the utility of inventions *per se* is first considered. For, if this is very great the importance of the subject from a popular standpoint must be proportionately enhanced.

The utility of an invention is in a direct ratio to the saving of labor effected by it, or to the comfort and convenience added to human life by means of it. As relates to the latter, the matter is of necessity indeterminate, but concerning the former, the means of demonstrating the debt which civilization owes to inventors are easily accessible, for nearly every modern industry has been revolutionized by them. Boots are pegged by a machine which drives nine hundred pegs a minute, and in one year fifty-five million pairs of boots and shoes were soled by the apparatus, at an expense of a quarter of a cent per pair. The improved carpet loom, during the nine years from 1852 to 1861, reduced the wholesale prices of Wilton carpets in this country from \$2.25 to \$1.80 cents per yard; of tapestry velvets from \$2.11 to \$1.25, and tapestry brussels from \$1.42 to 82½ cents per yard. The substitution of cast steel for cast iron in the manufacture of plow mold-boards gave an increased durability equal to \$5 for each plow, and a subsequent invention of chilled cast-iron mold-boards reduced the cost about \$2 per plow without diminishing the durability. Taking into view the number of plows required in the agriculture of this country, the utility of laws which promote such inventions becomes manifest.

Perhaps, however, I cannot here better illustrate the matter in hand than by quoting as follows from an article which I prepared some two or three years ago upon this topic:

"In the planting of corn one man with a hoe can plant, say, from half an acre to an acre per day; with the check-row planter (largely manufactured in Illinois) one man and two horses can plant twenty acres per day. The planting season is commonly about ten days, and it is a moderate estimate to say that where a man could plant ten acres by the old hand method he can now plant two hundred by the use of his team; so that with a given population the capacity for cultivation is marvelously increased. This means, of course, more abundant harvests to the cultivator; and that, in its turn, means cheaper food to the inhabitants of distant cities. It is by agencies such as these that the corn crop of the United States has reached no less than thirteen hundred million bushels in a single year."

"We can all remember the old double-shovel cultivator, and, by an effort of the memory, can compare it with the improved cultivators now in use. The latter have an advantage over the former of from two cents to three and a half cents per bushel in the production of corn. That is to say, the lessened expense in preparing the soil for planting amounts to a saving of from two to three and one half cents in the production of each bushel. Take the average of this—two and three-quarter cents per bushel—and the

profit to the United States by the use of the new cultivators, as compared with the old, is \$35,-750,000 annually. But this is not the end of the calculation. The double-shovel plow was itself an advance upon the single-share corn plow, and effected a very great saving when it superseded the more primitive devices still earlier in use. Referring further to the corn crop, you and I can remember shelling corn on the edge of a shovel. And it was hard work that would shell five bushels in a day of ten hours. The corn-shellers now used in the West, and driven by steam or horse-power, will shell 1,500 bushels a day with the help of two men. It has been very ingeniously calculated that in order to shell the corn crop of Illinois, Iowa, Missouri, Indiana, Ohio and Kansas, the whole farming community of those States would have to work 100 days of ten hours each in each and every year in order to shell the corn crop of those States by the old hand method. The entire present population of the United States, men, women and children, would have had to work an entire week, each person doing a full man's work in order to shell the corn crop of 1877 by hand."

"Let us now turn to the wheat crop. During the last thirty years about eight hundred thousand seed sowing machines have been sold to the farmers in different parts of the country. The advantage of uniform seeding is manifest when I tell you, from sound authority, that the people of China, by sowing their grain in drills save as much in seed every year as would be required to feed the entire population of the United Kingdom of Great Britain and Ireland. But in this country there is a still greater advantage, for with our winter wheat the seed is apt to heave out, and that injures the crop in proportion. Confining our estimate to winter wheat alone, there are about three hundred millions of bushels raised in the United States. The crop is increased more than one-eighth by the superior manner of sowing by means of seeding machines; and one-eighth of our annual crop of winter wheat amounts to thirty seven million seven hundred thousand bushels. A similar economy has been derived from the adoption of threshing machines. The first successful thresher was made ninety-four years ago, in Scotland, and enabled one man to do the work of six, and saved five per cent. more grain than in hand threshing. This extra five per cent., it will be perceived, was clear gain. It was a saving of grain that would otherwise have been lost, and looked at in this light was, as I have said, clear gain; for there was no additional expense of sowing, of reaping, or of rent of land. A writer of that time calculated that this saving of 5 per cent. in the threshing of grain was equal to an increase of one-seventh in the grain-producing lands of Great Britain. Each McCormick reaper, put into actual use in the West, saved to its owner before being worn out, the sum of \$500 dollars in labor alone, besides paying its own first cost; and it was calculated, twenty years ago, that this invention alone had saved to the public in the single item of labor more than \$36,000,000. But the increase of the grain crop, due to the introduction of the reaper, amounted during the same time to more than \$100,000,000. The annual profits to the country from that one invention are \$10,000,000 each year, and that profit will continue to be gained by the country so long as seed is sown or harvests are gathered in the broad prairies of the West. Every additional improvement works more or less of gain. The very fact that Mauny's harvester had the cutter-bar so arranged that it could be adjusted

higher or lower as required for cutting lodged grain, made a saving of \$4 a day for every machine used; and, estimating the number at 60,000 machines, which I believe to be far below the mark, the saving in lodged grain alone was more than \$23,000,000."

In view of facts like these, and others which might be cited without number, it is not too much to say that no branch of the law has a

more direct bearing upon the material interests of communities than that which fosters the development of industries, by leading continually to the addition of new improvements in every branch thereof. The nature of letters patent for inventions and the essential characteristics of a patentable invention are, therefore, each and both of them, matters of moment and of interest, directly or indirectly, to almost every member of the community.

CHARLES BECK, Importer and Manufacturer, Nos. 609 CHESTNUT, and 606, 608 and 610 JAYNE
STREETS, PHILADELPHIA.

PERFECTED STYLOGRAFIC.

The original and genuine Pen. Warranted the best made. Thirteen Patents granted to A. T. CROSS, the
last, June 20, 1880, being the most important and giving the name **Perfected**.

MAXIMUM.—Holds most ink of any pen made; tires the hand less than smaller barrels. Fits
Hambler's Pocket. Same price as Long.

LONG.—The famous Desk Pen. Extra Long. Holds most ink, except the **Maximum**.

SHORT.—Most widely known and sold heretofore; but **Maximum** and **Long** are much better for desk
or Hambler's Pocket. So this will be largely superseded.

GIANT. with Cord and Gold Ring, same price as Short.

LITTLE GIANT
Plain, \$3.00.
All Styles up to
\$4.50.

LITTLE GIANT,
The Ladies'
Favorite.

Thirteen patents granted; seven more applied for; more genuine improvements; better record; more styles;
larger stock; more thoroughly protected by patents than all rivals combined. Dealers and agents supplied
with wood, glass and paper signs, placards, circulars, leaflets and cuts. We make both largest and smallest
pens, all of which will have the new improvements. Sole Agents for the World. See Descriptive Circulars.

READERS AND WRITERS ECONOMY CO., 25 to 33 FRANKLIN ST., BOSTON.
4 BOND STREET, NEW YORK.

"THE GREAT ROCK ISLAND ROUTE"

Calls your attention to the following REASONS WHY, if about to make a Journey to the GREAT WEST, you
should travel over it:

As nearly absolute safety as is possible to be attained, are connections in UNION DEPOTS, at all important
points. No change of cars between CHICAGO, KANSAS CITY, LEAVENWORTH, ANCHISON or COUNCIL BLUFFS.
Quick journeys because carried on Fast Express Trains. Day cars that are not only artistically decorated, but
furnished with seats that admit of ease and comfort. Sleeping cars that permit quiet rest in home-like beds.
Dining cars that are used only for eating purposes, and in which the best of meals are served for the reasonable
sum of seventy-five cents each. A journey that furnishes the finest views of the fertile farms and pretty cities
of Illinois, Iowa and Missouri, and is afterwards remembered as one of the pleasant incidents of life. You arrive
at destination rested, not weary; clean, not dirty; calm, not angry. In brief, you get the maximum of comfort
at a minimum of cost.

That the unremitting care of the Chicago, Rock Island & Pacific Railway for the comfort of its patrons is
appreciated, is attested by its constantly increasing business, and the fact that it is the favorite route with dele-
gates and visitors to the great assemblages, political, religious, educational and benevolent, that assemble from
time to time in the great cities of the United States, as well as tourists who seek the pleasantest lines of travel
while en route to behold the wonderful scenes of Colorado, the Yellowstone and Yosemite. To accommodate
those who desire to visit Colorado for health, pleasure or business, in the most auspicious time of the year, the
Summer season and months of September and October, the Company every year puts on sale, May list, at a
coupon ticket offices in the United States and Canada, round trip tickets to

DENVER, COLORADO SPRINGS AND PUEBLO.

At reduced rates, good returning, until October 31st. Also to San Francisco, for parties of ten or more, good for
ninety days, at great reduction from regular fares.

REMEMBER, this is the most direct route for all points WEST and SOUTHWEST. For further infor-
mation, time-tables, maps or folders, call upon or address

R. R. CABLE,

Vice-President and Gen'l Man'gr, Chicago.

E. ST. JOHN,

Gen'l Ticket and Pass'g Agent, Chicago.

E. P. COBY & CO.,

98 & 95 William St.

NEW YORK.

CRYSTALLINE SURFACE ON CARD-BOARD.

The substance generally used for this purpose is the acetate of lead, commonly called sugar of lead; but inasmuch as it is poisonous, it is not to be recommended, as it is liable to become the cause of accidents. Better formulæ are the following, suggested by the late Prof. Boettger, which afford a brilliant crystalline surface on wood, paper, &c.: Mix a very concentrated cold solution of salt with dextrine, and lay the thinnest possible coating of the fluid on the surface to be covered, with a broad, soft brush. After drying, the surface has a beautiful bright mother-of-pearl coating, which, in consequence of the dextrine, adheres firmly to paper and wood. The surface may be made adhesive to glass by going over it with an alcoholic shellac solution. Beautiful crystalline coatings may be produced on wood or on sized or glazed paper by the use of the following salts: Sulphate of magnesia, acetate of soda, and sulphate of tin. Colored glass thus prepared gives a good effect by transmitted light.

FOR SALE.

Half or whole interest in one of the largest and best appointed Printing and Publishing Establishments in Massachusetts; also connected with same, a prosperous business in manufacture of novelties, &c., which sell readily and pay large profits. Business from \$50,000 to \$75,000 yearly, and profits large. Good reasons for selling.

This is a rare opportunity for a party with some knowledge of the Printing or Stationery business, or for a young man with capital to engage in a prosperous business, with a thoroughly competent and practical man. For particulars address

PUBLISHER, Box 1231, Worcester, Mass.

Erie and Chicago Line**PASSENGER ROUTE.**

THE SHORTEST, QUICKEST, AND SAFEST ROUTE to all points EAST. Fine tracks and lowest rates. The only route running **PULLMAN PALACE HOTEL COACHES** from

CHICAGO to NEW YORK,

LEAVING AT 4.40 P. M.

and the only route by which passengers from the NORTH-WEST can connect at CHICAGO and secure locations in these Palace Hotels on Wheels.

You should travel by the **E. & C. LINE,**

BECAUSE its trains run through from Chicago to New York, avoiding the dangers of transfers, the risks attending the changing of cars, and the possibility of missing connections.

BECAUSE the PALACE HOTEL COACHES run in connection with its trains, furnish Meals as good as can be had at any first-class hotel, and allow passengers to eat with as much comfort as at their own homes.

BECAUSE not one passenger has been killed or even injured on its trains since the opening of the line five years ago. Nor has an accident of any kind occurred.

BECAUSE the great variety of scenery on this line renders the journey pleasant and profitable.

BECAUSE provision has been made for running the trains from Mansfield, "Special" to destination, whenever they arrive after departure of train forming regular connection. This insures a continuous passage between New York and Chicago.

TRADE NOTICE.

These Celebrated Pens are now manufactured with unprecedented skill and care. They have the distinction—which has now become historical—of being the FIRST SUCCESSFUL AMERICAN STEEL PENS, also of having been so popular as to have been counterfeited to the extent of HUNDREDS OF THOUSANDS of gross, which was stopped by judgments of the SUPREME COURT of NEW YORK and of the UNITED STATES COURTS.

The genuine Pens are now sold direct to the Trade by the proprietors,

The J. W. Stoakes Automatic Shading

PEN.

FOR PLAIN, FANCY AND ORNAMENTAL

LETTERING.

WASHINGTON, D. C., March, 1880.
I desire to say that the "Shading Pen" invented by Mr. STOAKES meets a want long felt by penmen. The work done by it is perfect in line and shade. The rapidity with which lettering is done, aside from the beauty of the work, is enough to recommend it for general use.

H. A. WHITNEY, Ass't Cashier, U. S. Treasury.

U. S. ENGINEER'S OFFICE, ST. LOUIS, MO., }
February 11, 1880. {

I have tried the PEN, and it gives great satisfaction. It is worth twice the price asked. It is valuable for headings, etc.

JNO. R. BALLINGER.

CHICAGO, April 21, 1880.
Indispensable for the execution of neat, attractive lettering, etc.

SHANNON'S LETTER FILE AND PAPER HOLDER.

Opinion of the Circuit Court for the Northern District of Illinois, holding that all letter files or holders made with two parallel, curved or arched transfer wires, operating together as one to open and close, and to meet two fixed and parallel puncturing wires, are infringements of Shannon's patent. The opinion was delivered by the Hon. H. W. Blodgett, as follows:

[From the Chicago Legal News, November 5, 1881.]
UNITED STATES CIRCUIT COURT.

Opinion Filed October 31, 1881.

JAMES S. SHANNON vs. J. M. JONES STATIONERY CO.
PATENT CASE.

Held, that the patent of Smith and Shannon is valid in their first, second, third, fourth, and seventh claims, and that the defendant in his device infringes these claims.

BLODGETT, J.—This is a suit for injunction and damages for an alleged infringement, by defendant, of Patent No. 217,909, issued July 29, 1879, to Frederick W. Smith and James S. Shannon, and which is now held by complainant, for an "improvement in paper holders."

The defense set up is want of novelty and non-infringement.

The character and scope of the invention is set out by the patentees in their specifications as follows:

"Our invention relates to that class of paper files or temporary binders adapted, by having separable uniting wires, to allow of the withdrawal of any one of many papers thereon held, or the insertion of papers between those already on file, without disturbing the order in which the others are placed.

"The object of our invention is to provide a file, more prompt and positive in its action, less calculated to tear the papers filed thereon, more convenient of manipulation, and adapted, in its double form especially, to serve as a writing tablet for the lap or desk.

"It consists in a paper holder, with duplex parallel hinged transfer wires, made from one piece; having the fixed wires and movable wires secured to the same connecting plate whereby those parts may be separately packed and attached to any desired base-board; in the structure of the puncturing wire, in a felt or plush covering for the bottom of the base-board, in the stop to limit the movement of the hinged wires."

"Figure 1 is a perspective view of a double or duplex file applied to a tablet, showing the fixed wires as being tubular, and the movable wires solid. It also shows the movable or transfer wires formed of a single piece of wire bent in its connecting or horizontal position in the shape of a crank and hinged near its angles."

Another feature of the device as described and claimed, is that the fixed and movable wires are attached to a single plate removable from the tablet which allows the parts to be separately packed for transportation.

The leading idea of this device is, the two puncturing spindles, and the transfer wires, so arranged to operate with each other as to form two continuous parallel rings upon which papers may be held in place, and yet permit the easy opening of the rings for the removal or insertion of a paper without the displacement of the others.

Standards or spindles for holding papers in place, are old, and so, too, was a bent puncturing wire with another wire, so arranged as to form with the puncturing wire a ring on which papers could be transferred from the puncturing wire, and a paper removed or a new one placed on the file within the package. This is shown

in the "Hauxhurst file," one of the defendant's exhibits in the case.

This file lacks many of the elements of convenience and utility which are obviously furnished by the complainant's file. First, it is a hanging file; second, it has only one wire. Papers cannot be so easily looked over, examined or removed or new ones inserted, as in the other file. It also lacks the feature of ready removability of parts so as to admit of close packing for transportation.

Yet this, as well as the Billow file and the Buell and Lilley file holder, shown in the proof, must be held to limit the scope of the complainant's device.

But none of the devices antedating the complainant's patent show a practical duplex paper holder with a tablet, and arranged with more than one parallel ring composed of puncturing and transfer wires operating together as shown by complainant's device.

It seems very evident from the proof that these inventors made an improvement in the art to which their device belongs, which, while it may, in some degree, have been suggested, had not been accomplished by any or all their predecessors, and that this was a substantial and useful improvement is shown by the number of paper holders which have been brought before the public since Smith and Shannon's invention, which in all essential particulars seem to embody their device. The proof shows something over thirty devices, embodying substantially the Shannon device, which have entered the field since his patent went before the public, showing that the public accepted this form of file binder, or paper holder, as new and useful beyond anything of the kind before produced; and the proof shows that a large demand at once sprang up for complainant's device, which has continued, except so far as it has been impaired by interfering devices.

I therefore conclude that this patent cannot be held void for want of novelty.

Upon the question of infringement there can be no doubt but that defendant's paper-holder contains the same essential elements which have made the complainant's holder a success. The puncturing and transfer wires are so arranged as to form parallel rings. The transfer wires are so joined as to be, for all substantial purposes, the same as those of the complainant. Their mode of operation and effect, their function in the organism, are the same in both devices.

The defendant insists that by the terms of the complainant's patent his transfer wires must be formed of a "single piece of wire," but the connecting bar between the defendant's wire makes them, for all practical purposes, one wire, and I discover nothing in the proof that leads me to conclude that the complainant was, by the state of the art, when he entered the field, to be confined to so literal and narrow a construction of his patent as would relieve the defendant from infringement, because its transfer wires are made of two pieces of metal instead of one. If the proof showed that other double transfer wires had been made prior to complainant's patent, which performed substantially the function of the complainant's or defendant's transfer wires, then the point might be well taken. But it seems to be a necessity for the operation of these double transfer wires that they shall be so connected together as that the lifting of one will lift the other to the same extent in the same direction so as to retain the parallelism of the rings. And this appears to be most readily accomplished by making the two wires in one piece. But that

does not allow an infringer to cut out a section of this wire and insert another piece of metal in the place of that cut out, and then insist that it does not infringe, when the metal inserted performs the same function as that removed.

I find, therefore, that defendant's paper-holder infringes the first, second, third, fourth and seventh claims of the complainant's patent.

The seventh claim is for a stop. A stop is necessary for the proper working of the device in order to prevent the transfer wires from slipping past the points of the puncturing wires, as the transfer wires operate by a spring. If there was not a device for stopping them as they strike on the bevel, they would not make a perfect joint or connection at their point of contact. And, therefore, the complainant, in his device, has a stop upon his spring, so that the crank, as he calls it, strikes upon the stop and

prevents it from passing any farther. The defendant has two stops operating substantially the same way in his device, and for the same purpose, although he has arranged them differently, yet they perform the same function, and are, undoubtedly, substantially the same stop, though somewhat differently constructed.

My conclusion, then, is that there is an infringement of this patent shown clearly, and, although it is a patent for a device of minor consequence, yet, at the same time, it is just as much entitled to protection as though it was for the most important piece of machinery ever devised.

There will be a decree for an injunction, and a reference to ascertain and report profits and damages.

Jesse Cox and Homer N. Hibbard, solicitors.
N. C. Gridley, for defendant.

I WILL INSURE YOUR HOGS.

Dr. Jos. Haas' Hog AND Poultry Remedy.

THE ONLY SCIENTIFIC SWINE REMEDY COMPOUNDED.

Read My Propositions!

First—When my remedy is used as a preventive, I will insure hogs by the head for a year, and will make a deposit of money to make such insurance good. If any hogs die, they will be paid for from such deposit; you can refer to my bankers, Messrs. Fletcher & Sharpe, Indianapolis, Ind., for my standing financially.

Second—Where my expenses are paid, I will visit herds of not less than 100, and I will arrest the disease among them, or forfeit \$500.

Third—After hogs have been regulated with my remedy, I guarantee that the annual cost of feeding will not exceed 25 cents per head. Furthermore, that the increase of actual flesh will far more than pay for the remedy used.

SEND FOR IT!

It is not an experiment, but an established success. Remember, it is the only remedy that is used and indorsed by the great breeders of this country and England. It owes its great fame to its genuine merits, and every mail brings tidings of its good work. The evidence in its favor is so strong the most scientific men of the country have pronounced it the conqueror of this disease. It is gaining ground daily, and no hog raiser up with the times can do without it. It is not only a protection against disease, but it is a powerful appetizer.

Inquire of my Bankers, Messrs. Fletcher & Sharpe, Indianapolis, Ind., for my standing. Will make a deposit of necessary money, and will pay for that die.

SEND FOR IT! I GUARANTEE IT WILL STOP THE COUGH AMONG HOGS

and put them in fine condition for fattening. It will expel the poison from their system, tone them up, and invigorate them generally. It will make them thrive so as to astonish you. It will pay such a large per cent. on the investment, that no one can afford to be without it.

REFER TO ANY WELL KNOWN BREEDER OR SHIPPER IN ANY PART OF THE COUNTRY.

J. H. Whetstone, druggist, Iowa City, says: "The Haas Remedy sells better and with less effort than any proprietary medicine I have ever undertaken to sell of any kind. We have nothing in stock to-day but what I would rather do without than the Haas Remedy."

C. H. Klauenburg, druggist, Carlinville, Ill., says: "The Remedy sells well, and is the best on earth."

O. A. Elliott, druggist, Russell, Ia., says: "The Remedy has given good satisfaction here."

J. N. Penn & Sons, druggists, Sydney, Ia., say: "We hear good reports from what we have sold."

Ed. J. Brown, druggist, Edina, Mo., says: "It has given general satisfaction in this county. Have sold \$1,000 worth in three months. Have tested its merits myself."

J. M. Kufer, druggist, Macomb, Ill., bought \$400 lot of Haas' Remedy and sold \$900 of it in seven weeks.

W. Harris, druggist, Storm Lake, Ia., says: "It has given splendid satisfaction."

J. C. Eacker, druggist, Elliott, Ia., says: "Have sold several orders and in every case satisfaction given."

A. P. Gano, druggist, Missouri City, Mo., says: "It will be a popular article in our drug market."

BYRON WESTON

DALTON, MASS., U.S.A.,

HAS BEEN AWARDED THE

GRAND PRIZE GOLD MEDAL

AND RECOMMENDED THE

Medal of Honor and Perfection
At PARIS, 1878,

This being the HIGHEST and ONLY AWARD given for

LINEN RECORD & LEDGER PAPER

Also, the only Gold Medal given for Ledger Paper at the Adelaide, Australia, Exhibition, 1881.

—A SPECIALTY.—

THIS Paper has received THE HIGHEST PREMIUM over all others from the Cincinnati Industrial Exhibition, Massachusetts Charitable Mechanics' Association, Franklin Institute of Philadelphia, Louisville Exposition, Medal and diploma from United States Centennial Commission, Medal of Progress American Institute, 1877, and Medal of Improvement and Progress, Boston, 1878. Its

PRINCIPAL ADVANTAGES

are as follows:—1. It contains more LINEN than any other Ledger Paper, has a longer fibre, and is, consequently, tougher. 2. Having a harder and better body, it frays less in erasure, so that by simply using the rubber after the eraser, the ink is prevented from spreading. 3. It is more uniform in Weight Color and Finish. 4. It never cockles if properly bound. 5. Its chemical action upon ink is such that it both writes and rules up better. For proof of the foregoing, refer to a large number of Stationers, Bookbinders, Bookkeepers, and Recorders, who have given it, after a severe test, the preference over all others. This paper is Double Sized, and will stand any climate or the most acid of fluid inks.

Send for sample sheet, ERASE and REWRITE FOUR TIMES on same spot.
Each sheet is water-marked with name and date.

PHILADELPHIA NOTES.

[FROM OUR REGULAR CORRESPONDENT.]

PHILADELPHIA OFFICE OF THE LOCKWOOD PRESS,
407 Walnut Street,
PHILADELPHIA, November 22, 1881.

Langfeld, Turner & Andrews report that they are now getting even with their orders, which were recently behind. Their travelers are coming in, and are well satisfied with their success. They have covered the ground thoroughly and have found orders plentiful.

Louis Dreka, who is the fashionable stationer of Philadelphia, has just got out some very fine and tasty menus. They have fine hand-paintings of flowers, landscapes or portraits, on one side, and the menu on the other, and are tied with ribbons of rich color and splendid quality. Altogether they are very elegant. The paintings by Miss M. Fredericks, of Stamford, Conn., are charming pictures and of great credit to the artist.

Potsdamer & Co. are taking many orders for their chromo (fall) numbers. Among these, No. 122, Ariel, four designs; No. 123, Bric-a-brac, On the Waves, and No. 124, Kate Greenaway's series, are decidedly in great favor. The colored and black folding cards, which they have lately begun to manufacture, have also met with the success which their perfect execution justifies. The Nos. 1,100 to 1,103, four designs, 1,105 to 1,109, five designs, and 1,090 to 1,094, five designs, are remarkable for their workmanship, and deserve the extraordinary demand which has arisen for them. I must also mention the three designs of Christmas and New Year's folders etched and engraved similar to steel and printed in black, which are sold as fast as they are printed. The house of A. M. Collins, Cope & Co., of New York, has the exclusive sale of all of these cards, and it has trouble to meet all of the orders which it receives. Potsdamer & Co. have temporarily transferred their salesroom to their factory at 243 and 245 South Third street.

Turner & Harrison's steel pens are in such great demand that the firm is loaded down with work. The fact is that Turner & Harrison have orders on hand which it will take them until March 15 next to fill.

Moss & Co. have always a special reputation for their fine selections of fancy goods; but this year they surpass all former efforts in this line, and their samples make up a most interesting display for the trade, who will find at their store the handsomest goods of French, English and American manufacture.

The Philadelphia Novelty Manufacturing Company is selling a great number of its excellent "Novelty" paper fasteners, which are in great favor among all our business men, not only for their simplicity and accurate working, but also for their durability. The suspending paper fastener is also a very useful invention, which is much appreciated, and finds an easy sale. This company deserves praise for the great number of excellent inventions which it is constantly bringing out. Its self-locking door indicator, the "Novelty" pen-clip, automatic fountain penholder, "Novelty" book-binder, and a great many other articles, which are especially made for the stationery trade, have met with great and legitimate success. In fact, this establishment is to-day one of the most busy and prosperous of the kind in the country.

Sinclair & Co., although they are crowded with orders which will occupy their time until next February, are preparing for the early spring some new advertising folding cards of an entirely novel style.

Marcus Ward & Co. will move their establishment from Philadelphia to 734 Broadway, New York. This change will take place on February 1.

J. VIENNOT.

LETTERS PATENT FOR INVENTIONS.

BY JAMES A. WHITNEY, COUNSELOR-AT-LAW.

V.

WHAT CONSTITUTES A PATENTABLE INVENTION.

It early became necessary to define the subject matter in order to ascertain what lay within or without the scope of letters patent. The formulated definitions are found principally in the statutes, but have received many extensions, modifications and explanations from the courts. From the outset the tendency of these has been to give a broad and liberal intent to the term "invention," in accord rather with the spirit of the patent system than with the somewhat narrow, literal rendering of the written laws.

The practice in the United States having been originally based upon and closely conformed to that of England, the terms of the statute of monopolies, and their interpretation by English judges, are first to be considered. But, it is to be remembered that this statute established no new principle. It simply excepted novel and useful improvements from the operation of an otherwise general law, leaving the practice precisely what it had been from time immemorial. The language of this celebrated statute was, therefore, to be understood in the light of what had preceded it in determining what should be the proper subject of a grant. In other words

what must be held open to the pursuit of all under the common law, and what could be granted as an exclusive right under the prerogative of the Crown.

The statute of monopolies, after defining what grants are contrary to law, and therefore inhibited, saves and excepts (during periods not exceeding twenty-one years from their several dates) all letters patent previously made "of the sole working or making of any manner of new manufacture within this realm to the first and true inventor or inventors of such manufactures, which others, at the time of the making of such letters patent and grants, did not use." Precisely the same language is employed as to the subject matter of patents to be thereafter granted, the term, however, being restricted to fourteen years. That the principles controlling the administration of the patent law after the statute of monopolies were the same as before, is conclusively shown by the further provision, in speaking of patents that might be afterward granted, "that the same shall be of such force as they should be if this act had never been made, and of none other." The statute of monopolies, therefore, reaffirmed the principle that no manner of manufacture already in possession of the people of the realm should be taken from them, and also, in effect, reaffirmed the right of the Crown to grant protection, during a limited time, to inventors of such "manufactures," as others at the time of granting the letters patent did not use; and, furthermore, made apt and valid, as precedents for future use, the former decisions, some of them dated, as we have seen, back to the time of Elizabeth. While, however, it was plain that anything in antecedent use could not be lawfully patented, it was still obscure as to what extent an old manufacture need be modified to constitute one new within the meaning of the law, or to what extent the term "manufacture," something made by the hand of man, could be equitably and properly extended to cover the many incorporeal improvements, which consist, not in the article produced, but in the operation or manner of producing it. The first of these queries was speedily answered by inferences drawn from previous judicial decisions; the second awaited the co-ordinate development of the English patent system and of the industries which, beyond all former example, were fostered by it.

To this last indicated point a paragraph may be devoted, a positive parallelism being observable between the development of the law of patents and the evolution of industries. In the earlier period of such grants favor was extended mainly to industries which created a demand for hand-labor, as popular prejudice was so

great against those which saved labor that important inventions were frequently kept back for many years. In England this idea, so contrary to equity and justice, and so opposite to now universally accepted ideas, received strength and currency from the action of Lord Coke. This, the greatest of common law lawyers, was perhaps one of the narrowest of statesmen and the most shallow of political economists. He once declared a patent for an improved fulling mill to be invalid as against public policy, for the reason that one machine would accomplish the work of many men. The fallacy of this notion is clear when we reflect that the results of the machine would have been that for every man thrown out of employment by the introduction of the new apparatus, a thousand would have had the cost of fulling goods reduced to them.

But inventors in England fared well compared with those on the Continent when the invention collided with vested interests. For example, the ribbon-loom, which was invented toward the latter part of the sixteenth century, and which in one form or another has to this day been in use, was forbidden in 1579 by an act of the council of the city of Dantzic. This, however, was not the worst. The governing authorities caused the inventor to be privately strangled. In 1621 its use was forbidden all over Holland and also in Germany. It required nearly a hundred years in the face of such adverse legislation for the invention to secure the universal adoption which it ultimately gained. In England the patent system was retarded for nearly a century by one of Coke's decisions parallel with that just hereinbefore mentioned. He could not deny, in face of accepted usage and acknowledged law, that an original invention was patentable; but but he drew a thin distinction between an original invention and an improvement thereon, and held that the latter was not susceptible of protection. This, of course, restricted the application of the system within very narrow bounds, and it was not until the time of Lord Mansfield that the distinction was overthrown and improvements placed upon the same basis as other inventions. The quarter of a century succeeding this reform witnessed the most rapid development of British manufactures, and the utility of the system as thus demonstrated led not only to its extension to the British colonies, but also to the adoption of similar methods of promoting industries in various parts of Europe.

TO CRYSTALLIZE GRASSES AND FLOWERS.—Dissolve six ounces of alum in one quart of water, and boil until dissolved; then steep the grasses or flowers in the solution while hot. If, by the time the water is cold, the crystals are too large, then add more water. Separate the little branches gently, taking off the superfluous lumps. Fern leaves, oats, flax, and the long feathery grasses are the most beautiful for crystallizing.

One of the most frequent causes of disturbance of the telegraphic connections in Japan is found in the threads of spiders, which, in the vicinity of large forests, connect the wires and insulators with the surrounding trees and the ground. These threads, moistened by heavy dews, become conductors of electricity and allow the current to pass into the ground. There is no other remedy than to sweep the wires with brushes; but, since the spiders are more numerous and more persevering than the persons employed by the telegraph companies, it becomes necessary to repeat the operation almost daily.

A CHILDREN'S PARADISE.

"Let me make the toys of a nation and I care not who makes its laws," says Milton Bradley, of Springfield, Mass., who has been for over twenty years engaged in filling Christmas stockings and in making children's playthings for all other seasons of the year. The toys of this progressive age are a different creation from the clumsy playthings which amused the present generation in their childhood. Besides being designed with much skill to afford amusement, many of the toys now combine instruction in so subtle a manner that the children, without realizing that they are being taught, receive a great deal of practical knowledge. So a nation well furnished with modern toys would never need so much restraint by law, for knowledge and crime are not twin brothers.

So far has this idea of instruction been carried that one of the descriptions in the new catalogue of Milton Bradley & Co. is accompanied by the explanation that this game, "Bamboozle," is very funny and not in the least instructive. Probably next year the company will have to advertise in regard to some games a guarantee that "positively no educational trap is intended." The catalogue for 1881-82 is a real work of art—the wood engravers' and printers' art—and is more attractive than many a picture-book, while the company's manufactory is a perfect wonderland, which every child in this country would delight to explore.

Among the best of the new toys this year are the "Historiscope Improved" and the "Menagerie and Aquarium." These are both of great value as educators, but are so attractive that they cannot fail to please the young who are fortunate enough to get them. The panorama pictures are regular chromo-lithographs, and each scene and group is accompanied by a brief lecture, the scenes of the "Historiscope" presenting the principal events in our country's history. The "Feudal Castle" and the "Citadel" are also new, and represent the strongholds of the middle ages. Figures of knights and ladies on horseback can be arranged in many ways, and in the front wall of the castle the portcullis slides up and down to shut them out or in.

Other novelties are the "English Cottage," Nos. 1 and 2; the "American Village, Junior;" the "Mammoth Village;" the buildings of the latter being large and strong and intended to be set up out of doors on the sand as well as in the house; the "Lilliput City," a cheaper toy of the same character; the "Model of Mount Vernon," representing the principal buildings at the home of Washington; the "Steamer Union" and "Ferry Boat Fulton," two toys supplementing very popular ones of the same character last year; other steamers and steam tugs; the "Little Object Teacher," revised and made more entertaining and instructive than ever; the "Game of Old Maid Improved," with new features so good that they have been patented; poetical conversation cards; a "Visit to the Gypsies;" an "Excursion to Coney Island," &c. Besides all these the catalogue is filled with representations and descriptions of all of the old kinds, many of which have been popular for years. The company is doing more business this year than ever, and, before another season, will move into more commodious quarters than are now occupied. Among the games which the company has copyrighted is a simple game with numbers, called "Patience," a solitaire and social game in one. It is ingenious, and will be found entertaining to old and young. The old lines of cars and dissected

puzzles, maps, &c., are very full, and, all in all, the toy establishment of Milton Bradley & Co. is as complete as Yankee brains can make it.

MERCHANDISE SAMPLES IN THE MAILS

The following letter from Assistant Postmaster-General Hattun to a firm of New York lawyers representing the interests of a number of mercantile houses, is explanatory of recently published rulings, and is believed to cover the vexed question as to what may be written or printed on tags attached to merchandise intended for delivery by mail:

GENTLEMEN—Your favor of the 10th instant has been duly considered by the department, with those of many merchants who have complained of the past rulings as restricting their business enterprise. The result of such consideration has been the ruling herewith inclosed. It is intended that the matter printed shall be treated as third-class matter and being inclosed with merchandise subject to the higher rate, and that the merchant may also write upon the "package" "his own name and address, preceded by the word 'from,' and there may also be written or printed the number and names of the articles inclosed; and the sender thereof may write or print upon or attach to any such articles by tag or table a mark, number, name or letter for purposes of identification."

You will observe that what may be written upon the tag is simply "a mark, number, name or letter," not to tell the width or price, but to identify the article. If the full liberty to inclose printed matter with the samples will not enable merchants to avail themselves of the mail, when they can thus identify the articles described in print by a mark, number, &c., the department can only regret that further aid cannot be afforded under the law as it now stands.

DYES FOR WOOD.

For staining a finished article, which is similar to painting in the manner of its performance, a great variety of recipes are in use: A crimson stain may be made by boiling one pound of Brazil dust for an hour in three quarts of water, straining it and adding one-half ounce of cochineal, and finally boiling it gently for half an hour. To give it a scarlet tint, before applying the stain as above made, boil a half-ounce of saffron one hour in a quart of water and pass it over the surface to be stained. For a green stain, add to three pints of strong vinegar four ounces of verdigris finely pulverized, one-half ounce of sap green and one-half ounce of indigo. For purple, boil one pound chip logwood in three quarts of water for an hour, after which add four ounces pearlsh and two ounces pounded indigo. For blue, the same process, with the added ingredient of four ounces indigo mixed in a clean glass vial with one pound sulphuric acid. In all these cases the materials used should be of the best quality. The proper method of polishing will depend on the nature of the wood, but in any case rough sand-papering would not be advisable.

A company, including several persons interested in the paper trade, has been incorporated to build a railroad from Saratoga, N. Y., to Mount Macgregor, a distance of ten miles. The following named are among the incorporators, viz.: James Arkell and William J. Arkell, Canajoharie; George West, Ballston, and Howard Lockwood, New York. The following named directors of the company have been chosen: George Van Vlack and Howard Lockwood, New York; John Warner and John Kellogg, Amsterdam; Duncan Macgregor, Glens Falls; James Arkell, A. G. Richmond, W. J. Arkell and Benjamin Smith, Canajoharie; Nathan D. Wendell and D. H. Fonda, Albany; George West, Ballston, and James D. Taylor, Palantine Bridge.

OLD BERKSHIRE MILLS

DALTON, MASS., U. S. A.

One party writes: "The two hundred RECORD BOOKS, for 88 of the 99 Counties, now on exhibition at the Iowa State Fair, at Des Moines; and all, but four (?) of them, made from your 'OLD BERKSHIRE MILLS LINEN LEDGER,' Medium, 40lb., make a splendid show."

MANUFACTURED BY
CARSON & BROWN CO.

DALTON, MASS.

[The above cut is a fac-simile of the wrapper used on the Linen Ledger Paper.]

We will pay for any book rejected on account of fault in the paper. Send for Samples, test them in comparison, and see that your books are made from paper thus water-marked.

I WILL INSURE YOUR HOGS.

Dr. Jos. Haas' Hog AND Poultry Remedy.

THE ONLY SCIENTIFIC SWINE REMEDY COMPOUNDED.

Read My Propositions!

First—When my remedy is used as a preventive, I will insure hogs by the head for a year, and will make a deposit of money to make such insurance good. If any hogs die, they will be paid for from such deposit; you can refer to my bankers, Messrs. Fletcher & Sharpe, Indianapolis, Ind., for my standing financially.

Second—Where my expenses are paid, I will visit herds of not less than 100, and I will arrest the disease among them, or forfeit \$500.

Third—After hogs have been regulated with my remedy, I guarantee that the annual cost of feeding will not exceed 25 cents per head. Furthermore, that the increase of actual flesh will far more than pay for the remedy used.

SEND FOR IT!

It is not an experiment, but an established success. Remember, it is the only remedy that is used and indorsed by the great breeders of this country and England. It owes its great fame to its genuine merits, and every mail brings tidings of its good work. The evidence in its favor is so strong the most scientific men of the country have pronounced it the conqueror of this disease. It is gaining ground daily, and no hog raiser up with the times can do without it. It is not only a protection against disease, but it is a powerful appetizer.

Inquire of my Bankers, Messrs. Fletcher & Sharpe, Indianapolis, Ind., for my standing. Will make a deposit of necessary money, and will pay for all that die.

SEND FOR IT! I GUARANTEE IT WILL STOP THE COUGH AMONG HOGS

and put them in fine condition for fattening. It will expel the poison from their system, tone them up, and invigorate them generally. It will make them thrive so as to astonish you. It will pay such a large per cent. on the investment, that no one can afford to be without it.

REFER TO ANY WELL KNOWN BREEDER OR SHIPPER IN ANY PART OF THE COUNTRY.

J. H. Whetstone, druggist, Iowa City, says: "The Haas Remedy sells better and with less effort than any proprietary medicine I have ever undertaken to sell of any kind. We have nothing in stock to-day but what I would rather do without than the Haas Remedy."

C. H. Klauenburg, druggist, Carlinville, Ill., says: "The Remedy sells well, and is the best on earth."

O. A. Elliott, druggist, Russell, Ia., says: "The Remedy has given good satisfaction here."

J. N. Penn & Sons, druggists, Sydney, Ia., say: "We hear good reports from what we have sold."

Ed. J. Brown, druggist, Edina, Mo., says: "It has given general satisfaction in this county. Have sold \$1,000 worth in three months. Have tested its merits myself."

J. M. Kufer, druggist, Macomb, Ill., bought \$400 lot of Haas' Remedy and sold \$300 of it in seven weeks.

SEND FOR IT. LIBERAL TERMS TO THE TRADE. \$1.00, \$2.50, and \$5.00 packages. I can work up a trade for you. Terms, Circulars, &c., on application.

W. Harris, druggist, Storm Lake, Ia., says: "It has given splendid satisfaction."

J. C. Eacker, druggist, Elliott, Ia., says: "Have sold several orders and in every case satisfaction given."

A. P. Gano, druggist, Missouri City, Mo., says: "It will be a popular article in our drug market."

J. W. Wyman, druggist, Unionville, Ia., says: "It cures chicken cholera every time."

Smith & Thomas, druggists, Platte City, Mo., say: "It gives good satisfaction here."

Duffield & Harlan, druggists, Centreville, Ia., say: "It is entirely satisfactory."

Dr. S. S. Clayberg, druggist, Avon, Ill., says: "It gives good satisfaction here."

Melle Williams, druggist, Taylorville, Ill., says: "Have a good trade. It gives splendid satisfaction."

SEASON 1881-1882.

SEASON 1881-1882.

L. PRANG & CO.'S

Christmas and New Year Cards

ANNOUNCEMENT.

WE hereby beg leave to announce to the trade the completion of our line of Christmas and New Year Cards for this season, for which our agents are now soliciting orders. The extent of our list, the originality, and especially the American character of our designs, together with the great care taken in their execution, will, we have no doubt, secure for our goods the popularity which they have enjoyed heretofore. The efforts we have made to secure the highest excellence, is attested by the names of some of the artists whose designs have been reproduced. We would only name Elihu Vedder, C. C. Coleman, Thomas Moran, Miss Rosina Emmett, Miss Dora Wheeler, Mrs. O. E. Whitney, W. H. Gibson, F. S. Church, R. G. Birch, &c. That a due regard has been paid for the quality of the literary matter, in connection with these designs, is shown by the fact that many of the designs are accompanied by original poems from writers of note, such as Mrs. Celia Thaxter and Mrs. Emily Shaw Forman.

The great increase of our manufacturing facilities, secured by additions to our building nearly doubling our floor space and by the adding of new machinery, will place us in a position to fill orders promptly. Still we would request dealers to place their orders as early as possible, so as to still further enable us to make timely preparation for prompt deliveries.

Our Cards will, as heretofore, be put up in envelopes containing twelve Cards, unless otherwise stated on our price lists.

We furnish envelopes without extra charge for all our Christmas and New Year Cards, for which the list price is \$1.80 per set, and over. Our silk-fringed Cards will no doubt be in great demand this season. We have made ample preparation to furnish these in time and have made arrangements with our manufacturers for the best quality of silk fringes. We would call special attention to the excellence of our fringed Cards and the novelties in colors and style of fringes we offer for this season.

A marked and attractive feature of our cards are the elegantly ornamented backs.

All our fringed Christmas and New Year Cards are furnished with envelopes and protectors, so as to insure safe transportation in the mails.

It will be impossible to embody our whole list in the space of the advertisement, and we will therefore merely give a general outline of the variety offered.

PRANG'S PRIZE CHRISTMAS CARDS. COMPETITION OF 1881.

These are the Cards selected by the judges in the second competition for four designs of Christmas Cards, for which we offered \$2,000 in prizes of \$1,000, \$500, \$300 and \$200 respectively. At the recommendation of the judges, Messrs. COLEMAN, LAFARGE, and WHITE, the prize for third best Card was increased to \$500. Mrs. CELIA THAXTER has written appropriate verses for each of the designs.

- 1st Prize Card (\$1,000), by Elihu Vedder. Size, $6\frac{1}{4} \times 9$ inches; price \$1 each. Same card with silk fringe, cord and tassels, price \$1.50 each.
 2d Prize Card (\$500), by Miss Dora Wheeler. Size, 7×9 inches; price 75c. each. Same card with silk fringe, cord and tassels, price \$1.25 each.
 3d Prize Card (\$300), by C. C. Coleman. Size, 7×9 inches; price 75c. each. Same card with silk fringe, cord and tassels, price \$1.25 each.
 4th Prize Card (\$200), by Miss Rosina Emmett. Size, $5\frac{1}{4} \times 9\frac{1}{4}$ inches; price 60c. each. Same card with silk fringe, cord and tassels, price \$1 each.

The Prize Cards can also be had mounted on heavy board with gilt beveled edges.

We beg to call attention also to the following publications for New Year and Christmas:

"Goddess Fortune" New Year Card, by Elihu Vedder. Size, $6\frac{1}{4} \times 8\frac{3}{4}$ inches; price 75c. each. Same card with silk fringe, cord and tassels, price \$1.25 each.
 "Christmas Dove." Size, $7 \times 9\frac{1}{4}$. This card is in the same style as the success of the last Easter season, the "Easter Dove." Price 60c. each. Same card with silk fringe, cord and tassels, price \$1 each.

Our Regular Line of Christmas Cards consists, among others, of the following Series:

- | | |
|---|--|
| Nos. 901, 902, 903, 906, 909, 910. Floral designs ranging in price from 20c. to \$1.20 per set of 12. | Nos. 920 and 929. Children's designs, at \$2.40 and \$3.60 per set. |
| Nos. 904, 905. Humorous Cat and Frog Designs, 60c. per set. | No. 922. Shells of Ocean, with figures, \$2.40 per set. |
| No. 907 is a new series of Horseshoe designs, 75c. per set. | No. 924. Fans with silk fringes, \$3 per set. |
| | No. 933. Bric-à-Brac designs, very rich, \$6 per set, and many others. |

We offer a similar assortment of New Year Cards, but would call special attention to No. 1320, a new folding calendar, at \$2.40 per set. Most of the Numbers can be had with silk fringes ranging in price from \$2.25 to \$12 per set. Stock will be ready for delivery September 15.

Besides the above, attention is called to our New Birthday Cards, Scripture Texts Cards, New Panels, New Water Colors, by Thomas Moran, and other publications. Our line of Thanksgiving Day Cards will also be shown by our agents.

Trade Novelties.

[We will be glad to receive samples of all novelties issued in the trade, and will notice all such which possess merit free of charge. It is desirable to accompany descriptions with cuts whenever possible.]

NEW PATENTS.

No. 248,845. Crayon.—Charles A. Catlin, Providence, R. I.

A crayon having its exterior surface hardened by dipping in solution.

No. 248,848. Printing and Embossing Machine.—John Comly, Lincoln Park, N. J.

In a printing and embossing machine, a wiper or doctor having its journals provided with set-screws bearing on elastic plates, and with adjustable arms provided with springs for holding a roll of material in position to be fed to the machine.

No. 248,888. Delivery Apparatus for Printing Machines.—Walter Scott, Plainfield, N. J.

Two webs (or one web split) are led over separate turners and caused to travel at right angles to their previous course. One of the webs is thus led under the other and the two are associated. One of the webs is caused to travel a greater distance than the other after turning, so as to bring the printing on the two webs into register, and they are then led to cutting and folding devices. The machine can be adjusted to operate upon one wide web as well as two narrow ones.

No. 248,890. Type-Writer.—Albert G. Shannon, Santa Rosa.

A type constructed of a metallic casing filled with cement, into which are inserted sharp points to represent a character, the type being attached to a movable arm of a type-writer by means of a recess and set-screw in the arm.

No. 248,901. Parlor Quoit. Samuel P. Wetherill, Philadelphia, Pa.

A parlor quoit made of vulcanite, weighted by the incorporation therewith of a metallic or mineral substance.

No. 248,933. Game Table.—John Lechner, Faribault, Minn.

No. 249,030. Toy Chime Hoop.—Joseph L. M. Du Four, Bloomington, N. J.

The combination, with a hoop or wheel and its frame, of stationary bells (one or more) and a hammer-shaft revolving by frictional contact with the hoop, the pivoted spring-actuated frame forming the bearings for the hammer-shaft.

No. 249,049. Drafting Instrument.—Cyrus R. Howard, Huntingdon, Pa.

No. 249,052. Toy.—Cyrenus S. Hunt, Harwich, Mass.

A toy consisting of a base provided with a pocket for concealing a series of numbered cards, which are secured therein by means of springs, and a perforated case through which strings connected to the cards are passed for drawing the cards at random.

No. 249,071. Blotter Tablet.—Charles E. Meade, St. Louis, Mo.

No. 249,074. Pamphlet Cover Roller. Emma L. Miller, Washington, D. C., assignor of one-half to William H. Rohrer, same place.

A device for attaching covers to books, pamphlets, &c., after the application of paste thereto, which consists of two rollers, one arranged at right angles to the other, and both supported within a suitable frame.

DESIGNS.

No. 12,555. Wall Paper.—Eduard Leissner, New York, assignor to Leissner & Louis, same place. Term of patents, $3\frac{1}{2}$ years.

No. 12,557. Font of Printing Type.—John Marder, Chicago, Ill., assignor to Marder, Luse & Co., same place. Term of patent, 7 years.

SPECIAL HOLIDAY NOTICE TO STATIONERS.

The following Salable Novelties, selected from **BRADLEY'S List for 1881-2**, are specially adapted to your **HOLIDAY TRADE**:

The Aquarium and Managerie.—The finest toy of the season. Just issued.

Old Maid Improved—The most popular game of the year.

Patience.—The best new game in the market.

Words and Sentences.—The best word game made.

The Historioscope Improved.—The finest panorama ever made, with new designs in oil colors. Very pleasing and instructive.

Excursion to Coney Island.—New and very funny visit to the Gypsies. Very amusing for a company of young people.

Little Object Teacher.—New Edition. Very fine.

MILTON BRADLEY & CO., SPRINGFIELD, MASS.

WILSON BROS. CO., 119 Chambers Street, NEW YORK AGENTS.

PERFECTED STYLOGRAPHIC.

The original and genuine Pen. Warranted the best made. Thirteen Patents granted to **A. T. CROSS**, the last, June 20, 1880, being the most important and giving the name **Perfected**.

MAXIMUM.—Holds most ink of any pen made; tines the hand less than smaller barrels. Fits Hambley's Pocket. Same price as Long.

LONG.—The famous Desk Pen. Extra Long. Holds most ink, except the **Maximum**.

SHORT.—Most widely known and sold heretofore; but **Maximum** and **Long** are much better for desk or Hambley's Pocket. So this will be largely superseded.

GIANT, with Cord and Gold Ring, same price as Short.

LITTLE GIANT
Plain, \$3.00.
All Styles up to
\$4.50.

LITTLE GIANT,
The Ladies' Favorite.

Thirteen patents granted; seven more applied for; more genuine improvements; better record; more styles; larger stock; more thoroughly protected by patents than all rivals combined. Dealers and agents supplied with wood, glass and paper signs, placards, circulars, leaflets and cuts. We make both largest and smallest Pens, all of which will have the new improvements. Sole Agents for the World. See Descriptive Circulars.

READERS AND WRITERS ECONOMY CO., 25 to 33 FRANKLIN ST., BOSTON.
4 BOND STREET, NEW YORK.

"THE GREAT ROCK ISLAND ROUTE"

Calls your attention to the following **REASONS WHY**, if about to make a Journey to the **GREAT WEST**, you should travel over it:

As nearly absolute safety as is possible to be attained. Are connections in **UNION DEPOTS**, at all important points. No change of cars between **CHICAGO, KANSAS CITY, LEAVENWORTH, ATCHISON or COUNCIL BLUFFS**. Quick journeys because carried on Fast Express Trains. Day cars that are not only artistically decorated, but furnished with seats that admit of ease and comfort. Sleeping cars that permit quiet rest in home-like beds. Dining cars that are used only for eating purposes, and in which the best of meals are served for the reasonable sum of seventy-five cents each. A journey that furnishes the finest views of the fertile farms and pretty cities of Illinois, Iowa and Missouri, and is afterwards remembered as one of the pleasant incidents of life. You arrive at destination rested, not weary; clean, not dirty; calm, not angry. In brief, you get the maximum of comfort at a minimum of cost.

That the unremitting care of the **Chicago, Rock Island & Pacific Railway** for the comfort of its patrons is appreciated, is attested by its constantly increasing business, and the fact that it is the favorite route with delegates and visitors to the great assemblages, political, religious, educational and benevolent, that assemble from time to time in the great cities of the United States, as well as tourists who seek the pleasantest lines of travel while en route to behold the wonderful scenes of Colorado, the Yellowstone and Yosemite. To accommodate those who desire to visit Colorado for health, pleasure or business, in the most auspicious time of the year, the Summer season and months of September and October, the Company every year puts on sale, May 1st, at all coupon ticket offices in the United States and Canada, round trip tickets to

DENVER, COLORADO SPRINGS AND PUEBLO,

at reduced rates, good returning, until October 31st. Also to San Francisco, for parties of ten or more, good for ninety days, at great reduction from regular fares.

REMEMBER, this is the most direct route for all points **WEST** and **SOUTHWEST**. For further information, time-tables, maps or folders, call upon or address

R. R. CABLE,

Vice-President and Gen'l Man'gr, Chicago.

E. ST. JOHN,

Gen'l Ticket and Pass'g Agent, Chicago.

P. P. McHUGH

(late with Roby &
Cole), manufacturer
of Blank Cards
and Card Boards,
No. 51 Ann Street,

New York. Card Stock by the case at special low rates. **SPECIALTY.**—Fine Translucent Goods for Lithographic Printing or Steel-plate Work. Warranted to stand printing in ten colors. Engravers' Super Bristol, White and Cream, the very perfection of fine finished stock. Gilt Bevel-Edge Panels for Artists' and Photographers' use, and other artistic novelties.

Trade Gossip.

All new goods and designs which are not, strictly speaking, "Novelties" will be noticed under this head. The trade are requested to forward descriptions with samples in order to secure proper notice.

Myers Brothers are still very busy with all of the lines that they handle; but the rush is unprecedented for their cabinets.

Germer & Ruhnke, bookbinders of Buffalo, have absconded. Their liabilities are slight, principally due to New York houses.

Patrick Farrelly, of the American News Company, has been appointed one of the delegates to the National Board of Trade by the Chamber of Commerce.

McCarthy & Hasberg are now offering bargains in holiday goods, and invite the trade to profit by the opportunity in securing neat and cheap selections.

E. & H. T. Anthony & Co. have this week placed on the market cabinet pictures of Madame Geistering, the well known actress, at present performing in this city.

Henry Levy & Son, 477 Broadway, are now offering great inducements to buyers of holiday fancy goods, as they are determined to close out their balance of fall importations. This is a chance to secure bargains.

A. & E. Wallach have just received a magnificent line of embroidered and hand-painted cigar and card cases, and a handsome line of French and Vienna fans, with handles in shell, pearl or ivory. The firm is now closing out its stock of holiday goods at low prices.

R. G. Hutchinson has just issued a new expense book, one of the most compact and convenient of the kind yet offered; it contains spaces for all of the ordinary items incident to traveling, and is so small that it can be carried in the vest pocket.

Obpacher Brothers have just added three new designs to their already large, varied and beautiful line of Christmas and New Year cards. They are designated as Nos. 455, 461, 252, and are embossed in plate shape, fringed and tastefully and richly illuminated. No. 252 comes both in double and single styles, the latter being jointed with silk ribbon, which shows on the outside in an elegant bow.

H. Griffin & Sons, 54 Duane street, New York, are offering Welch's patent index tabs and keep them in stock. These are said to be good things, and worthy of the attention of buyers.

The Industrial Publishing Company, Philadelphia, Pa., has been dissolved by the withdrawal of D. S. Williams. Geo. W. Hubley and Chas. R. Mitchell continue under the same style.

W. J. Anderson, manufacturing stationer, New York, carrying on business under the style of Anderson & Cameron, has called a meeting of his creditors for Friday, the 25th inst.

Dick & Fitzgerald, book publishers, New York city, have dissolved partnership. William B. Dick continues under same style.

The City and Country Company, publisher, Columbus, Ohio, has been incorporated—authorized capital \$5,000.

McIrwin & Son, stationers, Clarinda, Iowa, have dissolved partnership. J. M. McIrwin continues.

Henry Gurley, bookseller and stationer, New York city, has sold out,

M. A. Reay has just introduced a very neat calendar for 1882. It consists of two parts, viz., a beautifully illuminated card and a roller, around which is wound the sheet on which the months and days are printed; this sheet contains twelve separate divisions, each being surrounded by a fancy border, within which are the days of the month, and in spaces between the borders are appropriate selections of poetry. The roller is fastened to the centre of the card, the illuminations of which include a representation of the new year coming in and the old year departing, the former being shown by a child appearing in sunshine, and the latter by an old woman disappearing in darkness. There is also on the back of the card, in smaller size, a tabular form showing the months and days at a single glance. The calendars come fringed and unfringed. This house also shows an elegant line of Lowell's Christmas cards, fringed and ribboned, and a rare line of cheap hand-painted wood-carved cases. The house has just added six new designs to Lowell's folders; they all show busts of little girls with intelligent faces, and are neatly finished, and are numbered 41 B., 44 B., 45 B., 46 B., 47 B., and 48 B.

The American Model Printer, speaking of Lockwood's Directory of the Paper and Stationery Trades, says: "This useful directory, published by perhaps the most thoroughly posted technical journalist of this country, is one brimful of information respecting all parties who are in any way engaged in making or selling paper. It contains well arranged lists of paper manufacturers in this country and the Canadas; paper and paper stock dealers in the principal cities; retail and wholesale stationers and paper dealers, together with the names and addresses of booksellers who deal in stationery and paper throughout the United States. The volume before us is the seventh annual edition, and bears evidence of greatest care and practical neatness."

J. H. Van Kirk & Co., commission paper dealers, New York, made an assignment on Friday last to Francis M. Eppley, the following named creditors being preferred: Beebe & Holbrook, \$3,488.52; Massasoit Paper Manufacturing Company, \$2,500; Chapin Paper Company, \$4,500; and James A. Townsend, \$2,500. The liabilities are said to be upward of \$60,000. The assignee has given notice that he expects to complete his inventory by November 28, when he will call a meeting of creditors.

Although Gillott's steel pens have for many years been known as standard goods in this market, and this old English firm which has made them for nearly half a century has enjoyed a good, steady demand for all of its various grades, there is an exceptional good demand at present for its Nos. 808 and 659, which are becoming more popular than ever.

W. H. Sears and Mr. Otis have just returned from a trip for the Acme Stationery and Paper Company, the former in the Middle and Southern States, and the latter from the West and Southwest, and both report having had an exceptionally good trade, with favorable prospects everywhere they visited.

It is understood that the contractors with the Western Union Telegraph Company for its supply of message envelopes, have renewed the contract, about expiring, until May 1 next.

Goodman & Schanck, 165 William street, New York, have published a nice series of lithographed New Year cards in fancy designs.

C. Hirstel & Co., booksellers and stationers, Portland, Oregon, have made an assignment.

John McCamley, dealer in notions, St. Louis, Mo., is dead.

The Mountaineer, The Dalles, Oregon, has been sold out.

W. Q. Haythorn, dealer in notions, Danville, Ill., is closing up.

C. H. Rogers, dealer in notions, Danville, Ill., is selling out at auction.

D. L. Hass, bookseller and stationer, Napa City, Cal., has been burned out.

O. H. Harpel, of the firm of Harpel & Co., printers, Louisville, Ky, is dead.

J. B. Bates, publisher of the *Tazewell County Republican*, Pekin, Ill., has sold out.

Joseph Hagan, paper-stock dealer, Providence, R. I., has made an assignment.

McCormack & Kilbourne, publishers, Casselton, Dakota, have dissolved partnership.

J. K. Parker, dealer in fancy goods, Baltimore, Md., is closing out to change business.

The stock of M. E. Knarston, dealer in fancy goods, San Francisco, Cal., has been attached.

John A. Tibbitts & Co., publishers of the *Day*, New London, Conn., have dissolved partnership.

Samuel Raynor & Co. show a very pretty assortment of plush papeterie boxes, filled with some of the latest styles of paper.

William C. Horn and wife, who have been on a visit to the principal cities on the Continent of Europe, are expected to leave for home on steamer sailing December 1.

Akehurst, 17 Fayette street, Utica, seems to be working his Xmas trade quite actively. He has issued his holiday cards, and also makes his announcement in Marcus Ward & Co.'s "Calendar of the Seasons." This last, by the way, is one of the prettiest yet produced.

Charles J. Cohen, Philadelphia, reports continued activity in all branches of his large establishment. The new lines of novelties displayed this week are large plush jewel-cases, with secret spring drawers; autograph albums in plush and flexible seal and imitation calf; photograph albums in plush, plain or with richly engraved shields for name plates; bisque statuettes, from \$15 to \$25 per pair; a further assortment of papier-maché desks from England, and some new and very desirable holiday papeteries.

Trade with Lyman & Curtiss in toys is literally "booming." They have a large portion of their immense store on Murray street, running through the entire length of the block to Warren street, filled with a well assorted stock, in addition to which is an annex consisting of three storehouses in adjoining blocks. In the line of children's sleds they are having an unprecedented demand. This concern is agent for some of the largest toy manufacturers in the country, and jobbers would do well to consult its catalogue and price list for the most popular selling toys in the market.

J. D. Whitmore & Co.'s varied lines of fancy and plain, also stamped and illuminated papeteries, are still in great demand. This firm has been taxed to its utmost to fill orders since July. It is offering a larger line than ever of menus and guest cards, with a variety of styles suitable for hotel use, as well as those particularly adapted for private purposes. The house is prepared to furnish estimates for any class of these goods, including fancy orders of dancing, opening announcements, souvenir programmes, &c. The very latest for an elegant menu favor is the satin, lace and ribbon design, hand-painted, and with steel-plate work. This is exquisitely made,

the most excellent workmanship and designing being made use of.

Perry & Berch, publishers, Wilber, Neb., have sold out.

A. Charles, dealer in fancy goods, St. John's, Mich., has closed on execution.

F. L. White, publisher of the *Sunday Times*, Boston, has sold out to Geo. B. White.

M. Welcome, fancy goods dealer, Manchester, N. H., has sold out to William Benson.

Geo. W. Watkins, bookseller and stationer, Portsmouth, O., has assigned to J. S. Pallit.

W. C. Davies, dealer in notions, Glendive, Iowa, is closing up. He will return to Mandau, Dakota.

O. Herring, dealer in paper hangings, Baltimore, Md., has compromised at fifty cents on the dollar.

The paper box factory of Isaac Swop, St. Louis, Mo., has been partly burned out. Fully insured.

Jacob J. Smith & Co., manufacturers of printers' ink, Toronto, Ont., Can., have been burned out; insured.

Biedinger & Seibert, wholesale paper dealers, Cincinnati, O., have been burned out. Loss from \$15,000 to \$20,000; insured, \$15,000.

The Albany Perforated Wrapping Paper Company, Albany, N. Y., has been burned out. Loss from \$2,000 to \$3,000; insured, \$5,000.

A fire broke out at Albany, N. Y., on Tuesday of last week, on the premises occupied by Robert M. Hamilton, agent for the Albany Perforated Wrapping Paper Company. Loss not known; insurance \$5,000.

The "Knockabout Club in the Woods" is a narrative of the adventures of six young men in the wilds of Maine and Canada. It is full of stirring incidents, humorous adventures and stories of hunters' life. Estes & Lauriat, Boston, are the publishers. The same firm has also ready "Chatterbox" for 1881.

Among the late publications of Estes & Lauriat, Boston, is a "Young Folk's History of Boston." This history begins with an account of St. Botolph, who was Abbot of Ikanho, afterward known as Boston, England, and carries the reader through historical incidents to our own Boston from its beginning to the present. The work is different from the mass of histories, and is pleasant as well as instructive reading.

R. Fideau, 16 Beekman street, is quite busy this week filling an export order for 300 cases of school slates, 10 cases slate pencils, 100 gross "Union" school bags, 1 gross mosquito netting, 6 bales hammocks, 6 dozen Hatfield patent beds, 6 dozen patent tropical beds and 6 dozen patent hammock cradles. Mr. Fideau has lately bought the building where his factory is situated, and also another set of machinery, so as to enable him to fill more expeditiously orders for his school bags and other goods.

The sales of the automatic shading pen by James D. Whitmore & Co., continue with very gratifying success. They are continuing to receive inquiries and orders from foreign countries, and, to meet the demand for some, are now putting the pens up in sets containing six, one of each size, which are meeting with a very ready sale, and afford an opportunity for parties to have a complete line of samples at small cost. Their inks for use with the pen are of the most brilliant colors, and people who formerly made their own ink are now said to be buying these in preference, because of their brilliancy and cheapness.

FOLEY'S PAT. IMPROVED STYLOGRAPHIC PEN.

Great reduction in price: No. 1, \$1.50; No. 2, \$2; No. 3, \$2.50; No. 4, \$3. A liberal discount to the Trade. FOLEY'S PATENT STYLUS is the best and only Pen with point, spring and cleaner in air tube. Fully warranted, and exchangeable for gold pens and pencils.

We, the subscribers, who know the value of FOLEY'S PENS from constant use of them for a number of years, cheerfully recommend them to those who wish for the best and most perfect Gold Pen ever made.

Signed by the following gentlemen and over 1,000 others: G. S. Coe, Pres. Am. Ex. Nat'l Bank; J. A. Beardsley, Cashier Nat'l Bank of North America; Wm. A. Fall, Pres. Corn Exchange Bank; R. H. DEVOTED TO THE INTERESTS OF THE

Stationery and Fancy Goods Trades.

WEEKLY--\$2.00 PER ANNUM.

Single Copies - - - 10 Cents.

NEW YORK, THURSDAY, NOVEMBER 24, 1881.

Advertisements cannot be received for insertion in the current week later than 12 M. on Wednesday. The charge for advertising is 25 cents a line, each insertion. Special terms for standing and displayed advertisements to be had on application.

This journal aims to be a medium of information for and a representative of the interests of every one connected with the stationery and fancy goods trades. It contains a full and trustworthy survey of the market for stationery in this country, in all cases giving the actual prices at which goods can be bought of importers and jobbers in this city, together with a detailed account of novelties in the trade, patents relating to stationery, and current items of interest. A review of foreign markets and accounts of movements abroad will also be furnished, and no pains will be spared to make THE STATIONER a thorough and complete exponent of the trade.

Subscription and postage for Great Britain, per annum..... 12s.

Any information our readers may wish to obtain shall be cheerfully given, and prompt replies will be made to all inquiries addressed to us on any subjects of interest to the trade.

Communications on all trade matters are earnestly solicited. Address

HOWARD LOCKWOOD, Pres. and Treas.

THIS is Thanksgiving Day.

CERTAINLY, we have much to be thankful for.

EVEN though the year has had its sadness and its griefs, we can still be thankful.

FROM a strictly business point of view, there is every reason to be grateful. The country is blessed with peace and prosperity. Therefore, let us give thanks.

THERE was a tariff convention at Chicago last week, at which it was resolved that a protective policy is necessary to the welfare of our manufactures. It was also recommended that the re-establishment of our merchant marine should be encouraged by exemption from taxation. The sentiment of the majority of our people will, we think, accord with this. But all the same, there is need of revising the tariff, not for the purpose of weakening or imperilling the position of our industries, but for the rectification of some anomalies in the law which, under strict construction, lead to injurious and, at the same time, amusing inconsistencies in the levying of duties.

POSTMASTER-GENERAL JAMES has led the way to retrenchment in postal expenditures, and, in his annual report, makes several important recommendations. He proposes to amplify and cheapen the money-order facilities, and suggests the establishment of postal-savings depositories. The prospect of the reduction of letter postage from three to two cents, is also suggested. Altogether, the Postmaster-General lets loose some very practical ideas, which will not come amiss to the people generally, if made effectual. His suggestion as to barring the mails to merchandise will, of course, excite opposition, but as he bases his objections to government portage on the ground that it is unremunerative and interfering with the quick dispatch of letter mails, it is plain that he has no argument to use against the convenience of this mode of shipment to merchants and others who may be called upon to use it. On this latter score, we can believe that Mr. James, with his known ability for bringing system into the distribution of mail matter, can devise a means whereby the benefit of merchandise transportation can be preserved at no loss to the government and without inconvenience to the general public. If postal rates must be advanced on this class of mail matter, there is no doubt that an increased rate of postage can and will be paid by those who want to take advantage of such means of postal transportation, and who will subordinate themselves to the exigencies of the general mail service.

THE Post-Office Department, as will be seen from what we have printed in another column, has made an explanatory ruling as to merchandise samples in the mails. As we read this ruling, a sample of merchan-

dise must bear an identifying mark only, but can be accompanied by a printed or written slip which gives a full description of the sample. If the latter has marked upon it numbers and figures which indicate its character and price, it must pay the highest rates, but if it has an identifying mark only, say a figure 5, and is inclosed with a printed or written slip on which 5 is said to be a "worsted comforter, price 10 cents," or a "sample of book paper, 24x38, 60 pounds, price 11 1/2 cents," it can be sent for less money. We confess that the language of the ruling puzzles us still, and that we are uncertain as to its construction; but we comfort ourselves with the reflection that more than we have been bothered by Post-Office decisions, and that perhaps we are no thicker-headed than most people outside of the Post-Office Department. If Congress has so queerly framed legislation as to provide for carrying mailable matter of most weight at less cost to the sender, but at greater expense to the public, it would prove to be something like this: A paper dealer may send out a hundred samples of paper separately and save money, but when it comes to transportation the aggregate increase in weight caused by the additional explanatory slip must be paid for out of the postal revenues, which are diminished for that purpose. This is the way we look at it, and it seems to us very queer.

WAS WILLY WALLACH DECEIVED?

The *Paper Trade Journal* of Saturday last says:

Continuing the sequence of "Facts" presented in the *Journal* of date November 5, we present further abstracts of the evidence already taken in the action of Joseph Parker & Son against the publisher of this paper. These abstracts are from the sworn testimony of Willy Wallach.

DIRECT EXAMINATION BY DEFENDANT'S COUNSEL.

Q.—Of whom did you buy "Treasury" when you first began to deal in it?

A.—Of the wholesale paper warehouses in Beekman street.

Q.—Did you ever buy directly of the Parkers—if so, when did you begin?

A.—I have, I believe, about ten years.

Q.—What do you mean by stating in your answer to Mr. Lockwood's letter that "Treasury" is made short weight?

A.—I mean that a paper marked #100 does not weigh a 100 pounds, but 90 pounds.

Q.—State whether or not "Treasury" marked 80 weighed 80 pounds.

A.—No, sir, it did not; nor does it weigh 80 pounds.

Q.—State whether or not "Treasury" marked 60 weighed 60 pounds.

A.—It does not weigh 60 pounds, nor ever did, to my knowledge.

Q.—State whether or not "Treasury" marked 120 weighed 120 pounds.

A.—It does not, nor ever did, to my knowledge.

Q.—About how much less than 60 pounds to the ream did "Treasury" marked 60 weigh?

A.—About six pounds.

Q.—State whether or not "Treasury" marked 80, 100 and 120 fell short in weight of 80, 80, and 120 pounds to the ream by about the same percentage.

A.—Yes, the same percentage.

Q.—State whether or not you recollect of mentioning to Mr. Lockwood that you had sometimes sold "Treasury" to customers who had afterward become dissatisfied that the paper was not of full weight, or rather did not weigh according to the numbers on it.

A.—I think that I have.

Q.—State whether or not you have ever sold "Treasury" blotting and the purchaser became dissatisfied by reason that the actual weight did not correspond to the figures marked on the paper.

A.—I remember such a case, but not the name of the party.

Q.—When was your attention first called to the fact that "Treasury" marked by the figures 60, 80, 100 and 120 in actual weight fell short of those figures by about 10 per cent.

A.—When I made my first purchase of F. S. & J. Parker, predecessors of the present firm.

Q.—You say that your attention was first called to it when you made your first purchase from F. S. & J. Parker; now state how it was called to it.

A.—It was the manner in which they made out their invoices or bills. They would read, for instance:

Two bundles, 80;	carried out 72 lbs.
Four " 100;	" 180 lbs.
Two " 120;	" 108 lbs.

Then these figures were added, the price per pound mentioned, and the sum carried out as the result of multiplying the pounds by the price per pound.

Q.—You stated that you first bought "Treasury" of some wholesale dealers in Beekman street. Now, how long a time elapsed after buying of them before you bought directly of the Parkers?

A.—Probably a couple of years.

Q.—Please state how you came to buy directly of the Parkers, instead of the Beekman street houses, as formerly.

A.—I used to confine myself almost exclusively to the importation of foreign goods until I found American goods, particularly paper, so much improved in quality and reduced in price that foreign papers could not any longer compete with them. I then gradually changed from dealing in foreign to domestic

goods, and from buying from wholesale dealers to ordering direct from the mills.

Q.—Do you recollect whether or not the wholesale dealers at that time sold you blotting paper in "Treasury" as #100 or 60 or 80, with a price per ream which would be the result of multiplying the figures 100, 60 or 80 by some other unit number?

A.—I recollect of buying "Treasury" blotting paper designated as 60, 80 or 100, but have no knowledge in what manner or at what rate the dealers fixed their price.

Q.—Do you recollect how you worded the order before you applied to Parkers directly?

A.—Yes, sir.

Q.—How was it?

A.—I ordered whatever quantity I required, in whatever color I wanted it, of 80, 100, or 120.

Q.—Do you recollect of having a conversation with Mr. Lockwood, in which you stated to Mr. Lockwood, that when you first bought "Treasury" directly of the Parkers, you told the Parkers, at first, that they were offering "Treasury" at the same price that you had been buying it of the jobbers for?

A.—I do not recollect the particulars of such a conversation.

Q.—I refer to a conversation a few weeks since, and add the further query, whether you did not state to Mr. Lockwood, that in the case of the first bargain with the Parkers, you said to them, "Why I can buy it of the jobbers for the same price that you sell it." Do you not recollect the substance of such a conversation?

A.—I recollect having had a conversation with Mr. Lockwood not long ago, in which I stated that on previous occasions, not specifying the time, I had called the attention of Mr. Parker that their paper was offered or sold at the same price quoted by them (the Parkers), and that the reply was "That dealers were satisfied with the difference between the net price charged by the mill and the price established by the jobbers."

Q.—State whether or not you had in fact called the attention of Mr. Joseph Parker to the point that their "Treasury" was offered or sold at the same price quoted by them.

A.—I did.

Q.—Had you called the attention of the Parkers to it more than once.

A.—That I don't remember.

Q.—Now, you state that you did call their attention to the point that their "Treasury" was offered or sold at the same price quoted by them; state what their or his reply was?

A.—I complained to Mr. Joseph Parker, senior, about the smallness of the profit left to the jobber in selling their paper, and his reply was "that they had no control over the price except establishing a fixed uniform price per net pound to all wholesale dealers, who had adopted as their selling price a price per ream representing the weight expressed by the figures 60, 80, 100 and 120, respectively."

Q.—Do you recollect the fact that a controversy appeared in the *Paper Trade Journal* about the method of selling "Treasury," or in the *AMERICAN STATIONER*?

A.—Yes, I do.

Q.—Now state whether this conversation which you had with Joseph Parker, Sen., and which you have here just stated, whether that conversation took place before or after the time of the controversy in those papers.

A.—Long before that time.

Q.—About how long?

A.—Years.

Q.—About how many years?

A.—Some five or six years.

CROSS-EXAMINATION.

Q.—State whether you had taken means to advise your customers that you dealt in "Treasury" and the method of your dealing in it.

A.—Not in a general way, only on special application.

Q.—I notice that on the direct examination counsel for the defendant with great care designated "Treasury" as "Treasury" marked 60, 80, 100, and 120—state whether or not you know that the figures 60, 80, 100, and 120 are prefixed by or further characterized

by any symbol or sign, and, if so, what that symbol or sign indicated.

A.—Although I see the bundles of "Treasury" every day, I am unable to remember the presence of any such symbol, or of anything except the figures, but I know that on all the samples such a mark is prefixed to the figure or number.

Q.—I understand you, then, that you never noticed so as to be able to tell now, the distinguishing signs or marks on the wrappers of 60, 80, 100 and 120 "Treasury"?

A.—I never paid any particular attention to it.

RE-DIRECT.

Q.—You have stated that the first you knew of the exact manner in which the Parkers put up "Treasury" was when you bought directly of them, and that you had dealt in it a few years before that time—while so dealing, before you bought of the Parkers, what was your understanding or supposition as to the weight per ream of the "Treasury," 60, 80, 100, 120?

A.—I did not buy during that period the "Treasury" by the pound, but per ream or quire, as we required it. My supposition, at that time, was that the numbers designated the weight.

The *Literary World* facetiously remarks that "Henry James, Jr., has condescended to revisit his native land, and expects to be able to endure its trials for about the space of six months."

Market Review.

OFFICE OF THE AMERICAN STATIONER, {
WEDNESDAY, November 23, 1881. }

THE MONEY MARKET.—Call loans are firm at full rates. Time loans on stocks are generally made at 6 per cent., and prime commercial discounts are quoted @7 per cent. The stock market has shown a weak tone, and prices, with limited exceptions, have declined. The semi-stringent condition of the money market exerts a depressing influence, but the prevalent belief that stocks are not safe investments at current values is a more potent reason for the prolonged weakness. Government bonds have shown some irregularity and weakness, but closed firm. Railroad bonds have been generally firm on a moderate business. Sterling exchange has materially declined, Continental sympathizing to some extent, with a light business in all kinds.

THE PAPER MARKET.—Trade keeps up to fair proportions, and although all dealers do not report an active demand, the consumption of paper is such as to prevent any accumulation of supplies, and there is a general satisfactory feeling, both as regards the demand and ruling prices. Manufacturers, although in a better position than a few weeks ago as to their water supply and their ability to execute new orders, show very little disposition to cut current prices, as most of them have still in hand enough contracts to keep them fairly engaged. Prices rule very steady, and in most grades are quite as firm as they have been during the past few months. In manilla trade has fallen off some, but the range of prices has not been changed; there is, however, a little weaker feeling in these.

THE STATIONERY MARKET.—Thanksgiving Day has kept many out-of-town buyers at their homes, and has been some drawback to business, but orders by mail communication continue very large, and the nearby jobbing trade assist to make up a fair aggregate for the week. A large share of the business now doing is with the nearby and city trade, who have laid in most of their stock of goods for the holidays, and in another fortnight many of the wholesale houses who have any goods left over will close them out at retail. The fancy goods men are still doing considerable business, and the toy trade is extremely active, and large stocks of goods are being sold. There is a steady trade in staples, and prices continue firm. The late advance in envelopes appears to give quite general satisfaction, particularly to those who have any considerable stock on hand.

THE BAY STATE PAPER COMPANY, HOLYOKE, MASS., were among

distinguished for their fine quality and the superior style in which they were wrapped. Their example has been approved and imitated by a swarm of competitors, who have flooded the market with inferior goods, put up in packages of 600 to 800 sheets, misleading the unwary, and sold at apparently lower figures; but the trade and consumers generally recognize the fact that a good article, honestly put up, in 1,000 sheet packages, is the most profitable both for use and for sale. Their goods are all guaranteed 1,000 sheets to package, and no short count. No wood is used in any of these papers, but they are made of the very best stock in the market.

**THE PAPER TRADE IN THE CITY OF NEW YORK.**

[Continued.]

In the spring of 1851, when Cyrus W. Field was a power in the paper trade, a young man entered his office one morning, accompanied by Edward S. May (now of E. & S. May, of Lee, Mass.), and bearing a letter of introduction from Elizur Smith, now the president of the Smith Paper Company. Mr. Field, with his characteristic suavity, said he was glad to see the young gentleman, and added, "You come of good stock." But the young gentleman was seeking a situation, and this Mr. Field had not to give, although he would be pleased to see his visitor again. The young man, however, did not find it necessary to call on Mr. Field again, for, during the afternoon of the same day, he obtained a situation in the house of White & Sheffield, then also one of the largest in the trade. The new clerk of White & Sheffield was H. C. Hulbert, than whom no man is better known in the trade to day.

Mr. Hulbert was born in Lee, Mass., in December, 1831. At the age of thirteen he began his mercantile career in Lee by entering the general store of William Taylor, a brother of Horace Taylor, in which Thomas A. Twining, a character well remembered by all of the older members of the paper trade, was then head clerk. After six months of mercantile life young Hulbert returned to school at the Lee Academy. In the early part of 1848 he re-entered the store of William Taylor as junior clerk. In May of the same year he entered the store of Plunkett & Hulbert at Pittsfield, Mass., then accounted the largest dry goods establishment in Berkshire County. While there he was carefully instructed in bookkeeping by Charles Hulbert, of the firm, who was his cousin. After three years' service, in turn as errand boy, salesman, and, during the last year, as bookkeeper and cashier, he left Plunkett & Hulbert and came to this city, with the result already told.

Young Hulbert, although the youngest clerk in the house, was not long in making his usefulness felt. Soon after he entered the trade, the bookkeeper, J. Carter Brantigan, was taken sick with typhoid fever, and the members of the firm being reluctant to throw their books open to an outsider, were puzzled to find a way of keeping up the books and getting out their January accounts' sales. Young Hulbert heard them talking the matter over one day, and offered to do the work. His offer was received with incredulity at first, but was finally accepted, and it must be added that he did the work to the entire satisfaction of all concerned. In January, 1855, less than four years after he became a clerk in the house, and when he was only 23 years old, he was given an interest in the firm in lieu of a salary. The year following he was admitted into full copartnership and the name of the firm was changed to J. B. Sheffield & Co. From this time he represented the firm in nearly all settlements, and was intrusted with many matters requiring careful and delicate manipulation.

On one occasion, a misunderstanding having arisen between the firms of J. B. Sheffield & Co. and Cyrus W. Field & Co., so that the latter returned unanswered the letters of the former, Mr. Hulbert was sent to settle the matter. Entering Mr. Field's office with a letter from Mr. Sheffield, he handed it to that gentleman. Mr. Field read, and then passed the letter to Mr. Stone, his partner, who read it and passed it back. Mr. Field then told a

clerk to return the letter to J. B. Sheffield & Co. Mr. Hulbert, who had hitherto kept silent, suggested at this point that a settlement was no doubt desired by all parties, but that it could never be reached by returning letters unanswered. "Are you empowered to settle this matter?" asked Mr. Field, sharply. Mr. Hulbert said he was, and forthwith entered into a discussion, which resulted in settling the affair to the entire satisfaction of his house. After the crisis of 1857 he went West and rendered important services to his house by making settlements and opening new accounts, his knowledge of bookkeeping enabling him to form a just estimate of a customer's financial condition from an examination of his books.

On January 1, 1858, the term of the copartnership of J. B. Sheffield & Co. expired, and Mr. Hulbert declined to renew it, although offered fifty per cent. advance on his former interest. In March, 1858, a settlement with J. B. Sheffield & Co. having been effected, he formed a new copartnership with Milan Hulbert, of Boston, as general partner, and Otis Daniell, of the same place, as special partner. The name of the new firm was H. C. & M. Hulbert, its capital was \$40,000, and the principal business it proposed to carry on was the sale of paper makers' supplies, the sale of paper being only a secondary object. H. C. Hulbert was then only 26 years old. Immediately on the formation of the firm he went to Europe to make connections for purchasing paper makers' materials, and succeeded in obtaining the exclusive agency for the sale of the Stubbins Vale Mill felts, and for Berger ultramarine, which the house retains at the present day. He returned in October, 1858, and opened a house at 83 John street. Thus began the firm of H. C. & M. Hulbert, which enjoyed a prosperous and honorable career up at the time of its dissolution in 1872. It never, even during the trying times of 1861-62, received any financial aid from its special partner, or asked a financial favor from any of its creditors. In this connection an anecdote may be related as serving to throw light as well on the condition of business during the squeeze of 1861 as on the character of the head of the house under consideration. While the squeeze was at its height, the interest due on the capital of the special partner, Mr. Daniell, became due. At the same time the rate of foreign exchange was greatly in our favor, and Mr. Hulbert, finding that he could use the money in hand to advantage by buying exchange to pay off European balances, wrote to Mr. Daniell asking him if he would take the firm's note for a short time in settlement of his interest account. Mr. Daniell replied that he needed the money to pay annual bills with, and Mr. Hulbert, immediately on the receipt of the letter, mailed him a check for the full amount due, saying, "As you seem to need the money, and it makes but little difference to us, I inclose you a check." A few days after, Mr. Daniell unexpectedly walked into Mr. Hulbert's office and said, "Mr. Hulbert, don't you want some money. If so, I may help you." Mr. Hulbert replied that he was not at all in need of assistance, and the subject of the conversation was changed.

A few more anecdotes may here be told before proceeding farther. At the time of Lincoln's election Mr. Hulbert was in England, and the news reached Liverpool the day after he had sailed for New York. It was not until the steamship arrived off Sandy Hook, and a pilot had brought some papers on board, that he became aware of the fact. Mrs. Hulbert, who was standing beside him as he glanced over the papers, asked him what was the matter. "Nothing," he replied, "except that there is the

biggest kind of panic in New York." During the crisis of 1857 Cyrus W. Field's partners suspended while he was on the way from Liverpool to this city, and the recollection of that circumstance at this time not unnaturally caused Mr. Hulbert the gravest anxiety. When the ship reached her pier the first representative of his house that he met was a small boy. "Well Johnny," said he, "what is the news?" "Oh, nothing, sir," replied the boy, "except everybody's 'busting.'" "What! have we 'busted,' Johnny?" "Oh, no, sir! We ain't that kind," answered Johnny. Mr. Hulbert said afterward that the relief afforded him by the boy's answer was inexpressible. Leaving his wife at the Astor House, with the caution that he might not be home until late, he went to the store and made himself acquainted, before going away with the exact condition and every detail of the firm's finances, and next day was prepared to meet all emergencies.

At one time, while H. C. & M. Hulbert were doing business with Goodwin & Sheldon, paper makers, near Hartford, some of their paper passed into the hands of the old Hartford Bank, which, taking a sudden fit of uneasiness, sent to inquire about the Hulberts of Leonard Church, who had been president of the Lee Bank, at Lee, Mass., but had afterward moved to Hartford. Mr. Church replied, "I do not know how much money they have; but I know the boys and the stock they come from, and if you have any of their paper that you don't want I will take it and pay interest on it." The bank, it is needless to add, did not part with the paper.

Goodwin & Sheldon eventually failed, owing, among others, H. C. & M. Hulbert and David Leavitt, well known for years as the president of the American Exchange Bank, who was a connection of Mr. Goodwin. Mr. Hulbert had secured his claim by a special agreement, but when he met Mr. Leavitt in Hartford, for the purpose of effecting a settlement, the latter disputed the validity of this agreement. Mr. Hulbert said he was willing to leave the matter to the decision of their lawyers, so the whole party adjourned to Mr. Hulbert's room in the hotel, where the legal gentlemen proceeded to argue the question. Mr. Hulbert's lawyer cited a precedent which Mr. Leavitt's lawyer declared was not in a parallel case. The former began to argue that it was a parallel case, when Mr. Hulbert, who was lying upon the bed, suddenly interrupted him by saying: "Allow me to suggest that you ask Mr. Welch one question, and that is, in what respect the parallel does not hold?" His lawyer saw at once the advantage to be gained by pressing that question, and Mr. Welch, finding that it was not as easy to demonstrate as to deny, yielded within three minutes. Mr. Hulbert therefore got his money. This transaction greatly pleased Mr. Leavitt, notwithstanding that he lost money by it, and returning to New York in the same train with Mr. Hulbert, he said: "Hulbert, do you get as much accommodation as you want at the American Exchange Bank?"

"Not always," replied Mr. Hulbert.

"Well," continued Mr. Leavitt, "if Coe does not let you have all you want in future, let me know and I will make him." George S. Coe, now president of the bank, was at that time its cashier.

At one time John Newton, the well known mill builder of Holyoke, had a line of credit with H. C. & M. Hulbert, ranging from \$30,000 to \$50,000, the firm being secured by a second mortgage for \$50,000 on his mill in Holyoke. One morning Mr. Hulbert received a dispatch from Mr. Newton saying that the mill had been

burned to the ground. He went immediately to Holyoke and found the insurance companies working to postpone the settlement so that Newton would be forced by the pressure of his creditors to compromise. Newton was somehow very unpopular, and this fact strengthened the hope of the insurance men. William B. Wood, now of the firm of Brown, Wood & Kingman, of this city, was also a creditor of Newton to the extent of about \$10,000, and had also gone to Holyoke. "Mr. Wood," said Mr. Hulbert, "we will have to stand together in this matter," and he then proposed to take up all of Newton's paper. This proposition was carried into effect, and, after the principal amounts had been secured, the local bank was notified by Mr. Hulbert to take up any stray paper of Newton's that came along and hold for account of H. C. & M. Hulbert. Newton had taken out an additional \$20,000 of insurance on his mill a day or two before it was burned, but had not obtained his policies, and the pretext on which the companies delayed a settlement was the assertion that Newton had placed the insurance and then set his mill on fire. Mr. Hulbert replied to this charge that, whatever Mr. Newton might be, he certainly was not a fool, and that, if he had set his mill on fire, he would certainly have taken the precaution to secure his policies first. After some days had passed, and the expected descent of creditors had not taken place, one of the insurance presidents expressed surprise on the subject to Mr. Hulbert, who replied that he had taken up all of Newton's paper, that no descent need be expected, and that the insurance men might just as well know first as last that they were fighting H. C. & M. Hulbert, who would use all the power they could command to win. Not long after this the insurance companies settled with Mr. Newton in full, and the claims of all of his creditors were satisfied.

On May 1, 1861, the firm moved from 83 John street to 13 Beekman, where it remained for twenty years. On January 1, 1862, Mr. Daniell sold out his interest in the business to the general partners, on the most liberal terms, giving them three years to pay in installments without requiring any security whatever. Notwithstanding that the firm sustained heavy losses from the panic of 1861, Mr. Daniell received in addition to his original capital a handsome share of profits. One circumstance will serve to show the character of Mr. Daniell. After the close of the first year and a half of the firm's existence, on looking over the semi annual statement of its business, Mr. Daniell said: "Mr. Hulbert, I think I am receiving too large a share of the profits. When my arrangement was made with you I expected to be of more assistance than I have been, and I must decline to receive more than 25 per cent. instead of 33 per cent. as originally agreed, and wish the papers to be changed to that effect." Mr. Hulbert replied that he was perfectly satisfied with the arrangement and that Mr. Daniell's name was worth more to the firm than it was paying for it. Mr. Daniell insisted, however, on the change and never could be induced to take more than 25 per cent. of the profits.

On the first of January, 1872, Milan Hulbert withdrew from the firm to enter the arms business in the firm of Merwin, Hulbert & Co. H. C. Hulbert then took into copartnership Joseph H. Sutphin and George P. Hulbert, and the name of the firm was changed to H. C. Hulbert & Co. Both of these young gentlemen had been clerks in the house from boyhood, and the latter was a cousin of the head of the firm. George P. Hulbert died before the close of 1872, and the

other partners continued under the same firm name. Another partner, H. M. Cleveland, was admitted on January 1, 1874, but he withdrew at the end of a year and a half to take charge of the *Christian Union*. Since then there have been no changes in the constitution of the firm.

H. C. Hulbert & Co. were the first to introduce into this country English sizing, concentrated alum, hyposulphite of soda, pearl hardening, Stubbins Vale felts, Berger ultramarine, and many other articles now used by paper manufacturers. They were the first also to introduce diamond Halum, a domestic product. As was remarked above, the sale of paper has always been a secondary part of the firm's business, and has been carried on more as an accommodation to paper makers with whom it has dealt than for the purpose of profit. It has never been directly engaged in manufacturing, but has been indirectly so engaged during most of its existence.

Mr. Hulbert has been for many years a director of the Importers' and Traders' National Bank of this city, which has the largest deposits of any bank in the United States, and a surplus, in addition to its capital, of one and a half to two million dollars. He is also a director of the South Brooklyn Savings Bank, whose deposits amount to over eight million dollars. He is, and has been for years, a director also of the New York Mutual Marine Insurance Company, one of the oldest and most conservative insurance corporations in this city. He is also president of the Winona Paper Company, of Holyoke, Mass. Without having even sought office or allowed his name to be used, except in connection with the strongest and best corporations in the country, he has had to decline many offers of official position. Mr. Hulbert is one of the advisors also of the Industrial School and Home for Destitute Children, of which Mrs. Hulbert has been for many years the treasurer. Last fall Mr. Hulbert shook off the cares of business, which he had borne unremittingly for over thirty years, and started on a pleasure trip to Europe with his family. After traveling over England and the Continent, he went to Palestine and other places of interest in Asia Minor. He returned to New York in September last.

Some men who afterward became prominent in the paper trade were at one time or another employed by the firm. Thus George F. Perkins, now the head of the firm of Perkins, Goodwin & Co., was the first clerk employed by H. C. & M. Hulbert, and he remained with them until C. S. Buchanan employed him under an agreement with H. C. Hulbert to take him into copartnership if he should prove competent. Mr. Perkins' subsequent career has already been related in this series of articles. The late J. B. Ayres was also brought by H. C. & M. Hulbert from a paper mill in Maine, and was salesman for them for a number of years.

J. H. Sutphin, the junior member of the firm, is a native of New Jersey. His connection with the house began as a boy in 1860 in answer to an advertisement, and he has received his entire business instruction therein. On January, 1866, he was given a percentage of the profits in lieu of a salary, and on January 1, 1872, was admitted as a partner of the firm of H. C. Hulbert & Co. During Mr. Hulbert's recent absence in Europe he had full control of the business of the house, as well as of the personal interests of Mr. Hulbert, which are much larger outside of than inside of the firm. Since Mr. Hulbert's return Mr. Sutphin has had entire charge of the details of the business, the former exercising only a general supervision. Mr. Sutphin is also secretary of the Winona Paper Company, of Holyoke.

PARQUETRY FLOORING.

The demand for parquetry floors is continually on the increase. They take the place of carpets for covering the coarse boards of ordinary flooring, and are made by ingeniously mortising together different kinds of wood. Most of this flooring is made seven-eighths of an inch thick, and what is known as "wood carpet" is made only about one-fourth of an inch in thickness. The principal body of parquetry work is oak, in different shades, but every kind of cabinet wood is used—mahogany, tulip, walnut, cherry—all furnishing a variety of shade, which, when properly set, harmonize with agreeable effect. The entire mosaic, when mortised and joined, can be lifted without breaking or injury.

Nothing neater and more refined can be found for a floor covering to a room than a centre rug or carpet, either in the shape of a square or a parallelogram, and surrounded on all sides by a neat pattern in wood. If one wishes to practise closer economy he can cover the space occupied by the carpet, the piano, stages, or other large pieces, with plain wood the thickness of the parquetry wood. The surface polish of the wood must be maintained to retain the beauty and finish of the floor. Waxing is often sufficient, or a vigorous application of shellac varnish.

The origin of this style of flooring can be traced back to the early history of Western Asia. The material used was usually marble. From those early days to the present, changes have taken place. Wood has succeeded stone, and the jig-saw the chisel. For some time past, parquet work has been successfully used in Germany, France, and lately in England; and in this country, although new at present, we predict for it great popularity. In our American

homes parquet flooring is particularly adapted for backgrounds to rugs or square carpets.—*Northwestern Lumberman.*

BROWN BRASS.

The following recipe is said to produce a good brown tone upon brass: The article, after having been thoroughly cleansed and freed from all traces of grease, then polished, is dipped for about half a minute into a cold solution of 10 grams of hypomanganate of potash, 50 grs. green vitriol, 5 grs. muriatic acid, and 1 litre water; then rinse well and dry in fine soft sawdust; if a reddish cast is desired, dip the article into a second bath heated to 60° C., of 10 grs. chromic acid, 10 grs. chloric acid, 10 grs. hypomanganate of potash, and 50 grs. blue vitriol (sulphate of copper) dissolved in 1 litre water. The latter mixture alone produces a light bronze. The article may afterward be heated in an oven, which operation, it is said, produces a very rich tone.

The platform of the National Tariff Convention, held at Chicago during last week, recites that the protective policy of America is to be credited with having not only provided the revenue with which to revive the national credit and discharge in large part the national debt, but also with having quadrupled the industries of the country, maintained the unexampled continued prosperity for twenty years and turned the balance of trade steadily in our favor; and that, however well established our manufactures may be, a tariff for protection and revenue is still needed, that skilled laborers and producers may have constant and remunerative employment. The convention recommended that American maritime property shall be exempted from the burdens of state, municipal and local

taxation; that Congress shall make American vessels the carriers of American mails at rates proportionate to the value of the service performed, without regard to the rates at which foreign vessels, subsidized by their own governments, may be willing to carry them.

Among the visiting members of the trade in the city since last week were: Erastus Darrow, Rochester, N. Y.; J. K. Pratt, Pittsburgh, Pa.; William Walker, of Morris I. Lobe & Co., Baltimore, Md.; S. E. Dawson, of Dawson Brothers, Montreal, Canada; Charles H. Barr, Lancaster, Pa.; Samuel Hobbs, Boston, Mass., William H. Fread, Troy, N. Y.; J. N. Adam, of Adam & Co., Buffalo, N. Y.; G. W. Green, Newburg, N. Y.; J. M. M. Conrad, Baltimore, Md.; Frank W. Hamilton, Deadwood, Dakota; A. Hamilton, Steubenville, Ohio; Mr. Randolph, Jr., of J. W. Randolph & English, Richmond, Va., and William H. Young, Troy, N. Y.

A United States marshal is in possession of the premises of J. Rosenberg & Co., fancy goods dealers, Detroit, Mich.

MARCUS WARD & CO.'S ANNOUNCEMENTS.**CHRISTMAS AND NEW-YEAR CARDS FOR 1881-82.**

THE NEW DESIGNS ARE COMPLETELY SUCCESSFUL.

"At Home."

THE NEW ART GIFT-BOOK for the Holiday Season bears this title. Its quaint, square pages represent children of all degrees—"At Home"—with all the charms which the ideal of costume can add to the loveliness of childhood. Known all over America as originators and first introducers of Christmas Cards, Marcus Ward & Co. have been asked, on all sides, to bring out a book which should abound in the versatile fancy and quaint conceit of their Cards, combined with good drawing and harmonious color. The work now introduced is the response to this wide-spread demand. Every page of "At Home" is a picture, not in glowing, gaudy colors, but in the subdued and harmonizing tints now favored by the devotees of culture. The pictures not only give the perfection of juvenile costume, but also afford glimpses of English Interiors, with the proper coloring, decoration and furniture of some of the most æsthetic of English Homes. The verses in "At Home" enhance its interest, and are in themselves worthy of the beautiful book of which they form part.

Decorated by THOMAS CRANE.

Illustrated by J. G. SOWERBY.

\$2.50

**THE ANCHOR OF HOPE.
THE HAVEN OF PEACE.**

New Illuminated "Daily Portion" Book.
BY THE REV. DR. MACDUFF.

\$2.00

Every page of this beautiful "Book of Days" is decorated in colors with exquisite flowers. The book is actually two books within a single cover. The Anchor will become the Christian's Hope in the morning, while The Haven will be his sure resting-place at night. When the morning portion has been read, the Christian will close and reverse the book, and there "The Haven of Peace" awaits his return when "evening shades prevail." This dual form of book is so convenient for ready reference that it is sure to be appreciated. Motto Texts have been adopted to head every page uniformly, special texts, differing every day, follow, and then comes the poem for the morning or evening, respectively.

THE SHAKSPERIAN CALENDAR.

An illuminated Calendar for the library or drawing-room, with date slip to tear off daily, and appropriate quotations from Shakspeare for every day in the year. Price, 50 Cents.

DAY UNTO DAY.

A SACRED CALENDAR. With quotations from Scripture (arranged in weekly subjects) for every day in the year. Also, Church Festivals, Holidays, etc. The new design for 1882, in colors and gold, represents "The Passing Days." Price, 50 Cents.

EVERY DAY.

A CALENDAR for men of business and other busy men. Daily date slips to tear off, similar to the above, with quotations from various authors of undying fame. The new design is unique for harmony of color and decorative beauty. Price, 50 Cents.

THE SEASONS' CALENDAR.

A small Calendar, eight pages, with four new and beautiful illuminated designs by KATE GREENAWAY, representing the seasons. Also, Church and Legal Holidays, Postal information, etc. Price 15 Cents.

In addition to their value from an Art standpoint, they will be found useful in every household as a historical reference.

RALPH TRAUTMANN, Publisher, 312 Broadway, New York.

MACHINERY IN RELATION TO ART.

No doubt there are many instances to be quoted in which industrial art suffers only too palpably through the inelastic nature of mechanical processes. That is to say, in our consideration of such departments of artistic design and workmanship as have a history, we cannot but perceive in the examples which date from the time before the aids of machinery were applied—using this language in its widest signification—a certain superiority over more modern examples, in respect of what is called character, which the connoisseur is fully entitled to attribute to the positive absence of a corrupting influence. It is of no use to argue that the action of the human hand is in itself essentially mechanical, or that even the operation of the intellect is none the less a matter of organization; the answer is that there is this difference between such mechanism of nature and the mechanism of man, namely, that the one is in its simplest manifestations entirely suited to its purpose, and the other in its most elaborate efforts comparatively feeble and imperfect. It is this feebleness and imperfection which, in fact, constitute the inelasticity of mechanical fine art. The human hand may not do what a machine can do, but it can do what the machine cannot. Take the familiar instance of a chromo-lithograph or an oleograph. No painter could undertake to effect with the hand such absolute reproduction of identity in a hundred copies as the press can readily accomplish, but in the work of the press all that goes to make the individuality of each one of a hundred pictures is irretrievably lost. If we go again to nature, we may with equal truth remember that, while a Coventry weaving-machine turns out—as the phrase goes not inexpressively—a thousand yards of ribbon with no possible difference between one yard and another, nature causes to blossom a thousand flowers of the field, not one of which is without its own idiosyncrasy. So also, then, if for nature we take the artistic hand, there may be a thousand ornaments cast in metal with nothing to distinguish one from another, while a thousand ornaments carved in oak shall not show two alike. It is a necessity of nature, and an exquisite charm, that not two blades of grass ever can be the very same, and it is one of the most legitimate charms of art not mechanical that no cut of the tool or touch of the pencil shall be quite like another.—*Pottery Gazette*.

It is well known that the combustion of ordinary illuminating gas produces sulphuric acid in quantity sufficient to destroy the binding of books and to tarnish the lettering on their backs, besides, of course, vitiating the atmosphere so much that the health of the person breathing it is slowly but certainly undermined. Dr. Joule has made an experiment which suggests a corrective. He suspended two plates of finely perforated zinc, one three and the other twelve inches, above the burner. At the end of three months the lower plate showed an accumulation of the ordinary brownish-black deposit and a furring of sulphate of zinc, but the upper plate was only slightly affected. The inference from this examination is that a single plate of perforated zinc about a foot square placed over a gas-jet is sufficient to retain most of the noxious emanations.

Beaconsfield said: "A human being with a settled purpose must accomplish it. Nothing can resist a will that will stake even existence for its fulfillment."

THE ANCIENT CUPBOARD.

"Cupboard" at the present day signifies by corruption a closed case, but originally cupboards had no doors, and were described in times as "things made like stayres." Our ancestors, like the Romans, plumed themselves on an ostentatious display of plate, and considered every cupboard of plate incomplete unless it consisted of a cup of gold covered, six great standing pots of silver, twenty-four silver bowls with covers, a basin, ewer and chasior of silver. Stowe mentions one exhibited at the marriage feast of Prince Arthur, in the palace of the Bishop of London, "of five stages in height, triangled," the which was set with plate valued at £1,200, and in the other chamber, where the prince dined, was a cupboard of gold plate, garnished with stones and pearls, valued at above £20,000. When Cardinal Wolsey entertained the French Ambassadors at Hampton Court, in 1528, two banqueting rooms were thrown open, in each of which a cupboard extended the whole length of the apartment, piled to the top with a mass of plate. Hall in his "Chronicles" (Henry III., an. 25), relates how "the Erle of Arundel was chief butler, on who xii. citizens of London did give their attendance at the Cupboard—the Erle of Darby *cup berer*." The historian Speed (b. ix. 19, Rich. II.) points out that it is the duty of the maior to attend in his own person as chief cup-waiter (charged with the cupboard royall), as well in the hall at dinner, to serve the king in a cup of gold with spices, and for his fees to have the said cup and a water-spout pot of gold thereunto belonging, when he took his leave at night.

A NOVEL APPLICATION FOR ICE MACHINES.—Suzani, an engineer of Milan, Italy, has had the idea of keeping the eggs of the silkworm in a state of lethargy for an indefinite time by keeping them at a temperature near the freezing point, and the *Génie Civil* gives elaborate drawings of the apparatus as now in operation at the exhibition at Milan. A Pictet ice machine is employed for the purpose. The value of the process lies in the fact that in years when the mulberry trees are behind, the eggs may be held for a future more auspicious period, so that thus the dangers incident to slow growth of the trees in some seasons are avoided.

A correspondent of *Notes and Queries* writes: "The Finch Collection, preserved in the Taylor institution at Oxford, contains a Latin MS. of the New Testament, a brief description of which may interest some of your readers. It is in 12mo. size, and comprises 128 parchment leaves, the last being a blank leaf. The text is written in double columns with minuscules, indicating the character of the twelfth century. It consists (1) of the Calendar of Canons and Saints (comprising originally six leaves, three of which, it appears, have been cut out); (2) of the dedicatory epistle written by Jerome, author of the Vulgate, and dedicated by him to Pope Damasus I. (one leaf), and (3) of the canonical books of the New Testament. These appear, however, not in the usual order of succession—the General Epistles of James, Peter, John, Jude, and the Book of Revelation preceding the Pauline Epistles and the whole canon concluding with the Epistle to the Hebrews."

The hills of lofty endeavor and high achievement lie all around us, and, if we never catch a glimpse of the views they afford, we need not complain that it is because of the insuperable limitations of our surroundings.

BYRON WESTON

DALTON, MASS., U.S.A.

HAS BEEN AWARDED THE

GRAND PRIZE GOLD MEDAL

AND RECOMMENDED THE

Medal of Honor and Perfection
At PARIS, 1878;

This being the HIGHEST and ONLY AWARD given for

LINEN RECORD and LEDGER PAPER

Also, the only Gold Medal given for Ledger Paper at the Adelaide, Australia, Exhibition, 1881.

—A SPECIALTY.—

THIS Paper has received THE HIGHEST PREMIUM over all others from the Cincinnati Industrial Exhibition, Massachusetts Charitable Mechanics' Association, Franklin Institute of Philadelphia, Louisville Exposition, Medal and diploma from United States Centennial Commission, Medal of Progress American Institute, 1877, and Medal of Improvement and Progress, Boston, 1878. Its

PRINCIPAL ADVANTAGES

are as follows:—1. It contains more LINEN than any other Ledger Paper, has a longer fibre, and is, consequently, tougher. 2. Having a harder and better body, it frays less in erasure, so that by simply using the rubber after the eraser, the ink is prevented from spreading. 3. It is more uniform in Weight Color and Finish. 4. It never coddles if properly bound. 5. Its chemical action upon ink is such that it both writes and rules up better. For proof of the foregoing, refer to a large number of Stationers, Bookbinders, Bookkeepers, and Recorders, who have given it, after a severe test, the preference over all others. This paper is Double Sized, and will stand any climate or the most acid of fluid inks.

Send for sample sheet, ERASE and REWRITE FOUR TIMES on same spot.
Each sheet is water-marked with name and date.

Correspondence.

ADELAIDE INTERNATIONAL EXHIBITION.

[FROM OUR AUSTRALIAN CORRESPONDENT.]

ADELAIDE, South Australia, October 8, 1881.

If the consumption of paper is a reflex of the intelligence of the people of the South Australian province, then foreigners are justified in forming a high estimation of the character of the citizens of Adelaide, the seat of government. The population of the whole colony is only 286,211 persons, yet the value of paper, books and other items in connection with the stationery business imported during the year 1880, is officially declared to be \$913,730. Of this amount, only \$15,420 was imported from the United States, so that there is ample room for improvement. It is gratifying, however, to mention, that during the current year, the imports increased in value and quantity, and that American manufacturers profited by the prosperity. The details are given, as well as the duty on paper, as the information may be of advantage to readers:

	Value.	Duty.
Fancy goods.....	\$57,415	10 p. c. ad val.
Books.....	58,517	Free.
Stationery.....	80,972	10 p. c. ad val.
Printing paper.....	23,019	Free.
Writing paper.....	5,355	Free.
Paper bags.....	4,828	3s. 4d. per cwt.
Wrapping paper.....	3,893	3s. 4d. per cwt.
Inks.....	2,727	Free.
Playing cards.....	1,080	3d. per pack.

The exhibitors of the stationery department of the United States had their samples well displayed on the pavilion of the Lockwood Press, which was described in the leading journal, the *South Australian Register*, as "neat-looking, with carpeted floor, and prettily arranged show-cases and show tables on it, and on them the various articles of mechanism on exhibit, all furnished to the last degree of brightness." However, it may be said that the "Pavilion" of the Lockwood Press was awarded twenty-five gold, five silver and three bronze medals, and thirty-three diplomas. These will be sent by next boat to Howard Lockwood for distribution.

A very pleasing event in connection with this subject took place in the early part of the week. J. W. Smith, the United States Consul, received from the exhibitors in the American Court a letter desiring him to convey to the head of her Majesty's Government in South Australia their appreciation of the courtesy and hospitality extended to their representatives at the exhibition." They recognized the intelligent and im-

partial manner in which the judges made their awards, the courtesy of the Customs officials, the vigilance of the police and the orderly demeanor of the visitors and the population generally. The representatives of Byron Weston, Lieutenant-Governor of the State of Massachusetts, H. D. Wade & Co., New York; Stewart Hartshorn, New York; Juvet & Co., Canajoharie, N. Y.; Moses Warren & Co., Chicago, Ill., and of Howard Lockwood, New York, on their behalf signed the letter. Mr. Consul Smith waited upon the Governor, His Excellency Sir William F. D. Jervois, K.C.M.G., and communicated the desires of the exhibitors. It afforded great gratification to His Excellency, and he expressed the pleasure it gave him to know that the American exhibitors would have always agreeable recollections of South Australia. It may be added that had not the representatives of the Hon. Orestes Cleveland, Jersey City, N. J.; E. Faber, N. Y.; Leroy W. Fairchild, New York; Galt & Hoy, New York; E. Remington & Sons, New York; Williams, Stillings & Co., New York, and Holmes, Booth & Haydens, New York, been rather delicate about affixing their principals' names, these exhibitors would have added to the value of what was characterized by the local press as a "graceful compliment."

The most interesting and attractive exhibit on the space of the Lockwood Press was the globes of Juvet & Co., Canajoharie, N. Y. These were entered in three classes—horology, education, and scientific instruments—by their representative, and were awarded three gold and one silver medal. This includes a gold medal for the inventor, L. P. Juvet. The judges in the horological section made the following report:

United States Court.—The time globe exhibited by Messrs. Juvet & Co., Canajoharie, N. Y., U. S. A.—This firm have exhibited specimens of their time globes or universal time-keepers. These may be regarded as cosmographic clocks. The globe is twelve inches in diameter, and revolves on its own axis in twenty-four hours by means of chronometer movements in its interior, or it may be turned by hand independently of the works without detriment to them. It gives the local time on a glass dial affixed to the North Pole; and the time of any other part of the world may be ascertained by merely glancing on the equatorial line. In order to test the accuracy of its movements we had one of the clocks sent to a local manufactory, where it was under our supervision for several weeks, and found its time-keeping qualities accurate, and the mechanism simple and easily renewed. It is evidently an invention which required much time and anxiety in its completion, and we recommend it for first order of merit and gold medal, and the inventor, Mr. L. P. Juvet for special commendation.

The Judges on Education—John A. Hartley,

B.A., Inspector-General of Schools, chairman—made use of complimentary terms also. The official report was made in these words:

School Globes.—"I have examined the various globes exhibited by Messrs. Juvet & Co., and consider them well adapted for school use. The 'Telurium' is a neat and well made model, by which the various points in connection with the seasons, time, &c., can be readily and clearly explained, and for this purpose I have not seen a better. I recommend first degree of merit for school globes."

In the department which included philosophical and scientific instruments, the competition was very keen.

C. Todd, C.M.G., Government Astronomer, was chairman of the judges, and that gentleman made the award:

"I have also inspected Mr. Juvet's time globes, exhibited by Mr. Hogan, which are very neatly made, and useful for the purpose of determining the relative time at different places on the earth's surface. I award them a second order of merit."

These high encomiums, coming from the best authorities in the country, must be gratifying to the exhibitors, and will lead to business. The representative of the company will no doubt have done a fair business before this letter reaches New York.

Those gold medalists, H. D. Wade & Co., 117 Fulton street, New York, have again been victorious. Their display of black and colored inks were duly appreciated. At Melbourne they were awarded the highest honors for black and colored inks. Here all competitors were again beaten after a most careful examination. The judges were E. Spiller, government printer, chairman, and Mr. Wilson, manager of the *South Australian Register*, who awarded the exhibitors first order of merit for black and colored inks as being "excellent and of good quality." It may be observed that both judges had an extensive assortment of these inks for trial. These inks are most popular in Australasia.

There is nothing new in the Joseph Dixon Crucible Company being awarded a gold medal. The Hon. Orestes Cleveland, president, is the only pencil manufacturer who has been awarded a gold medal at any of the Australian international exhibitions, and, if rightly informed, was the only one who was rewarded with gold at any exhibition in Europe. At Paris, in 1878, he obtained two gold medals. The people of Adelaide, like those at Paris, understand the value of good manufactures, and the chairman of the judges made the following report: "Joseph Dixon Crucible Company, Jersey City, N. J.—A large and comprehensive collection of superior American 'graphite' pencils. Lead of very uniform grain and superior quality. First order

of merit." The promoters considered this valuable exhibit worthy of the gold medal.

Lieutenant-Governor Byron Weston, Dalton, Mass., another gold-medallist, will not be astonished that his fine sample of ledger and record papers were awarded the highest degree of merit by the judges at this exhibition, and that the promoters were only too glad to award the gold medal. The official report of the judges was in the subjoined language: "United States Court, Byron Weston, Dalton, Mass., ledger and record paper. A very well-made paper, unusually long in fibre and full-bodied, with good color and face; special first degree of merit." This is the highest award, and, per consequence, the gold medal. There is reason to believe that the manufacturer will do a fair share of business in Australia. The grand prize gold medal was awarded to these papers at the Paris Exhibition of 1878.

The display of Eberhard Faber, 720 Broadway, New York, was confined to rubber bands. They were excellent and attractive, and commanded business from this part of Australia. The judges spoke of them in the highest terms, and made the following report, which is sufficiently explicit: "A. W. Faber, New York, pencil rubber, with erasers, india-rubber band; white bands particularly good. First order of merit." The promoters carried out the intentions of the judges by awarding the American branch of the celebrated house of Faber a gold medal.

Leroy W. Fairchild, Broadway, New York, has also obtained a medal of Australian gold at the Adelaide Exhibition; it was well and honorably deserved. This manufacturer's displays were neat and elegant, useful as well as ornamental, and several inquiries, which will lead to business, were made of his representative. The judges, through their chairman, Mr. Spiller, government printer, made their report as follows: Leroy W. Fairchild, New York, gold pens and pencil cases; finish and style very good, patterns novel and designs excellent. First order of merit." Nothing was left for the promoters—and, to their credit be it recorded, it was gracefully done—than to award Mr. Fairchild the gold medal.

At Melbourne and at Adelaide, Moses Warren & Co., State street, Chicago, Ill., have shown specimens of their well-known publication, "Hill's Manual of Social and Business Forms." This work has been appreciated at both International Exhibitions, and hundreds could be sold if the representative of the exhibitors desired. Here it was awarded first order of merit by the judges and a gold medal by the promoters. Good men are being selected to handle this work, as it will be sold by subscription.

The Common-Sense Binder of Williams, Stillings & Co., New York, was honored with the distinction of a silver medal. There can be no doubt that these binders will come into general use in Australia, if handled by competent persons. Those manufacturers who obtained honors at Melbourne will consult their interest by showing at the Christchurch, New Zealand Exhibition. The chairman of the judges, in awarding second order of merit, made the following remarks: "Williams, Stillings & Co., 252 Broadway, New York—Russell's Common-Sense Binder, a very useful and handy companion to the library, reading room or office." The promoters thought it deserving of the silver medal, and made the award accordingly.

The map of the City of New York, by Galt & Hoy, 111 Liberty street, performed a double duty, reminding visitors of the lines in the "Deserted Village" of Goldsmith:

"The chest contrived a double debt to pay,
A bed by night, a chest of drawers by day."

The very excellent map of these publishers was displayed on the handsome stand of Stewart Hartshorn, 486 Broadway, New York, who, by the way, obtained the gold medal for his window-shade rollers. However, to return, the City of New York was attached to one of these rollers, in order to display their usefulness in the school-room or library, as well as to show the visitors what could be done by the artists of New York. The judges awarded this exhibit second order of merit, and several of the maps could be sold were they on exhibit. The event will certainly lead to business, and the publishers, Galt & Hoy, were rewarded with a silver medal, which will be forwarded with the others, together with their diploma, to Howard Lockwood for distribution.

A bronze prize medal was awarded to the type-writer of E. Remington & Sons, but it is due to the manufacturers to state, that it was one of their old-fashioned ones, taken from the stock of a local importer, which was submitted for competition. Had their perfected type-writer, of the same style, which was awarded the gold medal at Paris three years ago, been submitted, there can be no doubt that a gold medal would follow. There are several of these now in use in the Australian colonies, and they are still becoming more popular.

Another bronze prize medallist is the firm of Holmes, Booth & Haydens, Chambers street, New York. Its exhibit was very small, when we take into consideration the large resources of its manufactory. In fact, its exhibit consisted only of a pair of McGill's single-stroke staple press and some fasteners. The official report of the judges was couched in the following terms: "Holmes, Booth & Haydens, of Waterbury, Conn.—McGill's patent binders and staple press, very useful for office purposes. Honorable mention." The promoters gave a bronze medal and diploma. Though the exhibit was small, it will have the effect of increasing the commercial relations of the manufacturers with the people of South Australia.

Pardon me for not publicly thanking the proprietor, Mr. Lockwood, for the kind manner in which he spoke of me at your last annual dinner, for not recognizing the very cordial manner in which the editorial staff and heads of departments received the toast of "Our Correspondents." It would, indeed, be akin to vandalism to overlook this praise from gentlemen who so well understand their professional duties, and the words of a proprietor, as Mr. Lockwood has proved himself during the years of our connection, who is indulgent and liberal. Besides

The love of praise, how'er concealed by art,
Reigns, more or less, and glows in every heart;
The proud, to gain it, toils on toils endure,
The modest shun it but to make it sure.

Thank you, Mr. Lockwood, and your jovial company; may you have many of such happy gatherings. In extenuation, let me say, that my neglect was owing to press of business, watching the interests of your patrons and keeping an eye to yours. In fighting your battles in a strange land—among strange, but intelligent people, let me say that you have fortified me with excellent weapons, as the following results will indorse:

The judges in fine arts made the following award:

Howard Lockwood, Lockwood Press, New York.—Photo-electrotypography: Pamphlets of *Musical and Dramatic Courier*, also of *The American Mail and Export Journal*.—"These are excellent and useful productions, of great saving in sending pamphlets to those countries not within the postal union. Special first degree."

This has been awarded a gold medal by the promoters.

In the class which included publications the "Lockwood Press" obtained another gold medal, as will be observed from the judges' report:

Publications.—Howard Lockwood, New York: *The American Mail and Export Journal*. "A very excellent publication, which cannot fail to be of very great use to a mercantile community. Special first degree of merit."

The jurors on printing could do no more than give the first order of merit. The chairman of the judges, E. Spiller, government printer, and William Wilson, of the *South Australian Register* office, reported as follows:

Howard Lockwood, New York: *American Mail* and other publications. "For trade purposes and as specimens of typography and wood engraving, the jury consider them unequalled in their sphere. First order of merit."

Here you have another order of merit and gold medal.

This does not complete the list of honors. In the class which included wood engraving the judges reported:

Howard Lockwood, Lockwood Press, New York. "Specimens of wood engraving, such as the reduced copy of the diploma granted by the Commissioners of the Sydney International Exhibition. First degree of merit."

Here we have another gold medal. Such astonishing appreciation of the workmanship of the Lockwood Press stands unequalled in the records of international exhibitions, and lest that the treasury of the promoters would become exhausted in finding gold for Howard Lockwood, my esteemed principal, the judges in other classes were requested to make no further awards.

For instance, the Chairman of Judges in the Musical Instrument Section contented himself with making the following report:

Musical and Dramatic Courier, New York. "We would specially mention this literary organ as a useful exponent of the various improvements made from time to time in musical instruments generally, as well as of the progress of the great art both in music and the drama in the United States. It is a weekly periodical, beautifully printed and illustrated. Price, 5 cents."

The advertisers in America should know that the *Courier* has a large circulation in Australia.

The same may be said of the *Millers' Journal*. The judges in milling machinery—those who gave the gold medal to John C. Higgins, Chicago, mill picks—passed a high compliment on that excellent organ of the milling trade. Let me hope that these remarks will be my apology at your next annual dinner—possibly they will be supplemented by increasing your roll of subscribers, and extending your business columns.

My stay here will be about six weeks, when I will travel via Melbourne to Sydney, and converse with all the stationers and leading importers on my route. The Lockwood Press will be represented at the New Zealand International Exhibition, which will be held in March and April, 1882. Those of your constituents who desire honors and business are requested to communicate with me. Send catalogues and price lists. While engaged at the last three exhibitions—Sydney, Melbourne and Adelaide—business had to be of secondary consideration. I have, however, commenced business operations, and drafts payable at Boston and New York have been sent by this mail. My motto is "honor first, business after," in connection with international exhibitions. There are, however, one or two houses which will have my first attention, otherwise it would on my part be black ingratitude.

The New Zealand Exhibition will be held at Christchurch, which is described in the *Australian Hand-book* as under :

Christchurch, the capital of the provincial district of Canterbury, is situated on the plain of that name, and is eight miles distant from the port of Lyttelton. The port and town are connected by railway, and the tunnel through the Port hills is the longest in New Zealand, extending to a mile and five-eighths. Christchurch is on the main line of the Middle Island Railway, and is connected with all parts by telegraph. The streets form a square of about a mile, and are laid out chiefly in parallel and intersecting lines. There are several fine buildings, the principal of which are the provincial government buildings, the museum (which contains fine exhibits, and a unique collection of skeletons of the Moa), the cathedral (in course of building), and the government offices in Cathedral square. Tenders have been called for town hall and council chambers. The banking companies which have offices in Christchurch are the Bank of New Zealand, the National Bank, the Colonial Bank, the Union Bank, the Bank of New South Wales, and the Bank of Australasia. It is the head-quarters of the Union Insurance Company, and agencies of the New Zealand, South British, National, Standard, and Colonial Insurance Company carry on business here. All the chief insurance companies of Australia and the United Kingdom are represented. The town is bounded on the west by Hagley Park, a beautiful pleasure ground of 500 acres, through which the Avon flows. The southern extension of the town is incorporated as the borough of Sydenham, and there are suburban districts named Addington, Phillips Town, Buirgland, St. Albans, and Woolston. The area of the borough is 1,602 acres, and the population 13,425, but if Sydenham and the suburbs are included, the population is 30,800. The number of dwellings in the borough is 2,554, and the rateable value of property £215,000. The municipal rates amount to 1s. 4d. per pound, and there is a rate of 5½d. for drainage and of 2d. for the protective works on the banks of the Waimakariri River. The city is supplied with excellent water by means of artesian wells, which yield a daily supply of about 144 gallons per head. There are several local industries, that of boot manufacture being, perhaps, the chief. Publications, morning newspapers: *Lyttelton Times*, *Canterbury Press*; evening newspapers, *The Globe*, *The Star*; weekly newspapers, *Canterbury Times*, *Illustrated Press*, *New Zealand Sun*, *Weekly Press*; monthly publications, *Christian Laborer*, *New Zealand Church News*, and *New Zealand Wesleyan*. Among the hotels are Collin's, the Terminus, the Clarendon, the White Hart, the City, and the Commercial. Ten trains run to and from Christchurch and Lyttelton during the day, fare 1s. 9d. and 1s. 2d. The railway also extends in a southern direction to Dunedin (230 miles), fare 5½s. 6d. and 38s. 4d., and thence with numerous branches to the Bluff. The northern line extends to Amberley, via Rangiora, with a branch to Oxford. The places of amusement are the Theatre Royal, the Gaiety Theatre, the Odd Fellows' Hall, and several smaller ones. A new Masonic hall has been opened. The district is more particularly suitable for grain growing and grazing purposes.

Thus it will be seen that it is connected by rail with the leading city of the South, and there can be no doubt that the exhibition will be worth the serious attention of the manufacturers of America. Your correspondent is prepared to give the fullest information, and to guard the interests of your manufacturers at New Zealand. Cable address, "Hogan, Sydney." Postal address, Box 337, G. P. O., Sydney, New South Wales. J. HOGAN.

ST. LOUIS SIFTINGS.

[CORRESPONDENCE OF THE STATIONER.]

St. Louis, November 24, 1881.

Trade here keeps up with the regularity and volume of a tidal wave. Our sleepy town is astonished at itself; and, indeed, if you are acquainted with the ordinary condition of affairs, and could see how things are "booming" at present, you would not wonder at the astonish-

ment of our good people. All of the large houses are rushed, and everybody is looking for a holiday trade that will astonish the natives, as well as "oi barbaroi." All this, mind you, in spite of the floods on the Father of Waters; despite the delays and inefficiency of our Transfer Company; despite Jay Gould and all the rest whose hands are upon our municipal throat; in spite of these our merchants are flourishing.

Chicago, indeed, has a "light, provincial way" of sneering at us; and, undoubtedly, she is larger in population and business; but St. Louis is on the march, and, possibly, the time will come when the sneers may be from the other direction. It may be mere fancy, but St. Louis is nearer than any other large town to the geographical centre of the country; and after the Mississippi is thoroughly opened and carries a permanent transatlantic trade, after the Isthmus is opened for transpacific trade, who knows but that St. Louis shall take her rank with New York and San Francisco for home and export business? Of cities, as well as individuals, it may be said, that "some are born great, some achieve greatness, and some have greatness thrust upon them." New York is one of the "born great," Chicago has "achieved greatness," and it looks as if St. Louis was to be one of the last. Anyway, at present, our people are inclined to feel a little pompous, for the trade which concerns us now is fine.

But all things are not "smooth as a summer sea." The freight blockade still continues, to the annoyance of our merchants, and the cry is everywhere for goods. There is no dearth of places to put them, for twenty mouths are waiting for every spoonful that arrives.

John J. Daly & Co., always in the lead, are busy from sunrise to long after gas-light. There is not a busier house in town, and notwithstanding they are put back, as all the rest, by delays on the other side of the bridge, both Messrs. Daly, junior and senior, are always smiling, busy and serene.

F. O. Sawyer & Co. are making a fine thing out of their specialty in fancy cards, programmes and folders. I don't suppose there is a finer or more varied stock in town than theirs, or a heavier business in the goods. It is worth writing to see what they offer.

Our people are going to show up well in Lockwood's Directory for '82, which, I hear, is announced for January 1. The addition of the list of printers projected will be a useful and profitable improvement.

Mr. Monroe, your Chicago manager, writes that he will be with us next week.

The latest visitor was Joe Kelly, of Langfeld, Turner & Andrews, Philadelphia, [who is always welcome here, as a friend, among the trade. He was sent away rejoicing and with unbounded confidence in the future of St. Louis. "Everything is lovely," and prospects are bright.

A visit to the leading paper houses found them all on the *qui vive*. In reply to the question: "How is business?" the reply is always the same—"Splendid; never better!—but you must excuse me, I have so much to do that I cannot stop to talk."

The Southern Hotel Company of this town is running an elegant line of Sunday bills-of-fare. It has on each Sunday the latest thing out in menus. The bills are printed by the house of John J. Daly & Co., and are models of artistic printing. This house is now turning out some of the finest job-work ever seen in this country, and its increasing business shows that the people of St. Louis recognize their efforts.

PRINCE HAL.

CHICAGO CLIPPINGS.

[FROM OUR REGULAR CORRESPONDENT.]

WESTERN OFFICE LOCKWOOD PRESS, 8 LAKESIDE BUILDING, CHICAGO, ILL., NOV. 28, 1881.

Chicago has been "dreadfully" cold during the past week or so, notably on Thanksgiving Day.

As I have heretofore remarked several times during the past few months, *trade is good*.

Illinois is likely to get some of the spoils from the present administration. Among others, S. P. Rounds, an old Chicago printer, is in Washington, whence he is likely to return with an appointment to the position of Government Printer. "Tis a consummation devoutly to be wished," for Mr. Rounds is not only a man thoroughly competent to fill the position with justice and ability, but his appointment would please a large circle of voters about this locality.

Lerow & Robinson, 196-198 Clark street, are now pushing their "Favorite" letter copying books. This is something that all stationers should keep, as it always sells.

Skeen & Stuart, now finally settled, are putting in a very large and select stock.

Creswell, Wanner & Co., 54-56 Franklin street, are selling a large and elegant list of New Year address cards, which are, many of them, new and striking. Their complete price list, just out, will be mailed on application.

Hulse & Spencer have dissolved partnership, the old firm having been succeeded by Ostrander & Hulse. Mr. Ostrander is very well known to the trade, having been connected recently with the house of Harvey, Hart & Co. The new firm will continue regularly the manufacture of the old firm's well established machinery and tools and electrotypes' and stereotypes' specialties, giving personal attention to repairs.

The Chicago Post Office has instituted a neat scheme for saving government money. It offers a reward of \$100 to the clerk who shall, during the year, detect the greatest amount of insufficient postage on letters passing through the office. The first reward has just been paid, the lucky boy having detected shortage on the larger part of nearly 2,000 letters and packages for this city alone. The whole amount collected on the list footing up over \$6,000.

Rounds Brothers, at 173 Monroe street, are adding new presses and machinery to their already extensive press-room, and are now in shape to do a prompter business than ever.

George Watson, Jr., of New York, has been in town the personal guest of George H. Taylor.

H. McAllister & Co., 196 and 198 Clark street, have just issued their November price list of fancy advertising cards—wholesale—to the trade exclusively. Their latest novelties are a folding calendar for 1882; a "floral" in nine colors; a set of six crying babies; and an elegant "money" series. They are worth sending for, and the trade should see them.

The Shober & Carqueville Lithograph Company, of this city, sent last September twenty copies of its lithograph portraits of President Garfield to Queen Victoria, having heard that she desired a good picture of the President. The firm is just in receipt of the following:

"Lieutenant-General Sir Henry F. Ponsonby is commanded by the Queen to thank the Shober Lithographic Company for their letter of the 30th of September.—Buckingham Palace, 28th of October, 1881."

Farnham & Birchard, room 32 A, American Express Building, have recently succeeded E. W. Farnham in the manufacture of the arm rest and wrist support. The support is neat, light and convenient, being made of parti-colored celluloid. The firm are advertising for agents, and

will soon be ready to offer the article to the trade.

The United States Ticket and Tablet Company is rushing things. Its "Dolly" fan is taking well, and a series of novel folders will be ready for the trade ere long, and will give them something out of the hackneyed line.

Manufacturers and dealers in infringing files will have to "mind their P's and Q's." Shannon is "after them with a sharp stick."

This office received, the other day, a pleasant visit from Oliver Braden, formerly with Thomas Dando, now representing the L. L. Brown Paper Company.

The Pennsylvania Company, always in the van of enterprise, always quick to feel a public want and quick to fill it, has given the business and traveling public a real convenience in the shape of its "New York and Chicago Limited Express." This special train, now running daily east and west, leaves Chicago at 3:30 P. M., making the run to Pittsburg, 14 hours; Harrisburg, 21½ hours; Philadelphia, 23 hours; Baltimore, 23 hours; Washington, 24 hours; New York, 26 hours; Boston, 40 hours. This new departure is a real blessing to our business men, who are frequently forced to make flying trips between the East and West, and Chicago is brought, by the "New York and Chicago, Limited," practically several hundred miles nearer the East. The train arrives at and departs from the Union depot, where it makes close connections with the trains of the C. & A.; C., B. & Q., and Chicago, Milwaukee & St. Paul Road. For further particulars, those intending to avail themselves of this fast train may address C. W. Adams, Assistant General Passenger Agent, 65 Clark street, Chicago. The Pennsylvania Company deserves the patronage of the traveling public for its enterprise. G. B. H.

CINCINNATI COMMENTS.

[FROM OUR REGULAR CORRESPONDENT.]

CINCINNATI, O., November 26, 1881.

What a pity I must set out in this letter saying that here in Cincinnati the trade of the retail stationers is, in the main—What, dull? No; I won't say that, but will say that is the way some of them talk. That's the phrase, "the way they talk," and that's about the sum total of it. It's a fact that some of us haven't observed that we have a very late fall. All through the country the pork packing has scarcely commenced, and in the cities there is more activity, or rather a different sort of activity, among people engaged in the industries from that which characterizes wintry weather. People, so long as we have autumn weather, fail to realize, even late in November, that autumn is nearly gone, and that young winter stands waiting to step into his place in the procession of the seasons in less than a week. Consumers don't buy holiday goods in warm weather.

We have had our first sniff of winter, and in a very mild way, too. Now look out for the holiday trade. In this city, in all branches of industry and trade, there is a stiffness in prices and a tendency upward. Men of every handicraft are busy, and no good workers are idle upon compulsion. Employers say that applications for work are not frequent. Everybody is busy. Go on Third street, among the bankers, and they will tell you that the demand for money is wonderfully active. Look at the clearing-house exchanges for Cincinnati during the last week, and you will see the figures run up to nearly twenty-one millions. Go to the wharves, go to the freight depots, go to the ex-

press offices, go to the telegraph office, and you will see for yourself that there is a force at work that is making all sorts of human labor hum with the very velocity with which it moves. Take up the crop reports—cotton better than was expected; season good for gathering it; this coolish weather just the sort for curing tobacco; the crop failure from drought not so bad as reported; only corn affected by it; the drought in a region where wheat was the chief crop, and that not affected and good; in a bluegrass region and the blue grass fine.

My beloved grumbler, can you look upon all this and complain? The trouble is not with the times if there is any trouble. People have put off the time for buying, and they will come in later with a rush—that's the whole of it in a small nutshell. It's a fact, however, that in nearly all branches of retail business here there seems to be a temporary dullness. A few people can't see through a rail fence, and they scowl and complain. On the contrary, there is scarcely an exception to the testimony that the jobbing trade in all sorts of goods is extraordinarily good.

The stocks of Christmas stationery this season are large and very fine, especially in colored goods. Robert Clarke & Co. have a large assortment in all lines of these goods, and they form an exception to the rule in that they say that their retail trade is good and their jobbing extraordinary.

There is George Stevens' bazaar, one might call it, on Fourth street, aglow with color, astir with activity. He has a run now on translucent window pictures, and is pushing them with success.

Davy, in his admirable second-hand bookstore, has crowds to serve—scholars some of them—book-lovers all of them.

The Arcade booths are brilliant, and before many days will be busy.

Crosby, at his stand on Central avenue, and Alfred Warren, on the same avenue, are looking forward to a fine prospect.

All of the manufacturing stationers—Wilstack & Baldwin, A. H. Pounsford & Co., C. F. Bradley on Fourth, and the whole list on Walnut, below Fourth—are driving all their presses on full time. Collections are easy and confidence very full and strong. Fears for the future annoys no one. There is a belief that business will continue good.

It is worth mention for the benefit of Eastern manufacturers, that John Holland is sending

goods right within gun-shot of their shops. He has within the last few days received three immense orders from New York city, two from Boston, one from Brooklyn, two from Newark, N. J., two from Trenton, to say nothing of others from Bridgeport, Conn., New Haven, New Brunswick, Paterson, Philadelphia, and other places. All of these orders are large. From San Francisco he has just received an order for thirty-four dozen pens. All of his shop room is occupied, and he is working his hands day and night, and must have more room.

Biedinger & Selbert, paper dealers, burned out on the 12th inst., with a loss of about \$18,000; well insured.

The following-named trade visitors have been among us during the past week: Chadwick, of the United States Pencil Company, Springfield, Mass.; Hyman, of the Eagle Pencil Company, New York; Gunn, of Eberhard Faber, New York; Gamaliel H. Graves, of J. D. Whitmore & Co.; Spear, the "Document Box Man," New York; Beach, of the New York Blank-book Company, New York; Mr. Hano, of Boston.

Edward Sellers, of stationery fame, is now at the head of W. B. Carpenter's counting-room. He and his brother Fred, it seems, must work in double harness. Explanation: Fred has been at Carpenter's for a long time.

All grades of book and newspapers have advanced ¼ cent within the last week. This advance is on each manufacturer's former prices. There is no agreement to sell at any given rate per pound, but simply for each to add ¼ cent to his former prices. PRINCE WILLIAM.

Polished steel may be beautifully gilded by means of the ethereal solution of gold. Dissolve pure gold in aqua regia, evaporate gently to dryness so as to drive off the superfluous acid, redissolve in water, and add three times its bulk of sulphuric ether. Allow to stand for twenty-four hours in a stoppered bottle, and the ethereal solution of gold will float at top. Polished steel dipped in this is at once beautifully gilded; and by tracing patterns on the surface of the metal with any kind of varnish, beautiful devices in plain metal and gilt will be produced. For other metals the electric process is best.

You ought not to ask for any favors from fortune; all that you have a right to demand is that you shall, like a horse that is willing to do his share but not willing to pull the whole load, be put even on the whiffle-trees.

Being Triple Sized (a process entirely our own) and Loft Dried, can be erased and written upon the fifth time distinctly. None genuine without the water-mark and date, thus—Old Berkshire Mills Linen Ledger, 1881.

CARSON & BROWN CO., Manufacturers.

Extra Fine Papers

Manufactured by

Z. CRANE, JR., & BRO.,

DALTON, MASS., U.S.A.

These Papers, which are acknowledged to equal the finest foreign manufactures, are presented in the following styles and qualities:

REGULAR QUALITY.

In handsome Light Blue Packages containing one-quarter of a ream of Note Paper each, and bearing in blue letters description of contents.

In a separate Package of uniform size, is one-eighth of a thousand Envelopes corresponding in tint and quality to the paper.

EXTRA QUALITY.

In attractive Lavender Colored Boxes containing one-quarter ream of Extra Fine Paper each, with contents printed in red. Corresponding to this, in like Boxes, are Envelopes to match.

All this Stationery may be relied on to be according to representation. It is suited to the tastes of the most select trade.

In addition to the above lines, our other Specialties are put up with care, in attractive and substantial form. Goods can be seen at the Mill, or New York Office, 47 Beekman Street. GEO. B. HURD, Gen'l Agent.

SEASON 1881-1882.

SEASON 1881-1882.

L. PRANG & CO.'S

Christmas and New Year Cards

ANNOUNCEMENT.

WE hereby beg leave to announce to the trade the completion of our line of Christmas and New Year Cards for this season, for which our agents are now soliciting orders. The extent of our list, the originality, and especially the American character of our designs, together with the great care taken in their execution, will, we have no doubt, secure for our goods the popularity which they have enjoyed heretofore. The efforts we have made to secure the highest excellence, is attested by the names of some of the artists whose designs have been reproduced. We would only name Elihu Vedder, C. C. Coleman, Thomas Moran, Miss Rosina Emmett, Miss Dora Wheeler, Mrs. O. E. Whitney, W. H. Gibson, F. S. Church, R. G. Birch, &c. That a due regard has been paid for the quality of the literary matter, in connection with these designs, is shown by the fact that many of the designs are accompanied by original poems from writers of note, such as Mrs. Celia Thaxter and Mrs. Emily Shaw Forman.

The great increase of our manufacturing facilities, secured by additions to our building nearly doubling our floor space and by the adding of new machinery, will place us in a position to fill orders promptly. Still we would request dealers to place their orders as early as possible, so as to still further enable us to make timely preparation for prompt deliveries.

Our Cards will, as heretofore, be put up in envelopes containing twelve Cards, unless otherwise stated on our price lists.

We furnish envelopes without extra charge for all our Christmas and New Year Cards, for which the list price is \$1.80 per set, and over. Our silk-fringed Cards will no doubt be in great demand this season. We have made ample preparation to furnish these in time and have made arrangements with our manufacturers for the best quality of silk fringes. We would call special attention to the excellence of our fringed Cards and the novelties in colors and style of fringes we offer for this season.

A marked and attractive feature of our cards are the elegantly ornamented backs.

All our fringed Christmas and New Year Cards are furnished with envelopes and protectors, so as to insure safe transportation in the mails.

It will be impossible to embody our whole list in the space of the advertisement, and we will therefore merely give a general outline of the variety offered.

PRANG'S PRIZE CHRISTMAS CARDS. COMPETITION OF 1881.

These are the Cards selected by the judges in the second competition for four designs of Christmas Cards, for which we offered \$2,000 in prizes of \$1,000, \$500, \$300 and \$200 respectively. At the recommendation of the judges, Messrs. COLEMAN, LAFARGE, and WHITE, the prize for third best Card was increased to \$500. Mrs. CELIA THAXTER has written appropriate verses for each of the designs.

- 1st Prize Card (\$1,000), by Elihu Vedder. Size, $6\frac{1}{4} \times 9$ inches; price \$1 each. Same card with silk fringe, cord and tassels, price \$1.50 each.
- 2d Prize Card (\$500), by Miss Dora Wheeler. Size, 7×9 inches; price 75c. each. Same card with silk fringe, cord and tassels, price \$1.25 each.
- 3d Prize Card (\$500), by C. C. Coleman. Size, 7×9 inches; price 75c. each. Same card with silk fringe, cord and tassels, price \$1.25 each.
- 4th Prize Card (\$200), by Miss Rosina Emmett. Size, $5\frac{1}{4} \times 9\frac{1}{4}$ inches; price 60c. each. Same card with silk fringe, cord and tassels, price \$1 each.

The Prize Cards can also be had mounted on heavy board with gilt beveled edges.

We beg to call attention also to the following publications for New Year and Christmas:

- "Goddess Fortune" New Year Card, by Elihu Vedder. Size, $6\frac{1}{4} \times 8\frac{1}{4}$ inches; price 75c. each. Same card with silk fringe, cord and tassels, price \$1.25 each.
- "Christmas Dove." Size, $7 \times 9\frac{1}{4}$. This card is in the same style as the success of the last Easter season, the "Easter Dove" Price 60c. each. Same card with silk fringe, cord and tassels, price \$1 each.

Our Regular Line of Christmas Cards consists, among others, of the following Series:

- Nos. 901, 902, 903, 906, 909, 910. Floral designs ranging in price from 20c. to \$1.20 per set of 12.
- Nos. 904, 905. Humorous Cat and Frog Designs, 60c. per set.
- No. 907 is a new series of Horseshoe designs, 75c. per set.
- Nos. 920 and 929. Children's designs, at \$2.40 and \$3.60 per set.
- No. 922. Shells of Ocean, with figures, \$2.40 per set.
- No. 924. Fans with silk fringes, \$3 per set.
- No. 933. Bric-à-Brac designs, very rich, \$6 per set, and many others.

We offer a similar assortment of New Year Cards, but would call special attention to No. 1320, a new folding calendar, at \$2.40 per set. Most of the Numbers can be had with silk fringes ranging in price from \$2.25 to \$12 per set. Stock will be ready for delivery September 15.

Besides the above, attention is called to our New Birthday Cards, Scripture Texts Cards, New Panels, New Water Colors, by Thomas Moran, and other publications. Our line of Thanksgiving Day Cards will also be shown by our agents.

REGULAR DISCOUNT TO THE TRADE. PRICE LISTS AND CATALOGUES SENT ON APPLICATION.

Trade Novelties.

[We will be glad to receive samples of all novelties issued in the trade, and will notice all such which possess merit free of charge. It is desirable to accompany descriptions with cuts whenever possible.]

A NATURAL HISTORY TOY.

When a child can receive instruction through a toy or a game, it may be considered as just so much clear gain in the general education of the child, as the information is received without any effect or mental weariness, and is often much better retained than if imposed as a task.

words and short sentences are "set up" with the letters in the grooves as types are set up. The picture cards are so finely designed and printed that they form a very attractive set of picture cards, and the letters serve to impress the spelling of the words on the minds of the young compositors. The whole is beautiful as well as useful. This toy, although not of new design, has been completely revised and improved upon this year, and comes forward with a freshness and originality that will be recognized.

A NEW HISTORICAL PANORAMA.

Milton Bradley & Co. have for ten years published a panorama of the history of this country,

rithmic scales, each exceeding in length the length of graduated space on the rule, parts of such scales being laid off on successive parallel lines, and means for bringing the several parts of scales on slide and bars in position for direct comparison.

No. 249,146. Device for Imparting Motion to Toy Wind-Wheels.—Hermann W. F. Liebmann, Chicago, Ill., assignor of one-half to Hermann Rendtorff, same place.

No. 249,178. Printer's Cabinet.—Stephen S. Hoe, Tarrytown, N. Y.

A printer's cabinet, consisting of a frame-work filled with drawers that present a vertical front, above which a support is provided for working cases, the front portion of which pro-

Milton Bradley & Co., in their new toy, the Aquarium and Menagerie, have presented beautiful colored plates of thirty-seven animals and forty varieties of fish, arranged on a double panorama in a beautifully ornamented case on wheels, representing on one side a menagerie car, with wire bars, the pictures being at the

which has been one of the most popular items on their list; but the plates having become a little out of date, new ones, greatly enlarged and improved in design and execution, have been prepared, and, under the name of Historiscope Improved, the new toy embraces the most beautiful and valuable series of illus-

jects beyond the drawer fronts and their frame-work.

No. 249,181. Photographic Apparatus for Holding Dry Plates.—John H. Hubbard, Cambridge, Mass.

No. 249,198. Map and Chart Case.—Hiram E. Moon, Richmond, Ind.

The combination, in a map and chart case or

back of the cage, and on the other side an aquarium cage, with the pictures of fishes passing behind and close to a plate of glass. With a brief description of each of the animals, this toy becomes a fascinating and profitable amusement for any youngster.

THE LITTLE OBJECT TEACHER.

A beautiful polished walnut box, with bright chromo label in the styles of modern art, contains twenty object cards, with colored prints of animals and objects, together with a large number of letters cut up, all on heavy board. In the cover are grooves of suitable width, one to receive the object cards and two others to receive the letters. The names of the objects or other

trations of the history of this country ever printed, and the attractive lecture, poster, and tickets of admission combine to make the whole one of those novelties which come to stay, and will be as salable next year as this. The idea of a toy panorama was original with this house, its panorama of the rebellion being the first one ever put on the market. There have been many imitations, but lacking any historical or other educational value, they have been short-lived.

NEW PATENTS.

No. 249,117. Slide Rule.—Edwin Thacher, Pittsburg, Pa.

A slide rule having on both the slide and on the body or bars of the rule two or more loga-

cabinet, of a rear recessed frame, a pivoted front recessed frame secured thereto, and one or more intermediate independently pivoted and detachable leaves, having maps, charts, or slating upon their surfaces, adapted to fold into said recessed frames.

No. 249,216. Book Support.—George D. B. Adams, Zanesville, Ohio.

The combination of a case with pivotally attached standards provided with outwardly extending shoulders, and a base-board provided with slots in which said standards are pivotally secured.

No. 249,230. Pen Holder.—John Doyle, Hoboken, N. J., assignor of one-half to C. Coles Dusenbury, White Plains, N. Y.

Pressing down a leaf causes its cam to enter

the slot of the slide and bear against the latter, so as to project the pen beyond the guard when it is desired to use the pen. When pressure is removed from the leaf the spring retracts the slide and pen, so that the latter will lie within the point of the guard for protection.

No. 249,291. Perforating Machine.—Charles E. Bentley, New York, N. Y.

No. 249,338. Bill File.—John E. Gorman, Newark, N. J.

In a paper file, an adjustable sliding standard carrying the follower movable thereon, combined with a cam lever, to hold the standard at any desired point by frictional contact.

No. 249,347. Toy Trumpet.—Noah D. Hauver, New York, N. Y.

A mouth-piece for a trumpet or horn, formed of two elastic lips, with a paper tube that may serve as a wrapper for candies, &c., and adapted to be used as a trumpet.

DESIGNS.

No. 12,559. Font of Printing Type.—Herman Ihlenburg, Philadelphia, Pa., assignor to MacKellar, Smiths & Jordan, same place. Term of patent, 14 years.

Nos. 12,560 and 12,561. Font of Printing Type.—William W. Jackson, Philadelphia, Pa., assignor to MacKellar, Smiths & Jordan, same place. Term of patents, 14 years.

No. 12,565. Printing Type.—John K. Rogers, Brookline, Mass. Term of patent, 3½ years.

TRADE-MARKS.

No. 8,790. Metallic Pens.—Esterbrook Steel Pen Manufacturing Company, Camden, N. J.

"The figures and words, '130, R. Esterbrook & Co.'s Easy Writer.'"

No. 8,791. Metallic Pens.—Esterbrook Steel Pen Manufacturing Company, Camden, N. J.

"The figures and name, '161, R. Esterbrook & Co.'s,' used in connection with the word 'Engrossing.'"

No. 8,795. Medicated Paper for Water-Closet Use.—The Pond's Extract Company, New York, N. Y.
"A landscape and words, 'POND'S EXTRACT.'"

LAP DESK TABLET.

One of the handsomest new things is the Ladies' Lap Desk Tablet, manufactured by Baugh-

man Brothers, 78 Duane street. It is made in note, letter and cap sizes, of strong binder's board, and will not warp. The spring band extends entirely across the top, grasping the paper firmly but leaving no impression upon it, a fault usual in some other spring tablets. The

arrangement of the spring permits the upward movement of the paper, thus affording a constant rest to the hand to the bottom of the page while writing. This tablet is supplied with a sheet of best English blotting paper, an ornate design embellishing the centre of the sheet. It is handsomely trimmed in cloth, leather, Russia, and silk plush.

The German Crown Prince and Crown Princess made the Crown Princess Victoria of Sweden, on the occasion of her late marriage, a present which is said to be a marvel of artistic taste. It is a fan, on the front of which the German artist Doepler painted two allegorical female figures, the one representing Baden and the other Sweden. The first figure contemplates mournfully her native country, the Grand Duchy of Baden, represented by a view of Heidelberg; while the other proudly points to Stockholm, the new residence of the bride; while Heidelberg appears to vanish in the dim twilight, Stockholm appears in all the splendor of spring light. On the reverse side of the fan are the arms of Baden and Sweden and the interwoven monograms of the couple. The ivory handle shows on the front plate the name "Victoria" in rubies, and at its foot gold ornamentation in the style of Augsburg jewelry work of the seventeenth century. At the top of the front piece there are to be found a few verses by Victor von Scheffel, to about the following effect:

"Sweden's strength and Baden's grace"
United by marriage;
Have happily solved
Many old quarrels."

the original German being:

"Schweden's Kraft und Baden's Zier,
Minniglich verbunden,
Manch ein alter Zwist hat hier
Fröhlich End' gefunden."

No. 10 Murray Street, New York.

THE BAY STATE PAPER COMPANY, HOLYOKE, MASS.,

were among the pioneers in the W. C. Paper trade and their goods, from the start, were distinguished for their fine quality and the superior style in which they were wrapped. Their example has been approved and imitated by a swarm of competitors, who have flooded the market with inferior goods, put up in packages of 600 to 800 sheets, misleading the unwary, and sold at apparently lower figures; but the trade and consumers generally recognize the fact that a good article, honestly put up, in 1,000 sheet packages, is the most profitable both for use and for sale. Their goods are all guaranteed 1,000 sheets to package, and no short count. No wood is used in any of these papers, but they are made of the very best stock in the market.

THE "MEDICATED BOUDOIR" BRAND

Has no equal for weight, strength, softness, and color, and commands the front place with "fine retail trade." Present reduced quotations furnished on application.

TWO WORKS

OF

Great Value

TO

STATIONERS.

The Stationers' Price Book and Illustrated and Descriptive Catalogue, . . . \$2.00

Lockwood's Directory of the Paper Trade, . . . \$2.00

EVERY STATIONER wants the above Works for the

FOLLOWING REASONS:

The Price Book and Catalogue furnishes Stationers information which, if they have at all, is usually scattered and never right at hand when wanted. As a book of immediate reference it will be found invaluable.

The Directory of Paper Manufacturers and Jobbers is a guide to First Hands in the Paper Trade. Any one who uses it intelligently can save many times its cost at once.

THE PRICE BOOK is deliverable in the cities of New York, Boston, Philadelphia, Chicago, Detroit and St. Louis, where purchasers can have it packed with any goods they may be buying.

THE DIRECTORY is sent post-paid.

All Stationers who wish to keep ABREAST WITH THE TIMES, must own these two books.

C. B. EATON & CO., 505 Main St.

BAUGHMAN'S Ladies' Lap Desk Tablet.

(Spring Band, Patented July 12, 1881.)

The Patent Spring Band extends across the entire width of the Tablet, holding the paper firmly without leaving an impression, a fault so marked in all other spring tablets.

The arrangement of the Spring Band permits the adjustment of the paper upward, so as to afford a constant rest for the hand.

They are neatly trimmed with Cloth, Russia, Calf, and Silk Plush, and furnished with Superior Blotting Paper, and being made of strong Binders' Board, will not warp.

MANUFACTURED BY

Send for Catalogue and Price List.

No. 23 MAIDEN LANE, NEW YORK.

Trade Gossip.

All new goods and designs which are not, strictly speaking, "Novelties" will be noticed under this head. The trade are requested to forward descriptions with samples in order to secure proper notice.

The Stockton Publishing Company, Stockton, Cal., has sold out.

Swope & Lent, printers, Portland, Oregon, have dissolved partnership.

George W. Mead, newsdealer, &c., St. Louis, Mo., has sold out to Fred. C. Norris.

R. B. Miller, bookseller and stationer, Stewardson, Ill., has made an assignment.

The stock of William T. Soule, dealer in fancy goods, New Bedford, Mass., has been attached.

E. H. Lewis & Co., bookseller and stationer, Aberdeen, Miss., have been closed up by attachment.

George T. Barker, dealer in fancy goods, Hudson, Mass., has removed to Amesbury, same State.

Smith & Mayo, publishers of the *Somerset Reporter*, Skowhegan, Me., have been burned out. Insured.

Samuel A. Hoskins, bookseller and stationer, Sioux City, Iowa, has been succeeded by Humphries & Lawrence.

Bamberger, Hanley & Co., wholesale dealers in notions, Salt Lake City, Utah, have dissolved partnership. Bamberger & Co. succeed.

Henry Levy & Son, 477 Broadway, have received several new specialties for the holiday trade, and report that the season's business has been excellent.

A. & E. Wallach have many rare articles yet on hand, which will be sold at a great sacrifice, and the trade might find it to their advantage to call and see them.

William Pedrick, representing Chas. H. Sherman & Co., Philadelphia, has been traveling through this State, and at last accounts was at Troy, where he says that he was very well received by the trade.

P. Phillips & Co., wholesale dealers in fancy goods at New Orleans, are offering to compromise at 50 cents on the dollar. They recently asked an extension, stating their liabilities to be \$12,000 and their nominal assets \$18,000. Poor collections precipitated their failure.

E. & H. T. Anthony & Co. have added several new subjects to their elegant line of transparencies, and have introduced several new designs in gold frames. The firm's exquisite line of hand-painted porcelain plaques in plush and brocade frames, is meeting with much approval.

Obpacher Brothers have this week placed on the market an elegant publication, in the shape of a Christmas card. It is 14x16 inches in size, is beautifully illuminated with birds, flowers and trees, and is richly embellished with fanciful silk cards, fringe and balls. It is intended for suspension from an easel or against a wall, and each one comes in a box.

J. H. Bufford's Sons show this week some new and attractive goods. They are called tablets, and are card-like in form, with a movable rest at the back, to keep them in an upright position. They are covered with either metal or satin, and are illuminated with elegant paintings. Those in satin come both in flat and cushion shape. All of the styles are intended for mantel and piano decorations.

The Pequonock Paper Company, of Bridgeport, Conn., has become involved in difficulty. The company was formerly owned by Wm. H. Parsons & Co., of New York, and W. K. Seeley, of Bridgeport, who sold out in November, 1879, to Page & Hosford, of Bridgeport, I. B. Hosford subsequently withdrawing. The company had a capital stock of \$60,000, of which \$36,000 was paid in. At the instance of I. B. Hosford, a former partner in the business, and several of the smaller local creditors, attachments were placed upon its stock and other assets. A meeting of the creditors was held at Bridgeport on Wednesday of last week to decide what action to take. A number of the larger creditors attended or were represented, but as there seemed to be no unanimity of opinion except as to the first step, an assignment, nothing was done. A statement showed the liabilities to be \$72,963.97, subject to a contingent deduction of about \$4,000. Of the nominal assets \$2,828.63 are put down as the value of the stock and other raw material, \$1,514.78 debts due the concern on open account, and the mill property nominally valued at \$75,000. Among the creditors are I. B. Hosford, \$5,000; C. F. Hardy & Co., \$10,000; Dickinson & Co., \$2,300; Dickinson & Grilley, \$1,300; John L. Taylor, \$1,211; Butterworth & Smalley, \$1,091; Sergeant Brothers, \$2,000; Train, Smith & Co., \$400; H. C. Hulbert & Co., about \$350; Deane Pump Company, \$900; Atterbury Brothers, J. W. Lyon & Co., and D. Ullman, of Buffalo. The mill property is said to be mortgaged for \$24,000. Some of the creditors think that there is a chance for the payment of only a very small dividend.

A meeting of the creditors of W. G. Anderson, manufacturing stationer, was held on Friday afternoon, at the Stationers' Board of Trade, Willy Wallach presided. After the usual routine business Mr. Anderson made the statement that, owing to the failure of J. H. Van Kirk & Co., he was embarrassed and wished to consult his creditors as to the best course to pursue in relation thereto. He was advised to make an assignment, so that all of his creditors might fare alike. Henry Seibert was suggested as assignee, which was agreed to. On Saturday a general assignment was made to Mr. Seibert, who will continue the business for ninety days under the supervision of a committee of creditors, who are to make a report to the creditors in January. This committee consists of Willy Wallach, W. I. Martin, and W. G. Donaldson. The following preferences are made: Abel Crooke, \$500; Ferdinand Mayer, \$3,000; Henry Seibert & Brother, \$436; Minnie J. Anderson, \$847; William Brown, \$250; Charles E. Johnson, \$250; James McCall, \$145; R. Roberts, \$436; L. S. Lawrence, \$464—a total of \$6,629. The liabilities are \$34,217.63, and the nominal assets \$22,654.38.

The "Perfection" student lamp offered by R. G. Hutchinson is meeting with a large sale. It has recently been improved with a new burner, which yields a powerful, soft, white light, and this, with the inclosed transparent oil reservoir, renders it a most desirable article. An illustrated circular and price list can be had on application.

McCarty & Hasberg are very busy, and, it is said, are giving great bargains to purchasers. The trade ought to avail themselves of this opportunity to secure cheap yet elegant goods.

Iwan Von Auw, of Liebenroth, Von Auw & Co., will sail from Havre for this city on December 10.

The stock of Ogden Brothers, paper bag manufacturers, Nashville, Tenn., has been attached.

Elliott & Moore, lithographers, San Francisco, Cal., have dissolved partnership.

F. H. Allen, fancy goods dealer, Marlboro, Mass., has sold out to C. H. Caldwell.

Carrie J. Daniels, dealer in periodicals, &c., Boston, Mass., has sold out to S. W. Sandford.

McPhail & Son, booksellers and stationers, Santa Barbara, Cal., have dissolved partnership.

D. E. Caldwell, publisher of the *Post-Appeal*, Atlanta, Ga., has sold out to Marcellus E. Thornton.

Barnea & Bigelow, bookbinders, New York city, have dissolved partnership. James N. Barnea continues.

D. Tomkins has just returned from a trip in the West for Leroy W. Fairchild, and reports having met with a successful trade.

Lind, Axel & Co., wholesale dealers in notions, Kansas City, have dissolved partnership. Axel & H. Lind continue under same style.

Ralph Trautmann has this week placed on the market an excellent steel engraving of William Cullen Bryant. It is 19 by 22 inches in size, is a faithful likeness, and is elaborately executed.

E. C. Lock & Co., Philadelphia, have just received by steamer a large invoice of gold and silver embossed and plain paper of the finest quality, the demand for which is very large at this time of the year.

Macauley Brothers, Detroit, have sent THE STATIONER an invitation to their opening of Christmas novelties. The invitation is neatly printed in script on a sheet having tasteful lithographed designs on the head and on the folding flap.

E. P. Coby & Co. have been obliged to increase their force and facilities, chiefly because they are now printing the *Sanitary Engineer* weekly, instead of semi-monthly, as heretofore. Their commercial work has been so pressing upon them, that they have been working at night lately.

Francis M. Eppley, the assignee of J. H. Van Kirk & Co., New York, has issued a notice calling a meeting of the creditors to be held at the Stationers' Board of Trade on Tuesday morning, December 6, at 11 o'clock, when he will have a full statement and schedule of liabilities and assets to present for the action of the creditors.

The recent purchase of the New York *Evening Express* by Cyrus W. Field, carries with it a valuable franchise, that of membership in the Associated Press, and the *Evening Mail* being merged with it, gives the right of publishing both a morning and afternoon paper, and having the Associated Press news. The consideration paid for the *Express* is said to have been \$250,000. Its new name will be the *Mail-Express*.

Among the visiting members of the trade to the city during the past week were J. A. Storer, Richfield Springs, N. Y.; S. C. Bigford, Toronto, Can.; John C. Dolan, Mauch Chunk, Pa.; J. B. Flagler, of Flagler & Co., Poughkeepsie; E. A. Emerson, Lynchburgh, Va.; H. K. Vierlinger, of Youse & Cohen, Baltimore, Md.; A. L. Lovejoy, Boston; Mr. Pratt, J. L. Fairbanks & Co., Boston; George Short, of Short & Forman, Cleveland, Ohio; A. K. Le Fever, Cambridgeborough, Pa.; C. S. Morris, Garland, Pa.; Mr. Hollenback, of Hollenback & Ford, Oakhill, N. Y.; Frank J. Smith, of Frank Smith & Sons, Collinsville, Conn.; Mr. McCutcheon, of McCutcheon & Bassett, Peekskill, N. Y.; F. E. Andrews, Winsted, Conn.;

Mr. Sanford, of Sanford & Co., Worcester, Mass., and Mr. Halcott, Catskill, N. Y.

Solomon Weinberg, dealer in notions, Philadelphia, Pa., is dead.

Mrs. Hand, publisher of the *Mountaineer*, The Dalles, Oregon, has sold out.

Sage & Goodrich, publishers, Cedar Rapids, Iowa, have dissolved partnership.

Henry Herweck, dealer in notions, St. Louis, Mo., has sold out to E. H. Hensing.

R. Bogisch, publisher of the *Dodge County Pioneer*, Mayville, Wis., has been burned out.

John W. Freeman, dealer in paper bags, Todmorden, Ont., is reported to have left that town.

W. H. Ransford, bookseller and stationer, Clinton, Ont., Canada, has been succeeded by C. Dickson.

The attention of the trade is called to the new folding cards of Potsdamer & Co., which are said to be the best of the kind ever made.

Thos. L. Marshall, stationer, Philadelphia, has failed. He made an assignment on November 22.

It is said that the J. J. Parson's Bookbinding Company, New York, will not pay its creditors a dividend of more than ten per cent.

George G. McLean, of the Dixon Crucible Company, was in the city this week, and reports that Dixon's pencils are still "booming."

A. Weidmann & Co. are now exceedingly busy with the city and country trade, and are working late at night to fill their orders in time.

I. H. Hamburger has now ready his samples for Easter and Valentine cards; and has, besides, an elegant line of imported valentines in boxes.

The Artistic Papeterie and Complimentary Card Company is the name of a new retail stationery firm which has opened at 80 Nassau street. T. Roberts is manager.

The Warrington steel pens, which have been such favorites on the market, are having this year a larger sale than ever. The greatest trouble of their manufacturer is to keep up with orders.

Wiltshire & Clement, engravers, 73 Nassau street, make a fine display of papeteries, Christmas and New Year cards, and are busy on orders from the trade for wedding, visiting cards, &c.

Homer P. Beach, for many years with the American News Company, and of late traveling representative for the New York Blank Book Company, has resigned his position with the latter named concern.

Lockwood, Brooks & Co., Boston, have published the American Poets' Calendar for 1882. This is a daily pad calendar affixed to a chromolithographed card, and having quotations from famous American writers for every day in the year.

Brown & Sanson have bought out a line of New Year cards in ten very pretty designs. They are gilt, bevel, shaped in the form of a palette, hand painted, with "forget me nots," "daisies," "holly," "lilies of the valley" and other flowers.

Hard & Parsons' travelers are all, at present, at head-quarters, and they report having had a very satisfactory business during the season. The firm is now taxing its manufacturing facilities to the utmost to fill the orders in time. It is also actively engaged on new goods for the spring trade, and it promises that this line will be highly appreciated when samples are shown.

Charles Beck, Philadelphia, has just received a very large invoice of the new patent marble paper, which is in great demand. This paper is made by machinery, which renders it very even, and, it is asserted, much superior to any hitherto produced, and on that account meets with a ready sale.

Russell, Morgan & Co., Cincinnati, are manufacturing the "United States" playing cards, all indexed and round cornered, each pack being put up in a box. Victor E. Mauger has taken the general agency for these cards, and his sales have been so large that he is only taking orders now for February delivery. The present price list comprises seven numbers, varying from \$24 to \$108 per gross. The cheap cards have a smooth, glazed surface and are as good as any sold at \$30, having a better finish, and retail at 25 cents. Each pack has a "joker," which is of special design for each grade. The numbers, designations and descriptions are as follows: 101, Tigers, steamboat quality, assorted plaid and star backs, paper boxes; 202, Sportsman's, Harry quality, enameled, high finish, assorted backs, paper boxes; 303, Army and Navy,

Mogul quality, all linen, assorted fancy backs, double enameled, highest finish, cloth boxes; 404, Congress, Great Mogul quality, double enameled, fancy full colored backs, in gold and silver, cloth boxes; 505, Extra Army and Navy, gilt edges, all linen, double enameled, cloth boxes; 606, Extra Congress, gilt edges, double enameled, gold and silver backs, cloth boxes.

William Mann, Philadelphia, is having great success with the sale of fancy articles for the stationery trade. His selection is large and chosen with good taste. His copying books are having a larger sale than at any previous time.

The Parmenter Crayon Company, Waltham, Mass., has issued a price list of its crayons and chalks.

Iron has sometimes to be bronzed for domestic use. The following is a very simple way of obtaining a very good bronze: Mix an equal quantity of butter of antimony and oil of olives; put this mixture on the iron which is required to be bronzed with a brush, the iron having been previously brightened with emery and cloth, and leave it for several hours. Then rub with wax and varnish with copal.

THE STATIONER.

DEVOTED TO THE INTERESTS OF THE

Stationery and Fancy Goods Trades.

WEEKLY--\$2.00 PER ANNUM.

Single Copies - - - 10 Cents.

NEW YORK, THURSDAY, DECEMBER 1, 1881.

Advertisements cannot be received for insertion in the current week later than 12 m. on Wednesday. The charge for advertising is 25 cents a line, each insertion. Special terms for standing and displayed advertisements to be had on application.

This journal aims to be a medium of information for and a representative of the interests of every one connected with the stationery and fancy goods trades. It contains a full and trustworthy survey of the market for stationery in this country, in all cases giving the actual prices at which goods can be bought of importers and jobbers in this city, together with a detailed account of novelties in the trade, patents relating to stationery, and current items of interest. A review of foreign markets and accounts of movements abroad will also be furnished, and no pains will be spared to make THE STATIONER a thorough and complete exponent of the trade.

Subscription and postage for Great Britain, per annum..... 12s.

Any information our readers may wish to obtain shall be cheerfully given, and prompt replies will be made to all inquiries addressed to us on any subjects of interest to the trade.

Communications on all trade matters are earnestly solicited. Address

Subscribers to THE STATIONER can be supplied with the best cloth binder in the market. Deliverable at the publication office. Price, fifty cents.

Readers of this paper who avail themselves of the information obtained from its columns, by advertisement or otherwise, are requested to notify their correspondents of the source of their information.

THE Tariff Convention, which has been in session in New York, discussed the revision of the tariff and the abolition of internal revenue taxes. We have not the space to present a report of the proceedings and discussions, but we lay before our readers the suggestions of some of our leading printers and manufacturers of book-making materials which were offered for the consideration of the convention.

It seems to be generally conceded that we have need of a good national bankrupt law. Several trade organizations and representatives of our most important commercial interests held a meeting in this city this week, and resolved to support the bill proposed by Judge Lowell. The difficulties attendant upon insolvency proceedings under different State enactments have fully impressed upon the business community this necessity. The great danger is the fraudulent advantage which may be taken of such a law, but this objection has been encountered, and we are sure has been seriously felt under the insolvent laws of the various States. The law must be rigid, with a capacity for mercy, serve to punish and defeat the dishonest debtor, yet a safeguard and aid to the honest victim of untoward circumstances.

THE tariff meeting was strong in its representation of leading industries and students of economic measures. Although it has been sought to charge the advocates of protection to home industry with the intention of opposing any effort at tariff modification, it is plain that such a charge will not stand. Certainly, there are extremes to which they cannot be induced to go, but it is certain that they are not averse to a fair consideration of propositions for amending the tariff and for reconciling its incongruities. It is also plain, that the appointment of a fairly constituted commission for this purpose will not be opposed. The proposition for the modification, if not total abolition of internal revenue taxation is something for public thought. It is yet open to question how far such modification should go.

OUR Consul at Leeds, England, has been considering the future of British trade, and has reached conclusions which are favorable to this country. While we do not rejoice in the prospective decline of England's manufacturing and commercial strength, we cannot but derive satisfaction from the thought that this country is to profit to the extent of sharing in the widespread trade which she has dominated, but is destined not to control so absolutely as heretofore. Among the deductions which our Consul makes from the present situation in England are a greater depression in trade in that country, a larger emigration, and a more fully developed "fair trade" agitation than has yet been had. If his conclusions are correct, the "leveling up" in the distribution of manufactured products must

follow, and we shall as surely profit thereby. But of nothing does there seem to us to be more certainty than the growth and final triumph of a "fair trade," or, in other words, a general protective policy as a means of salvation to British industries. Great Britain now has a tariff which brings in nearly one hundred millions of dollars annual revenue, and this all the while that she claims to be a free trade country. This claim, therefore, is to that extent disingenuous, and the talk of free trade has been made to overshadow the fact. But, returning to the "fair trade" agitation, we find that the Consul does not think that it will accomplish anything of permanent good for the reason that the evil that has been done is irremediable. As we have said, we do not rejoice at the commercial decadence of England, but at the same time are of one accord with the Consul who says that, while he regrets the prospect, he takes "consolation in the knowledge that American commercial interests are destined to be inversely affected."

ANSWERS TO CORRESPONDENTS.

R. & Co. ask: 1. For address of Ossawan Mills or other manufacturers of picture cord; 2. Who makes a leading thing of Perry's London specialties?

Ans.—1. Ossawan Mills (Jas. E. Vail, Jr., 71 Worth street, New York, manufacturer's agent), Norwich, Conn.; Palmer & Allien (same agent), manufacturers of covered wire cord, Middletown, Conn.; Horsman Brothers, Columbia Mills, Philadelphia; Geo. Magnus, 94 Fulton street, New York. 2. Perry's specialties are not much dealt in, except pens, of which Iverson, Blakeman, Taylor & Co., New York, have the control.

N. H. & Co. want to know who makes Thomas H. Taylor's patent transfer copying process paper; sample shown.

Ans.—We cannot find that the sample submitted is known to the trade under Mr. Taylor's name. It seems to be a foreign-made paper, and, as claimed, of Japanese origin. It certainly resembles a bamboo paper. Similar paper can be had of the Japanese Manufacturing and Trading Company, 865 Broadway, and of B. Lawrence & Co., Henry Bainbridge & Co., Willy Wallach, and of other large jobbing stationers.

A treasure-trove of great value, and not a little historical interest, is reported from Niedersteinbrunn in Alsace. An earthenware jar has been dug up on the site of an old house, containing about 4,000 gold coins of the aggregate weight of nearly 20 pounds. They are all of the same mintage, bearing dates from 1617 to 1623. On one side is the effigy of a double eagle, with the name of Berchtold V., Duke of Zähringen, founder of the city of Berne, and also of Freiburg-im-Breisgau. On the reverse are the arms of Berne, a bear on a mown field.

The ingenuity of mankind in the manufacture of stamps has displayed itself in 6,000 different kinds. The museum at Berlin contains 5,000 specimens, half of which have a European origin. Among the many kinds of decoration which have been used on stamps are coats-of-arms, stars, eagles, lions, the effigies of five emperors, eighteen kings, three queens, one grand duke, several titled rulers of less rank, and many presidents.

OBITUARY.

TRACY R. EDSON.

Tracy R. Edson, founder of the American Bank Note Company, died at his residence, 16 East Seventeenth street, this city, on Tuesday morning. He had been confined to his house by illness for some two weeks, the cause of death being a fatty degeneration of the heart. Mr. Edson was born in Cooperstown, this State, December 12, 1809, and in that town he received a common school education. After leaving school he was for a time engaged in commercial life, and then went to Albany, where, with the firm of Rawdon, Clark & Co., he learned the business of engraving. He came to this city in 1827, and became connected with the then leading firm in the engraving business, Rawdon, Wright, Hatch & Smillie. He remained with the firm for a number of years, and when it was decided to establish a branch of its house in New Orleans he was called upon to superintend it. So successful was he in its establishment and conduct that he was also employed to establish branch houses in Cincinnati, Boston and Philadelphia. It was while these branches were being established that the firm became financially embarrassed, and a failure seemed absolutely certain. Mr. Edson was called to New York, and Mr. Smillie retiring, he became a member of the firm, whose name was changed to Rawdon, Wright, Hatch & Edson. His management averted the impending catastrophe, and in the end brought fortunes of very considerable proportions to his partners. Competition at this time became very sharp and profits small, and Mr. Edson called together the representatives of the then existing engraving firms—Rawdon, Wright, Hatch & Edson; Tappan, Carpenter, Casilier & Co.; Danforth, Wright & Co.; Bald, Cousland & Co.; and Jocelyn, Draper, Welch & Co.—and explained to them the advantages of a combination. So feasible were his plans, and so thoroughly business-like in their methods, that they were adopted, and in 1858 the American Bank Note Engraving Company sprang into existence. In the following year a rival, which had appeared in the firm of Ed-

monds, Jones & Smillie, was absorbed. Charles Tappan, of Philadelphia, was the first president of the concern, and Mr. Edson was a director and the leading spirit in the management. He was elected president on the retirement of Mr. Tappan, holding the position for three years, and it was through his efforts that the large contracts with the government were secured. When he retired from the presidency he retained an active interest in the management of the concern until about six years ago, and only retired from its directory about three years ago.

Later in life Mr. Edson branched out in other directions, paying especial attention to improvements in telegraphy and kindred enterprises in which electricity figured as the important factor. He obtained control of the old Manhattan Telegraph Company, and was the prime mover in the organization of the Gold and Stock Telegraph Company, of which he was, next to the Western Union Telegraph Company, the largest stockholder. Up to the time of his death he was a director in the company and active in the management of its affairs. He was one of the original stockholders and directors of the American Speaking Telephone Company, and it was through a plan of his that the Metropolitan Telegraph and Telephone Company was organized, he representing in its directory and management the interest of the Gold and Stock Telegraph Company. When celluloid was first brought to public attention, Mr. Edson became interested in it, saw a fortune in its manufacture, extended aid to its inventor, and organized the Celluloid Manufacturing Company, of which he was president and a director at the time of his death.

INDIA INK.

The difference between a good and an inferior India ink lies chiefly in the extent to which the lampblack, which is the coloring matter, forms with the water a chemical solution rather than a mechanical mixture. In inferior ink the lampblack is more or less held in suspension, and, by long exposure to the air, will separate, so that, on being spread, the solid particles will aggregate by themselves and the water by itself.

Usually india ink can only be tested by actual trial, but, since it is desirable to test before purchasing it, it may be mentioned that one method is to mix a little on the finger-nail, and, if it has a "bronzy" gloss, it is a good indication. It should also spread out and dry without any tendency to separate. The best method of testing that has come to our knowledge is to mix a very little and drop a single drop in a tumbler of clear water. The best ink will diffuse itself over the surface, and if the water is disturbed will diffuse itself through the water, leaving it translucent and black, with a very slight tinge of bronze color. A coarser ink will act in a similar manner, but make the water somewhat opaque, with a blue-black or dull ashy color. A still coarser ink will, when diffused over the surface of the water, show fine specks, like black dust, on the surface. This is readily apparent, showing that the mixture of the ink is not homogeneous. Our readers will find this test gives the characteristics named in so marked a degree as to leave no uncertainty in the matter.

It has been very difficult to get lampblack, which is the coloring matter of true india ink, to mix with water and remain so when exposed to air. On account of this difficulty some have tried ivory black—that is, ivory charred and ground—but this cannot be reduced fine enough, which more than offsets its facility of mixing with water and comparative freedom from pre-

cipitation. Encyclopedias state that india ink is lampblack in combination with some kind of a size, or glue, and some include vegetable juices of one kind or another; but this is certainly not the case, and there is little doubt that it is produced by the combustion of camphor, a gelatine of some kind being added. On exposure to the air the gelatine decomposes, producing an acid which causes the lampblack to deposit.

The main point in a liquid ink is to get a size that will not decompose with ordinary exposure. To prevent this, some have added antiseptics of some kind, but very few are of much avail for this purpose or for preventing precipitation, or the size from coagulating. To prevent coagulating or thickening, a solvent, like acetic acid, is used, this being one of the best for gelatine and one that will not readily decompose, but is objectionable because it has a corrosive action on the drawing pens, and acid is chemically antagonistic, as is proved by deposition in the bottles. This renders necessary the direction on the label to shake the bottle before using—a precaution that is not required with a perfect and homogeneous liquid ink.

Great works are performed, not by strength but by perseverance.

Market Review.

OFFICE OF THE AMERICAN STATIONER, {
WEDNESDAY, November 30, 1881. }

THE MONEY MARKET.—The money market has been somewhat irregular during the past week, at times being tight, and on occasions was positively stringent. At the close it alternated between a steady and a stringent tone, commissions of 1-64@1-16 of 1 per cent. per day in addition to 6 cent. per annum being asked on call loans. Holders of government bonds were accommodated at 3¼@4¼ per cent. Time loans and prime mercantile discounts are nominally unchanged. The stock market has for the most part shown a strong tone, the intervals of weakness having been the result of extreme rates charged for temporary loans. Government bonds are strong and the "extended" fives have advanced. All the issues are in small supply, while the demand continues active. Railway bonds are generally quiet, and prices have been subject to no appreciable change. Foreign exchange is a shade firmer and more active.

THE PAPER MARKET.—As is usual near the close of a month, new business with the jobbing trade has been rather quiet this week, but most manufacturers continue fairly engaged on old orders, and have very little to complain of. In the straw wrapping trade, under the influence of an increased production, the market has lost much of the strength it has held for the past three or four months, and prices have declined. Manufacturers, in some instances, after stocking up the commission dealers pretty fully, are offering paper directly to consumers and the small jobbing trade at the same prices asked of the large buyer. Light weight paper is now selling generally on the basis of 35 cents for ten pounds, and heavy weight at 3 to 3¼ cents.

THE STATIONERY MARKET.—Although there was an interruption to business on Thursday, owing to its being Thanksgiving Day, buyers have been coming in each day since, and trade has been very active in nearly all branches of the stationery interest. Dealers in Christmas and New Year cards, albums, gold pens and pencils, and other holiday goods, have been very much driven to complete their orders, and some in these lines find themselves very short of stock, and must necessarily lose considerable business which they might otherwise have had. The fancy goods lines are pretty well sold out, and many of the dealers will close out the remainder of their stocks at retail. The toy trade is doing an unprecedented large business, and bids fair to outdo any former season, both in the variety of the goods and the amount of sales. Staples hold to firm prices, and no further changes are to be noted.

THE DUTY ON BOOKS AND BOOK-MAKING MATERIAL.

The Tariff Convention, which has been in session in this city during the past two days, has had under discussion many questions of economic interest, and among the points submitted for consideration were the following suggestions of the Book Trade Association of Philadelphia and of the Type Founders' Association of the United States.

The representatives of the Book Trade Association of Philadelphia and of the Type Founders' Association of the United States beg leave to make to the convention the following suggestions, mainly of a practical nature, and of especial importance to those industries with which they are themselves connected.

The duties at present levied on the imports of printing-paper, books, type, stereotype and electrotype plates, would be entirely satisfactory to the American producers of those articles, could those duties always be honestly levied and collected. On the contrary, however, their experience with these commodities goes far to prove the soundness of the judgment of all the leading advocates of protective duties, both in the past and the present, that all duties should, so far as it is possible, be specific instead of ad valorem, which latter form so large a portion of our present tariff.

There are few things the actual value of which it is so difficult to fix as a book, there being so many different books, and so many editions of many books, with such varying rates of discount for each book, and thus no uniform market price for any, and the value to the producer so different from that when in the hands of a *bona fide* purchaser. This condition of things gives a great and manifest advantage at the custom-house to the English publisher having an agency in this country, who pays a much lower duty on books of equal value than the American bookseller who buys in England. They are well satisfied that the duty on all books should be levied by the pound, but if this cannot be obtained, then that all books costing under a certain price per pound should, in addition to the ordinary ad valorem duty, pay a specific duty by the pound. This would let in fine and valuable books not reproduced in this country at moderate rates, and keep out many cheap and poor ones, which at present overwhelm the American market, and crush out domestic competition. Such a provision of combined ad valorem and specific duties would tend to restore to the American paper maker, type founder, stereotyper, electrotyper, wood engraver, printer, bookbinder and publisher the trade in many cheap books—small bibles and prayer books, for instance—which of late has been almost wholly transferred to Great Britain.

In the importation of type, electrotypes of wood-cuts and stereotype plates of books, great and glaring frauds are now perpetrated by means of the ad valorem duties levied on these articles. Type is invoiced at prices far below what is actually paid for them, and without regard to the cost of the machinery which is necessary to produce them. Electrotypes are invoiced at the mere cost of the electrotypes themselves, and without regard to the cost of the wood-cuts from which they are produced; and stereotype plates without regard to the cost of the setting of the type, but merely to the cost of the plates themselves. For the cost and use of the original cuts and the type-setting, and sometimes for copyright on the original drawings and books, the American purchaser of English electrotypes and stereotype plates is obliged

to pay. By means of false invoices, however, under a system of ad valorem duties, these legitimate and necessary items of cost are avoided at the custom house. Duties on type should be levied by the pound, and those on the electro-types of wood-cuts and stereotypes of book or other printed matter by the square inch, the manner and form in which they are largely, if not wholly, bought and sold.

HAKE'S EASTER OFFERINGS.

The elegant line of Easter offerings just issued by this house comprises twenty-five varieties. The artistic skill displayed in their manufacture is worthy of special mention.

No. 70.—A white satin sachet, heavily corded, with a humming-bird rising from a nest of swan-down, with verses on the inside.

No. 71.—A satin cross, beautifully painted with Passion flowers, and the word "Easter," white chenille around the entire cross, making it one of the prettiest of the line.

No. 72.—A standing panel, the centre of embroidery, an Easter design on white satin, surrounded with the same puffed, corded and fringed.

No. 73.—A white satin cross, especially adapted to the decoration of churches. It stands about two and a half feet, and is finely painted with appropriate flowers. The cross has a white dove on the top, with wings extended. The design is probably the most elaborate article ever manufactured for Easter.

No. 74.—Standing panel of puffed satin, with cord and fringe; the centre, a satin picture of various designs.

No. 75.—A four-sided folding card, with painted flowers on each. Verses in the centre, while "Easter" from engraved plate appears on the front, outside.

No. 76.—An "Easter Star" of white satin, four corners being painted, and the centre with verses on the satin.

No. 77.—Double-hinged beveled card, with satin ribbons; the left painted, the right with Easter verses. "Easter" on outside.

No. 78.—Satin fan, with chenille around edge. A painted card across centre and white tassels, with bow at bottom.

No. 79.—Satin sachet, in book form, fringed on all sides. The front has a pretty oval Easter card sunk in the centre of swan-down; inside, "Easter" and verses.

No. 80.—Square shape sachet, similar to No. 79.

No. 81.—Same, with the exception of the front being ornamented with Easter nest.

No. 82. The Easter nest. Three eggs reposing in the centre of a nest of swan-down; backed with satin card fringed, with verses.

No. 83.—Card of a child bursting from egg, and reposing in the nest of swan-down.

No. 84.—Large round satin panel, with ornament of fancy milk-weed in centre, painting around the edge and verses on back, with cord to hang on wall.

No. 85.—Elegant satin sachet, with heavy cord and loops at corners; cross of silk, "Bonbons" on front. Verses and word "Easter" from engraved plate in the inside

No. 86.—Satin sachet, with ball fringe. The first cover, "Easter," from finely engraved plate; inside, verses and painted Easter dove.

No. 87.—Chromo on satin, surrounded with white chenille, and backed with verses on satin.

No. 88.—Smaller size, like No. 87, with narrow cord around the satin chromo.

No. 89.—Embroidered satin panel, to stand; the centre a beautiful embroidered design of a cross with flowers, surrounded with puffed satin, card and fringe.

A NEW VARNISH GUM.

Jules Greth contributes to the *Journal of the Society of Arts* the results of some experiments made by him with a new gum, *Pistachia terebinthus*, to which attention was called some time ago. "This new gum," he says, "which is soluble in oil, turpentine and alcohol, is of a light yellowish color, and has an agreeable odor of mastic. If the *Pistachia* gum is mixed with common rosin, soda of a strength of 25° has no soluble action on the gum, and soda of a strength even far greater than 25° has, no more than water, any effect on the unadulterated *Pistachia* gum. These facts alone are a sufficient proof of the value of this gum for the uses to which I have subjected it in my experiments. It is well known that most of the gums or rosins now used in the manufacture of varnish are soluble in soda, and therefore yield to the action of soap in a short space of time. Now, the varnish made with *Pistachia* gum possesses many advantages over the ordinary varnish, for, besides being waterproof, it does not in any way yield to the action of either soap or soda, and it can also be advantageously used for oil-cloth. I found, after further experiment, that when left in contact with the open air this new varnish thickens very quickly, which renders it a valuable acquisition to painters on glass and porcelain, both as a substitute for the burning process or to mix with the colors now used. The color of this varnish can be made of different shades, varying from a light gray to a beautiful dark brown, and it has the same appearance as the ordinary varnish. *Pistachia* gum, while of a similar character and of the same basis as Venetian turpentine, is far more important in its composition, which ought to render it valuable for commercial and medicinal purposes, and I may add, in conclusion, that *Pistachia terebinthus* gum, as a varnish and paint, in my opinion will become in the future of great value for these purposes."

A TRAVELER WANTED.

Must be posted in the Stationery and Fancy Goods business. One acquainted with the Book and Stationery dealers in Wisconsin, Minnesota and Dakota preferred. Address S. P., office American Stationer.

WANTED.

An active young man, aged 26, born in New Orleans, and speaking French and English fluently, desires a position as Clerk (traveling preferred), for some stationery house, in which branch he has had 10 years' experience; is well acquainted throughout the State, and can furnish best references. Address, stating terms, &c.,

Cable address: Hogan, Sydney. Postal address: John Hogan, Box 397, G. P. O., Sydney, New South Wales.

FAILURE OF THE AMERICAN BOOK EXCHANGE.

The embarrassment of the American Book Exchange, of No. 764 Broadway, culminated on Saturday last in the appointment of Sands F. Randall as receiver by Judge Donohue, of the Supreme Court, on the application of E. B. Mack. It has been expected that such a course would have to be taken, although it was hoped that a syndicate of the largest creditors, which has been carrying the company for some time, would be able to bring it out of its trouble; but some of the smaller creditors begun suits, an attachment was issued and a judgment obtained, and it was thought best by the persons interested, to have a receiver appointed, so that all of the creditors might share alike. The exchange's reports state that it was incorporated March 14, 1878, with a capital stock of \$15,000, of which \$10,000 was paid in. The authorized capital was increased January 14, 1880, to \$100,000, of which \$30,000 was paid in, \$20,000 cash and \$10,000 in property, their statement showing debts to the amount of \$45,000 at that time. The capital stock was again increased February 1, 1881, to \$250,000, and their annual statement, dated April 21, showed that \$160,000 had been paid in, \$150,000 cash and \$10,000 property, and the existing debts did not exceed \$114,000. The company succeeded to the business of John B. Alden, who began in this city as a dealer in old books in 1875, and he became the president. For nearly three years the transactions were confined to exchanging second-hand books and selling miscellaneous new books. In the autumn of 1878 the company made preparations to enter the market as a publisher of standard books at lower rates than the older publishing houses were offering. A statement to stockholders, December 31, 1880, showed liabilities, \$239,572.63, of which \$48,100 was capital stock paid up; bills and accounts payable, \$119,702.66; undivided surplus, \$71,769.97; assets, stock, furniture, machinery, book-plates, &c., net cash value, \$213,291; cash on hand, \$2,012.25; bills receivable and accounts through the company, \$24,269.38. It is said the company about the first of the year declared a dividend of \$40,000. The stockholders could have had cash, but nearly all used the dividend to take up additional stock. The time for filing the annual statement for 1881 expired before it was filed, and it is said that the trustees may be considered individually liable for the debts of the corporation. The syndicate which has been trying to carry the company for some months represents upward of \$80,000 of the total indebtedness, and it is said that it has a large part of the assets secured to it for its claims. Besides the above liabilities, there are debts unsecured of between \$50,000 and \$60,000. It is not known how much the contingent liabilities are, and they will probably have to be determined legally, as there is a question regarding them. A meeting of the creditors took place yesterday morning at 10 o'clock, at which about twenty-five creditors were present or were represented. Mr. Alden, the manager, did not have the statement prepared which he had promised to submit, but he made a statement, which, it is said, was very unsatisfactory to the creditors present. The result was the appointment of a committee of five to thoroughly investigate the affairs of the concern, and report at a future meeting. The committee is composed of Mr. Wilson, printing-ink manufacturer; Mr. Griffin, of H. Griffin & Sons, bookbinders' materials; Mr. Whiting, of J. S. Rockwell & Co.; Mr. Green, of S. W. Green's Son, printer; and Mr. Ferguson, of Lovejoy & Son,

electrotypers. The firms composing the syndicate of creditors: Perkins, Goodwin & Co., Wilkinson Brothers & Co., Vernon Brothers & Co., and the Smith Paper Company. A proposition was made by Mr. Alden to form a new company.

THE NATIONAL BANKRUPT LAW.

At a meeting of commercial men in the Fifth Avenue Hotel on Tuesday evening, the passage by Congress of a national bankruptcy law was advocated. Among the bodies represented in the meeting were the Board of Trade and Transportation, the Hardware Board of Trade, the Legal Protective Association of Cigar Manufacturers, the Produce Exchange, the Stationers' Board of Trade, the Dry Goods Jobbers, the dry goods commission merchants (by a committee of fifteen), the Mercantile Jobbers' Association, the New York Jewelers' Association, the Mechanics and Traders' Exchange, the Butter and Cheese Exchange and the Petroleum Exchange.

A. B. Miller, of the Board of Trade, called the meeting to order in a speech reviewing the work of the convention of mercantile bodies of the country held in Washington city in January last. He commended the bill proposed by Judge Lowell, of Massachusetts, for a uniform and equitable bankrupt law.

A. H. Colby was chosen chairman of the meeting, and Morris S. Wise, Walter H. Lewis and Franklin Edson, the Committee on Resolutions, reported in favor of Judge Lowell's bankrupt bill, and recommended the following:

Resolved, That we further express our sincere convictions that any system which compels the settlement of bankrupt or insolvent estates in courts of equity or of chancery, according to the established procedure, would involve undue delay, confusion and expense, and would utterly fail to prove either uniform, equitable or satisfactory, and that such a system of judicature would not prove permanent in its operation.

It was resolved to appoint an executive committee, to consist of one from each of the organizations represented at the meeting. This committee, which will be appointed by the Chair after consultations with the several interests, will be expected to go to Washington city and urge Congress to pass a national bankrupt law.

GLASS AS A STRUCTURAL MATERIAL.

A Pittsburg paper has been giving attention to the use of glass as a material of which to construct buildings. The following article is the result:

Perhaps not one builder or contractor in ten, if told that the common grades of glass have a crushing strength of nearly four times as great as that credited by experienced engineers to the strongest quality of granite, would accept the statement as true. Yet it is a fact, and, being so, the query as to why glass has not received more attention from architects as a structural material naturally suggests itself. A reporter had a talk with several prominent glass manufacturers on the subject, and, in answer to an interrogatory as to whether blocks of glass could be made in suitable lengths and sizes, and so annealed as to be utilized in the construction of a building in place of stone, they said that it could be done. Said one of these gentlemen:

"This question has been considered by myself a number of times, and, although I do not want to advocate the absolute abolition of brick and stone, yet in the erection of art galleries, memorial buildings, etc., a structure composed of blocks of glass in prismatic colors would be alike a unique, beautiful and lasting structure. With the numerous inventions which have come into

use of late years in connection with the production of glass, the cost has been gradually going down while the quality of the fabric is steadily becoming better. Now, as the Smoky City controls the bulk of the glass production, there could not be a more appropriate place for the erection of such a building. One objection which would be raised to the durability of a glass house, in the literal sense of the words, might be that the blocks would not take a bind or adhere together with common mortar. This objection can be readily set aside by the use of a good cement, and when completed the structure would stand for ages, barring extraordinary accidents, or, mayhap, cataclysm. As to the cost of a glass house, it can be kept down to but a small percentage above the price of cut granite, as there are many points where saving gains can be made. Thus, for instance, in building with stone, you have to pay the stone-masons, and when it comes to elaborate examples of carving, in Corinthian pillars, collars and capitals, &c., why, the work is rather costly, as compared with glass, when the latter can be molded in any shape or form, and the work accomplished in much less time. I am convinced that the time will come when we will see such a building erected. Scarcely a day passes but what the sphere of glass as an article of use becomes widened. In parts of Germany and on one line in England, glass ties are being used on railroads, and thus far have given satisfaction, combining all of the requisites of the wooden tie with the virtue of being susceptible to usage at least 75 per cent. longer than wood. Then, by the Bastie process, glass articles are now being made for common use which can be thrown on the floor, and will rebound like a rubber ball. Progress is also being made toward rendering glass, which has even been characterized as 'the brittle fabric' ductile, and to-day threads of glass can be made that can be tied in knots and woven into cloth. Were one disposed to give play to fancy and fuse it into fact, a house entirely composed of glass could be built with walls, and roof and floors fashioned from melted sand. Carpets of glass could cover the floors, the wall decorations embodying the forms and colors of the most ultra aesthete, sitting on glass chairs or reclining on glass couches, and arrayed in glass garments, eating and drinking from glass dishes, such an one could realize that the age of glass had come. Yet nearly all of this fifty years ago would have been classed with the then impossible telephone and electric light, and this statement would likely have found its place in the catalogue *Expurgatorius*."

Much has been said about the inability of modern glass manufacturers to make window glass imbued with the rich and beautiful colors peculiar to the windows of old cathedrals in England and on the Continent. It is not generally known, however, that the secret of securing those wondrous tints has been discovered by one of our glass manufacturers. After a long series of experiments conducted in conjunction with Thomas Garfield, of Boston, he has found that the rich effects in those old cathedral windows are owing to the poorness of the quality of the glass. Owing to the imperfect mixing of the ingredients by the old glass makers, the substance did not unite closely, and in consequence it became porous, and the minute particles of soda in the composition are exposed and act in the function of radiators, which give brilliancy to the colors of the window. In making window glass in colors now, the makers prefer to leave the surface rough, in order that by exposure to the elements it may go through the same beautifying process alluded to above.

MARCUS WARD & CO.'S ANNOUNCEMENTS.

CHRISTMAS AND NEW-YEAR CARDS FOR 1881-82.

THE NEW DESIGNS ARE COMPLETELY SUCCESSFUL.

"At Home."

THE NEW ART GIFT-BOOK for the Holiday Season bears this title. Its quaint, square pages represent children of all degrees—"At Home,"—with all the charms which the ideal of costume can add to the loveliness of childhood. Known all over America as originators and first introducers of Christmas Cards, Marcus Ward & Co. have been asked, on all sides, to bring out a book which should abound in the versatile fancy and quaint conceit of their Cards, combined with good drawing and harmonious color. The work now introduced is the response to this wide-spread demand. Every page of "At Home" is a picture, not in glowing, gaudy colors, but in the subdued and harmonizing tints now favored by the devotees of culture. The pictures not only give the perfection of juvenile costume, but also afford glimpses of English Interiors, with the proper coloring, decoration and furniture of some of the most æsthetic of English Homes. The verses in "At Home" enhance its interest, and are in themselves worthy of the beautiful book of which they form part.

Decorated by THOMAS CRANE.

Illustrated by J. G. SOWERBY.

\$2.50

THE ANCHOR OF HOPE. THE HAVEN OF PEACE.

New Illuminated "Daily Portion" Book.
BY THE REV. DR. MACDUFF.

\$2.00

Every page of this beautiful "Book of Days" is decorated in colors with exquisite flowers. The book is actually two books within a single cover. The Anchor will become the Christian's Hope in the morning, while The Haven will be his sure resting-place at night. When the morning portion has been read, the Christian will close and reverse the book, and there "The Haven of Peace" awaits his return when "evening shades prevail." This dual form of book is so convenient for ready reference that it is sure to be appreciated. Motto Texts have been adopted to head every page uniformly, special texts, differing every day, follow, and then comes the poem for the morning or evening, respectively.

THE SHAKSPERIAN CALENDAR.

An Illuminated Calendar for the library or drawing-room, with date slip to tear off daily, and appropriate quotations from Shakspeare for every day in the year. Price, 50 Cents.

DAY UNTO DAY.

A SACRED CALENDAR. With quotations from Scripture (arranged in weekly subjects) for every day in the year. Also, Church Festivals, Holidays, etc. The new design for 1882, in colors and gold, represents "The Passing Days." Price, 50 Cents.

EVERY DAY.

"A CALENDAR for men of business and other busy men." Daily date slips to tear off, similar to the above, with quotations from various authors of undying fame. The new design is unique for harmony of color and decorative beauty. Price, 50 Cents.

THE SEASONS' CALENDAR.

A small Calendar, eight pages, with four new and beautiful illuminated designs by KATE GREENAWAY, representing the seasons. Also, Church and Legal Holidays, Postal information, etc. Price 15 Cents.

MARCUS WARD & Co., Nos. 611 & 613 Chestnut Street, Philadelphia.

LETTERS PATENT FOR INVENTIONS.

BY JAMES A. WHITNEY, COUNSELOR-AT-LAW.

VI.

WHAT CONSTITUTES A PATENTABLE INVENTION—
(CONTINUED).

From the earliest decisions it appears that the exercise of a certain degree of origination skill in any industry was part of the possession of the public, and consequently outside of the protection of letters patent. Thus a patent having been granted in the time of Elizabeth to one Hastings for making a fabric termed "frizadres," which seems not to have been previously known in England, but, a bill being exhibited in the Exchequer Chamber, it appeared that certain clothiers had made "baies" very like the new material, "for which cause they were neither punished nor restrained from making their baies like to his frizadres." The same authority quotes the case of one Matthey in the early part of the same reign, who had a patent "for the sole making of knives with bone hafts and plates of latin," but as the warden of the Company of Cutters showed "that they did use to make knives before, though not with such hafts," it was held "that such a light difference of invention should be no cause to restrain them, whereupon he could never have benefit of this patent, although he labored very greatly therein." In these two cases is found the germ of the doctrine, now universally recognized, that the alleged improvement must display something more than mere mechanical judgment or the ordinary exercise of technical skill.*

A method being well known for making one fabric, no invention could be shown in simply using the same means for making another fabric substantially the same. Various materials having the quality of hardness and solidity, being of common use for knife-handles, there could be no exercise of the inventive faculty in merely applying some other hard and solid material to the same purpose in the same way. Such changes involve no exertion of the creative talent, and overcome no obstacle not manifestly easy to overcome. They are within the ordinary discretion of manufacturers and artisans, as who should say, Brass is too brittle for my purpose, and lead too soft, therefore I will use iron; or, ivory is too costly for my use, therefore I will replace it with bone. A known manufacture, therefore, included not merely its exact practice, but such modifications as in the usual routine of the trade or art would naturally suggest themselves to a person ordinarily skilled therein. This is still an inherent principle of patent law, but in its application there are qualifications which should be kept in mind, and which are hereinafter stated in detail.

Until the case of *Morris vs. Bransom*, there was no further elucidation, in accordance with modern practice, of the term "manufacture." In this Lord Mansfield decided that an addition to an old machine was patentable, and that an opposite meaning "would repeal almost every patent that was ever granted. This ruling, by completely overturning the dictum of Sir Edward Coke, and the decision in *Bircat's* case, saved practically the entire system from destruction and removed one of the causes which,

* There is a further reason in this, that most inventions require elaboration in practice, and, if mere mechanical changes could be patented, the inventor might be debarr'd from exercising ordinary skill in applying his invention to use, but this cannot extend to improvements which go beyond mere mechanical skill and judgment.

during several generations, prevented the inventors of Great Britain from receiving the full benefit of her laws. Within a few years after this decision by Lord Mansfield many important patent causes were tried in England, and the ethical principles and practical rules laid down during their consideration soon formed a complete and symmetrical system. Although these cases were, almost without exception, subsequent in date to the achievement of American independence, their conclusions were adopted in our earliest patent trials, and reiterated in a liberal and enlightened spirit by our jurists, are still binding on our courts. In nothing is this more apparent than in the determination of what constitutes patentable novelty or invention.

It was early settled that a "principle" taken in its abstract sense cannot be the subject of a patent. This was epitomized by Chief-Justice Eyre (the other judges concurring), in *Boulton v. Bull*, A. D. 1795, as follows: "Undoubtedly there can be no patent for a mere principle, but for a principle so far embodied and connected with corporeal substance as to be in a condition to act and to produce effects in any art, trade, mystery, or manual occupation, I think there may be a patent." The same ruling was even more elaborately set forth nearly half a century later in the *Househill Company v. Neilson*: "A patent cannot be taken out solely for an abstract philosophical principle; for instance, for any law of nature, or any property of matter, apart from any mode of turning it to account in the practical operations of manufacture or the business and arts and utilities of life. * * * The instant that the principle, although discovered for the first time, is stated in actual application to, and as the agent of producing a certain specified effect, it is no longer an abstract principle; it is then clothed with the language of practical application, and receives the impress of tangible direction to the actual business of human life." Buller, J., in the same case, tersely explained the same truism: "The very statement of what a principle is, proves it not to be the ground of a patent. It is the first ground and rule for arts and sciences, or, in other words, the elements and rudiments of them. A patent must be for some new production from these elements and not for the elements themselves."

The matter may be readily illustrated.

Water, subjected to certain conditions of heat and pressure, is converted into a gas possessing great elasticity and expansive force. Here is an abstract principle, great in its possibilities, but, considered apart and alone, of no utility in the arts and barren of any useful purpose. As such, it would be no improvement in manufactures or industries, and a patent granted for it would be wholly without consideration. But couple this principle with means for producing a useful result, embody it in the operation of mechanism, or make it the guide and central idea of some manner of working in the arts, and its character is changed. This abstract, isolated fact of nature or scientific principle, made to manifest itself through tangible means for useful purposes, is abstract no longer. Embodied with two alternating water cylinders and suitable valves, it becomes the steam engine of Savary; caused to act upon pistons in cylinders alternately injected with a jet of cold water, it becomes the engine of Newcomen; caused to operate an apparatus in which an external condenser condenses the steam without cooling the cylinder, it becomes the engine of James Watt. Thus while the property of matter, its manifestation of energy under certain conditions, consid-

ered in the abstract, is incapable of being patented, yet, applied through suitable means to useful purposes, it gives rise to many subordinate principles of construction or operation, or, as they may be termed, principles practically applied, which, producing useful results, are the most important of inventions and clearly within the intent of the patent law.

ANTIQUE BRONZING AND ITS IMITATION.

The deep green, blue, and blue-green covering of copper and bronze which develops under the influence of dampness and air is technically called patina, and consists of carbonate of copper. It has been observed that bronze statues in large towns are no longer covered with this patina, but turn black, while those statues which have been erected in the country and in parks are still covered with the greenish covering. Some kinds of bronze turn green sooner than others, which is especially the case with those containing much zinc, little lead, and no tin. The principal thing, however, in a statue is a clean surface, which has been obtained by filing, etching, and polishing, and which is retained by frequent washing with water. In some places the surface is kept clean by being rubbed down once a month with olive oil. The artificial patina is obtained by first cleaning the bronze and then dipping it into a solution of vinegar and water, after which it is exposed for some weeks to the influence of damp carbonic acid gas. Or the bronze may be painted with a solution of $\frac{1}{4}$ parts sal-ammoniac and 1 part oxalic acid in $94\frac{1}{2}$ parts distilled vinegar. The modern imitation patina, to be seen on lamp statues, can be produced by using a paint consisting of carbonate of copper and light spirit varnish (sandarach lacquer or photographic negative lacquer); this greenish lacquer is then put on the objects to be treated with a brush, like paint. This green paint then collects in the recessed parts, and, when dry, looks like patina. This proceeding is specially to be recommended where objects with imitation patina have been damaged and are to be restored. Carbonate of copper gives a bluish color, verdigris (acetate of copper) a light green shade. Intermediate tinges are obtained by mixing the two.

AN EXPLOSIVE ALLOY.—An alloy of rhodium and lead, lately exhibited before the French Academy of Sciences, has a curious property of exploding on exposure to heat, as in being held before a gas flame. Its composition is one-third rhodium and two-thirds lead, fused together in a crucible at a high temperature.

The surplus of the fund subscribed for the monument to Pushkin, unveiled last year at Moscow, which amounts to 20,313 roubles, is to be devoted to founding three prizes in honor of the poet—the first, for works of erudition upon the history of the Russian language and literature; the second, for original literary compositions or translations in verse, and the third, for critical analyses of Russian literary works.

A valuable medal was dug up on the farm of John Myer, Burlington, N. J., a few days ago. It is of copper, weighs nearly two ounces, and is in a fine state of preservation. On one side are the heads of Washington and Lafayette and the date, 1783. On the other side is an eagle holding up a globe on which are the words "United States."

SPECIAL HOLIDAY NOTICE TO STATIONERS.

The following Salable Novelties, selected from **BRADLEY'S List for 1881-2**, are specially adapted to your **HOLIDAY TRADE**:

The Aquarium and Managerie.—The finest toy of the season. Just issued.

Old Maid Improved.—The most popular game of the year.

Patience.—The best new game in the market.

Words and Sentences.—The best word game made.

The Historiscop Improved.—The finest panorama ever made, with new designs in oil colors. Very pleasing and instructive.

Excursion to Coney Island.—New and very funny visit to the Gypsies. Very amusing for a company of young people.

Little Object Teacher.—New Edition. Very fine.

MILTON BRADLEY & CO., SPRINGFIELD, MASS.

WILSON BROS. CO., 119 Chambers Street, NEW YORK AGENTS.

PERFECTED STYLOGRAPHIC.

The original and genuine Pen. Warranted the best made. Thirteen Patents granted to **A. T. CROSS**, the last, June 30, 1880, being the most important and giving the name **Perfected**.

MAXIMUM.—Holds most ink of any pen made; tires the hand less than smaller barrels. Fits Hambley's Pocket. Same price as Long.

LONG.—The famous Desk Pen. Extra Long. Holds most ink, except the Maximum.

SHORT.—Most widely known and sold heretofore; but Maximum and Long are much better for desk or Hambley's Pocket. So this will be largely superseded.

GIANT, with Cord and Gold Ring, same price as Short.

LITTLE GIANT
Plain, \$3.00.
All Styles up to \$4.50.

LITTLE GIANT,
The Ladies' Favorite.

Thirteen patents granted; seven more applied for; more genuine improvements; better record; more styles; larger stock; more thoroughly protected by patents than all rivals combined. Dealers and agents supplied with wood, glass and paper signs, placards, circulars, leaflets and cuts. We make both largest and smallest Pens, all of which will have the new improvements. Sole Agents for the World. See Descriptive Circulars.

"THE GREAT ROCK ISLAND ROUTE"

Calls your attention to the following REASONS WHY, if about to make a Journey to the GREAT WEST, you should travel over it:

As nearly absolute safety as is possible to be attained. Sure connections in UNION DEPOTS, at all important points. No change of cars between CHICAGO, KANSAS CITY, LEAVENWORTH, ATCHISON or COUNCIL BLUFFS. Quick journeys being carried on Fast Express Trains. Day cars that are not only artistically decorated, but furnished with seats that admit of ease and comfort. Sleeping cars that permit quick rest in home-like beds. Dining cars that are used only for eating purposes, and in which the best of meals are served for the reasonable sum of seventy-five cents each. A journey that furnishes the finest views of the fertile farms and pretty cities of Illinois, Iowa and Missouri, and is afterwards remembered as one of the pleasant incidents of life. You arrive at destination rested, not weary; clean, not dirty; calm, not angry. In brief, you get the maximum of comfort at a minimum of cost.

That the unremitting care of the Chicago, Rock Island & Pacific Railway for the comfort of its patrons is appreciated, is attested by its constantly increasing business, and the fact that it is the favorite route with delegates and visitors to the great assemblages, political, religious, educational and benevolent, that assemble from time to time in the great cities of the United States, as well as tourists who seek the pleasantest lines of travel while en route to behold the wonderful scenes of Colorado, the Yellowstone and Yosemite. To accommodate those who desire to visit Colorado for health, pleasure or business, in the most auspicious time of the year, the Summer season and months of September and October, the Company every year issue puts on sale, May 1st, at all coupon ticket offices in the United States and Canada, round trip tickets to

DENVER, COLORADO SPRINGS AND PUEBLO.

At reduced rates, good returning, until October 31st. Also to San Francisco, for parties of ten or more, good for ninety days, at great reduction from regular fares.

REMEMBER! This is the most direct route for all points WEST and SOUTHWEST. For further information, time-tables, maps or folders, call upon or address

R. R. CABLE,

Vice-President and Gen'l Man'gr, Chicago.

E. ST. JOHN,

I WILL INSURE YOUR HOGS.

Dr. Jos. Haas' Hog AND Poultry Remedy.

THE ONLY SCIENTIFIC SWINE REMEDY COMPOUNDED.

Read My Propositions!

First—When my remedy is used as a preventive, I will insure hogs by the head for a year, and will make a deposit of money to make such insurance good. If any hogs die, they will be paid for from such deposit; you can refer to my bankers, Messrs. Fletcher & Sharpe, Indianapolis, Ind., for my standing financially.

Second—Where my expenses are paid, I will visit herds of not less than 100, and I will arrest the disease among them, or forfeit \$500.

Third—After hogs have been regulated with my remedy, I guarantee that the annual cost of feeding will not exceed 25 cents per head. Furthermore, that the increase of actual flesh will far more than pay for the remedy used.

SEND FOR IT!

It is not an experiment, but an established success. Remember, it is the only remedy that is used and indorsed by the great breeders of this country and England. It owes its great fame to its genuine merits, and every mail brings tidings of its good work. The evidence in its favor is so strong the most scientific men of the country have pronounced it the conqueror of this disease. It is gaining ground daily, and no hog raiser up with the times can do without it. It is not only a protection against disease, but it is a powerful appetizer.

Inquire of my Bankers, Messrs. Fletcher & Sharpe, Indianapolis, Ind., for my standing. Will make a deposit of necessary money, and will pay for all that die.

SEND FOR IT! I GUARANTEE IT WILL STOP THE COUGH AMONG HOGS

and put them in fine condition for fattening. It will expel the poison from their system, tone them up, and invigorate them generally. It will make them thrive so as to astonish you. It will pay such a large per cent. on the investment, that no one can afford to be without it.

REFER TO ANY WELL KNOWN BREEDER OR SHIPPER IN ANY PART OF THE COUNTRY.

J. H. Whetstone, druggist, Iowa City, says: "The Haas Remedy sells better and with less effort than any proprietary medicine I have ever undertaken to sell of any kind. We have nothing in stock to-day but what I would rather do without than the Haas Remedy."

C. H. Klauenburg, druggist, Carlinville, Ill., says: "The Remedy sells well, and is the best on earth."

O. A. Elliott, druggist, Russell, Ia., says: "The Remedy has given good satisfaction here."

J. N. Penn & Sons, druggists, Sydney, Ia., say: "We hear good reports from what we have sold."

Ed. J. Brown, druggist, Edina, Mo., says: "It has given general satisfaction in this county. Have sold \$1,000 worth in three months. Have tested its merits myself."

J. M. Kufer, druggist, Macomb, Ill., bought \$400 lot of Haas' Remedy and sold \$300 of it in seven weeks.

SEND FOR IT. LIBERAL TERMS TO THE TRADE. you. Terms, Circulars, &c., on application.

W. Harris, druggist, Storm Lake, Ia., says: "It has given splendid satisfaction."

J. C. Eacker, druggist, Elliott, Ia., says: "Have sold several orders and in every case satisfaction given."

A. P. Gano, druggist, Missouri City, Mo., says: "It will be a popular article in our drug market."

J. W. Wyman, druggist, Unionville, Ia., says: "It cures chicken cholera every time."

Smith & Thomas, druggists, Platte City, Mo., say: "It gives good satisfaction here."

Duffield & Harlan, druggists, Centreville, Ia., say: "It is entirely satisfactory."

Dr. S. S. Clayberg, druggist, Avon, Ill., says: "It gives good satisfaction here."

Melle Williams, druggist, Taylorville, Ill., says: "Have a good trade. It gives splendid satisfaction."

\$1.00, \$2.50, and \$5.00 packages. I can work up a trade for

BYRON WESTON

DALTON, MASS., U.S.A.

HAS BEEN AWARDED THE

GRAND PRIZE GOLD MEDAL

AND RECOMMENDED THE

Medal of Honor and Perfection

At PARIS, 1878,

This being the HIGHEST and ONLY AWARD given for

LINEN RECORD and LEDGER PAPER

Also, the only Gold Medal given for Ledger Paper at the Adelaide, Australia, Exhibition, 1881.

—A SPECIALTY.—

THIS Paper has received THE HIGHEST PREMIUM over all others from the Cincinnati Industrial Exhibition, Massachusetts Charitable Mechanics' Association, Franklin Institute of Philadelphia, Louisville Exposition, Medal and diploma from United States Centennial Commission, Medal of Progress American Institute, 1877, and Medal of Improvement and Progress, Boston, 1878. Its

PRINCIPAL ADVANTAGES

are as follows:—1. It contains more LINEN than any other Ledger Paper, has a longer fibre, and is, consequently, tougher. 2. Having a harder and better body, it frays less in erasure, so that by simply using the rubber after the eraser, the ink is prevented from spreading. 3. It is more uniform in Weight Color and Finish. 4. It never cockles if properly bound. 5. Its chemical action upon ink is such that it both writes and rules up better. For proof of the foregoing, refer to a large number of Stationers, Bookbinders, Bookkeepers, and Recorders, who have given it, after a severe test, the preference over all others. This paper is Double Sized, and will stand any climate or the most acid of fluid inks.

Send for sample sheet, ERASE and REWRITE FOUR TIMES on same spot.
Each sheet is water-marked with name and date.

MONTREAL TRADE ITEMS.

[FROM OUR REGULAR CORRESPONDENT.]

MONTREAL, P. Q., December 1, 1881.

"Going into winter quarters!" Our navigation is closed. The majestic ocean steamer and stately ship are no longer in our port, not even a little puffing, noisy harbor tug, and soon the noble river will be ice-bound. And thus do seasons come and go.

The summer trade has been good and profitable, perhaps not to the extent that most merchants would like, but a better feeling exists.

The volume of trade has enormously increased. Our imports and exports have been larger than for the past five years. Orders from the country come in freely, and what are called discretionary orders are not uncommon.

The excitement now in our trade is Christmas cards; nearly every stationer's and bookseller's window, yea, and even the small news-vender and candy-shop having their display of the article; among the larger fry several have "the largest and best stock in the city," some of them "our own special cards printed specially for us," &c. &c.

The exhibition of cards by the various dealers is beyond description, and the designs and subjects are bewildering in the extreme, from the tiny, juvenile card, to the magnificent tasseled panel picture. Henderson, W. J. Clarke and a Toronto firm have Canadian scenes. Those made in Canada are not so finely executed as the imported ones, but the designs and subjects are essentially new and national and will command a good sale on that account.

The retail trade are busy arranging their goods for the holiday season which all anticipate as being the best in some years, and it is thought that they will not be disappointed.

The display of novelties of fine goods and fashionable stationery certainly surpasses everything that has been attempted hitherto.

G. W. Clarke's mammoth fancy goods store on St. James street, with its æsthetic sign-boards and its three windows filled with attractive goods, makes one imagine himself in a bazaar as he walks around among the forest of show-cases and tables laden with the choicest fancy goods, "objets d'art and articles de vertu." He that cannot be suited in there must be hard to please.

Dawson Brothers' show of books and fine stationery is worth a visit; their two immense windows have always an admiring crowd before them.

William Drysdale & Co. are not one whit be-

hind the rest; their stock of standard books, photograph albums, &c., is among the best.

Morton, Phillips & Bulmer, on Notre Dame street, seem to have been scouring the world for goods; their stock is larger and choicer than ever. Although doing mainly a mercantile and railway business, they have not forgotten that the holidays come about this time of the year and have laid in accordingly, and the display and assortment is not niggardly. Autograph albums, photo albums, gold and silver pencil-cases, pocket-books, baskets for library and office use, &c., *ad infinitum*, and so it goes on through the whole round of the trade.

The wholesale trade is a little quieter, but doing a good steady business. Hodgson, Summer & Co., our leading notions house, are rushing things, there seemingly being no "let up" to their ability for sending out goods. Their establishment has more the appearance of an immense retail house than that of one of our largest wholesale concerns.

H. A. Nelson's Sons report a like good state of affairs. Good houses always do command a good trade at all times.

Geo. Home & Son, retail stationers, are closing out their stock at reduced rates preparatory to retiring from the business.

We are at present favored with a visit from your talented countryman, "Mark Twain," who is here interviewing a publisher!

Travelers are scarce just now, and rightly so, for everyone is full of goods. We have had a few stray ones with specialties who have "just dropped in as they were finishing their trips" and were homeward bound. Perhaps I have written enough for this time, and next time will try and give you the history of our holiday doings.

By the bye, I forgot to give you a word of commendation in re the special number of THE STATIONER. Tell the Colonel he did well. I have shown it with pride. It is well printed and neatly and attractively arranged. Long may it wave!

C.

TORONTO NOTES.

[FROM OUR REGULAR CORRESPONDENT.]

TORONTO, Ont., December 3, 1881.

Your Chicago correspondent, in his letter of the 5th, touches a sore which is difficult to get at. It is certain that it cannot be cured by legislation. The trouble is caused by competition and greed, and is not confined to your side. We have both wholesale and retail dry goods houses that do the same thing. The leading retail house of this city has a prominent show of cards in its window, and stores in towns outside are offering

cards as presents on certain amounts of purchase. The only remedy is for the booksellers and stationers to combine and meet these people on their own ground, and advertise lines of dry goods at cost, or what would be better, give these houses who furnish these goods to people outside the trade the go-by. If this was firmly and systematically done it would soon bring the card publishers to their senses.

I have been having a look around for a few days West, and wherever I have been I found business booming. In city, town and village great strides have been made ahead this season. New stores and factories, and enlargements to meet the demands of increasing trade. Mills and factories running day and night. New enterprises constantly starting up. In fact there is a universal hum. The leading booksellers in Guelph, T. J. Day and Nellis & Co., carry large stocks and are very busy.

In London, W. Bryer & Co., J. I. Anderson & Co., W. Currie, Reid Brothers, and others, all report business first-rate. Some of them, indeed, were so pushed that I was told that while they were glad to see me they really had no time to devote to me, and in the smaller towns of Ingersoll and Woodstock I heard the same story. There is one exception I wish to make to all this. When I solicited a subscription to THE STATIONER none of these people had time to read it, or anything else, which is a bad state of things, you will admit, and hence it would only be a waste of money to take it. There is nothing like frugality, but this kind reminds one of the penny wise and pound foolish man. The mind requires food as well as the body, and no intelligent man can afford to stint either. In the rush and push of these days it is absolutely necessary if a man wishes to rise above the plane of commonplace mediocrity that he should use liberally the facilities afforded him by the press, in order to keep pace with the times, and take that position among his fellows which every man should aim to do.

Having wandered about a great deal, and knowing the comfort of a well ordered hotel, let me mention, for the benefit of those who may find themselves in the pretty town of Woodstock, the O'Neil House. It is new, well furnished and well kept. I do this because to my knowledge this place hitherto has been deficient in this respect.

I notice that some one is advertising for a partner with experience and some capital to start a paper mill in Portage la Prairie, Manitoba. This is a fine chance for some active man who wishes to strike out in a new field.

The paper mills at Gordon's Mills, on the Trent River, have been enlarged to double their former

capacity, and are now provided with over \$10,000 worth of new and perfected machinery. Several other mills have been enlarged and improved, and all are pushed with orders.

The new paper mills in course of erection at Cornwall, Ont., and St. Jerome, P. Q., are being pushed, and are expected to be in working order in the spring. Both are for the manufacture of fine paper.

Jas. Baine & Son are now in their new store and are prepared to meet their customers; as I wrote you before, they have larger and much finer premises.

Brown Brothers are working day and night. They are nearly through with their diary, wallet, &c., orders for the season. They report business as rushing, and I may report the same respecting Copp, Clark & Co., Jas. Campbell & Son, Canada Publishing Company, Buntin Brothers & Co., W. J. Gage & Co., Barber & Ellis, Nichols & Byron, Rowsell & Hutchison, &c. C. H.

ST. LOUIS PARAGRAPHS.

[FROM OUR REGULAR CORRESPONDENT.]

ST. LOUIS, December 5, 1881.

Trade here is generally above comment; it is simply luxurious to those fortunate enough to be in the stationery line this season. The school-book trade, however, furnishes a fruitful cause for dissatisfaction.

R. & T. A. Ennis say that though their general country and railroad business is better than ever, their school-book business is deplorable, so much so that the firm will, on January 1, in common with several other of the largest houses here, practically withdraw altogether from this line. I have seen the copy for a circular soon to be issued by them, in which, although regretting the necessity, they announce their intention of selling school-books for cash only, or with another order.

The trade are desperate on this subject, and declare that unless their wrongs are righted they will leave the publishers in the lurch. Various expedients are suggested, and precedents cited: for instance, years ago, when the wall-paper trade had got into about the same condition, the manufacturers entered into a pool to protect the jobbers, eventuating in a margin of at least 25 per cent. to the latter. Cannot the book trade do the same? Or, again, cannot they follow the example of Ivison, Blakeman, Taylor & Co., who bind the trade by contract not to sell their pens below a certain fixed limit? Again, it is suggested that the jobbers shall withdraw altogether and allow the publishers to establish in each centre a large warehouse for their goods, from which buyers may draw their supplies.

It is claimed that the present policy of the publishers has encouraged a class of visionary business men, and the country is strewn from Maine to California with the wrecks of ruined booksellers. Ten years ago there were in Chicago eight or ten first-class book-jobbers, and now, outside of the Western News Company, there is but one; and the same story might be illustrated in every large Western city.

This sad state of affairs, it is thought, is largely due to the corruption of local school-boards and the duplicity of Eastern publishers. But the end is near. Several large houses have already dropped from the list of the "fleece," and three others here in St. Louis are ready to secede on January 1. "What are you going to do about it?"

A recent departure has caused quite a flutter in trade circles, that of the E. Jaccard Jewelry Company, at Fifth and Olive streets, which has just put in one of the completest lines of fine

stationery, &c., to be found West. Its paper-teries are exquisite, and all of its goods are in the latest and best taste, painted, embossed, and illuminated goods. Its designs are new, striking and original, and include a profuseness of fancy that is quite charming. The menu cards—mostly designed and painted by Mr. Taff—are the prettiest I have ever seen, while the Christmas and New Year cards are of the choicest selection. One of the company's own ideas, which takes well, is that of a long and narrow visiting card instead of the ordinary square styles. The fact is, this house is going to take the lead among the society stationers in the West.

Levison & Blythe are lively as usual. They have just received four cases of French copying books by direct importation. They are now probably the only house in the country importing these goods.

The St. Louis Paper Company has had, since its start, only a few years since, an almost phenomenal success. The company is composed of lively young men, who know how to make things move, as did Galileo of old. The rapid increase of business has necessitated a removal to a new store, 60 by 120 feet, on the north side of Locust street, west of Seventh. Here new cutting, ruling and card-cutting machinery, all of the latest and most approved pattern, will enable the company to meet promptly all of the wants of printers, stationers and publishers, in the paper line. It expects to get into its new quarters about December 15.

"Charley" Crutinger, the grand mogul in printers' rollers and composition, reports himself "busy as a bee in a Scotch bonnet."

Snider & Holmes, 217 Chestnut street, are carrying a neat line of novel New Year cards, in engraved, printed, and lithographed designs. They report business "booming," with a large increase over last year. They also carry a special line of paper-teries in fancy boxes. They are introducing a new line of "Bankers' Linen Ledger" paper. These papers sell very reasonably, and are giving general satisfaction. They replace with this house the old "Defiance" brand, once so popular, but the house thinks the "Bankers'" will be even more so. For blank-books it is pronounced *ne plus ultra*.

A. M. Coleman, manufacturer of the popular "Atwood" file, has removed to 1,026 Carr street. W. P. Beard, formerly with the St. Louis Paper Company, has just united his fortunes with the Graham Paper Company. He expects to travel for the latter company.

The St. Louis Tag Factory has been so successful that it expects to come out with a fine new building in the spring. This claims to be the only tag manufactory in the West, and its goods deserve the success they have achieved.

The agents of the "Eagle," "American," and Dixon Pencil Companies have been in town during the past week, and all went away "full"—of orders. PRINCE HAL.

OUR LONDON LETTER.

[FROM OUR REGULAR CORRESPONDENT.]

5 LUDGATE CIRCUS BUILDINGS, }
LONDON, E. C., Nov. 19, 1881. }

Although trade is brisk in most lines here, there is a peculiar dead feeling prevalent. No novelties are forthcoming, and therefore trade has returned to the old groove of stock goods, and, after all, I think this is the healthiest state of affairs. There is plenty to be done now in educating the public to appreciate what is good rather than what is startling or surprising.

You know that I have perhaps peculiar views,

strangely at variance with those of current trade journals, respecting many lines of stationery goods. I don't believe much in novelties, especially cheap ones. A novelty, moreover, is not an old friend dressed in a new suit. How many of the so-called novelties could stand peeling? It seems to me that provided a firm brings out some line of goods only differing in one slight item from an old production it is entitled to be called a novelty. A novelty should be an idea, something more than an outward skin. Thus it is that when I cast my eyes around I can't find anything new; I don't see anything that is very different in principle from what has been out for years. Now, I certainly did think the first stylographic pen a novelty. It was something new undoubtedly; but now there is a "new" stylographic pen every week, and by and by we may be able to buy one for a penny.

The worst of novelties is this: They induce buyers to make an outlay, and when the public play with them for a short time the public get tired of them, and there is a large useless stock in the stationer's shop directly. Many of the so-called novelties are mere catch-articles to sell, and wholesale houses would do well to limit the production of this class of goods and rather cultivate a wholesome trade in goods of daily use.

Take note paper and envelopes. Instead of flooding the markets here with rubbish at one shilling for five-quire packets, why have not our manufacturers turned their attention to the development of a higher priced article and assisted its sale by the employment of artistic packing, wrapping, &c.? At the present time elaborate boxes of stationery are being pushed hard, but the push is this—who is to produce the cheapest (and this means the most worthless) article. The public now think paper is nothing and can be had for nothing. These efforts at introducing elaborate boxes would be good if they themselves were good; but most of the boxes that I have seen are merely the means to work off a lot of cheap stuff.

Just so the foreigners, accurately gauging the taste of the hour, have introduced some cheap wood writings, of various tints and embossed with designs of attractive character, topical in subject. The tints are good, especially so. They excel our efforts simply because chemistry is studied by foreign paper makers, and they can produce the finest effects. The designs upon the paper and envelopes are also good, while the wrapping and neatly arranged boxes have no equal at all here. The sheets of paper and envelopes too are tied up with blue silk ribbon. Here a dirty looking colored paper band is thought good enough. But the paper is simply rubbish, so that the public pays for fancy only. The boxes of stationery now so much in vogue here are a diluted plagiarism of the Austrian goods, and, I am ashamed to say, are a sorry substitute in every detail.

Has not the time arrived when we can go in for good and decent trade? Has not the moment now come when we can abandon the cheap and nasty business and begin to issue goods that shall speak for themselves? Or is it a simple impossibility for us to imitate, much more excel, foreign competition?

Among the latest things I have seen are the following: Stationery cabinets, pocket diaries, office calendars, and pocket memo books. There is nothing to say about them.

Raphael Tuck & Sons' Christmas cards are good. The reproduction of the prize cards in many cases is excellent, but many pictures have been unsuitable. There are cards of all designs, all shapes, all sizes, and all prices. The collection

is one to suit "the million." I do not mean to forego my usual growl at the dearth of subjects fit for the coming winter season. I do not recognize flowers, bees, semi-nude children, and such subjects as applicable to any Christmas topic, be it a card or any other form of idea to awaken remembrance of winter and snow. I do, however, recognize, and am pleased to do so, talent and enterprise. The first-named virtue has been fully expended in the artist's work, and the second in the business-like system and achievements of Raphael Tuck & Sons, City road, N.

I have received a handsome show-card containing a set of samples of lead pencils of various colors, from a comparatively new firm, viz., Johann Faber, of Nuremberg. The name of Faber is always associated with the pencil trade, and this firm, consisting of Johann Faber and his two sons, Carl and Ernst Faber, is a branch of the well known firm of A. W. Faber. Judging from the very neat and complete show-card, and from an experience of thirty-seven years' practice in the manufacture of pencils, I should think that a promising future is before Mr. Faber, whose London house is at 145 Queen Victoria street, E. C.

Reid's self-inking pad will be of great service to all who use rubber stamps. The principle of this pad is simple but effective. A small reservoir under the pad is filled with ink, and on being reversed, of course supplies the pad with a sufficiency of ink, which is spread over the pad evenly. The whole is comprised in a neat metal box, and one charge of ink will last several months. This pad is a good idea, and superior to the old, dirty method of pouring ink upon the pad. T. Reid, Printing Court Buildings, Newcastle-on-Tyne.

The October (27th issue) or holiday number, of THE AMERICAN STATIONER, was a good production in every way. I wonder when our trade will enable such a production to be issued here!

W. F. C.

PREPARING WOOD FOR VENEER.

The wood required for veneering purposes should be perfectly dry, free from knots and shakes; if it is not dry the veneer will either not fasten properly, or, if it does fasten, it will come off as the wood shrinks. If knots are veneered over the probability is that the veneer will be detached all round the knot, because the toothing plane does not cut the knot so deeply as the straight grain; and, again, if the timber is shaken to begin with, the work will sooner or later split. Having obtained the necessary timber, it must be planed up accurately, straight, and out of twist; the plane-iron should be as square as possible, so that no hollows may exist. A glance along the edges of the timber will reveal any hollowness or roundness in the timber. These faults must be avoided, and at the same time that regard is had that the timber is straight from end to end, care must be taken that the face does not twist. Apprentices find it difficult to get rid of the twist. To the experienced eye it is readily perceived by looking along the face of the timber, when if one corner projects in the slightest degree it is faulty; both edges of the timber must appear exactly parallel as we look along the face, otherwise it is still twisted. The surest way is to use small and perfectly parallel straight-edges, placed one across each end of the timber which has been planed, then stoop down and compare the two edges; if they are not parallel, take a few more shavings off until they are exact and the wood is straight across. Two pieces of wood, planed up straight, should, when placed face to face, adhere strongly. The

wood must now be toothed. This is done by means of a plane with a serrated edge; it cuts very fine grooves in the wood, without destroying the straight surface. It is, however, quite possible to undo all our straightening operations by toothing too much. When the wood is toothed size it with thin glue and let it get quite hard. When the sized surface is perfectly dry tooth it again, and it is then ready for veneering.

The growth of the telegraph system in Japan has been rapid. It was introduced in 1871, and at the beginning of last year comprised 3,929 miles of line and 9,345 miles of wire. During last year the total number of telegrams reached 1,372,756, of which about 96 per cent. were in Japanese. Including the five submarine cables, the total receipts were over \$523,000, the expen-

diture being nearly \$500,000. It was the first year that the lines returned an excess of revenue. Operatives are trained from the youths of Japan in a special school recently opened for that purpose. During this year 227 were appointed to positions, and 77 still remain under tuition. They are taught to write English and French. For twenty characters in the Japanese language, for a distance of sixty miles, the average rate is about three sen, or a little less than a penny. This is taking the entire line from Tokio to Nagasaki as a basis. But for shorter distances the rates are higher. From Tokio to Yokohama messages are transmitted for seven sen, or about twopence farthing. There are 112 offices open for general traffic, besides 70 others connected with the government, the railways or the police. About 350 Morse instruments and 29 telephones are used.

MARCUS WARD & CO.'S ANNOUNCEMENTS.

CHRISTMAS AND NEW-YEAR CARDS FOR 1881-82.

THE NEW DESIGNS ARE COMPLETELY SUCCESSFUL.

"At Home."

THE NEW ART GIFT-BOOK for the Holiday Season bears this title. Its quaint, square pages represent children of all degrees—"At Home,"—with all the charms which the ideal of costume can add to the loveliness of childhood. Known all over America as originators and first introducers of Christmas Cards, Marcus Ward & Co. have been asked, on all sides, to bring out a book which should abound in the versatile fancy and quaint conceit of their Cards, combined with good drawing and harmonious color. The work now introduced is the response to this wide-spread demand. Every page of "At Home" is a picture, not in glowing, gaudy colors, but in the subdued and harmonizing tints now favored by the devotees of culture. The pictures not only give the perfection of juvenile costume, but also afford glimpses of English Interiors, with the proper coloring, decoration and furniture of some of the most aesthetic of English Homes. The verses in "At Home" enhance its interest, and are in themselves worthy of the beautiful book of which they form part.

Decorated by THOMAS CRANE.

Illustrated by J. G. SOWERBY.

\$2.50

THE ANCHOR OF HOPE. }
THE HAVEN OF PEACE. }

New Illuminated "Daily Portion" Book.

\$2.00

BY THE REV. DR. MACDUFF.

Every page of this beautiful "Book of Days" is decorated in colors with exquisite flowers. The book is actually two books within a single cover. The Anchor will become the Christian's Hope in the morning, while The Haven will be his sure resting-place at night. When the morning portion has been read, the Christian will close and reverse the book, and there "The Haven of Peace" awaits his return when "evening shades prevail." This dual form of book is so convenient for ready reference that it is sure to be appreciated. Motto Texts have been adopted to head every page uniformly, special texts, differing every day, follow, and then comes the poem for the morning or evening, respectively.

THE SHAKSPERIAN CALENDAR.

An illuminated Calendar for the library or drawing-room, with date slip to tear off daily, and appropriate quotations from Shakspeare for every day in the year. Price, 50 Cents.

DAY UNTO DAY.

A SACRED CALENDAR. With quotations from Scripture (arranged in weekly subjects) for every day in the year. Also, Church Festivals, Holidays, etc. The new design for 1882, in colors and gold, represents "The Passing Days." Price, 50 Cents.

EVERY DAY.

"A CALENDAR for men of business and other busy men." Daily date slips to tear off, similar to the above, with quotations from various authors of undying fame. The new design is unique for harmony of color and decorative beauty. Price, 50 Cents.

THE SEASONS' CALENDAR.

A small Calendar, eight pages, with four new and beautiful illuminated designs by KATE GREENAWAY, representing the seasons. Also, Church and Legal Holidays, Postal information, etc. Price 15 Cents.

L. PRANG & CO.'S

Christmas and New Year Cards

ANNOUNCEMENT.

WE hereby beg leave to announce to the trade the completion of our line of Christmas and New Year Cards for this season, for which our agents are now soliciting orders. The extent of our list, the originality, and especially the American character of our designs, together with the great care taken in their execution, will, we have no doubt, secure for our goods the popularity which they have enjoyed heretofore. The efforts we have made to secure the highest excellence, is attested by the names of some of the artists whose designs have been reproduced. We would only name Elihu Vedder, C. C. Coleman, Thomas Moran, Miss Rosina Emmett, Miss Dora Wheeler, Mrs. O. E. Whitney, W. H. Gibson, F. S. Church, R. G. Birch, &c. That a due regard has been paid for the quality of the literary matter, in connection with these designs, is shown by the fact that many of the designs are accompanied by original poems from writers of note, such as Mrs. Celia Thaxter and Mrs. Emily Shaw Forman.

The great increase of our manufacturing facilities, secured by additions to our building nearly doubling our floor space and by the adding of new machinery, will place us in a position to fill orders promptly. Still we would request dealers to place their orders as early as possible, so as to still further enable us to make timely preparation for prompt deliveries.

Our Cards will, as heretofore, be put up in envelopes containing twelve Cards, unless otherwise stated on our price lists.

We furnish envelopes without extra charge for all our Christmas and New Year Cards, for which the list price is \$1.80 per set, and over. Our silk-fringed Cards will no doubt be in great demand this season. We have made ample preparation to furnish these in time and have made arrangements with our manufacturers for the best quality of silk fringes. We would call special attention to the excellence of our fringed Cards and the novelties in colors and style of fringes we offer for this season.

A marked and attractive feature of our cards are the elegantly ornamented backs.

All our fringed Christmas and New Year Cards are furnished with envelopes and protectors, so as to insure safe transportation in the mails.

It will be impossible to embody our whole list in the space of the advertisement, and we will therefore merely give a general outline of the variety offered.

PRANG'S PRIZE CHRISTMAS CARDS. COMPETITION OF 1881.

These are the Cards selected by the judges in the second competition for four designs of Christmas Cards, for which we offered \$2,000 in prizes of \$1,000, \$500, \$300 and \$200 respectively. At the recommendation of the judges, Messrs. COLEMAN, LAFARGE, and WHITE, the prize for third best Card was increased to \$500. Mrs. CELIA THAXTER has written appropriate verses for each of the designs.

- 1st Prize Card (\$1,000), by Elihu Vedder. Size, $6\frac{1}{4} \times 9$ inches; price \$1 each. Same card with silk fringe, cord and tassels, price \$1.50 each.
 2d Prize Card (\$500), by Miss Dora Wheeler. Size, 7×9 inches; price 75c. each. Same card with silk fringe, cord and tassels, price \$1.25 each.
 3d Prize Card (\$300), by C. C. Coleman. Size, 7×9 inches; price 75c. each. Same card with silk fringe, cord and tassels, price \$1.25 each.
 4th Prize Card (\$200), by Miss Rosina Emmett. Size, $5\frac{1}{4} \times 9\frac{1}{4}$ inches; price 60c. each. Same card with silk fringe, cord and tassels, price \$1 each.

The Prize Cards can also be had mounted on heavy board with gilt beveled edges.

We beg to call attention also to the following publications for New Year and Christmas:

"Goddess Fortune" New Year Card, by Elihu Vedder. Size, $6\frac{1}{4} \times 8\frac{1}{4}$ inches; price 75c. each. Same card with silk fringe, cord and tassels, price \$1.25 each.
 "Christmas Dove." Size, $7 \times 9\frac{1}{4}$. This card is in the same style as the success of the last Easter season, the "Easter Dove" Price 60c. each. Same card with silk fringe, cord and tassels, price \$1 each.

Our Regular Line of Christmas Cards consists, among others, of the following Series:

Nos. 901, 902, 903, 906, 909, 910. Floral designs ranging in price from 20c. to \$1.20 per set of 12.
 Nos. 904, 905. Humorous Cat and Frog Designs, 60c. per set.
 No. 907 is a new series of Horseshoe designs, 75c. per set.

Nos. 920 and 929. Children's designs, at \$2.40 and \$3.60 per set.
 No. 922. Shells of Ocean, with figures, \$2.40 per set.
 No. 924. Fans with silk fringes, \$3 per set.
 No. 933. Bric-à-Brac designs, very rich, \$6 per set, and many others.

We offer a similar assortment of New Year Cards, but would call special attention to No. 1329, a new folding calendar, at \$2.40 per set. Most of the Numbers can be had with silk fringes ranging in price from \$2.25 to \$12 per set. Stock will be ready for delivery September 15.

Besides the above, attention is called to our New Birthday Cards, Scripture Texts Cards, New Panels, New Water Colors, by Thomas Moran, and other publications. Our line of Thanksgiving Day Cards will also be shown by our agents.

THOS. DE LA RUE & CO.'S IMPERIAL TREASURY

THIS POPULAR STATIONERY is made from the very best rags, and is tub-sized with the purest animal size by a process which strengthens it throughout its entire texture. It is supplied with a rough, mill rolled, or highly finished surface. Each sheet of paper bears the watermark, "Imperial Treasury, De La Rue," and the Imperial Crown and Monogram. Both paper and envelopes are packed in neat, ornamental boxes, with hinged lids and fall-down flaps—the paper in five quires and the envelopes in boxes of one hundred. This paper combines the excellences of hand-made paper, with the best characteristics of machine-made paper, and we can with confidence recommend it to all stationers who deal in first-class stationery.

Samples and prices on application to our American representative, **Mr. A. J. PULSFORD**, P. O. Box 1590, New York.

THE BAY STATE PAPER COMPANY,

HOLYOKE, MASS., were among the pioneers in the W. C. Paper trade and their goods, from the start, were distinguished for their fine quality and the superior style in which they were wrapped. Their example has been approved and imitated by a swarm of competitors, who have flooded the market with inferior goods, put up in packages of 600 to 800 sheets, misleading the unwary, and sold at apparently lower figures; but the trade and consumers generally recognize the fact that a good article, honestly put up, in 1,000 sheet packages, is the most profitable both for use and for sale. Their goods are all guaranteed 1,000 sheets to package, and no short count. No wood is used in any of these papers, but they are made of the very best stock in the market.

THE "MEDICATED BOUDOIR" BRAND

64 SUDBURY ST., BOSTON, MASS.

WHOLESALE

DANIEL SLOTE & COMPANY,

Manufacturers of

BLANK BOOKS.

Nos. 119 and 121 William Street, New York.

It is universally acknowledged that goods of our manufacture are the best self-made goods in the market.

Since our introduction of Duck Bound Blank Books throughout the United States, we have added largely to our variety of bindings, and for the past two years have successfully introduced the NOW POPULAR SLATE COLOR.

In addition to their value from an Art standpoint, they will be found useful in every household as a historical reference.

RALPH TRAUTMANN, Publisher, 312 Broadway, New York.

Trade Gossip.

All new goods and designs which are not, strictly speaking, "Novelties" will be noticed under this head. The trade are requested to forward descriptions with samples in order to secure proper notice.

The Baker Lithograph Company, Boston, Mass., has failed.

Boyd & Quigley have succeeded Joseph Reed, publisher, Delevan, Ill.

J. L. Kroesen, publisher, Battle Creek, Iowa, has sold out to S. W. Young.

S. C. Fuller, bookseller and stationer, Traverse City, Mich., has sold out.

John Smith, newsdealer, &c., Plymouth, Mass., has sold out to Chas. A. Smith.

William E. Gilmore & Co., printers, Woonsocket, R. I., have sold out to C. A. King.

C. Hirstel & Co., booksellers and stationers, Portland, Oregon, are offering to compromise.

Joseph R. Gresimer, of the firm of Gaskill & Gresimer, paper dealers, Philadelphia, Pa., is dead.

W. H. Elliott, dealer in notions, Portsmouth, Ohio, has been burned out. Loss \$3,000; insured.

A. Mellish, dealer in fancy goods, Chatham, Ont., is offering to compromise at 45 cents on the dollar.

Heymer & Amory, electrotypers, &c., Boston, Mass., have dissolved partnership. The style is now John Heymer & Co.

E. A. Flint & Co., booksellers and stationers, Yarmouth, Nova Scotia, have assigned to A. & W. McKinlay as security.

A. R. Chisholm & Co., publishers, New York city, have dissolved partnership. A new firm has been formed under same style.

Knobel & Jamison (Eastern Publishing House), Philadelphia, Pa., have dissolved partnership. Godfrey C. Knobel continues under same style.

Any traveling salesman who has room for a line of samples of staple goods for the stationery trade should send his address to the Philadelphia office of THE STATIONER.

O. Bourgoin and Mr. Duchesneau are to be admitted to the firm of G. Bourgoin & Co., wholesale dealers in fancy goods, Montreal, P. Q., Can., as partners under the style of Bourgoin, Duchesneau & Co.

E. J. Kennedy and J. R. Kennedy, under the style of E. J. Kennedy & Co., have opened a stationery, book, fancy goods, and music store at Tuscaloosa, Ala. They ask the trade to forward their catalogues, price lists, &c.

The firm of Beldin & Westwood, bookbinders, &c., Springfield, Mass., having dissolved, the business is continued by H. L. Beldin, who has issued an announcement of the fact in one of the handsomest circulars that has yet been sent out to the trade.

Marcus Ward & Co. have given the public of Philadelphia a splendid opportunity for seeing their beautiful Christmas and New Year cards. They are tastefully arranged and exhibited in their store, which is lighted by numerous jets of gas, displaying to advantage the merits of these artistic little pictures. They are much admired by the numerous visitors to this novel show. It was arranged by W. H. Ward, of the firm, who left for England last week. This exhibition is intended as a compliment to the people of Philadelphia.

The repoussé bronze art pieces, referred to in a recent issue, have been received by Charles J. Cohen, Philadelphia. They are pronounced by judges and critics to be admirable specimens of fine art work. One of the subjects is the goddess Venus beckoning to Cupid, and is a spirited and attractive piece; a pair of game pieces for dining-room or hall, and "The Seasons," are realistic and beautifully executed. Mr. Cohen is also receiving a line of European engravings (originals), which, neatly framed in ebony and with easels of the same character, will, it is thought, make a display unequalled as yet in the wholesale trade.

Hover's manuscript writing paper, sold by H. L. Lipman, Philadelphia, is making its way in the trade, by whom it is now fully appreciated. This paper has a great advantage, as it gives a black and perfect manuscript. This result is reached by a chemical process of sizing which permeates the whole thickness of the paper. Persons who have a good deal of writing to do and have used this paper are said to prefer it to all others.

Hard & Parsons' line of stamped and illuminated papeteries for the spring trade are now being introduced. The assortment is large, and possesses many features of merit in the way of novel and unique designs. Although the line during the season just closed was very large, varied, and rare, the one intended to be offered for the spring season will, it is said, eclipse it.

L. Prang & Co. have their line of valentine cards for 1882 complete, and their travelers are now on the road with samples. It is far superior to that of last year, and even of this year's line of Christmas cards. The prices range from ten cents to five dollars per card, and the assortment consists of some twenty-four different series.

L. Prang & Co. will, before the close of this month, celebrate the twenty-fifth anniversary of the organization of the firm. Extensive preparations are being made by the employees to make the affair a grand success, and it will no doubt be an event worthy of the occasion, and one to be long remembered.

Owing to the great increase in the firm's business, McCarty & Hasberg will move to 487 Broadway, corner of Broome street, on February 1. This house is now offering great bargains, and will continue to do so till the season closes.

The friends of Liebenroth, Von Auw & Co. will be glad to learn that this firm has largely increased its facilities for blank-book manufacturing, and it is now prepared to fill all orders with promptness and dispatch.

Joseph Campbell, printer, at No. 15 Vandewater street, this city, has made an assignment to Peter F. Collier. His liabilities are about \$15,000. The Standard Machine Company hold a chattel mortgage for \$4,800.

Aikin, Lambert & Co. show a large variety of new designs in cartridge pencils. Among them are many with mountings representing animals. This firm is still very busy.

W. H. Ward, of the London house of Marcus Ward & Co., who had been for several months in this country, left for home on November 30 per steamship Gallia.

Victor E. Mauger & Petrie are sole agents for the Knickerbocker Card Company, Albany, N. Y., and are very busy supplying the trade.

Petrie's face powder has been awarded a diploma from the judges at the late American Institute fair.

R. Laidlaw, bookseller and stationer, Woodstock, Ont., has been closed by the sheriff.

John M. Spencer, dealer in notions, Baltimore, Md., is dead.

Joseph Campbell, printer, New York city, has made an assignment.

John S. Spooner, printer, Boston, Mass., has sold out to Spooner & Co.

H. Wagner, publisher of the *Pacific Coast*, Hollister, Cal., has sold out.

E. J. Hall, publisher, Wahoo, Nebraska, has sold out to a joint-stock company.

C. Dickman, fancy goods dealer, Malden, Mass., has sold out to Fred. B. French.

A. M. Neal & Co., dealers in fancy goods, Salem, Mass., are advertising to close out.

Edward Donaldson, bookseller and stationer, Owatonna, Minn., has sold out to W. H. Kelly.

J. S. Locke & Co., booksellers and stationers, Boston, Mass., have been sold out by the sheriff.

Armstrong & Whedon, publishers, York, Nebraska, have dissolved partnership. F. L. Whedon continues.

Joseph Webber, publisher of the *Northern Advocate*, Claremont, N. H., has sold out to Robert E. Muzzey.

Mulkey & Burke, booksellers and stationers, Helena, Ark., have dissolved partnership. Burke & Co. succeed.

Henry Levy & Son have still on hand a few desirable articles suitable for the holiday trade, which they will close out at low prices.

A. Wallach, of A. & E. Wallach, who recently recovered from a long and severe illness, is now to be found at the warerooms every day.

Sargent's double-game register is said to be one of the best articles of the kind which has lately been placed before the trade. For a full description see advertisement in this issue.

Redhead, Wellslager & Co., Des Moines, Iowa, have taken orders since September 15 for 750,000 rolls of wall paper. This would load a freight train of about forty cars, if sent in one shipment.

C. M. Ward, representing the Springfield, Mass., Printing Company, was in the city this week. He has been making a trip through the West, and he reports that trade throughout that section is very good.

Hall, Nicoll & Granbery, 20 John street, this city, have issued a handsomely-printed catalogue of their holiday offerings. The artistic novelties and useful articles which this firm displays are adapted to the most refined tastes.

As A. & E. Wallach are offering great inducements to purchasers, parties requiring articles in any of the lines the firm handles, might find it to their benefit to call at the firm's warerooms. A recent importation of albums having arrived, some excellent selections may be made from these goods.

Robert H. Miller, Nicholas Ussing and David Miller, composing the firm of Miller, Ussing & Co., commission paper dealers, at 103 William street, this city, made an assignment on Tuesday, without preferences, to Charles H. Williamson, Secretary of the L'Artiste Publishing Company, No. 7 Warren street. The liabilities are about \$18,000. Among the largest creditors are the Agawam Paper Company, \$3,000; Megargee Brothers, Philadelphia, \$2,500, and John G. Ditman & Co., of Philadelphia. The assignment was precipitated by an attachment on a claim for \$500, and the sheriff is in possession of the store and assets. It is understood that the assignee will call a meeting of the creditors in a few days, and that a proposition will be made to

pay 25 cents. The firm succeeded Flemming, Miller & Ussing about May 1 last.

The stock of P. P. Phillips, wholesale dealer in notions, New Orleans, La., has been attached.

D. B. Brooks & Co., Boston, are giving away a bronze inkstand with every bottle of ink sold by them.

The *Daily News Company*, St. Louis, Mo., has been incorporated; capital stock, \$34,000, half of which is paid up.

J. L. Putnat, Jr., 23 East Thirty-first street, represents J. L. Putnat, stationer, &c., of Brownsville, Texas, in New York.

The straw board manufacturers and dealers will meet at the Grand Central Hotel, in this city, on Wednesday next, at ten A. M.

Salisbury, Vinton & Co., paper manufacturers, Indianapolis, Ind., have been succeeded by the Salisbury and Vinton Paper Company.

Bond & Tinsley (East River Printing Office) 372 Pearl street, New York, have dissolved partnership. James H. Tinsley will continue the business and settle the accounts of the late firm.

Charles J. Cohen, Philadelphia, states that an active demand exists for envelopes for inclosing Christmas and New Year cards. This house manufactures eighteen sizes specially adapted for current styles of cards. Each size is boxed separately in quarter-thousands and the eighteen sizes are also put in assorted boxes of five hundred envelopes, which is a great convenience to the retailer, and is in demand from all parts of the United States. Samples and price lists will be sent on application to the house.

The Birnie Paper Company is a new concern which has just started at Springfield, Mass. It makes a specialty of illuminated papereries. Mr. Birnie, of this house, was for a long time with the Springfield City Paper Company, and will be glad to hear from his friends. The firm proposes to get out something new every week.

Case Brothers, South Manchester, Conn., forward samples of their press papers. These are excellent goods, and secured the highest award at the Paris Exhibition of 1878. The firm is now exporting considerable quantities of these papers, and its foreign trade is increasing.

It seems that Kansas City is buying from Pennsylvania most of the mucilage it uses. Ewing & Co., Philadelphia, have sold to one firm in Kansas City one hundred gross packages of that article.

The *Southern Farm and Fireside*, Baltimore, Md., has heretofore been published monthly, but is now a weekly. This paper is the organ of the Maryland, West Virginia and Tennessee Grangers.

A. D. Porter, printer, has removed from No. 4 Liberty square to No. 79 Milk street, Boston. W. Stillman has been admitted to partnership, and the firm is now A. D. Porter & Co.

The *Daily News Company*, Springfield, Mass., has added a large job and book printing and printed wrapping paper manufacturing department to its business.

The *Cultivator and Country Gentleman*, Albany, N. Y., will be enlarged on January 1, each weekly number containing twenty instead of sixteen pages.

Langfeld, Turner & Andrews' stock of leather goods is the finest and largest of its kind. It is certainly to the interest of buyers to see it before purchasing.

Marcus Ward & Co. will remove from Philadelphia to 734 Broadway, this city, on February 1, 1882. Alfred Ireland will continue as superintendent and John Glenn as traveling representative.

The illustrated Christmas number of the *Publishers' Weekly*, just out, is a holiday gift-book in itself. It is handsomely printed, and the engravings are things to keep. Mr. Leyboldt has never done better.

A meeting of the committee of the creditors of the American Book Exchange took place on Friday last, but as John B. Alden, the manager, had no statement ready, an adjournment was had until December 16.

Fred. W. Koch, of W. L. Stork & Co., Baltimore, Md.; John R. Runyon, of Morristown, N. J.; and William Entrekin, of Manayunk, Pa., were among the visiting members of the trade in the city during the past week.

J. H. Bufford's Sons show this week two new series of advertising cards. One has four designs representing the seasons of the year, and each card contains a calendar for 1882. The other, which is called the Santa Claus Series, also consists of four designs which show some of the scenes that invisible being is said to pass through on Christmas Eve. This house has issued an exceedingly well executed india-ink drawing of its lithographic factory at Boston. It is 22x28 inches in size.

THE STATIONER.

DEVOTED TO THE INTERESTS OF THE

Stationery and Fancy Goods Trades.

WEEKLY--\$2.00 PER ANNUM.

Single Copies - - - 10 Cents.

NEW YORK, THURSDAY, DECEMBER 8, 1881.

Advertisements cannot be received for insertion in the current week later than 12 M. on Wednesday. The charge for advertising is 25 cents a line, each insertion. Special terms for standing and displayed advertisements to be had on application.

This journal aims to be a medium of information for and a representative of the interests of every one connected with the stationery and fancy goods trades. It contains a full and trustworthy survey of the market for stationery in this country, in all cases giving the actual prices at which goods can be bought of importers and jobbers in this city, together with a detailed account of novelties in the trade, patents relating to stationery, and current items of interest. A review of foreign markets and accounts of movements abroad will also be furnished, and no pains will be spared to make THE STATIONER a thorough and complete exponent of the trade.

Subscription and postage for Great Britain, per annum..... 12s.

Any information our readers may wish to obtain shall be cheerfully given, and prompt replies will be made to all inquiries addressed to us on any subjects of interest to the trade.

Communications on all trade matters are earnestly solicited. Address

HOWARD LOCKWOOD, Pres. and Treas.

Subscribers to THE STATIONER can be supplied with the best cloth binder in the market. Deliverable at the publication office. Price, fifty cents.

Readers of this paper who avail themselves of the information obtained from its columns, by advertisement or otherwise, are requested to notify their correspondents of the source of their information.

Don't forget the New Zealand Exhibition! The trade of New Zealand is worth looking after, and a great many varieties of American stationery, in staple and special articles, as well as paper and the manufactures of paper, can gain a market there.

WASHINGTON stationers, as will be seen from a correspondent's letter in another column, are quite put out with the competition they meet with from dry goods houses. The instances of low prices cited are certainly aggravating, and it is not to be wondered at if booksellers and stationers so situated refuse to order goods for such competition.

WE observe that there is some dissent from the proposition for a general bankrupt law. This is not unexpected, since there are always differences upon every measure of commercial importance. But whatever objections arise, have not, we think, logical effect in opposition to the statement that there is too much disagreement and uncertainty in the practice of the different States in dealing with insolvents. Straight business dealings demand straight methods of legal procedure. It is best, however, to weigh each objection, and to utilize its suggestion, if feasible.

READERS of this paper, who keep watch of its reports, will have noted that there appears to be an increasing number of failures in the trade, and that, in such cases, the assets do not compare favorably with the liabilities. There is warning in this. It shows that there is a tendency to go too far, and to stretch credit to a limit not warranted by the extent of capital or the nature of the trade done. If people are trusting more freely, it is because the conditions of trade have been such as to warrant confidence. There is a time to restrain this feeling, and to guard against the turn in business. The banks have begun to think that it is prudent to limit and guard their loans, and there has been more than once of late a stringency in money that has been strongly felt. These are warnings of which we should take notice.

In a communication addressed to us by a well-known paper-making firm, we are glad to find evidence that the attempt to develop an exporting business has been so successful as to produce a marked increase in the number of foreign orders. There are other manufacturers who are undergoing the same experience, and we doubt if those who have been induced to try the foreign markets, however unwillingly, could be induced to withdraw from that field now that they know what it is. The firm we refer to makes first-class goods, which are not excelled, if they are equaled, by similar goods of European manufacture. The fact that the papers exported find buyers and that orders come in larger quantities and with a wider demand, is proof that our goods will sell. Confronting this fact, no one should say that it is of no use to try to sell abroad,

or that they do not care to engage in the export trade.

Communications.

[Correspondents are requested to write on only one side of their paper. No responsibility for the opinions of correspondents attaches to this paper.]

"A Universal Disgust."

WASHINGTON, D. C., Nov. 30, 1881.

To the Editor of The Stationer:

There is a universal disgust among the booksellers and stationers in this city at the present time. The holidays, until the last year or two, have been heralded with joyful greetings, and happy anticipations after a drought in business. This year is an exception, however, owing to the competition of a well known fancy dry goods and notions dealer on Seventh street, N. W., who has his window crowded with publications of the well known publishers of Philadelphia and New York, marked at just enough to cover cost, freights, &c. For instance, Porter & Coates, Lippincott, American News Company's and Worthington's poets, regular retail price, \$1.25—60 cents; English "Chatterbox," \$1 retail, formerly \$1.25—65 cents; Porter & Coates and Routledge's popular pencils, retailing at \$1 and \$1.25, offered at 65 cents; McLaughlin's toy books, games, &c., at a few cents above cost; Christmas and New Year's cards, box stationery, &c., all going the same way.

In conversation with one of the largest dealers a few nights ago, and who seemed thoroughly disheartened as we looked over his valuable stock, which he was compelled to reduce to a fractional profit to hold his trade, he ventured to state that the whole business was being demoralized and taken out of the legitimate dealers' hands.

Several of the agents of these houses have been muzzled during the last few weeks, and where they have been accustomed to place large orders have been requested to state if they have sold outside of the trade, and replying in the affirmative, have been refused an audience. In fact, we have concluded, when we find such a man, to notify other dealers to refuse his goods, and when we find the illegitimate dealers plying their catchpenny business to our injury, and by handling certain lines, to repudiate the line, and push other lines of respectable houses not in competition with their reputable and clearly defined authorized agents.

It is a perfect farce and hazardous undertaking for legitimate dealers to do business when the publishers and jobbers themselves conspire against them.

OCCASIONAL.

A fire occurred yesterday in the five-story building on the corner of Beekman and Gold streets. The fourth floor, where the fire was discovered, and the under floors, were occupied, among others, by Gaylord Watson, manufacturer of maps; John Metz, printing materials; J. H. Beal, lithographer; George Wright, directory publisher; and H. H. Thorp, printing presses, whose total loss will be from \$25,000 to \$30,000.

Several attempts have been made lately to rob the show-case of A. Zeltmacher, at 84 Duane street, containing fancy leather goods. On Friday of last week the case was broken open, and its contents were afterward found at a place in Pearl street, near Park street, where it was claimed they were bought. Yesterday evening two boys were arrested in the act of opening the case again, and it is supposed that they are the same persons who robbed it before.

ANSWERS TO CORRESPONDENTS.

K. & Co. ask for address of Thaddeus Davids & Co.
Ans.—No. 127 William street, New York.

C. & Co. want names of manufacturers of leatherette.

Ans.—Rice, Kendall & Co., Boston, Mass., are manufacturers' agents. We believe that the Shawmut Manufacturing Company, Boston, is a manufacturer, and we are told that there is a leatherette company at Turner's Falls, Mass. The Evans Artificial Leather Company makes an artificial fancy leather; Walter N. Dole, 92 Pearl street, Boston, is general agent for the company.

B. wants to know who is manufacturer of wire easels of style shown in illustration forwarded.

Ans.—Cannot tell you who makes the easel designated. Woods, Sherwood & Co., Lowell, Mass., make white lustral wire goods of all descriptions.

The prizes awarded at Moore's art gallery for L. Frang & Co.'s Christmas card competition amounted to \$4,000. Of the designs sent in seven were awarded the eight prizes, the first two, of \$1,000 each, falling to one design, viz., that by Dora Wheeler. All of the designs receiving prizes are very meritorious. The result of the competition shows that the idea of a popular vote is a very good one, and it is a noteworthy and gratifying fact that the artists' decision and the popular choice agreed upon the same design for the first prize, thus showing that the artists' judgment does not widely differ from that of the public, and that the public's taste in and appreciation of matters of art are far higher than is sometimes represented. The exhibition has been removed from this city to Boston.

A largely attended meeting of the creditors of the Massachusetts Paper Company took place on Thursday of last week at Springfield, nearly every creditor being represented. Mr. Olmstead, of Springfield, presided. Mr. Cline read a statement, showing a total liability of about \$205,000, and nominal assets of \$56,000. A committee of five was appointed, consisting of Mr. Timmson, of Timmson Brothers, of Boston; Mr. Baker, of the Collins Paper Manufacturing Company; James Newton, of Holyoke; Mr. Graves, of Graves & Brown, Albany, and S. Weber Parker, of Butterworth & Smalley, this city. This committee is to make a thorough investigation of the affairs of the concern, employ good legal advice, and report to an adjourned meeting to-day.

The committee of the creditors of W. J. Anderson have been busily engaged in examining the stock, etc., in conjunction with the assignee, Mr. Seibert, and hope in a few days to call a meeting of the creditors and submit a proposition for Mr. Anderson to close up the estate for the best interests of all concerned. The committee, consisting of Mr. Wallach, Mr. Martin and Mr. Donaldson, have had five or six meetings, and have devoted ten or twelve hours to the work. The committee has ascertained that the liabilities are largely in excess of what was stated at the first meeting of the creditors, and that these are caused by endorsements on the paper of various parties. The total liabilities will amount to upward of \$45,000.

It is reported that the actual assets, book accounts, stock, &c., of the Pequonnock Paper Company, the nominal value of which was given last week at \$4,343.41 over and above the value of the mill, are only \$1,000.

Willy Wallach has issued a circular announcing that he intends to withdraw from the general jobbing stationery trade and to confine his business to commercial stationery and the importation and manufacture of a few specialties.

Samuel Raynor & Co. have just issued a full line of Christmas card envelopes adapted for the smallest as well as the largest sizes, and are having a large demand for them. The firm notifies to the trade that if they are in need of any they had better order at once.

G. Lautenschlager, 21 West Fourth street, Cincinnati, has brought out a new numbering and paging machine, which has been examined by practical men and pronounced to be a very perfect and complete machine. Besides his anti-friction figure-head, he has introduced another new feature, which secures a uniform stroke or impression, regardless of how the operator's foot may be stimulated. The well known ingenuity of Mr. Lautenschlager is fully vindicated in this machine, and, although it is just completed, he has already several orders.

Among the latest publications of Estes & Lauriat, Boston, are a "Young Folks' History of Russia," by Nathan Haskell Dole, and "Zig-Zag Journeys in the Orient," by Hezekiah Butterworth. Both of these are for juvenile readers and are handsomely illustrated. They convey a good deal of historical information, expressed in an interesting and pleasing form. "Sketches and Scraps" is the title of a nursery book illus-

trated by Henry Richards, text by Laura E. Richards. The "jingles" of this book are of the usual type, some of them apparently new, and the illustrations are apt and well executed.

RECIPE FOR BRONZING IRON.—Iron has sometimes to be bronzed for domestic purposes. The following is a very simple way of obtaining a very good bronze: Mix an equal quantity of butter of antimony and oil of olives; put this mixture on the iron which is required to be bronzed with a brush, the iron having been previously brightened with emery and cloth, and leave it for several hours; then rub with wax and varnish with copal.

A vein of what is supposed to be a new metal, is said to have been found in digging a well near Battle Creek, Mich. The find is in a stratum of rock about 28 feet below the surface. Pieces of some of the nuggets taken out, it is said, have been melted up, and have all the appearance of the best gold; but when the acid test is applied to the metal it corrodes, showing that it is not the genuine precious metal. It is not known what metal it is, and specimens have been sent away for analysis.

Market Review.

OFFICE OF THE AMERICAN STATIONER,
WEDNESDAY, December 7, 1881.

THE MONEY MARKET.—The money market continues stringent, and is likely to so continue till after the turn of the year. Borrowers on stock collateral continue to pay full legal rate, and at times commissions ranging from 1-64 to 1-32 of 1 per cent. per diem for call loans, while trust companies and savings banks are lending upon government bonds at 4 per cent. Commercial discounts remain at @7 per cent. on best indorsed paper. The stock market has ruled quiet, with prices variable. The recommendation of the President in his message, and the Secretary of the Treasury in his report, that unless the 3½ per cent. bonds could be funded at a much lower rate of interest, they would not favor legislation on the subject, caused an improvement in the stock market at the close. Government bonds were active and ¼ lower for the 4s and extended 5s, and ½ for the 4½s; the extended 6s are ¼ higher. Railroad bonds were dull and irregular, but generally lower. The foreign exchange market was rather heavy, owing to the stringency of the local money market and the increased offerings of bankers' bills.

THE PAPER MARKET.—The market has undergone no important change since our last business with the city trade continuing moderately active. The demand for news and low grade book papers keeps very close to the production, and there is no accumulation of these. Although paper has been sold on very close margins, trade during the past month is generally reported to have been much larger in volume than for the corresponding month of last year. With the exception of the weak feeling in straw wrappings, prices continue to rule with considerable steadiness, and there are no indications of any early change. There is no complaint now from any direction of a lack of water, and manufacturers are enabled to execute their contracts without any interruption.

THE STATIONERY MARKET.—In sales of staple goods there is a lull usual at this time of the year. Dealers in fancy goods suited to the holiday trade as a general thing continue very busy, and large orders for Christmas and New Year cards are still being shipped. A feature of the trade at the close of the season will be the unusually small stocks of goods to be carried over into next year. This is very encouraging to dealers, as oftentimes the left over stocks have been so large as to lessen very much the profits on the season's trade. There has been very few out-of-town buyers in the city during the week. Prices keep very steady, and, as a general thing, firm.

JAMES SARGENT'S Complete Double
 Game Register, or Counter.

For Whist, Euchre, Old Sledge and various other Games
 PATENTED AUGUST 16th, 1881.

As shown in the half-sized cut above, the four rows of Gold and Nickel Plated Pins are so arranged as to enable the players to tally the points made by each side in a game, and also the number of games won. The two outside rows of pins are for tallying the points made in a game, and the two middle rows for registering the number of games won.

DIRECTIONS FOR USE.—First see that all pins are pressed down. Assign one row for points and another for games to each side. As points are made up and games won, pull up pins to correspond in the respective rows indicating the points made and the games won by either side.

VIEW OF HALF SIZE OF REGISTER.

A. shows pins in original position; B. shows pins as shown up; C. shows packing between the two upper plates; D. shows space between the middle and bottom plates.

Having no springs or other complicated machinery—the pins being held in position by the friction of an elastic packing—there is no possible danger of getting out of order from use or otherwise; while the superb finish in gold and nickel plate and velvet top renders it highly ornamental, as well as durable.

Net Price, \$30.00 per dozen.

Shipped by Express, C. O. D. Samples sent to the trade by mail on receipt of \$2.75. Weight, 25 oz.

Erie and Chicago Line

PASSENGER ROUTE.

THE SHORTEST, QUICKEST, AND SAFEST ROUTE to all points EAST. Fine tracks and lowest rates. The only route running **PULLMAN PALACE HOTEL COACHES** from

CHICAGO to NEW YORK,

LEAVING AT 4.40 P. M.

and the only route by which passengers from the NORTH-WEST can connect at CHICAGO and secure locations in these Palace Hotels on Wheels.

You should travel by the **E. & C. LINE,**

BECAUSE its trains run through from Chicago to New York, avoiding the dangers of transfers, the risks attending the changing of cars, and the possibility of missing connections.

BECAUSE the PALACE HOTEL COACHES run in connection with its trains, furnish Meals as good as can be had at any first-class hotel, and allow passengers to eat with as much comfort as at their own homes.

BECAUSE not one passenger has been killed or even injured on its trains since the opening of the line five years ago. Nor has an accident of any kind occurred.

BECAUSE the great variety of scenery on this line renders the journey pleasant and profitable.

BECAUSE provision has been made for running the trains from Mansfield, "Special" to destination, whenever they arrive after departure of train forming regular connection. This insures a continuous passage between New York and Chicago.

No. 29 MURRAY STREET, NEW YORK.

BAUGHMAN'S Ladies' Lap Desk Tablet.

(Spring Band, Patented July 12, 1881)

The Patent Spring Band extends across the entire width of the Tablet, holding the paper firmly without leaving an impression, a fault so marked in all other spring tablets.

The arrangement of the Spring Band permits the adjustment of the paper upward, so as to afford a constant rest for the hand.

They are neatly trimmed with Cloth, Russia, Calf, and Silk Plush, and furnished with Superior Blotting Paper, and being made of strong Binders' Board, will not warp.

MANUFACTURED BY

SPECIAL HOLIDAY NOTICE TO STATIONERS.

The following Salable Novelties, selected from **BRADLEY'S List for 1881-2**, are specially adapted to your **HOLIDAY TRADE**:

The Aquarium and Managerie.—The finest toy of the season. Just issued.

Old Maid Improved—The most popular game of the year.

Patience.—The best new game in the market.

Words and Sentences.—The best word game made.

The Historiscope Improved.—The finest panorama ever made, with new designs in oil colors. Very pleasing and instructive.

Excursion to Coney Island.—New and very funny visit to the Gypsies. Very amusing for a company of young people.

Little Object Teacher.—New Edition. Very fine.

MILTON BRADLEY & CO., SPRINGFIELD, MASS.

WILSON BROS. CO., 119 Chambers Street, NEW YORK AGENTS.

PERFECTED STYLOGRAPHIC.

The original and genuine Pen. Warranted the best made. Thirteen Patents granted to **A. T. CROSS**, the last, June 30, 1880, being the most important and giving the name **Perfected**.

MAXIMUM.—Holds most ink of any pen made; tires the hand less than smaller barrels. Fits Hambley's Pocket. Same price as Long.

LONG.—The famous Desk Pen. Extra Long. Holds most ink, except the **Maximum**.

SHORT.—Most widely known and sold heretofore; but **Maximum** and **Long** are much better for desk or Hambley's Pocket. So this will be largely superseded.

GIANT, with Cord and Gold Ring, same price as **Short**.

LITTLE GIANT
Plain, \$3.00.
All styles up to
\$4.50.

LITTLE GIANT.
The Ladies'
Favorite.

Thirteen patents granted; seven more applied for; more genuine improvements; better record; more styles; larger stock; more thoroughly protected by patents than all rivals combined. Dealers and agents supplied with wood, glass and paper signs, placards, circulars, leaflets and cuts. We make both largest and smallest Pens, all of which will have the new improvements. Sole Agents for the World. See Descriptive Circulars.

READERS AND WRITERS ECONOMY CO., 25 to 33 FRANKLIN ST., BOSTON.
4 BOND STREET, NEW YORK.

"THE GREAT ROCK ISLAND ROUTE"

Calls your attention to the following REASONS WHY, if about to make a Journey to the GREAT WEST, you should travel over it:

As nearly absolute safety as is possible to be attained, are connections in UNION DEPOTS, at all important points. No change of cars between CHICAGO, KANSAS CITY, LEAVENWORTH, ATCHISON or COUNCIL BLUFFS. Quick journeys because carried on Fast Express Trains. Day cars that are not only artistically decorated, but furnished with seats that admit of ease and comfort. Sleeping cars that permit quiet rest in home-like beds. Dining cars that are used only for eating purposes, and in which the best of meals are served for the reasonable sum of seventy-five cents each. A journey that furnishes the finest views of the fertile farms and pretty cities of Illinois, Iowa and Missouri, and is afterwards remembered as one of the pleasant incidents of life. You arrive at destination rested, not weary; clean, not dirty; calm, not angry. In brief, you get the maximum of comfort at a minimum of cost.

That the unremitting care of the Chicago, Rock Island & Pacific Railway for the comfort of its patrons is appreciated, is attested by its constantly increasing business, and the fact that it is the favorite route with delegates and visitors to the great assemblages, political, religious, educational and benevolent, that assemble from time to time in the great cities of the United States, as well as tourists who seek the pleasantest lines of travel while en route to behold the wonderful scenes of Colorado, the Yellowstone and Yosemite. To accommodate those who desire to visit Colorado, for health, pleasure or business, in the most auspicious time of the year, the Summer season and months of September and October, the Company every year puts on sale, May 1st, at all coupon ticket offices in the United States and Canada, round trip tickets to

DENVER, COLORADO SPRINGS AND PUEBLO.

At reduced rates, good returning, until October 31st. Also to San Francisco, for parties of ten or more, good for ninety days, at great reduction from regular fares.

REMEMBER, this is the most direct route for all points WEST and SOUTHWEST. For further information, time-tables, maps or folders, call upon or address

R. R. CABLE,

Vice-President and Gen'l Mgr., Chicago.

E. ST. JOHN,

Gen'l Ticket and Pass'r Agent, Chicago.

LETTERS PATENT FOR INVENTIONS.

BY JAMES A. WHITNEY, COUNSELOR-AT-LAW.

VII.

WHAT CONSTITUTES A PATENTABLE INVENTION—
(CONTINUED).

The truism that a principle cannot be patented relates, therefore, only to principles not appropriated to useful purposes; it does not apply to a principle embodied in the *modus operandi* of any amelioration of the useful arts.

The case of *Boulton vs. Bull* was the first in which was given a full definition of the term "manufacture" as used in the statute of monopolies. The general conclusions of the jurists of the day were evidently embodied in the opinion of Chief Justice Eyre: "It was admitted in the argument at the bar," said he, "that the word 'manufacture' in the statute was of broad significance; that it applied not only to things made, but to the practice of making, to principles carried into effect in a new manner, to new results of principles carried into practice." No general definition of the term "invention," or broader view of its synonym "new manufacture," exists than his further declaration, as follows: "Under things made we may class in the first place new compositions of things, such as manufactures in the ordinary sense of the word; secondly, all mechanical inventions, whether made to produce old or new effects, for a new piece of mechanism is certainly a thing made. Under the practice of making we may class all new artificial manners of operation with the hand, or with instruments in common use, new processes in any art producing effects useful to the public. When the effect produced is some new substance or composition of things, it should seem that the privilege of the sale, working or making, ought to be for such new substance or composition, without regard to the mechanism or process by which it has been produced, which, though perhaps also new, will be only useful as a new substance. . . . When the effect produced is no substance or composition of things, the patent can only be for the mechanism, if new mechanism is used, or for the process, if it be a new method of operating, with or without old mechanism by which the effect is produced." It has been already observed that this case, and others decided at about the same period, formulated the essential principles of the English practice, and it is worthy of note that this leading case established the patentability—as within the term "manufacture" of new substances and articles of manufacture, compositions of things, new artificial manners of operating, new processes in any art, and new methods of operating with or without old mechanism. This is an enumeration comprehensive enough to include the major subdivision of "invention" as understood at the present day.

The patentability of combinations was also admitted in the same suit, and eight years later, in 1803, Lord Ellenborough, in *Huddart vs. Grimshaw*, said: "I suppose it will not now be disputed that a new combination of old materials, so as to produce a new effect, may be the subject of a patent." This was extended in scope by Lord Eldon in *Hill vs. Thompson* in 1817, as follows: "There may be a valid patent for a new combination of materials previously in use for the same purpose, or for a new method of applying said materials."

Such, so far as concerns the subject matter, was the British law of patents, when it became the duty of American jurists to apply its principles in the administration of the American statutes. They followed it closely, softening its asperities, refining its distinctions, and elaborating its practice not less than its ethics into closer

and clearer accord with great principles of national policy and individual justice.

In this country the statutory definition of patentable subject matter, although verbally varying in the several acts, has remained substantially the same from the beginning, and in substance is identical with that established by the English courts. The constitution was simply the terms "inventions or discoveries." The act of 1790 employs the words, "invented or discovered any useful art, manufacture, engine, machine or device, or any improvement therein not before known or used." This act was repealed by that of 1793, which substituted the phrase "any new and useful art, machine, manufacture or composition of matter." This act stood unrepealed until the passage of the act of 1836, but it was supplemented by that of 1800, in which the terms employed were "any invention, art or discovery," and "any new invention, discovery or improvement." The language of the act of 1836 includes "any new and useful art, machine, manufacture or composition of matter, or any new and useful improvement on any art, machine, manufacture or composition of matter." The supplemental act of 1842 added "designs for industrial products. These are the definitions contained in the act of 1861, and in the existing law, the act of 1870. The matter of designs, as partaking somewhat of the character of copy-right, will be separately considered.

Apart from the above, the enumeration of subjects matter in the several statutes referred to is, in scope and intent, substantially uniform throughout. It is, however, practically only a subdivision into topical heads of the matter covered by the term "manufacture" in the statute of monopolies. Every variety of invention that could be protected under the latter term in the English practice has been protected under one or the other of the classes indicated in the American statutes. This naturally resulted from the fact that in the inception of the American system no precedents existed other than those of Great Britain, and to these, in the absence of American authorities under accepted principles of practice, our judges necessarily turned.

The unimportant case of *Rentzen vs. Ranows et al.*, the first under the federal law, was tried in 1804, or nine years after *Boulton vs. Bull* had settled, in the rough, the governing principles of ethics and practice in patent causes. It was nine years later still before *Marshall, J.*, in *Evans vs. Jordan*, and *Story, J.*, in *Whittemore vs. Cutler*, first gave bent and direction to American patent jurisprudence, and the extent to which the British precedents and the reasoning of British judges was followed is manifest in all the decisions of that time. While, therefore, the subdivisions indicated in the statutes may be followed in the classification of the subjects matter for letters patent of the United States, English decisions, equally with those of our own courts, especially as relates to principles early decided, are applicable for all purposes of elucidation.

A meeting of the creditors of J. H. Van Kirk & Co. was held on Tuesday at the Stationers' Board of Trade, and was attended by about

forty creditors. The assignee, Francis M. Eppley, read a statement showing total liabilities of \$59,486.39, of which \$12,988.52 are preferred; nominal assets, \$53,931.61; actual assets, \$42,431.52; stock on hand, \$24,785.50; nominal value of book accounts, \$17,488.39; actual value of same, \$14,567.29; nominal value of bills receivable, \$4,605.74; actual value of same, \$1,401.43; nominal value of collateral deposited with L. S. Lawrence & Co., bankers, \$2,496.49; actual value of same, \$624.12. The preferred creditors are Beebe & Holbrook Co., \$3,488.52, Massasoit Paper Company \$2,500, and Chapin Paper Company \$4,500, and J. A. Townsend \$2,500. Henry Lindenmeyr is among the unpreferred creditors for \$1,300. The stock was carefully examined by J. F. Anderson, Jr., and an appraisal was made on his valuation, at a reduction of about seven and one-half per cent. on present market value, some of the lines not being full, and in an assignee's hands might be classed as odd lots. The assignee stated that he thought he could make the estate pay fifty per cent. in cash. After some discussion on the part of creditors, a committee was appointed to investigate the statements of the assignee, and to report at a future meeting whether it will be better to compromise with the firm, or instruct the assignee to close out the business. The committee is composed of E. P. Chapin, of the Chapin Paper Company, J. F. Anderson, Jr., and Henry Lindenmeyr.

A French journal suggests the following substitute for oil in sharpening tools: Instead of oil, which thickens and makes the stones dirty, a mixture of glycerine and alcohol is used. The proportions of the mixture vary according to the instrument operated on. An article with a large surface—a razor, for instance—sharpens best with a limpid liquid, as three parts of glycerine to one part of alcohol. For a graving tool, the cutting surface of which is very small, as is also the pressure exercised on the stone in sharpening, it is necessary to employ glycerine almost pure, with but two or three drops of alcohol.

One of the strongest cements, and very readily made, is obtained when equal quantities of gutta percha and shellac are melted together and well stirred. This is best done in an iron capsule placed on a sand bath, and heated either over a gas furnace or on the top of a stove. It is a combination possessing both hardness and toughness, qualities that make it particularly desirable in mending crockery. When this cement is used the articles to be mended should be warmed to about the melting point of the mixture, and then retained in proper position until cool, when they are ready for use.

SHRIVER'S NEW YORK COPYING PRESSES.

Received the Only Medal awarded for Copying Presses at the Paris Exposition of 1878.

All sizes, from smallest to the largest in use. All styles, from lowest priced to the most elaborate finish.

Large Steel-Arch Railroad Press; Flaten, 22x24.

Catalogues on application to T. SHRIVER & CO., 333 East Fifty-Sixth St., New York.

TRADE NOTICE.

These Celebrated Pens are now manufactured with unprecedented skill and care. They have the distinction—which has now become historical—of being the FIRST SUCCESSFUL AMERICAN STEEL PENS, also of having been so popular as to have been counterfeited to the extent of HUNDREDS OF THOUSANDS of gross, which was stopped by judgments of the SUPREME COURT of NEW YORK and of the UNITED STATES COURTS.

The genuine Pens are now sold direct to the Trade by the proprietors,

THE WASHINGTON MEDALLION PEN CO.,

229 Broadway, N. Y.

MAGIC POLE

(PATENTED JULY 12, 1881.)

For taking down from HIGH Piles, or Shelves, or putting up in HIGH places, Boxes having a projecting lid.

For Envelopes it is invaluable.

Price, \$1.00 each; per dozen, \$9.00. One MAGIC POLE sent anywhere by Express for \$1.25, except the Pacific Slope.

Williamson-Stewart Paper Co.
ST. LOUIS, MO.

Agents Wanted in all large Cities.

The J.W. Stoakes Automatic Shading

PEN.

FOR PLAIN, FANCY AND ORNAMENTAL

LETTERING.

WASHINGTON, D. C., March, 1880.
I desire to say that the "Shading Pen" invented by Mr. STOAKES meets a want long felt by penmen. The work done by it is perfect in line and shade. The rapidity with which lettering is done, aside from the beauty of the work, is enough to recommend it for general use.

H. A. WHITNEY, Ass't Cashier, U. S. Treasury.

U. S. ENGINEER'S OFFICE, St. Louis, Mo., }
February 11, 1880.

I have tried the PEN, and it gives great satisfaction. It is worth twice the price asked. It is valuable for headings, etc.

JNO. R. BALLINGER.

CHICAGO, April 21, 1880.
Indispensable for the execution of neat, attractive lettering, etc.

RAND, McNALLY & Co.

INFRINGEMENT IN FOUNTAIN PENS.

NOTICE TO DEALERS.—It is well known that the patent of Duncan Mackinnon, covering a central air tube in Fountain Pens, has been extensively infringed, and the owners of said Mackinnon Patent have issued a circular to the trade warning them against dealing in these infringing goods.

It is therefore no longer safe to buy pens having the air tube unless they are made under the authority of said patent.

The undersigned, C. W. Livermore, Proprietor of the Stylographic Pen Co., Providence, R. I., hereby gives notice that he is the only licensed manufacturer under the said Mackinnon Patent of Fountain Pens having the said air tube.

By the terms of his license no other parties can be authorized to manufacture pens having that feature, the said license being exclusive in its terms.

No other manufacturer, therefore, has the right or can obtain the right to represent himself as licensed to make such pens.

STYLOGRAPHIC PEN CO., C. W. LIVERMORE, Proprietor.

CONTRAST OF COLORS.

Harmony is determined by fixed natural laws. It is wrongly supposed that the art of arranging colors so as to produce the best effects in printing is entirely dependent on the taste of the operator. The increasing demand for decorative or ornamental work renders it of some importance to the letter-press printer to make himself acquainted with these laws; as, without some attention to them, the most elegant designs of the type founder, and the finest inks that can be made, may yield but an indifferent, if not a decidedly unpleasant result.

The frequent receipt of specimens of color work in which the rules of color contrast are systematically violated, proves that the subject is still a stumbling block to many printers, and that its principles are but little understood.

The following remarks will be of use to those to whom the subject is new; but for a thorough explanation they should refer to "Chevreul on Colors"—a valuable work in the French language, which has been translated into English.

I. We may in the first place, consider **WHITE LIGHT** as composed of three primary colors—blue, red and yellow—duly blended; these three, in an infinite variety of proportion, serving to produce all the hues in creation. If any two of these primaries are mixed, a *secondary* color is the result. Thus blue and red form *violet*, blue and yellow give *green*, red and yellow make *orange*. Each of these secondary colors harmonizes perfectly with the primary which does not enter into its composition. Violet, for instance—itsself a mixture of red and blue—harmonizes with yellow; green, having no red in its composition, agrees well with red; orange in the same way forms a perfect contrast to blue. Either of these contrasts has the effect of mutually brightening the colors employed; a red and a green, &c., being more beautiful when placed side by side than when viewed singly. This is termed the **HARMONY OF CONTRAST OF COLORS**; and a good example of it is seen in the scarlet geranium, or the holly; the one showing a light green leaf opposed to a bright red flower, and the other a deep green leaf with a dark red berry.

The *mixing* of colors is a very different thing from *contrasting* them; for, strange as it may seem, although one combination of the primary colors gives *white*, yet another proportion will produce *black*. While, then, red and green look beautiful side by side, it does not generally answer to print red ink on *green paper*. The reason is, that as the ink is slightly transparent, some of the green shows through it, and appears somewhat black, and thus lowers the brilliancy of the red in the same degree as so much black ink would if mixed with it. This remark will apply to orange or yellow on a blue paper, &c. The darker and fuller the body of color used the less it is affected in this manner.

The most perfect contrasts are those we have mentioned, which are formed by the complementary colors; yet the primaries blue, red, and yellow also agree well together. But if such colors as are not in harmony are placed near each other, the effect is very damaging to their brightness. While red is made more brilliant by the proximity of green, it is dimmed and spoiled by placing it next to orange. Neither blue nor red contrasts well with violet, because the latter contains each of these colors in its composition. In any case where they must come into juxtaposition, the unpleasant effect may be lessened by adding a little of the opposite color; so, if a violet is to contrast with red, it will be well to give it a shade of blue, making it more *purple*;

if, on the other hand, it is to contrast with blue or green, it should be made *redder*.

II. **COLORS WITH BLACK.**—In all contrasts, the depth of the color is an important element, but especially so in such as are to be effected in the presence of black. In but few instances will the latter bear the neighborhood of a very deep color to advantage, while it harmonizes with the lighter ones by contrast of tone. Yellow, from its near approach to white, should always be worked "full;" orange and green should always be full, and moderately deep in tone, to contrast with black. If a blue is employed, it should be light, or it will impoverish the black and be weakened itself. A very light blue border, with a broad margin of white between it and the body of matter inclosed, will give a clean, bright look to black ink, and whiteness to the paper. A light pink (such as carmine reduced with flake white or with clear varnish) is also good; yet perhaps the preceding is preferable. Dark and heavy borders are frequently a positive injury to printing, where the working in a light shade would have secured a good effect; for the border should always be so far secondary to the matter inclosed as not to draw off too much attention to itself.

III. **COLORS ON TINTED PAPERS AND TINTED GROUNDS.**—Besides the kind of harmony already mentioned, there is another, which is produced by the contrast of light and dark shades of the same color. This might be employed in letter-press more frequently than it is at present, with some advantage, as the effects it is capable of yielding are very chaste and pleasing. In a photograph or an engraving, all the effect is dependent on difference of tones of one color; and the beauty of a wood in summer consists chiefly in the contrast displayed by a variety of shades of green only. A deep green ink on a paper of a light tone of the same color is especially good if a heavy letter is used; and, indeed, in most printing in colors, full solid-faced letters should be preferred to outlines or shaded ones, which are difficult to work, and have at best but an inferior appearance unless the darkest tones are employed. A deep blue on a light blue ground, or against a light blue border, is also good; and without the latter accompaniment it is not unpleasant on a blue wove writing paper. To secure the proper effect, however, the tints should be of the same *hue*; that is, if the groundwork is of a bluish green, the color that is to be worked upon it should also be a green inclining to blue; and so on. This may easily be managed by adding a small portion of ink of the color required, until the hue is matched.

IV. **NEUTRAL TINTS.**—In selecting borders for the more chaste description of printing, it is a pretty safe rule to avoid such as cover much surface, if they are to be worked in any strong color or in black. When lighter tints are used they will bear extension over a larger surface; and in this case a pale gray or central border will have a beneficial effect on any body with which it is contrasted, as well as on black itself, which is purified by its proximity. If the central printing is black only, or in black and yellow, a *lavender* gray may be substituted for the border. And in any case in which the central matter is all in one color, it will improve it to have a border of gray which is *slightly tinged with the complementary of such color*. Thus, if the body be red, a very small portion of green may be added to the gray; and so forth.

In color printing absolute cleanliness is indispensable. The same roller should never be used for different colors, even after it has been washed. Rollers should be kept in a tightly

closed box; and in this manner they will remain a long time in good order. Tins of ink should be similarly preserved, and the lids never left off except at the moment of using from them. These are small matters; but it is only by patient attention to minute details that excellence can be attained in printing.

HOW TO MULTIPLY COLORS.—A printer who has on hand a stock of yellow, carmine, blue and black inks, may produce other colors and shades by intermixing as follows:

Yellow and carmine, mixed, will give . . . Ve million.
Carmine and blue Purple.
Blue and black Deep blue.
Carmine, yellow and black Brown.
Yellow and blue Green.
Yellow and black Bronze green.
Yellow, blue and black Deep green.

Lighter shades may be obtained by adding proper proportions of white ink.

TO MAKE A GOOD GROUND TINT.—Three pounds of best magnesia ground up in half a gallon of plate oil forms a transparent mass from which by the addition of such positive colors as black, vermilion, lemon-yellow, and bronze blue, innumerable tints may be manufactured, such as green, brown, lead, gray, buff, salmon, flesh, pink, purple, &c.

HOW TO USE DRY COLORS.—To produce fine qualities of printing inks by mixing pure dry colors with varnish, special attention should be paid to the following particulars:

1. No more should be mixed at a time than will be required for the job in hand.

2. Colored inks should be mixed upon a slate or marble slab, by means of the muller, and never upon an iron or other metallic table. The table, before mixing, should be thoroughly clean, and perfectly free from the slightest soil or trace of other inks.

3. For working colored inks, the roller should not be too hard, and should possess a biting, elastic face. When change of color is required, it should be cleaned with turpentine, and a moist sponge passed over the face, allowing a few minutes for the roller to dry before resuming its use.

For bronze printing, the rollers should have a firm face, or the tenacity of the preparation may destroy it; yet it must have sufficient elasticity to deposit the preparation freely and cleanly on the type.

4. Various shades may be produced by observing the following directions:

Bright Pink Ink.—Use carmine or crimson lake.

Deep Scarlet.—To carmine add a little deep vermilion.

Bright Red.—To pale vermilion add carmine.

Deep Lilac.—To cobalt blue add a little carmine.

Pale Lilac.—To carmine add a little cobalt blue.

Bright Pale Blue.—Cobalt.

Deep Bronze Blue.—Chinese.

Green.—To pale chrome add Chinese blue; any shade can be obtained by increasing or diminishing either color.

Emerald Green.—Mix pale chrome with a little Chinese blue, then add the emerald until the tint is satisfactory.

Amber.—To pale chrome add a little carmine.

Deep Brown.—Burnt umber, with a little scarlet lake.

Pale Brown.—Burnt sienna; a rich shade is made by adding a little lake as above.—*Paper and Printing Trades Journal*

BRONZING COPPER.—At the Paris mint medals are bronzed by boiling them for a quarter of an hour in the following solution: Pulverized verdigris, 500 grams; pulverized sal ammoniac, 475 grams; strong vinegar, 160 grams; water, 2 litres. An untinned copper boiler is used, and the medals are separated from each other by bits of glass or wood.

T. W. & C. B. SHERIDAN, 25 Centre St., New York.

I WILL INSURE YOUR HOGS.

Dr. Jos. Haas' Hog AND Poultry Remedy.

THE ONLY SCIENTIFIC SWINE REMEDY COMPOUNDED.

Read My Propositions!

First—When my remedy is used as a preventive, I will insure hogs by the head for a year, and will make a deposit of money to make such insurance good. If any hogs die, they will be paid for from such deposit; you can refer to my bankers, Messrs. Fletcher & Sharpe, Indianapolis, Ind., for my standing financially.

Second—Where my expenses are paid, I will visit herds of not less than 100, and I will arrest the disease among them, or forfeit \$500.

Third—After hogs have been regulated with my remedy, I guarantee that the annual cost of feeding will not exceed 25 cents per head. Furthermore, that the increase of actual flesh will far more than pay for the remedy used.

SEND FOR IT!

It is not an experiment, but an established success. Remember, it is the only remedy that is used and indorsed by the great breeders of this country and England. It owes its great fame to its genuine merits, and every mail brings tidings of its good work. The evidence in its favor is so strong the most scientific men of the country have pronounced it the conqueror of this disease. It is gaining ground daily, and no hog raiser up with the times can do without it. It is not only a protection against disease, but it is a powerful appetizer.

Inquire of my Bankers, Messrs. Fletcher & Sharpe, Indianapolis, Ind., for my standing. Will make a deposit of necessary money, and will pay for all that die.

SEND FOR IT! I GUARANTEE IT WILL STOP THE COUGH AMONG HOGS

and put them in fine condition for fattening. It will expel the poison from their system, tone them up, and invigorate them generally. It will make them thrive so as to astonish you. It will pay such a large per cent. on the investment, that no one can afford to be without it.

REFER TO ANY WELL KNOWN BREEDER OR SHIPPER IN ANY PART OF THE COUNTRY.

J. H. Whetstone, druggist, Iowa City, says: "The Haas Remedy sells better and with less effort than any proprietary medicine I have ever undertaken to sell of any kind. We have nothing in stock to-day but what I would rather do without than the Haas Remedy."

C. H. Klauenburg, druggist, Carlinville, Ill., says: "The Remedy sells well, and is the best on earth."

O. A. Elliott, druggist, Russell, Ia., says: "The Remedy has given good satisfaction here."

J. N. Penn & Sons, druggists, Sydney, Ia., say: "We hear good reports from what we have sold."

Ed. J. Brown, druggist, Edina, Mo., says: "It has given general satisfaction in this country. Have sold \$1,000 worth in three months. Have tested its merits myself."

J. M. Kufer, druggist, Macomb, Ill., bought \$400 lot of Haas' Remedy and sold \$300 of it in seven weeks.

SEND FOR IT. LIBERAL TERMS TO THE TRADE. Terms, Circulars, &c., on application.

W. Harris, druggist, Storm Lake, Ia., says: "It has given splendid satisfaction."

J. C. Eacker, druggist, Elliott, Ia., says: "Have sold several orders and in every case satisfaction given."

A. P. Gano, druggist, Missouri City, Mo., says: "It will be a popular article in our drug market."

J. W. Wyman, druggist, Unionville, Ia., says: "It cures chicken cholera every time."

Smith & Thomas, druggists, Platte City, Mo., say: "It gives good satisfaction here."

Duffield & Harlan, druggists, Centerville, Ia., say: "It is entirely satisfactory."

Dr. S. S. Clayberg, druggist, Avon, Ill., says: "It gives good satisfaction here."

Melle Williams, druggist, Taylorville, Ill., says: "Have a good trade. It gives splendid satisfaction."

\$1.00, \$2.50, and \$5.00 packages. I can work up a trade for

LINEN RECORD & LEDGER PAPER

Also, the only Gold Medal given for Ledger Paper at the Adelaide, Australia, Exhibition, 1881.

—A SPECIALTY.—

THIS Paper has received THE HIGHEST PREMIUM over all others from the Cincinnati Industrial Exhibition, Massachusetts Charitable Mechanics' Association, Franklin Institute of Philadelphia, Louisville Exposition, Medal and diploma from United States Centennial Commission, Medal of Progress American Institute, 1877, and Medal of Improvement and Progress, Boston, 1878. Its

PRINCIPAL ADVANTAGES

are as follows:—1. It contains more LINEN than any other Ledger Paper, has a longer fibre, and is, consequently, tougher. 2. Having a harder and better body, it frays less in erasure, so that by simply using the rubber after the eraser, the ink is prevented from spreading. 3. It is more uniform in Weight Color and Finish. 4. It never cockles if properly bound. 5. Its chemical action upon ink is such that it both writes and rules up better. For proof of the foregoing, refer to a large number of Stationers, Bookbinders, Bookkeepers, and Recorders, who have given it, after a severe test, the preference over all others. This paper is Double Sized, and will stand any climate or the most acid of fluid inks.

Send for sample sheet, ERASE and REWRITE FOUR TIMES on same spot.
Each sheet is water-marked with name and date.

LOCKWOOD PRESS, 74 Duane Street, New York.

The American Stationer

A JOURNAL DEVOTED TO THE INTERESTS OF THE STATIONERY & FANCY GOODS TRADES

"The Stationer"—Every Thursday—\$2.00 Per Annum.

VOL. X.—NO. 24. NEW YORK, DECEMBER 15, 1881. WHOLE NO. 338.

Correspondence.

CINCINNATI GOSSIP.

[FROM OUR REGULAR CORRESPONDENT.]

CINCINNATI, O., December 5, 1881.

I am going to write about Christmas goods before I get through with this letter. This hint is necessary, because I mean to commence this letter by contradicting two or three persons if it should happen that "Prince William" is one of these persons (yes, one of the persons contradicted). In the first place, I shall contradict any person who says that Mayor Means, of Cincinnati, ever meant to collect a license of mercantile travelers, or that he ever said that he meant to do so. He has no legal power to do anything of the kind. A city ordinance giving the Mayor such power was passed twenty-three years ago, and it was so unpopular that it did not live to be a year old. Mayor Means recently asked the City Attorney if he had power to levy such license, and before the answer came this query was twisted into all sorts of shapes by the papers. That's all there is about it—simply a case of the "three black crows."

Now for contradiction No. 2. I hereby contradict the impression that Cincinnati is not a greater book-making place than Chicago. Herein Cincinnati is, if not the greatest, one of the foremost among the greatest school-book publishing houses in this country, which is as much as to say in this world. Robert Clarke & Co. do a large law publishing business and no small amount of miscellaneous book publishing. Peter J. Thompson is doing a lively publishing business, Wilstack & Baldwin do book publishing, and there are some subscription-book publishers in addition to these. Now, in the consumption of book-binding material Chicago is far in advance of Cincinnati. Whether this is for actual local consumption or not I cannot say, but I can say I have good testimony that Chicago is the greater consumer of book-binding material produced by the manufacturer. It is presumable that a great deal of this material is used by dealers and distributed by them to actual consumers in the Northwest. Chicago in this respect leads our city, but when it comes to book-making she must take a back seat. It may be different in the course of a few years, but, my word for it, Cincinnati houses will have something to say about that.

Prices of all sorts of paper are firm, and dealers stand to solid rates. Collections are reasonably easy. Traveling men report the country trade brisk.

A. H. Pounsford & Co.'s traveling man, just

returned from Kentucky, reports an immense demand there for the best fancy letters and envelopes. It is due to Kentucky to say, that she has a great deal of wealth on her farms and in the little towns in the blue grass region. Like other Southern States she has not yet distinguished herself by lifting up to the highest plane the people's colleges, the common schools; but her people of wealth and competence have always taken care to educate their families. This is the class in Kentucky which furnishes consumers of the beautiful fancy stationery of the present day. I am told, that in this line, Kentucky buys more of Cincinnati than Indiana does, and also consumes a finer article.

Speaking of commercial travelers, I am in possession of information, that a large class of business men in Cincinnati are pondering over the question of dispensing with the services of this class entirely and selling directly to the consumer. They complain bitterly of the great expense of this modern method, and ask the question whether it would not be a more successful way to save this expense and give the consumer the benefit of this saving. I haven't heard any stationery dealers talk on this subject. Inquiries and investigations of this sort, if they have life enough in them to go so far as a practical test, are apt to be contagious.

The traveling men who have recently given Cincinnati a call are: Mr. Harding, of the Harding Paper Company, Franklin, Ohio; E. M. Spear, Springfield, Mass., and the following named representatives of New York houses: Milton Sears, of Daniel Slote & Co.; Frank Watkins and George Freeman, of American Pencil Company, and Mr. Hyman, of Eagle Pencil Company.

The John Shillito & Co. dry-goods palace is selling about every conceivable article in the stationery line and in the line of notions—in fact, it sells articles of furniture, and almost everything in the housekeeping line. I mention this without comment. The concern is immense and occupies a palace, which, with grounds, cost not far from a million dollars.

W. B. Carpenter & Co. are delighted with their success in manufacturing to order odd sizes and styles of envelopes. This business has passed from the stage of an enterprise to that of an achievement.

Now for the Christmas goods. Albums! why, there is no end to them. There is a craze for them. It's their outside which is indispensable to their sale. Old gold plush is a favorite, from a light citron tint to a brownish orange green. All grades and styles of turkey and russia bindings, plain and embellished, are in request.

Books illustrated in colors used to be monop-

olized by childhood. Later, chromo printing brought Christmas offerings in colors to youth; now, in the high stages of the art, colors came to maturity and age, illustrating the poets. You can't get rid of colors at Robert Clarke's; they gleam on the book covers and glow on the leaves within; they flash from cards, tinging the atmosphere with their very profusion. One doesn't want to get away from them. Never, as for this Christmas—never at all of the Christ-birth festival seasons since that one when the wise men, lighted by a star, brought gifts to the Babe in the manger—have the heart and the hand of the artist provided treasures so rare for the wise to give to their loved ones as in the festival season of the year 1881. These first Christmas gifts were of little intrinsic value, but they were costly, and the wise men could afford them. Our tokens of love are as varied in style, character and costliness as they are in form and hue.

At John Holland's you may secure a treasure, costing \$75, that a vest pocket would hide.

At Carpenter's you may purchase quite a variety of toilet cases with fine bevel-edged mirrors. I cannot attempt to enumerate further. The list of articles would fill a book about the size of Lockwood's Directory.

That reminds me that P. G. Monroe, of THE STATIONER, is in the city working like a beaver, and by no means in vain. PRINCE WILLIAM.

NOTES FROM CHICAGO.

[FROM OUR REGULAR CORRESPONDENT.]

WESTERN OFFICE LOCKWOOD PRESS,
8 LAKE SIDE BUILDING, CHICAGO, ILL., Dec. 12, 1881.

Though not accompanied with the blossoming of the hawthorne, Christmas is beginning to show its influence in our streets and stores. The regular holiday rush has commenced, and, as a casual "barbarian" from St. Louis remarked the other day, "one can only wonder where all the people come from and whither they are going."

Shop-windows are beginning to blossom with fancy goods and toys; the papers are beginning to talk about "holiday numbers;" the theatres are announcing "holiday attractions," and the people are beginning to "figure up" and see what they will "take in."

Excepting the school-book trade, all goes "merry as a marriage bell."

In the midst of such general bustle and business, the chronicler must necessarily find a dearth of matter; but silence in this respect should always be interpreted as a "silent page of history," indicative of uneventful prosperity.

A new venture in the card line is that of Holtzman & Hart, who have opened a line of

fine selected holiday cards at 93 Madison street, for the holidays only. Holtzman & Hart are old printers, and know a good opportunity when it offers.

H. A. Taylor has just returned from an extensive tour through Kentucky, Ohio, Michigan, &c., in the interests of the Livermore pen. He visited en route St. Louis, Indianapolis, Cincinnati, Louisville, Covington, Columbus, Cleveland, Toledo and Detroit, having a very successful trip in all respects, especially at Louisville and Cincinnati. The success of the Livermore pen in the West has been, as a prominent dealer here remarked, "something quite phenomenal." This is owing partly to the perfection in manufacture, but principally to the fact that the company is represented here by a thoroughly live and pushing "down East" Yankee, who knows his business and does it.

Mr. Sutherland, the enterprising news-dealer, is still going ahead, having just opened a new stand at the Board of Trade. G. B. H.

THE MANUFACTURE OF MOSAICS.

The modern process of making mosaics, now commonly followed in Rome, is this: A plate, generally of metal, of the required size, is first surrounded by a margin rising about three-quarters of an inch from the surface. A mastic cement, composed of powdered stone, lime and linseed oil, is then spread over as a coating, perhaps a quarter of an inch in thickness. When set this is again covered with plaster-of-Paris rising to a level with the margin, upon which is traced a very careful outline of the picture to be copied, and just so much as will admit of the insertion of the small piece of smalto or glass is removed from time to time with a fine chisel. The workman then selects from the trays, in which are kept thousands of varieties of color, a piece of the tint which he wants, and carefully brings it to the necessary shape. The piece is then moistened with a little cement and bedded in its proper situation, the process being repeated until the picture is finished, when the whole, being ground down to an even face and polished, becomes an imperishable work of art. The process is the same for making the small mosaics so much employed at the present day for boxes, covers or articles of jewelry, and this work is sometimes upon almost a microscopic scale.

The Florentine mosaic, which is chiefly used for the decoration of altars and tombs, or for cabinets, tops of tables, coffers, and the like, is composed of precious materials in small slices or veneers, and by taking advantage of the natural tints and shades which characterize the marble, the agate or the jasper, very admirable effects may be produced in imitation of fruit, flowers or ornaments. The use of this kind of mosaic is extremely restricted on account of the great value and expense not only of the materials, but of the labor which is spent upon them. None but the hardest stones are used; every separate piece must be backed by thicker slices of slate or marble to obtain additional strength, and every minute portion must be ground until it exactly corresponds with the pattern previously cut.

A copy of Levinus Hulsius' "Schiffahrten" is offered for sale by a bookseller at Frankfurt-on-the-Main. There are twenty-six parts in the work, which is bound in four volumes, and is said to be the most perfect copy seen in the book market during the last forty years. The price asked for the four volumes of sea travels is £225.

There is only now and then an opportunity of displaying great courage, or even great wisdom; but every hour in the day offers a chance to show our good-nature.

INFRINGEMENT IN FOUNTAIN PENS.

NOTICE TO DEALERS.—It is well known that the patent of Duncan Mackinnon, covering a central air tube in Fountain Pens, has been extensively infringed, and the owners of said Mackinnon Patent have issued a

circular to the trade warning them against dealing in these infringing goods.

It is therefore no longer safe to buy pens having the air tube unless they are made under the authority of said patent.

The undersigned, C. W. Livermore, Proprietor of the Stylographic Pen Co., Providence, R. I., hereby gives notice that he is the only licensed manufacturer under the said Mackinnon Patent of Fountain Pens having the said air tube.

By the terms of his license no other parties can be authorized to manufacture pens having that feature, the said license being exclusive in its terms.

No other manufacturer, therefore, has the right or can obtain the right to represent himself as licensed to make such pens.

L. PRANG & CO.'S

Christmas and New Year Cards

ANNOUNCEMENT.

WE hereby beg leave to announce to the trade the completion of our line of Christmas and New Year Cards for this season, for which our agents are now soliciting orders. The extent of our list, the originality, and especially the American character of our designs, together with the great care taken in their execution, will, we have no doubt, secure for our goods the popularity which they have enjoyed heretofore. The efforts we have made to secure the highest excellence, is attested by the names of some of the artists whose designs have been reproduced. We would only name Elihu Vedder, C. C. Coleman, Thomas Moran, Miss Rosina Emmett, Miss Dora Wheeler, Mrs. O. E. Whitney, W. H. Gibson, F. S. Church, R. G. Birch, &c. That a due regard has been paid for the quality of the literary matter, in connection with these designs, is shown by the fact that many of the designs are accompanied by original poems from writers of note, such as Mrs. Celia Thaxter and Mrs. Emily Shaw Forman.

The great increase of our manufacturing facilities, secured by additions to our building nearly doubling our floor space and by the adding of new machinery, will place us in a position to fill orders promptly. Still we would request dealers to place their orders as early as possible, so as to still further enable us to make timely preparation for prompt deliveries.

Our Cards will, as heretofore, be put up in envelopes containing twelve Cards, unless otherwise stated on our price lists.

We furnish envelopes without extra charge for all our Christmas and New Year Cards, for which the list price is \$1.80 per set, and over. Our silk-fringed Cards will no doubt be in great demand this season. We have made ample preparation to furnish these in time and have made arrangements with our manufacturers for the best quality of silk fringes. We would call special attention to the excellence of our fringed Cards and the novelties in colors and style of fringes we offer for this season.

A marked and attractive feature of our cards are the elegantly ornamented backs.

All our finished Christmas and New Year Cards are furnished with envelopes and protectors, so as to insure safe transportation in the mails.

It will be impossible to embody our whole list in the space of the advertisement, and we will therefore merely give a general outline of the variety offered.

PRANG'S PRIZE CHRISTMAS CARDS. COMPETITION OF 1881.

These are the Cards selected by the judges in the second competition for four designs of Christmas Cards, for which we offered \$2,000 in prizes of \$1,000, \$500, \$300 and \$300 respectively. At the recommendation of the judges, Messrs. COLEMAN, LAFARGE, and WHITE, the prize for third best Card was increased to \$500. Mrs. CELIA THAXTER has written appropriate verses for each of the designs.

- 1st Prize Card (\$1,000), by Elihu Vedder. Size, $6\frac{1}{4} \times 9$ inches; price \$1 each. Same card with silk fringe, cord and tassels, price \$1.50 each.
- 2d Prize Card (\$500), by Miss Dora Wheeler. Size, 7×9 inches; price 75c. each. Same card with silk fringe, cord and tassels, price \$1.25 each.
- 3d Prize Card (\$500), by C. C. Coleman. Size, 7×9 inches; price 75c. each. Same card with silk fringe, cord and tassels, price \$1.25 each.
- 4th Prize Card (\$200), by Miss Rosina Emmett. Size, $5\frac{1}{4} \times 9\frac{1}{4}$ inches; price 60c. each. Same card with silk fringe, cord and tassels, price \$1 each.

The Prize Cards can also be had mounted on heavy board with gilt beveled edges.

We beg to call attention also to the following publications for New Year and Christmas:

- "Goddess Fortune" New Year Card, by Elihu Vedder. Size, $6\frac{1}{4} \times 8\frac{3}{4}$ inches; price 75c. each. Same card with silk fringe, cord and tassels, price \$1.25 each.
- "Christmas Dove." Size, $7 \times 9\frac{1}{4}$. This card is in the same style as the success of the last Easter season, the "Easter Dove" Price 60c. each. Same card with silk fringe, cord and tassels, price \$1 each.

Our Regular Line of Christmas Cards consists, among others, of the following Series:

- Nos. 901, 902, 903, 906, 909, 910. Floral designs ranging in price from 20c. to \$1.30 per set of 12.
- Nos. 904, 905. Humorous Cat and Frog Designs, 60c. per set.
- No. 907 is a new series of Horseshoe designs, 75c. per set.

- Nos. 920 and 929. Children's designs, at \$2.40 and \$3.60 per set.
- No. 922. Shells of Ocean, with figures, \$2.40 per set.
- No. 924. Fans with silk fringes, \$3 per set.
- No. 933. Bric-à-Brac designs, very rich, \$6 per set, and many others.

We offer a similar assortment of New Year Cards, but would call special attention to No. 1330, a new folding calendar, at \$2.40 per set. Most of the Numbers can be had with silk fringes ranging in price from \$2.25 to \$12 per set. Stock will be ready for delivery September 15.

Besides the above, attention is called to our New Birthday Cards, Scripture Texts Cards, New Panels, New Water Colors, by Thomas Moran, and other publications. Our line of Thanksgiving Day Cards will also be shown by our agents.

REGULAR DISCOUNT TO THE TRADE. PRICE LISTS AND CATALOGUES SENT ON APPLICATION.

Trade Novelties.

[We will be glad to receive samples of all novelties issued in the trade, and will notice all such which possess merit free of charge. It is desirable to accompany descriptions with cuts whenever possible.]

NEW PATENTS.

No. 249,755. Feeding Attachment for Printing Presses.—Sidney A. Grant, Springfield, Mass.

No. 249,835. Process of and Apparatus for Bronzing Paper.—Thomas Henry, Buffalo, N. Y.

The process of applying bronze to a varnished surface, consisting in heating such bronze before its application thereto, and then applying it in its heated state to the varnished surface.

No. 249,851. Staple or Tag Fastener.—George W. McGill, New York, N. Y.

A double-pronged fastener or pin made of a single piece of flexible wire pointed at both ends, having its centre portion inclosed in a metal tube and its ends bent down at right angles from its covered centre.

No. 249,863. Hand Stamp.—Walter D. Wesson, Providence, R. I.

The postmarker is eccentrically pivoted, so that it may be swung around clear of the bar, in order to change the dating type.

No. 249,883. Newspaper Wrapper.—Almanzor W. Boynton, Brooklyn, N. Y.

A method of simultaneously addressing a number of wrappers, which consists in piercing the address through a superposed layer of sheets and simultaneously applying ink or liquid coloring matter to the perforations.

No. 249,892. Inkstand Attachment for Writing-Desks.—Spencer H. Brown, Westchester, Pa.

No. 249,893. Finger-Rests for Pencils and Penholders.—John S. Bulkeley, Ballston Spa, N. Y., assignor of one-half to Benjamin R. Lawrence, same place.

A triangular metal or other rest furnished with projecting gripping ends, so as to be individually or collectively adjustable, by which means the rest may be turned or moved lengthwise, so as to be adjustable in both directions, and so as to fit large or small or unequal-sized penholders or pencils.

No. 249,922. Buzz and Top.—Abram E. Garrison, Wyandotte, Kans.

No. 249,930. Type-Writing Machine.—James B. Hammond, New York, N. Y.

The key on being depressed comes in contact with the inclined edge of the sliding frame, carrying nuts working on the threaded shaft of the type-wheel, which is thus rotated more or less to bring the required letter into alignment with the impression-hammer, which is operated by the end of the key bearing against the tilting-frame, causing the star-wheel to move outwardly the arm to which the hammer is attached, it being retracted by springs. The paper is fed more or less for each letter by the beveled end of the key operating the minor tilting frame, which moves the paper-frame by pawl and ratchet. It is moved the space between the lines by the end of the spring-pawl striking the side of the case and allowing the paper-frame to rise the distance between the pins. The paper is returned for the commencement of another line by springs, the sliding bar coming in contact with the side of the case and raising the pawl from the ratchet and lowering it when the operation is completed.

REISSUES.

No. 9,939. Process of Dyeing Tissue and Bonbon Papers.—Isabella J. Van Skellime, Brooklyn, E. D., N. Y. Original No., 192,201, dated June 19, 1877.

THE BAY STATE PAPER COMPANY,

HOLYOKE, MASS., were among the pioneers in the W. C. Paper trade and their goods, from the start, were distinguished for their fine quality and the superior style in which they were wrapped. Their example has been approved and imitated by a swarm of competitors, who have flooded the market with inferior goods, put up in packages of 600 to 800 sheets, misleading the unwary, and sold at apparently lower figures; but the trade and consumers generally recognize the fact that a good article, honestly put up, in 1,000 sheet packages, is the most profitable both for use and for sale. Their goods are all guaranteed 1,000 sheets to package, and no short count. No wood is used in any of these papers, but they are made of the very best stock in the market.

THE "MEDICATED BOUDOIR" BRAND

Has no equal for weight, strength, softness, and color, and commands the front place with "fine retail trade." Present reduced quotations furnished on application.

RALPH TRAUTMANN, Publisher, 312 Broadway, New York.

Trade Gossip.

All new goods and designs which are not, strictly speaking, "Novelties" will be noticed under this head. The trade are requested to forward descriptions with samples in order to secure proper notice.

The *Globe*, Lincoln, Neb., has made an assignment.

F. M. Pickering, Cincinnati, has sold out his stationer's store.

T. J. Shelton, publisher of the *Times*, Wichita, Kan., has sold out.

A. M. Krusemer & Co., dealers in fancy goods, Iowa City, Iowa, have failed.

F. B. Legg, dealer in notions, Vail, Iowa, has sold out to McLane & Ainsworth.

L. V. Grant, dealer in notions, Wichita, Kan., has been closed out by the sheriff.

Kavanagh & Miller, fancy goods dealers, Oakland, Cal., have dissolved partnership.

The Dominion Leather Board Company, Chambly, Ont., was burned out on December 13.

The holiday number of J. B. Lippincott & Co.'s "Monthly Bulletin" of new publications is out.

J. H. Lawrence, printer, 19 South street, Rochester, N. Y., does all kinds of printing. He asks for lists, &c.

J. W. Pike, publishers of the *Commercial Bulletin*, Philadelphia, Pa., have dissolved partnership. James W. Pike continues.

Lovejoy & Carter, wholesale dealers in notions, St. Louis, have dissolved partnership. B. L. Carter continues under style of B. L. Carter & Co.

Bingham & Lee, designers, engravers and printers, 32 Thorpe Block, Indianapolis, Ind., will begin active operations about January 1, 1882.

Geo. Tilles, bookseller and stationer, Fort Smith, Ark., forwards his catalogue, which is very comprehensive. Mr. Tilles also conducts a circulating library, which has a list of about 550 works of fiction.

Fred. J. Prouting, 9 Curzon street, Murray street, N. London, is the author and publisher of the little book called "The Stationers' Guide," before referred to in these columns. The work gives useful suggestions for window dressing which, even if not strictly carried out, will open the way to study and thought upon that useful adjunct of trade—the show window.

Robert J. Lester, with J. H. Bufford's Sons, has returned from Chicago, where he had been laid up with a severe illness for six or seven weeks. His friends in the trade will be glad to know that he has now completely recovered, and will at once resume business. During his illness the members of the trade in Chicago showed him many attentions, for which he is grateful.

A meeting of the committee of the creditors of the American Book Exchange will take place to-morrow, when Mr. Alden, the manager, is expected to have a statement ready. The manager of the American Book Exchange is endeavoring to reorganize the business by the formation of a new company, and he has filed articles of incorporation for it under the style of the Useful Knowledge Publishing Company, with an authorized capital stock of \$10,000, in shares of \$10 each. The incorporators are F. Tracy, H. W. Bartlett, E. M. Dudley, O. B. Bois, F. E. Grady and J. B. Alden.

A meeting of the creditors of W. J. Anderson took place on Wednesday at the Stationers' Board of Trade. The committee of creditors appointed to investigate his affairs reported, recommending to the creditors to accept 25 per cent. in cash. After some discussion, this was agreed to, with the provision that it should be paid up by February 15 next, and not to be binding unless accepted by creditors representing two-thirds of the total liabilities, and the assignee to remain in charge of the estate until the settlement is completed. A resolution was adopted, recommending all of the creditors to accept this compromise at once, so that in the event of the consent of the required number being obtained a speedy settlement can be made. The meeting was attended by about thirty creditors, representing nearly \$30,000 of claims.

A meeting of the creditors of the Massachusetts Paper Company was held at Springfield, on Thursday of last week, and the committee appointed to investigate the affairs of the concern reported that there was a deficiency of \$58,000 unaccounted for. The committee recommended that the creditors accept 20 per cent. of their claims, but Mr. Cline only offered 15 per cent.

Victor E. Mauger & Petrie wish the trade to know that the reason why they cannot fill orders for the A. B. French copying ink more promptly than they are now doing is partly because of the large number of orders on hand and partly because of the late severe storms on the Atlantic, which have delayed arrivals.

Some of the creditors of the J. J. Parsons Bookbinding Company, of this city, are growing impatient at the delay of the assignee in presenting a statement of its affairs, as several months have elapsed since the assignment was made. If they are not to receive more than 10 per cent. they would like to know it.

A meeting of the creditors of Miller, Ussing & Co., will take place to-day at 2 o'clock, at the office of Samuel Adams, attorney for the assignee, at 318 Broadway, this city. The Agawam Paper Company, of Mittineaque, Mass., denies that it is a creditor of this concern.

Oscar Strasburger & Co.'s show windows present a very attractive appearance. The most elegant articles in various lines of holiday goods are there exhibited, and have been inspected by thousands of Broadway pedestrians every day this week.

A new firm, styled the Sentinel Publishing Company, has been organized at Cape Elizabeth, Me. (P. O., Ferry Village), for the publication of a weekly paper called the Cape Elizabeth *Sentinel*. It is not an amateur sheet.

The remainder of A. & E. Wallach's stock is now being sold at very low prices, and parties wanting holiday bargains should call at the firm's warerooms.

The Pequonnock Paper Company, of Bridgeport, Conn., made an assignment last week to Frank Miller, of Bridgeport.

Lloyd & Clemens, publishers of the *Advance*, Akron, O., have dissolved partnership. William Clemens succeeds.

William H. Smith, publisher of the *Argus*, Milton, Pa., has sold out to Charles Hottenstein.

Stoutmeyer & Co., publishers of the *Times*, New Orleans, La., have dissolved partnership.

Henry C. Bispham, dealer in fancy goods, Boston, Mass., has sold out to S. A. Hazard.

Joseph M. Peries, wholesale dealer in notions, Chicago, Ill., has made an assignment.

Frank S. Geer, news-dealer, &c., Syracuse, N. Y., has sold out.

T. Embury, of Perry & Embury, booksellers, &c., Nanapanee, Ont., is dead.

Dodd & Hemingway, printers, Pittsburg, Pa., have sold out to Genge & Thompson.

E. H. Hyde, fancy goods dealer, Oakland, Cal., has been burned out. Insured.

F. Lenzberg, dealer in fancy goods, Meadville, Pa., has been closed out by the sheriff.

Thomas Graham, fancy goods dealer, Paris, Ont., has changed his style to Graham & Berry.

Ellis, Robinson & Co., printers, 129 State street, Boston, have succeeded Chas. E. Ellis & Co.

The Post Printing and Publishing Company, Montreal, Canada, has been burned out. Partly insured.

Samuel Bard, paper manufacturer, Logansport, Ind., has sold out to the Logansport Paper Company.

Hannah Rosenthal, dealer in notions, Pittsburg, Pa., is offering to compromise at 50 cents on the dollar.

The firm of Rose & Hodge, dealers in printers' supplies, Chicago, Ill., has been succeeded by Rose, Hodge & Co.

Abel Brothers, wholesale dealers in notions, Denver, Col., have dissolved partnership. Albert Abel continues.

Payette & Bourgeault, booksellers, &c., Montreal, P. Q., are advertised to be sold out by the sheriff on the 15th inst.

Jacob Kaufmann, of the firm of Feustmann & Kaufmann, wholesale dealers in fancy goods, Philadelphia, Pa., is dead.

Alexander Robertson has retired from the firm of Billings, Harbourn & Co., booksellers and stationers, San Francisco, Cal.

J. W. Downs, publisher of the *Examiner*, Waco, Texas, has admitted L. T. Ross to partnership, under style of Downs & Ross.

The firm of James S. Mahaffy & Co., publishers, &c., Memphis, Tenn., has been succeeded by Graves & Mahaffy, G. W. Granbery withdrawing.

A. P. & A. F. Holbrook, printers, 11 Mechanic street, Newark, N. J., continue the business carried on by their father, A. Stephen Holbrook, who died last year.

William Bruns, publisher, &c., New York, has bought out the business of Wm. M. Donaldson & Co., 298 Broadway, and is offering to close out the stock by January 1.

The Mercantile Printing House, Hartford, Conn., has been consolidated with the Fowler & Miller Company, and the business will be conducted under the style of the latter concern.

The Stationers' Board of Trade will have a special meeting of its trustees next week to decide upon the question of the annual dinner. The annual business meeting occurs on Tuesday, January 3.

The firm of Hinkley & Southland, printers, Indianapolis, Ind., has been dissolved. Mr. Southland retiring and Otis Hinkley and George H. Elder, combining two offices, will now conduct the business under the firm name of Hinkley & Elder, at 51 W. Washington street.

It is reported that John P. Wood, of Indianapolis, Ind., wholesale paper dealer, has failed, with liabilities amounting to \$25,000. He gave the Central Bank, one of his heaviest creditors, a bill of sale amounting to \$8,445. Other heavy

creditors who are unsecured have placed an attachment on the stock.

L. Barnes & Co., dealers in paper hangings, Lowell, Mass., have failed.

R. R. Marsh, publisher, Austin, Minn., has sold out to B. F. Langworthy & Son.

The Excelsior Printing Company has succeeded the Globe Printing Company, Baltimore, Md.

Bernard H. Feustmann, of Feustmann & Kaufmann, dealers in fancy goods, Philadelphia, Pa., is dead.

J. F. Oltrogge & Co., printers, New York city, are asking for an extension of six, nine and twelve months.

Hall & Thompson, mucilage manufacturers, Philadelphia, Pa., have dissolved partnership. Charles Hall continues.

Henry D. Noyes & Co., Boston, publish the "Long Look" books of Edward Abbott. This is said to be a first-rate juvenile series.

The Compton Lithograph Company, St. Louis, has removed to the northeast corner of Third and Vine streets. It has largely extended its facilities for work.

The stock of J. L. Pool, dealer in paper hangings, Oswego, N. Y., was damaged by fire on the morning of the 11th inst. Estimated loss, \$1,000; insured for \$4,500.

The interest of John G. Mangel, Jr., of the firm of John Ryan & Co., type founders, Baltimore, Md., has been purchased by John Ryan, who will continue under the old style.

The book and job printing office of John C. Eckel, Eighteenth and Market streets, Philadelphia, has changed hands from father to son. Earl W. Eckel has had entire control and management since May last.

C. W. Kirby has just returned from a trip to Europe, where he has been in quest of novelties in fancy leather goods for James D. Whitmore & Co.'s stock for next season, which promises to be something unusually fine.

A. Moog & Brothers, printers, Baltimore, Md., have taken the old stand formerly occupied by the Atlas Printing Company, at 446 West Baltimore street, where they will execute all kinds of plain and ornamental book and job printing.

Marcus' Ward's gift-book for the holiday season is called "At Home." It is an elegantly illustrated work, and the pictures not only give the perfection of juvenile costume, but also afford glimpses of English interiors, with the proper coloring, decoration and furniture of some of the most æsthetic of English homes.

The Birnie Paper Company has just gotten up, among the many new designs, for its "Universal Papeteries," a "Patience" box which is very pretty and novel. The designs are taken from the most striking "posings" in the operetta and are very appropriate. Any one who has seen the operetta can appreciate them. Two of the four designs appear in an advertisement on another page in this number. The designs are printed on a 5-pound cream octavo. They are having a very large sale.

The annual meeting of the Straw Board Dealers' Association took place yesterday at the Grand Central Hotel in this city. An advance in the prices of straw boards is the principal question under discussion, and although no decided action has been agreed upon, it is very likely that this will be one of the results of the conference before its adjournment. The advance in the price of straw at the West, and the high cost of raw materials in the East, induce the trade to take this action.

SHEPARD'S PATENT

Invoice and Scrap Books.

THE Trade are hereby notified that we have made arrangements with Messrs. LIEBENROTH, VON AUW & CO., Nos. 48, 50 and 52 Franklin St., New York, to whom all orders and inquiries should be addressed, for the sole control and exclusive sale of our popular line of Invoice and Scrap Books. THE STATIONER.

DEVOTED TO THE INTERESTS OF THE

Stationery and Fancy Goods Trades.

WEEKLY---\$2.00 PER ANNUM.

Single Copies - - - - 10 Cents.

NEW YORK, THURSDAY, DECEMBER 15, 1881.

Advertisements cannot be received for insertion in the current week later than 12 M. on Wednesday. The charge for advertising is 25 cents a line, each insertion. Special terms for standing and displayed advertisements to be had on application.

This journal aims to be a medium of information for and a representative of the interests of every one connected with the stationery and fancy goods trades. It contains a full and trustworthy survey of the market for stationery in this country, in all cases giving the actual prices at which goods can be bought of importers and jobbers in this city, together with a detailed account of novelties in the trade, patents relating to stationery, and current items of interest. A review of foreign markets and accounts of movements abroad will also be furnished, and no pains will be spared to make THE STATIONER a thorough and complete exponent of the trade.

Subscription and postage for Great Britain, per annum..... 12s.
Any information our readers may wish to obtain shall be cheerfully given, and prompt replies will be made to all inquiries addressed to us on any subjects of interest to the trade.

Communications on all trade matters are earnestly solicited. Address

HOWARD LOCKWOOD, Pres. and Treas.

Subscribers to THE STATIONER can be supplied with the best cloth binder in the market. Deliverable at the publication office. Price, fifty cents.

Readers of this paper who avail themselves of the information obtained from its columns, by advertisement or otherwise, are requested to notify their correspondents of the source of their information.

CHEERFULNESS is a prevailing expression in trade features.

BACKWARD as trade has been at the remote West, it certainly seems to have picked up handsomely.

FEARFUL as the underselling is at Washington, it is worse at other places, as witness the figures given by a friend in Utica.

Go where we will in any part of the metropolis, and we will find more than usual preparation for the holidays. Toys, gift-books, cards, and many articles which the smallest retail stores have not been wont to keep, will be found in unexpected places.

HAS anybody forgotten to prepare his exhibit for New Zealand? The American trade should be strongly represented at the coming Exposition. The Lockwood Press pavilion will afford room for a liberal supply of samples, and if needs be, can spread its wings. We may say here that a large manufacturer in a special line, and who has been Governor of his State, is about to send exhibits to New Zealand. Emulate his example.

NOTHING excites the foreign manufacturer so much as to find that a "live Yankee" has got into the hotbed he has sedulously cultivated for years. What makes it worse for him is that he has no preemptive right other than the claim to a market which is to be held by the quality of his goods. Next to this excitement comes that created by the intimation that the same irrepressible American proposes to export and to look for a market. Why can't we keep such excitements up?

BOX makers are likely to find higher prices for straw boards ere long. The reduced supplies and the higher cost of straw, even at the West, are working to the disadvantage of the mills. Besides, straw is becoming more difficult to get convenient to the manufacturing centres. It does not, therefore, seem improbable that an advance in prices will be made, or that if made, it could be sustained. The straw board men are in consultation as we write, and their conclusions will not be known before we go to press; but there are indications that higher quotations will be made. We shall inform our readers as to this in our next issue.

ONE of the English milling papers lately had an article upon business enterprise, and, borrowing an expression from us, spoke of "live millers," and cited American progress as a proof and result of energy rightly directed. The thought is good for other men besides millers. We all know what "live" means in the American sense. It is the essence of earnestness, activity, and "wide-awake" management. How many are wanting in this attribute? The stationery trade of this country are not destitute of this eminent quality, as our

advertising columns will show; yet there are many who do business and never think to display the active spirit which the nature of our times and the advance we are making should call forth. Some men never patronize a paper except to subscribe for it, and forget that the positive, keen-witted men whose advertisements they idly pass over, are taking the cream from the milk of trade. They are not "live!" What, then, can they expect?

MORE—ONLY MORE SO.

UTICA, N. Y., December 10, 1881.

To the Editor of The Stationer:

We can beat your Washington correspondent, "Occasional," as a prominent dry-goods house in this city is selling the "Chatterbox" mentioned at 59 cents, Peter Paul's "Christmas Stocking" at 15 cents, and other stationery items at equally remunerative prices. E.

ANSWERS TO CORRESPONDENTS.

M. & Co. want to know who makes "perpetual" diaries.

Ans.—Cambridgeport Diary Company, Liebenroth, Von Auw & Co., C. H. Clayton & Co., and Francis & Loutrel.

G. M. S. wants names of jobbers and manufacturers of writing papers.

Ans.—The list is too long to repeat here. We send you a marked copy of THE STATIONER, a paper to which you ought to subscribe. Read its advertisements carefully.

H. & C. ask who makes rubber-headed tacks.

Ans.—We had this inquiry once before but could not supply the information. We are now informed that rubber-headed tacks are made by Hincks & Johnson, Bridgeport, Conn.

OBITUARY.

JOHN W. FORNEY.

Colonel John W. Forney died at his residence in Philadelphia, on Friday last. Colonel Forney was born at Lancaster, Pa., September 30, 1817. When thirteen years old he was forced to abandon his studies in the common school and earn his own bread. He first entered a store, but three years later (in 1833) he became an apprentice in the Lancaster *Journal* office. There he excelled at the case, was accurate as a proof-reader, and exhibited a striking brilliancy in his first essays in editorial writing. In 1837 he bought a share in the *Intelligencer*, and three years later that newspaper was combined with the *Journal*. During the presidential campaign of 1844 he published a campaign journal called the *Plaindealer*, and in 1848 President Polk rewarded him with the post of Deputy Surveyor of the Port of Philadelphia. Colonel Forney at this time sold out his interest in the Lancaster *Journal* and purchased a half interest in the *Pennsylvanian*.

In 1851 he resigned his editorship of the *Pennsylvanian*, and from that time until 1855 he was Clerk of the House of Representatives at Washington. At this time Colonel Forney was one of the most influential and conspicuous of the politicians in Washington, and the record he had made and the power he had acquired in the House was strengthened by his purchase of the *Washington Union*, the acknowledged organ of President Pierce's administration. On August 1, 1857, he issued the first number of the *Philadelphia Press*. In 1859 he was again elected clerk of the house.

In 1863 he started *The Washington Chronicle* as a Sunday journal, and in 1865 it became a

daily publication and was soon recognized as the organ of the National Government. In 1861 Colonel Forney was elected Secretary of the Senate, a position which he held until 1868. A brief holiday in Europe after the war resulted in a series of letters to *The Press and Chronicle*, and these were published in 1867 in a volume called "Letters from Europe." Returning to his editorial chair he began the publication of a series of "Anecdotes of Public Men," for which his intimate connection with leading men for so many years had furnished him with abundant and entertaining material. These anecdotes were afterward collected into two volumes. Colonel Forney disposed of his interest in *The Chronicle*, in 1870, and of his interest in *The Sun-day Press*, in 1874, and in 1877 he severed his connection with *The Daily Press*. In 1874 or 1875 he again sailed for Europe, where he rendered valuable service as a volunteer Centennial Commissioner. On his return, in 1876, he published a book called "A Centennial Commissioner in England." In 1877 he again went abroad. *The Progress*, a weekly literary journal, was established by him in 1878, and in its columns his novel, "The New Nobility," first appeared as a serial.

Colonel Forney was impulsive and generous to a fault, and his deeds of private benevolence were many. He leaves a widow, two sons, Lieutenant-Colonel James Forney, of the marines, and John W. Forney, Jr., journalist, and three daughters, one of whom is Mrs. W. W. Weigley.

At a meeting of representatives of the Philadelphia newspaper press, held on Monday, resolutions expressive of their feeling were adopted.

T. B. Peterson & Brothers, Philadelphia, have just published uniform in style with the "Bridal Eve" and other publications, George Sands' story, "Indiana." This work, known as the masterpiece of its author, is one of the strongest pieces of fiction in current literature. It needs an intelligent and dispassionate reader to master its strength and to properly appreciate its power of feeling and incident, and is not, therefore, suitable for weaklings.

Portia fans are greatly in favor at Paris. They are made of ostrich and peacock feathers, and the plumage of the golden or Impeyan pheasants. Other feathers are employed, but these are the favorites. The centres of these fans are sometimes adorned with heads or wings of small brilliant colored birds.

B. E. Pike, with M. A. Ray, has returned from a Western trip, in which his success far exceeded his anticipations, and, as he is now through traveling for this year, his friends can find him every day till after the holidays at the headquarters of the firm. The house is exceedingly busy filling orders.

George E. Lane & Co., Exeter, N. H., make their holiday announcements on a four-page sheet, newspaper style, called *The Encyclical*. They seem to have a very full and widely assorted stock.

William C. Horn and wife returned home on Monday from a two months' trip to Europe. Mr. Horn enjoys excellent health and good spirits after experiencing a very tempestuous voyage.

Samuel Raynor & Co. have received an order from Washington for a quantity of envelopes about two feet square in size and to be made of XXXX manilla paper.

BRITISH PROVINCES.

William Templeman, Almonte, Ont., Can.	\$3,000
--	-------	---------

Among the visiting members of the trade to the city during the week were N. L. Shattuck, Barre, Mass.; Mr. Le Boutillier, Philadelphia; C. F. Peck, Troy; A. H. Pettibone, of Calver, Page, Hoyne & Co., Chicago; Samuel Burgess, of Shorb & Boland, St. Louis.

Oscar Strasburger & Co. show a large line of holiday goods and other elegant fancy articles. Among them are fancy china, pottery, glass, Majolica and Barbotine wares in vases, flower-holders, baskets, &c. Limoges china is also exhibited in a variety of vases, some of the largest mounted in real bronze. The display of French bisque decorated figures is elegant. French china vases are shown in the newest modern shapes and designs, as well as in antique models. Novelties, styled English lilyware, come in bronze, silver, gold and ivory. In English moss and snow ware there are many beautiful novelties, and old Flemish stoneware is shown in the styles and patterns of 300 years ago. The firm's assortment of albums comprises 290 different styles of all grades. There is also an enormous display of work-boxes, bags, dressing-cases, writing-desks, glove and toilet boxes, small mirrors, hold-alls, picture stands, pin-cushions, &c. The doll department contains all styles, including those in china, wood, kid and wax, jointed and stuffed. The dressings are perfect in every detail, and there is an endless variety of dolls' hats, shoes, hose, handkerchiefs, jewelry, &c., also pianos, kitchens, houses, furniture sets, toilet sets, bath rooms, &c. A great variety of accordions, banjos, violins and musical boxes, and every kind of ornament for Christmas decoration. Japanese goods come in the shape of ladies' silk and embroidered dressing gowns and jackets, and gentlemen's smoking jackets in silk, screens, panels and wall decorations. In lacquered ware are an immense variety of boxes, trays, writing desks, puzzles, games, &c. Of jewelry and ornaments also there is a large assortment. In fans the firm exhibits an almost bewildering variety. Toys and games of all kinds are shown in profusion. In the mask depart-

ment there is to be seen every description of masks and faces of men, women, animals, noses, wigs, boards, and all the paraphernalia required for masquerades, processions, &c. The notion department, comprising buttons, combs, brushes, toilet articles, &c., is very complete.

Clark's "Boston Blue-Book," that *vade mecum* of fashion and society in Boston, is ready for 1882. It is marked by its usual elegance and completeness. It contains the names of over 13,000 householders. Edward E. Clark, 41 West street, Boston, is the publisher.

John P. Morton & Co., Louisville, Ky., have recently added another store, which now gives them three buildings, making one of the largest and prettiest stationery establishments in the South, and which is said to be doing the largest business in that section.

Ewing & Co., Philadelphia, manufacturers of inks and mucilage, have lately received very large orders from Baltimore. They do contract work and furnish a superior article.

T. S. James has just returned from a good trip of two weeks in the West for Daniel Slote & Co.

Market Review.

OFFICE OF THE AMERICAN STATIONER,
WEDNESDAY, December 14, 1881.

THE MONEY MARKET.—The money market remains in about the same stringent condition of a week ago. The stock market has been firm most of the week, although, as usual of late, very sensitive to reports and rumors circulated in the interest of both sides. The dealings have been comparatively small and confined mainly to the regular brokers, the stringency of the money market being against heavy transactions. Government bonds have been in active demand and prices firm. Railway bonds of the better class also have a firm support, with a fair business. Sterling exchange is steady. French a trifle easier, and other kinds steady. The actual rates for Continental bills are as follows: France, \$5.20% and \$5.25%; marks, 94 and 94%, and guilders, 39% and 40%.

THE PAPER MARKET.—The volume of general trade has settled down to about the usual winter proportions, and according to former precedents, a moderate amount of activity is to be expected during the remainder of this month, as most business men during the time will be engaged in balancing the accounts of the closing year, and there will be natural hesitancy to embark in new enterprises until the results of this year's transactions have been ascertained. In this situation of general business, the paper trade is no exception, and is affected to a more or less extent. At the decline recently noted in one or two grades prices have a fair support, particularly for the low and medium qualities of book and news, the demand for which keeps very close to the production. Manilla wrappings are in fair request, considering the season, and manufacturers hold to former prices. Straw wrappings are without any new feature. The dealers in straw boards are now holding a meeting in this city, and it is likely that they will agree on an advance in prices.

THE STATIONERY MARKET.—There is very little change to note in business in staple goods. Trade in fancy goods retains many of the elements of activity which have been so marked for many weeks past, although wholesale dealers are beginning to feel a falling off in the heavy orders which they have been lately receiving. There are very few out-of-town buyers in the city. Reports of trade at the West, as gathered from salesmen who have just been through the principal places in that section, are of an encouraging nature, and the outlook for next spring is even more so. There are no changes to note in prices, which generally rule firm.

MARCUS WARD & CO.'S ANNOUNCEMENTS.

CHRISTMAS AND NEW-YEAR CARDS FOR 1881-82.

THE NEW DESIGNS ARE COMPLETELY SUCCESSFUL.

"At Home."

THE NEW ART GIFT-BOOK for the Holiday Season bears this title. Its quaint, square pages represent children of all degrees—"At Home,"—with all the charms which the ideal of costume can add to the loveliness of childhood. Known all over America as originators and first introducers of Christmas Cards, Marcus Ward & Co. have been asked, on all sides, to bring out a book which should abound in the versatile fancy and quaint conceit of their Cards, combined with good drawing and harmonious color. The work now introduced is the response to this wide-spread demand. Every page of "At Home" is a picture, not in glowing, gaudy colors, but in the subdued and harmonizing tints now favored by the devotees of culture. The pictures not only give the perfection of juvenile costume, but also afford glimpses of English Interiors, with the proper coloring, decoration and furniture of some of the most æsthetic of English Homes. The verses in "At Home" enhance its interest, and are in themselves worthy of the beautiful book of which they form part.

Decorated by THOMAS CRANE.

Illustrated by J. G. SOWERBY.

\$2.50

THE ANCHOR OF HOPE. THE HAVEN OF PEACE.

New Illuminated "Daily Portion" Book.

BY THE REV. DR. MACDUFF.

\$2.00

Every page of this beautiful "Book of Days" is decorated in colors with exquisite flowers. The book is actually two books within a single cover. The Anchor will become the Christian's Hope in the morning, while The Haven will be his sure resting-place at night. When the morning portion has been read, the Christian will close and reverse the book, and there "The Haven of Peace" awaits his return when "evening shades prevail." This dual form of book is so convenient for ready reference that it is sure to be appreciated. Motto Texts have been adopted to head every page uniformly, special texts, differing every day, follow, and then comes the poem for the morning or evening, respectively.

THE SHAKSPERIAN CALENDAR.

An illuminated Calendar for the library or drawing-room, with date slip to tear off daily, and appropriate quotations from Shakspeare for every day in the year.

Price, 50 Cents.

DAY UNTO DAY.

A SACRED CALENDAR. With quotations from Scripture (arranged in weekly subjects) for every day in the year. Also, Church Festivals, Holidays, etc. The new design for 1882, in colors and gold, represents "The Passing Days."

Price, 50 Cents.

EVERY DAY.

"A CALENDAR for men of business and other busy men." Daily date slips to tear off, similar to the above, with quotations from various authors of undying fame. The new design is unique for harmony of color and decorative beauty.

Price, 50 Cents.

THE SEASONS' CALENDAR.

A small Calendar, eight pages, with four new and beautiful illuminated designs by KATE GREENAWAY, representing the seasons. Also, Church and Legal Holidays, Postal information, etc.

Price 15 Cents.

LETTERS PATENT FOR INVENTIONS.

BY JAMES A. WHITNEY, COUNSELOR-AT-LAW.

VIII.

WHAT CONSTITUTES A PATENTABLE INVENTION—
(CONTINUED).

In indicating the sub-divisions of patentable subject matter, it is preferable, on the score of clearness and convenience, to follow the classification developed from the great number of adjudicated cases rather than that less definite indicated by the verbal terms of the statute. This classification must, of course, be more or less arbitrary, including as it must all that which, in an industrial sense, arises from the exercise of the inventive faculty in "the finding out, contriving, devising or creating something new and useful, which did not exist before."

In practice patents on machines are now issued to cover the several combinations of parts included in their structure, and which constitute their essential or distinguishing features. But that a machine *per se* is patentable is settled, not only by the specific terms of the act, but by the leading case of *Blanchard v. Sprague*, decided in 1839, and relating to the celebrated engine for turning irregular forms, patented by Thomas Blanchard, September 6, 1819. The inventor claimed "the method or mode of operation in the abstract," explained in the second article of his specification, which second article described at considerable length the construction and operation of the machine. This form of claim, which would scarcely be admitted at the present day, threw upon the court the duty of interpreting not only its scope but its character. It was held to be for "a particular machine, constituted in the way pointed out, for the accomplishment of a particular end or object." In *Woodcock v. Parker*, an action on the case for a violation of the patent granted to the plaintiff May 8, 1809, for a machine for splitting leather, a "whole machine," or a "new machine," was defined to be a new mode, method or application of mechanism to produce a new effect or an old effect in a new way," which is to be interpreted as a mechanism that, taken as a whole and in connection with its mode of working, is substantially a new creation.

It is clear that a distinction may be drawn between an invention thus exemplified, and a combination of certain specified parts even though the machine itself be composed of old elements newly correlated. The term "machine" may in this sense be taken to mean "organized mechanism," in which an apparatus embracing elements, and perhaps modes of operation, old for other purposes, has those elements so readjusted and their operation so modified as to secure a result unattainable by their former relations with each other.

Thus, in *Geizer v. Cook*, decided in 1842, the subject matter was a peculiarly constructed arm for forge hammers. To quote the words of the court: "It was shown in evidence that previously there had been wooden arms barreled with iron and iron arms barreled with wood." But the subject matter at issue was an arm "composed of wood and iron, each forming a substantial part of the arm, neither being properly an addition to, or covering of, the other, and constituting one whole of which these material were the component parts, and forming an arm more elastic, durable and secure than the former ones." The structure being different from the devices that preceded it, and producing a result not before secured, the court held that the patentee could not well claim it "in a better manner than as a new arm."

The propriety of thus claiming it is apparent

when we consider that a claim to the combination of wood and iron in a forge-hammer arm would have included the previous constructions, and would, therefore, have been void; while on the other hand, had the claim been to the mere arrangement of the wood and iron in the structure of the arm, this might have been evaded by some change in which the particular collocation of parts would have been avoided, although still embracing the practical application of the central or essential idea of the actual invention. Whereas, considered as a machine, an entity organized with especial reference to certain results, the scope and character of the invention is made clear.

Another case in point is that of the Clark Patent Steam and Fire Regulator Company v. Copeland, on the Timothy Clark patent of 1847, for "improved safety apparatus for steam boilers." The object of the invention was to automatically operate the damper of the furnace by the pressure of steam in the boiler in order that the production of steam should not be above or below that necessary for the required pressure, and that the latter should remain practically constant. The invention consisted in the application of an elastic vessel, to which steam from the boiler was admitted, and which was capable of expanding from the increase of steam pressure or contracting with its diminution. This vessel was externally connected with the damper, so that its swelling or shrinking gave the requisite movement to the damper to increase or diminish the draft of the furnace as required, to increase or diminish the rapidity of the generation of steam in the boiler. Substantially, there had previously existed for the same purpose, but in different combinations, the float regulator, operating on the same plan as the piston regulator, in which a piston, receiving its motion from variations in the steam pressure, had similarly operated the dampers, and being in itself the same as Brunton's operative thermometer, in which an elastic vessel, expanded and contracted by the expansion and contraction of a liquid within it, was designed to give motion to parts in very much the same manner in which those connected with Clark's device were operated. The court held that there was no doubt "that the elastic vessel in Brunton's machine was substantially like that in Clark's," a fact also conceded by the plaintiffs.

But it was also held by the learned judge that a valid objection to the patentability of a machine could not arise merely from its anticipation by something "substantially the same in its particular parts," but only that to void the patent, it must be so organized as that, when set in operation, it will produce substantially the same results in the same way. The jury found a verdict for the plaintiff, thus sustaining the validity of the claim.

The American News Company has contracted with the Philadelphia Novelty Company for the agency of its patented specialties of stationery articles, comprising the "Novelty" paper fastener, "Novelty" staples, single stroke ring and paper fastener, &c. The American News Company now carries a full line of these goods in stock, and is prepared to fill orders promptly and at the manufacturers' rates.

One hundred and fifty thousand copies of "Helen's Babies," have already been printed and sold, and the demand for it continues as lively as ever. It is a book that all should read, old and young. It is published by T. B. Peterson & Brothers, Philadelphia.

The Aquarium and Managierie.—The finest toy of the season. Just issued.

Old Maid Improved.—The most popular game of the year.

Patience.—The best new game in the market.

Words and Sentences.—The best word game made.

The Historiscope Improved.—The finest panorama ever made, with new designs in oil colors. Very pleasing and instructive.

Excursion to Coney Island.—New and very funny visit to the Gypsies. Very amusing for a company of young people.

Little Object Teacher.—New Edition. Very fine.

MILTON BRADLEY & CO., SPRINGFIELD, MASS.
WILSON BROS. CO., 119 Chambers Street, NEW YORK AGENTS.

PERFECTED STYLOGRAPHIC.

The original and genuine Pen. Warranted the best made. Thirteen Patents granted to A. T. CROSS, the last, June 20, 1880, being the most important and giving the name **Perfected**.

MAXIMUM.—Holds most ink of any pen made; tires the hand less than smaller barrels. Fits Hambley's Pocket. Same price as Long.

LONG.—The famous Desk Pen. Extra Long. Holds most ink, except the **Maximum**.

SHORT.—Most widely known and sold heretofore; but **Maximum** and **Long** are much better for desk or Hambley's Pocket. So this will be largely superseded.

GIANT. with Cord and Gold Ring, same price as Short.

LITTLE GIANT
Plain, \$3.00.
All Styles up to
\$1.50.

LITTLE GIANT,
The Ladies'
Favorite.

Thirteen patents granted; seven more applied for; more genuine improvements; better record; more styles; larger stock; more thoroughly protected by patents than all rivals combined. Dealers and agents supplied with wood, glass and paper signs, placards, circulars, leaflets and cuts. We make both largest and smallest Pens, all of which will have the new improvements. Sole Agents for the World. See Descriptive Circulars.

READERS AND WRITERS ECONOMY CO., 25 to 33 FRANKLIN ST., BOSTON.

"THE GREAT ROCK ISLAND ROUTE"

Calls your attention to the following REASONS WHY, if about to make a Journey to the GREAT WEST, you should travel over it:

As nearly absolute safety as is possible to be attained, are connections in UNION DEPOTS, at all important points. No change of cars between CHICAGO, KANSAS CITY, LEAVENWORTH, ATCHISON or COUNCIL BLUFFS. Quick journeys because carried on Fast Express Trains. Day cars that are not only artistically decorated, but furnished with seats that admit of ease and comfort. Sleeping cars that permit quiet rest in home-like beds. Dining cars that are used only for eating purposes, and in which the best of meals are served for the reasonable sum of seventy-five cents each. A journey that furnishes the finest views of the fertile farms and pretty cities of Illinois, Iowa and Missouri, and is afterwards remembered as one of the pleasant incidents of life. You arrive at destination rested, not weary; clean, not dirty; calm, not angry. In brief, you get the maximum of comfort at a minimum of cost.

That the unremitting care of the Chicago, Rock Island & Pacific Railway for the comfort of its patrons is appreciated, is attested by its constantly increasing business, and the fact that it is the favorite route with delegates and visitors to the great assemblages, political, religious, educational and benevolent, that assemble from time to time in the great cities of the United States, as well as tourists who seek the pleasant lines of travel while en route to behold the wonderful scenes of Colorado, the Yellowstone and Yosemite. To accommodate those who desire to visit Colorado for health, pleasure or business, in the most auspicious time of the year, the summer season and months of September and October, the Company every year puts on sale, May 1st, at all coupon ticket offices in the United States and Canada, round trip tickets to

DENVER, COLORADO SPRINGS AND PUEBLO.

At reduced rates, good returning, until October 31st. Also to San Francisco, for parties of ten or more, good for ninety days, at great reduction from regular fares.

REMEMBER, this is the most direct route for all points WEST and SOUTHWEST. For further information, time-tables, maps or folders, call upon or address

R. R. CABLE,
Vice-President and Gen'l Mgr, Chicago.

POSTAL REGULATIONS.

From recent rulings of the Post-office Department the following facts are gathered: The Postmaster-General is authorized to introduce and furnish for public use "double postal cards." He has not yet taken action under such authority, and until he adopts some device no cards purporting to be double postal cards can be sent in the mails, except at letter rates. There is no law prohibiting other writing than the address and the return request on the envelopes of letters prepaid with one full letter rate, provided such other writing is not of the character prohibited by section 225, and is done by the writers thereof. Nothing but an address may be put upon the address side of a postal card. There is nothing in the postal law prohibiting a "dun" or threat of prosecution being sent in the mail by postal card. Further than enforcing sections 225 and 226, the Post-office Department takes no cognizance of the character of the language of such cards. The court, and not the department, is the proper source of protection against libel. Postal cards that have been split, written upon the inside and then pasted together, are unmailable. It is the duty of a postmaster to examine postal cards and to see that they contain no improper matters, but he must not disclose the contents. It is also the duty of a postmaster to examine all matter other than such as may be sealed against inspection, to see that it contains no improper matter or such as may be subject to a higher rate of postage, but he should under no circumstances break the seal of a package in order to examine it. It is not the duty of postmasters to open packages of third or fourth-class matter in the presence of the person addressed. If a package reaches a post-office sealed with a stamp so that it cannot be opened without breaking the stamp, the postmaster should not open it, but should rate it up with letter postage and deliver it, upon payment of the same, unless the party addressed desires that it should be held by the postmaster unopened, until a request can be forwarded to the Postmaster-General for permission to remit the extra charge upon the package being opened by the person addressed and found not to contain any matter rendering it subject to a higher rate of postage than already paid. There is no authority for withdrawing letters from the mails at any other request than that of the writer, or the legal guardian of the writer when the latter is a minor, or for any cause, such as insanity, unless the writer is under guardianship by order of a court of competent jurisdiction. It is the Postmaster-General who is authorized by law to determine the quality, form and size of postal cards, and prescribe the rules and regulations under which they may be sent in the mails, and it is not within the discretion of others to change the card so adopted. Such change of form or face will render the card unmailable. Only publishers and news-dealers have the right to send publications at pound rates. A sheriff cannot claim a right to seize matter in the custody of the United States mails under an execution. Under no circumstances can a postmaster open any sealed package not addressed to himself.

Cincinnati seems to have been overrun recently with drummers. A salesman of one of our prominent city houses notified a concern in that city of his intention to visit it, when he received a reply by postal on which was a drawing of a skull and cross-bones, underneath which was written, "Keep away from here." It is needless to say the salesman did keep away, and is now in New York.

The J. W. Stoakes Automatic Shading PEN.

FOR PLAIN, FANCY AND ORNAMENTAL
LETTERING.

WASHINGTON, D. C., March, 1880.
I desire to say that the "Shading Pen" invented by Mr. STOAOKES meets a want long felt by penmen. The work done by it is perfect in line and shade. The rapidity with which lettering is done, aside from the beauty of the work, is enough to recommend it for general use.

H. A. WHITNEY, Ass't Cashier, U. S. Treasury.

I WILL INSURE YOUR HOGS.

Dr. Jos. Haas' Hog Poultry Remedy.

THE ONLY SCIENTIFIC SWINE REMEDY COMPOUNDED.

Read My Propositions!

First—When my remedy is used as a preventive, I will insure hogs by the head for a year, and will make a deposit of money to make such insurance good. If any hogs die, they will be paid for from such deposit; you can refer to my bankers, Messrs. Fletcher & Sharpe, Indianapolis, Ind., for my standing financially.

Second—Where my expenses are paid, I will visit herds of not less than 100, and I will arrest the disease among them, or forfeit \$500.

Third—After hogs have been regulated with my remedy, I guarantee that the annual cost of feeding will not exceed 25 cents per head. Furthermore, that the increase of actual flesh will far more than pay for the remedy used.

It is not an experiment, but an established success. Remember, it is the only remedy that is used and indorsed by the great breeders of this country and England. It owes its great fame to its genuine merits, and every mail brings tidings of its good work. The evidence in its favor is so strong the most scientific men of the country have pronounced it the conqueror of this disease. It is gaining ground daily, and no hog raiser up with the times can do without it. It is not only a protection against disease, but it is a powerful appetizer.

Inquire of my Bankers, Messrs. Fletcher & Sharpe, Indianapolis, Ind., for my standing. Will make a deposit of necessary money, and will pay for all that die.

SEND FOR IT! I GUARANTEE IT WILL STOP THE COUGH AMONG HOGS

and put them in fine condition for fattening. It will expel the poison from their system, tone them up, and invigorate them generally. It will make them thrive so as to astonish you. It will pay such a large per cent. on the investment, that no one can afford to be without it.

REFER TO ANY WELL KNOWN BREEDER OR SHIPPER IN ANY PART OF THE COUNTRY.

J. H. Whetstone, druggist, Iowa City, says: "The Haas Remedy sells better and with less effort than any proprietary medicine I have ever undertaken to sell of any kind. We have nothing in stock to-day but what I would rather do without than the Haas Remedy."

C. H. Klauenburg, druggist, Carlinville, Ill., says: "The Remedy sells well, and is the best on earth."

O. A. Elliott, druggist, Russell, Ia., says: "The Remedy has given good satisfaction here."

J. N. Penn & Sons, druggists, Sydney, Ia., say: "We hear good reports from what we have sold."

Ed. J. Brown, druggist, Edina, Mo., says: "It has given general satisfaction in this county. Have sold \$1,000 worth in three months. Have tested its merits myself."

J. M. Kufer, druggist, Macomb, Ill., bought \$400 lot of Haas' Remedy and sold \$300 of it in seven weeks.

SEND FOR IT. LIBERAL TERMS TO THE TRADE. you. Terms, Circulars, &c., on application.

W. Harris, druggist, Storm Lake, Ia., says: "It has given splendid satisfaction."

J. C. Eacker, druggist, Elliott, Ia., says: "Have sold several orders and in every case satisfaction given."

A. P. Gano, druggist, Missouri City, Mo., says: "It will be a popular article in our drug market."

J. W. Wyman, druggist, Unionville, Ia., says: "It cures chicken cholera every time."

Smith & Thomas, druggists, Platte City, Mo., say: "It gives good satisfaction here."

Duffield & Harlan, druggists, Centreville, Ia., say: "It is entirely satisfactory."

Dr. S. S. Clayberg, druggist, Avon, Ill., says: "It gives good satisfaction here."

Melle Williams, druggist, Taylorville, Ill., says: "Have a good trade. It gives splendid satisfaction."

BYRON WESTON

DALTON, MASS., U.S.A.

HAS BEEN AWARDED THE

GRAND PRIZE GOLD MEDAL

AND RECOMMENDED THE

Medal of Honor and Perfection
At PARIS, 1878,

This being the HIGHEST and ONLY AWARD given for

LINEN RECORD and LEDGER PAPER

Also, the only Gold Medal given for Ledger Paper at the Adelaide, Australia, Exhibition, 1881.

—A SPECIALTY.—

THIS Paper has received THE HIGHEST PREMIUM over all others from the Cincinnati Industrial Exhibition, Massachusetts Charitable Mechanics' Association, Franklin Institute of Philadelphia, Louisville Exposition, Medal and diploma from United States Centennial Commission, Medal of Progress American Institute, 1877, and Medal of Improvement and Progress, Boston, 1878. Its

PRINCIPAL ADVANTAGES

are as follows:—1. It contains more LINEN than any other Ledger Paper, has a longer fibre, and is, consequently, tougher. 2. Having a harder and better body, it frays less in erasure, so that by simply using the rubber after the eraser, the ink is prevented from spreading. 3. It is more uniform in Weight Color and Finish. 4. It never cockles if properly bound. 5. Its chemical action upon ink is such that it both writes and rules up better. For proof of the foregoing, refer to a large number of Stationers, Bookbinders, Bookkeepers, and Recorders, who have given it, after a severe test, the preference over all others. This paper is Double Sized, and will stand any climate or the most acid of fluid inks.

Send for sample sheet, ERASE and REWRITE FOUR TIMES on same spot.
Each sheet is water-marked with name and date.

THE WESTERN PAPER MAKERS.

[FROM OUR REGULAR CORRESPONDENT.]

WESTERN OFFICE LOCKWOOD PRESS, {
8 LAKESIDE BUILDING, CHICAGO, ILL., Dec. 15, 1881. }
A meeting of Western paper manufacturers, looking to important results, took place in this city yesterday. For a long time it has been apparent that the lack of understanding and intelligent co-operation between the manufacturers of Cincinnati and the Miami Valley and those of Chicago and the Northwest, rendered ineffectual any regulations passed by either set of manufacturers. If prices were fixed in Chicago, there was nothing to prevent them being lower in Cincinnati, and *vice versa*. This want of unanimity the meeting was intended to modify. The only important action taken in the convention was organization and appointment of officers, and the fixing of a date for the regulation of affairs. The following is a succinct report of the meeting.

Yesterday morning a large number of the members of the Chicago division and the Cincinnati division of the American Paper-makers' Association assembled in the ladies' parlor at the Grand Pacific Hotel; the primary object of the meeting being the consolidation of the two bodies. Over 75 per cent. of all the paper manufacturers in the two districts named were represented either by person or proxy.

J. W. French, of Three Rivers, Mich., was chosen chairman.

After a long session, lasting most of the day, and considerable discussion as to the details of the new organization, the two bodies united under the name of the Western Division of the American Paper-makers' Association.

The new organization, whose objects will be essentially the same as that of the two old ones, namely, the promotion of the interests of the paper trade, and the better acquaintance of its members, then proceeded to the election of officers for the ensuing year, with the following result:

President—J. W. French, Three Rivers, Mich.
First Vice-president—W. B. Oglesby, Middletown, Ohio.

Second Vice-president—P. F. La Motte, Louisville, Ky.

Treasurer—H. J. Rogers, Appleby, Wis.
Secretary—Lucius Clark, South Bend, Ind.
Executive Committee—J. W. French, Three Rivers, Mich.; H. D. Clutch, Franklin, Ohio; J. L. Rubel, Louisville, Ky.; J. A. Kimberly, Neenah, Wis.; and Wm. N. Van Nortwick, Batavia, Ill.

After the transaction of some minor business the society adjourned, to meet at Cincinnati on January 18.

In a brief conversation with Mr. French this morning I learned that his corporation, the J. W. French Manufacturing Company, Rozet Mills, Three Rivers, Mich., is preparing to start its new 76-inch Fourdrinier as soon as possible. This will give the mills a capacity of about seven tons daily.

The same company has just purchased the flouring mill adjoining the paper mill property in order to secure the water-power. The building will probably be utilized as a paper mill. The town of Three Rivers is soon to be blessed with "brand new" water-works, which will be a great convenience to the manufacturing interests of the place. Mr. French was too modest to say so himself, but I am told by some of his fellow townsmen that the water-works are an institution due principally to his efforts, as President of the town corporation.

Messrs. Clark and Kimberly, whose names appear prominently in the report of the convention proceedings, have just left Chicago for the Atlanta Exposition. Both gentlemen are veterans of the late war, and will spend a portion of their time in revisiting their old battle-grounds. They will return about the 26th.

Trade is quiet and business steady.

G. B. H.

TRADE IN THE MIAMI VALLEY.

[FROM OUR REGULAR CORRESPONDENT.]

DAYTON, O., December 20, 1881.

The holiday season is fairly on us. The streets are thronged with gaily-dressed ladies, and eager-eyed children are enjoying the sight of prospective Christmas presents. The shops look gayier than ever before. Every line of business now makes preparations for the holiday trade instead of leaving it, as formerly, to the stationers and jewelers. The dry-goods establishments are gorgeous with bright-hued articles of use and ornament. The clothing stores fill their show windows with scarfs, cravats and handkerchiefs that rival the rainbow in colors.

I have taken special pains to find out how the trade compares this season with last year, and in every case it is better, and that means the best trade ever in Dayton. While last year we had the benefit of the traditional Christmas weather—i. e., snow and ice,—this year we have green fields and beautiful autumn weather.

The Holden Manufacturing Company, taking advantage of the temporary vacancy of the premises next to its own, occupies the two stores. Its retail department is in charge of C. E. Con-

over, whose suave manner and seductive smile woos many a dollar from the pocket of the most hard-hearted parent.

John H. Thomas has his store crowded with goods, both elegant and useful. Robert Dicks, formerly in his employ, is now engaged with him for the holidays.

James Rickey, with his usual good taste, has his windows beautifully trimmed. The crowds at all times in front of them show the popular appreciation of his ability in that line.

The United Brethren Printing Company has some beautiful goods, and has in its double store abundant room for its really fine display.

Sullivan & Chacecellor are not behind their competitors in their holiday show, and tell me that they never had so good a trade.

Hoglen Brothers, in their specialties of picture frames and artists' materials, have a mighty nice display, and are selling a great many goods.

H. E. Mead & Co. do not make a specialty of stationery, and of course do not make a holiday display.

R. S. Rogers & Co. deal only at wholesale in stationery and holiday goods, and report sales so good that they have nothing left to display.

James F. and Joe Crane, both with Warren, Fuller & Co., are at home for the holidays, and report the best sales for the past season that they ever had. They have become so accustomed to decorations of interiors in their line of business that from mere force of habit, I presume, they will lend the aid of their personal presence to the decoration of many a social festivity in our city during the coming holidays.

Among the mills I find everything rushed to keep up with the demand. The prices of news and book are steady, but have not advanced. The manilla mills are all busy, and prices have been advanced about $\frac{1}{4}$ cent per pound. The Middletown Paper Company, successor to A. Hill & Sons, is running the upper mill. The Globe Mill is as yet idle.

The Xenia Paper Company is about ready to begin on heavy straw paper.

The tactics of the straw mills will encourage the building of eight or ten new mills throughout this section. They are fairly wild on prices. It is cheaper to-day to use No. 1 manilla for wrappers than the miserable article of straw paper that is being palmed off.

Traveling men are very scarce. Charles Bates, of Bates Brothers, was here and showed some nice pocket-books. Mr. Hall, of the Springfield Paper Company, had a good line of papers and card-board at low figures. Speaking of low price of writing papers, how is it that the envelope manufacturers account for their frequent advances in price on the claim that paper

has advanced? Envelopes are being offered by dealers at a small discount from the manufacturer's price. There is some incredulity as to whether any advance has in reality taken place. We are looking for a merry Christmas throughout the

MIAMI VALLEY.

A VISIT TO ATLANTA.

[CORRESPONDENCE OF THE STATIONER.]

PHILADELPHIA, December 20, 1881.

THE AMERICAN STATIONER, which does not neglect any occasion for advising its readers of all matters of interest to them, sent one of its representatives to visit and report upon the Atlanta Exposition, which, although for the most part devoted to the textile industry, is also a general exposition where the most important products of the United States are largely represented, and particularly those of the South.

The chief purpose of this trip was to ascertain if the great hopes for the future of this part of the country were justified, and and I return from my trip to Atlanta with the conviction that, in a few years, industry in general, and particularly in the manufacture of cotton, will show a development greater than we can now imagine, and that prosperity will crown the efforts of a population which has not only forgotten old dissensions, but which is today loyally devoted to the Union. This was the most important point of my investigations, for the South cannot prosper without the aid of the capitalists of the North, and this assistance could not be expected if fidelity to the Union was not an undisputed fact.

By its situation at the point of junction of the great railways of the South, Atlanta has taken of late years a position of considerable importance, and is to become the grand *entrepot* and central point where the products of the North and South will be exchanged. The initiative made by the Exposition now in progress is a happy idea which has resulted in success. The visitors have been more numerous than was hoped for, and from now to December 31, when the Exposition closes, they will appear in large numbers.

If space permitted, I would like to give a detailed account of my visit to the Exposition, but I shall be compelled to confine myself to that which particularly concerns our trade.

In the department devoted to the booksellers, bookbinders and stationers, I specially remarked the exhibit of F. G. Hancock, of Atlanta, which comprises blank-books of his own manufacture, and which bear comparison with the finest goods from the North. His paper boxes and folding boxes deserve the same eulogium, and also his shipping tags. I shall speak more at length of F. G. Hancock, because his establishment shows the spirit of enterprise which has taken hold of the young generation. Mr. Hancock began the manufacture of paper boxes a few years ago with five or six hands, a German box-maker and a boy. The only machine he had then was a shoemaker's knife worth fifteen cents. To-day he has all of the necessary machinery in a building which is one of the finest in Atlanta. His factory on the second floor is provided with the most perfect tools, run by steam and giving employment to nearly sixty working people. To give an idea of the importance of the manufacture of paper boxes by F. G. Hancock, I will say that I have seen an order for thirty thousand boxes given by one house. The warerooms occupy the upper stories, and on the first floor are the salesrooms in which is perhaps the finest and heaviest stock of paper, stationery and blank-books in this section of the

South. This house controls the sale of the flat and ruled papers of the Whiting Paper Company. It draws its supplies of stationery goods from the best manufacturers of the North. Esterbrook provides it with a special brand of pens, Langfeld, Turner & Andrews sell it the larger part of its leather goods, William Mann provides it with copying books, which are in demand everywhere in the South. Mr. Hancock has two travelers, and his trade extends over six different States. He is a young man yet, and there is no doubt that in extent of business he will, in time, rival the greatest houses of the North.

At whatever cost to modesty, I must mention the exhibit of the Lockwood Press. This includes one volume of THE STATIONER and one of the *Paper Trade Journal*, richly bound, besides numerous specimens of our different publications and of the work of the Lockwood Press printing-office. But that which particularly attracts the attention of the public is a copy of the catalogue of the Russell & Erwin Company, a full bound quarto of 1,000 pages, containing six or seven thousand engravings, and which was composed and printed in the Lockwood Press establishment, and which is considered a model of typography in its class.

D. Appleton & Co. exhibit their handsome books. Charles Scribner's Sons show their encyclopædia and other publications.

Carter, Rice & Co. have a very remarkable display of all kinds of papers and envelopes of every quality.

Byron Weston exhibits his ledger paper. Mr. Weston has made at the Exposition and in Atlanta numerous friends with whom he will be delighted.

Ivion, Blakeman, Taylor & Co., of New York, and Van Antwerp, Bragg & Co., of Cincinnati, make a very complete exhibition of their school books.

Louis Frang & Co., with their beautiful chromo lithographs, and John A. Lowell & Co., with their elegant specimens of engraved work, make exhibits which are very much admired.

I am sorry that I have to write so briefly of this Exposition, but I must end this letter, already too long, with a hurried review of the leading stationery houses of Atlanta.

I shall first mention Phillips & Crew, who do the largest business in the city as booksellers and stationers. Mr. Crew, the founder of the house, was a newsboy about seventeen years old at the beginning of the civil war. He started the large establishment which he now directs with a capital of \$25, which he had saved. Eighteen months later Mr. Phillips became his associate, and by persistent effort, and their recognized probity, they have secured the confidence of the best custom in Atlanta. Their business has considerably increased this year, and their sales for the Christmas season have run very large. The cards of L. Frang & Co. and of Marcus Ward & Co. are sold by them, and are in very great demand. Fairchild's gold pens are sold by them, and are very popular in Atlanta. Holman's photo albums and Bibles also sell very well. They have a very nice line of artists' materials, furnished by Janetzki & Co., of Philadelphia.

S. P. Richards, successor to J. J. & S. P. Richards, general booksellers and stationers, is the oldest house in Atlanta, and does an excellent trade.

Lynch and Thornton are also very popular in the stationery trade.

Lovejoy & Pitchford, at one time connected with the house of Phillips & Crew, have been established for two years, and have already secured an excellent reputation. These two active

young men carry an excellent line of school books, fancy goods, stationery and frames. Their trade, this year, has proved very good.

I shall close by mentioning Walden & Stowe, stationers, booksellers and dealers in school books, who are well known here, having been in the trade for a number of years.

Howard Lockwood, proprietor of the Lockwood Press, will be glad to corroborate my remarks as to the friendly feeling of the people in the South. On several occasions we have had reason to feel the warm and cordial reception given us by the many friends whose acquaintance we have formed.

Persons returning from Atlanta have the choice of different railway lines from the South. The Virginia Midland claims to be the shortest line. Without disputing this assertion, I can say it is not the one by which to travel the quickest; for, whether because of the bad management of the line or for some other reason, I was delayed ten hours in going and thirteen hours in returning. It is, nevertheless, only just to say that the last delay was caused by an accident due to malevolence. Some unknown parties had obstructed the track for the purpose of smashing the locomotive and of derailing the train. By a providential chance, although the engine was completely disabled, it remained on the rails, and thereby the lives of all of the passengers were saved. I am rejoiced at the fortunate escape, inasmuch as I shall not be deprived of the pleasure of wishing your readers a Merry Christmas and a Happy New Year.

J. VIENNOT.

LETTERS PATENT FOR INVENTIONS.

BY JAMES A. WHITNEY, COUNSELOR-AT-LAW.

IX.

WHAT CONSTITUTES A PATENTABLE INVENTION—
(CONTINUED).

I have spoken at some length of machines and improvements on machines as allied, in some cases, in their nature as patentable inventions. It is not necessary, however, to enter thus fully into details with reference to other subdivisions of equal importance; the general idea of the system and propriety of dividing the subject matter under different heads having been illustrated somewhat at length in the preceding articles. It is not uncommon in recent practice for patents to issue upon organized machines, and also upon specific improvements upon specific machines. In general, however, patented inventions are ranged under different classifications.

One of the least common of these is that of an "art" which, in substance, is a much strained title for devices or methods which, in most instances, could be more clearly designated under other headings. It had its origin in English practice, and was adopted at an early day in the United States as a means of saving the validity of patents which, under strict verbal construction, might otherwise have been destroyed through technical objections. In this country it was first used by the court concerning a federal patent granted to Oliver Evans for the improvements which I have previously referred to as the subject of a local patent from the State of Maryland. The case turned upon the interpretation of a subject matter which included two machines for use in flouring-mills, and these were held to constitute an improvement in the art of manufacturing flour. The term is, however, legitimately applied to many processes, as for example, in the English case of *Crane v. Price*, which related to the manufacture of iron

by the combination of a hot-blast with anthracite coal, the hot-blast having been previously used in connection with bituminous coal, and anthracite having been previously used in connection with the cold-blast. In this instance the substitution of one well-known air-blast for another, and the substitution of one well-known fuel for another, for a purpose for which both had been before employed, would have been open to the technical but forcible objection that the alleged invention consisted merely in the substitution of one well-known means for another, a difficulty which was effectually and properly overcome upon the reasoning that the invention was not so much a combination as a new art which produced a cheaper and better article than any that had been commonly produced before.

It is well settled that the mere function of a machine cannot be patented apart from the means by which that function is exercised. But in many cases this objection is merely colorable, inasmuch as what is done by a machine may be covered independently of the particular means employed. This is commonly designated as a mechanical process, and is illustrated by an English case, in which the invention consisted in welding tubes without an internal mandrel to support the edges while undergoing the welding operation. This was something which could only be effected by the use of a machine operated in a specific manner, although the machine itself might be varied in details, and even machinery old and well known could be employed.

Chemical processes constitute another class of patentable subject matter, which, practically, are often of the highest importance. These commonly consist in subjecting one substance or material to the successive action of other substances or materials which modify the character of the substance acted upon, or which produce some new product. In such instances the product itself is patentable as a separate article of manufacture, or rather they form a subdivision of a comparatively large class of patentable inventions designated by this general term. A new article of manufacture, like every other patentable invention, must involve something of invention in its production, but not necessarily more than is necessary to the patentability of an invention of any other class. Thus it has been held that a brass kettle made by spinning was patentable, although composed of the same material as the kettles previously known, and although made by a mechanical operation previously well known for the production of similar though smaller articles. A new article of manufacture may also comprise what is otherwise termed a composition of matter; that is to say, a compound made up by the mingling of various materials, such inventions frequently arise from but slight additions to, or eliminations from, a previously known compound, and such have frequently been held to be patentable. In one instance the addition of a flavoring material to a popular beverage was sustained by the courts, and an infringer upon the patent thereof was enjoined. This, although a somewhat extreme case in view of the previous state of the art, was based upon accepted axioms of the patent law, and clearly illustrates one of its leading principles.

This principle has been systematically acted upon by the Patent Office. Thus, in the *ex parte* case of Hawley in 1875, the applicants for a patent claimed a concentrated extract for food, consisting of wheat-flour, malt-flour, wheat-bran and bicarbonate of potash. The case was rejected by the examiner upon a reference which showed the combined use of wheat-flour,

ground barley, malt, water and bicarbonate of potash, both the new improvement and the reference being based upon something similar previously enunciated by Professor Liebig, the object in each case being to produce a practically marketable article. It was held by the Commissioner that the addition of the wheat-bran to the other ingredients constituted a new composition and consequently a new invention. In the analogous case of Heide and Wirtz in the same year it was held by the Commissioner

that a preserving composition for macaroons composed of almonds, dried white of egg, sugar and water in certain proportions, and with the water less in quantity than was necessary for baking was patentable. The invention consisted of old ingredients arranged in a new manner, and possessing the superior qualities of transportability, cheapness, economy and convenience in use and imperishability. The demonstrated utility of the invention led to the conclusion that it was worthy of protection.

1882 VALENTINES 1882

DURING the past year we have enriched and beautified our Valentines in many ways, and while our improvements have nearly doubled their value, our prices will remain the same. Our increasing facilities enable us to make better goods at less cost each succeeding year, and we now offer for the coming season a very choice and complete line of the

— MOST ELEGANT VALENTINES —

on the market, forming the finest display we have ever made at prices exceptionally low.

Our New and Beautiful Easel Valentines are delicately and artistically trimmed with Fringes and Satins in rich and chaste designs, and will, undoubtedly, be the **LEADING VALENTINE** of the season, retailing at from \$1.00 to \$6.00 each. Sold to the trade by the dozen or gross, not put up in assorted lots.

Our Chromo Box Valentines, acknowledged by all to be the **FINEST LINE OF BOX VALENTINES** made, retail at from 10 cents to \$25.00 each. Sold to the trade by the dozen or gross; also in assorted lots at from \$10.00 to \$50.00 each.

Our Cupid Darts or Lace Valentines retail at from 3 cents to \$1.00 each, and are also sold to the trade by the dozen or gross or in assorted lots at from \$6.00 to \$50.00 each. In this particular line we have made a very great improvement.

Valentine Cards.—We have a very choice line of plain, embossed, panelled and fringed cards, retailing at from 3 cents to \$1.00 each, sold to the trade by the dozen or gross; also in an assorted lot at \$20.00. Valentine Envelopes to suit all sizes of our Valentines.

 **Trade Discount on above 50 per cent.**

— COMIC VALENTINES —

IN these changes are made every year, and their constant improvement keeps them fully up to the times. Our latest Novelties are our CHANCEABLE COMICS, something entirely new, which by a single fold make a double hit. Price, per gross, \$3.00 net.

Portrait Comics.—Also new. Price, per gross, 30 cents net.

Long Jokers.—New last season; size 9x21. Price, per gross, \$2.00 net.

INFRINGEMENT IN FOUNTAIN PENS.

NOTICE TO DEALERS.—It is well known that the patent of Duncan Mackinnon, covering a central air tube in Fountain Pens, has been extensively infringed, and the owners of said Mackinnon Patent have issued a circular to the trade warning them against dealing in these infringing goods.

It is therefore no longer safe to buy pens having the air tube unless they are made under the authority of said patent.

The undersigned, C. W. Livermore, Proprietor of the Stylographic Pen Co., Providence, R. I., hereby gives notice that he is the only licensed manufacturer under the said Mackinnon Patent of Fountain Pens having the said air tube.

By the terms of his license no other parties can be authorized to manufacture pens having that feature, the said license being exclusive in its terms.

No other manufacturer, therefore, has the right or can obtain the right to represent himself as licensed to make such pens.

L. PRANG & CO.'S

Christmas and New Year Cards

ANNOUNCEMENT.

WE hereby beg leave to announce to the trade the completion of our line of Christmas and New Year Cards for this season, for which our agents are now soliciting orders. The extent of our list, the originality, and especially the American character of our designs, together with the great care taken in their execution, will, we have no doubt, secure for our goods the popularity which they have enjoyed heretofore. The efforts we have made to secure the highest excellence, is attested by the names of some of the artists whose designs have been reproduced. We would only name Elihu Vedder, C. C. Coleman, Thomas Moran, Miss Rosina Emmett, Miss Dora Wheeler, Mrs. O. E. Whitney, W. H. Gibson, F. S. Church, R. G. Birch, &c. That a due regard has been paid for the quality of the literary matter, in connection with these designs, is shown by the fact that many of the designs are accompanied by original poems from writers of note, such as Mrs. Celia Thaxter and Mrs. Emily Shaw Forman.

The great increase of our manufacturing facilities, secured by additions to our building nearly doubling our floor space and by the adding of new machinery, will place us in a position to fill orders promptly. Still we would request dealers to place their orders as early as possible, so as to still further enable us to make timely preparation for prompt deliveries.

Our Cards will, as heretofore, be put up in envelopes containing twelve Cards, unless otherwise stated on our price lists.

We furnish envelopes without extra charge for all our Christmas and New Year Cards, for which the list price is \$1.80 per set, and over. Our silk-fringed Cards will no doubt be in great demand this season. We have made ample preparation to furnish these in time and have made arrangements with our manufacturers for the best quality of silk fringes. We would call special attention to the excellence of our fringed Cards and the novelties in colors and style of fringes we offer for this season.

A marked and attractive feature of our cards are the elegantly ornamented backs.

All our fringed Christmas and New Year Cards are furnished with envelopes and protectors, so as to insure safe transportation in the mails.

It will be impossible to embody our whole list in the space of the advertisement, and we will therefore merely give a general outline of the variety offered.

PRANG'S PRIZE CHRISTMAS CARDS.

COMPETITION OF 1881.

These are the Cards selected by the judges in the second competition for four designs of Christmas Cards, for which we offered \$2,000 in prizes of \$1,000, \$500, \$300 and \$200 respectively. At the recommendation of the judges, Messrs. COLEMAN, LAFARGE, and WHITE, the prize for third best Card was increased to \$500. Mrs. CELIA THAXTER has written appropriate verses for each of the designs.

- 1st Prize Card (\$1,000), by Elihu Vedder. Size, $6\frac{1}{4} \times 9$ inches; price \$1 each. Same card with silk fringe, cord and tassels, price \$1.50 each.
- 2d Prize Card (\$500), by Miss Dora Wheeler. Size, 7×9 inches; price 75c. each. Same card with silk fringe, cord and tassels, price \$1.25 each.
- 3d Prize Card (\$500), by C. C. Coleman. Size, 7×9 inches; price 75c. each. Same card with silk fringe, cord and tassels, price \$1.25 each.
- 4th Prize Card (\$200), by Miss Rosina Emmett. Size, $5\frac{1}{4} \times 9\frac{1}{4}$ inches; price 60c. each. Same card with silk fringe, cord and tassels, price \$1 each.

The Prize Cards can also be had mounted on heavy board with gilt beveled edges.

We beg to call attention also to the following publications for New Year and Christmas:

- "Goddess Fortune" New Year Card, by Elihu Vedder. Size, $6\frac{1}{4} \times 8\frac{3}{4}$ inches; price 75c. each. Same card with silk fringe, cord and tassels, price \$1.25 each.
- "Christmas Dove," Size, $7 \times 9\frac{1}{4}$. This card is in the same style as the success of the last Easter season, the "Easter Dove" Price 60c. each. Same card with silk fringe, cord and tassels, price \$1 each.

Our Regular Line of Christmas Cards consists, among others, of the following Series:

- Nos. 901, 902, 903, 906, 909, 910. Floral designs ranging in price from 20c. to \$1.20 per set of 12.
- Nos. 904, 905. Humorous Cat and Frog Designs, 60c. per set.
- No. 907 is a new series of Horseshoe designs, 75c. per set.
- Nos. 920 and 929. Children's designs, at \$2.40 and \$3.60 per set.
- No. 922. Shells of Ocean, with figures, \$2.40 per set.
- No. 924. Fans with silk fringes, \$3 per set.
- No. 933. Bric-à-Brac designs, very rich, \$6 per set, and many others.

We offer a similar assortment of New Year Cards, but would call special attention to No. 1320, a new folding calendar, at \$2.40 per set. Most of the Numbers can be had with silk fringes ranging in price from \$2.25 to \$12 per set. Stock will be ready for delivery September 15.

Besides the above, attention is called to our New Birthday Cards, Scripture Texts Cards, New Panels, New Water Colors, by Thomas Moran, and other publications. Our line of Thanksgiving Day Cards will also be shown by our agents.

Trade Novelties.

[We will be glad to receive samples of all novelties issued in the trade, and will notice all such which possess merit free of charge. It is desirable to accompany descriptions with cuts whenever possible.]

THE WEB TABLET.

The drawing illustrates the Web Tablet, which is claimed to be the most compact and convenient method yet devised for putting up writing paper. This tablet is adapted alike to the requirements of the office and counting-room and is suitable for home use. It is substantially made, finished in leather and ornamented in gold. It is said to be very durable. The cylinder contains a web of paper wound in a compact roll. The free end of the paper extends the length of the tablet, passing under a guard at the end, which serves to separate the web into sheets when it has been written upon. The tablet has all of the advantages of the ordinary pad or tablet.

MUSTANG MAILER.

An illustration of Piner's Mustang Mailer is given herewith. This little tool is intended for expediting the work of mailing where long lists of names have to be given out. It is said to be very simple and durable, and these qualities, with its cheapness will, it is thought, commend it to publishers and to every business house having a large mail list. The great advantage of this machine is that it prints directly upon the paper or wrapper, and does away with pasting. Where labels are used there is a liability of their being pulled off, in which case the matter mailed fails to reach its intended destination, and is therefore lost as well as the postage. The Mustang Mailer occupies a space of 37 inches in length and $4\frac{1}{2}$ inches in width; it is made wholly of iron, without springs or complications of any kind to get out of order, and can be operated by a boy as easily as by a man. It is capable of printing addresses at the rate of from 1,500 to 2,500 an hour, according to the expertness of the operator. The mail list is imposed (made up) upon galleys, $1\frac{3}{4}$ inches (10 ems pica) in width on the inside. Each galley will contain 75 to 80 addresses, is easily accessible for the purpose of making corrections, and convenient for handling. The weight of the machine is only fifteen pounds, and galleys one pound each, making their transportation to any part of the country, by express, but a small item. The mailer is manufactured by the St. Louis Type Foundry, 115 Pine street, St. Louis.

NEW PATENTS.

No. 249,932. Writing Tablet.—Frederick S. Hasbrouck, New York, N. Y.

A writing tablet comprising a number of detachable sheets of paper, a box receiving them, retaining them in position, and covering and thereby protecting their edges, a writing surface upon which the sheets, when detached, may be placed and used, and a blotter attached to said writing surface, the said writing surface forming a cover for the box when the tablet is not in use, and the blotter lying between the sheets of the tablet and the writing surface when the latter is employed as a cover.

No. 249,963. Toy Puzzle.—Charles H. Loomis, New Haven, assignor to Clinton Brothers & Co., North Haven, Conn.

No. 249,969. Printing Press.—Phil. Miller, Norwich, Ct. No. 249,975. Perforating Stamp.—Henry H. Norington, West Bay City, Mich.

The combination, with the table and receiving die, of a spring clip or presser having a thumb-lift which extends inward beneath the edge of the die.

No. 249,989. Printing Press.—Enoch Prouty, Boscon, Wis.

THE WEB TABLET.

No. 250,013. Toilet Fan.—James C. Stirrat, Brooklyn, E. D., N. Y.

No. 250,023. Lead Pencil Holder.—Edward Weissenborn, Hoboken, N. J.

No. 250,026. Packing and Toy Box.—Francis M. Whitelaw, Hartwell, O.

A box adapted for packing and for use as a toy or toys, having the body thereof ornamented with complete figures and the cover with figures which register when the box is closed, and form but one complete figure on each face of the box.

No. 250,045. Bill File.—Charles H. Peltier, Faribault, Minn.

A device for file-papers, consisting in a rod having a hook at one end and a sheet of metal bent around said rod, and having transverse strips.

MUSTANG MAILER.

No. 250,052. Stereotype-Locking Device.—Elijah P. Brown, Cincinnati, Ohio.

No. 250,060. Automatic Toy.—John Doyle, Hoboken, N. J., assignor to William L. Hubbell, New York, N. Y.

No. 250,066. Clasp for Albums.—Eli S. Glover, Battle Creek, Mich.

A clasp for an album or other book, having a series of plates or sections linked or hinged together to form an adjustable and extension clasp, said plates, links, or sections being provided with perforations or a fixture to clasp the covers of the book.

No. 250,211. Adjustable Frame for Printing Films. Benjamin Day, West Hoboken, N. J.

No. 250,213. Inkstand.—Charles De Roberts, Albion, Neb.

No. 250,215. Printer's Lead and Slug Rack.—Cornelius De Vos, Iowa City, Iowa.

A printer's lead and slug rack having series of graduated shelves, 1, 2, 3, that incline from the front to the rear, and from one end toward the other.

No. 250,234. Blotting Case.—François R. Grumel, Paris, France. Patented in France June 9, 1881. A blotter composed of a series of sheets of

blotting paper united in book form, and provided with covers, one of which extends beyond the paper and is provided with receptacles for writing and other implements.

No. 250,238. Plate for Printing.—Christian E. Hansen, Washington, D. C.

The method of forming relief blocks or plates for printing, which consist in, first, applying to a bed a layer of a yielding plastic material capable of resisting heat, and upon this a foil capable of resisting the heat at which type metal melts, and provided with a thin film of thin or solder metal on its upper or exposed side; next, indenting by suitable means the foil through the layer of plastic material to the bed or base plate; next, preparing the indented foil film to adapt it to unite with molten type metal, and then backing the foil by pouring a suitable quantity of molten type metal over it.

No. 250,239. Process of Preparing Matrices for Producing Printing Plates.—Christian H. Hansen, Washington, D. C.

The method of forming matrices for the production of printing plates, which consists in first applying to a bed a yielding adhesive layer of material, and upon this tin-foil, next indenting the tin-foil through the layer of adhesive material to the plate or bed by means of a stylus, and then backing the tin-foil with plaster-of-paris.

No. 250,246. Printing Machine.—Joseph E. Hinds, Brooklyn, N. Y.

No. 250,304. Registering Device for Printing Machines.—Thomas M. Vieillelard, Paris, France, Patented in France May 18, 1880.

No. 250,327. Blotter Tablet.—Robert B. Holmes. Watertown, N. Y., assignor to John Sterling Robinson, same place.

A writing or memorandum tablet, having its top cover and one or more blotters mounted upon separate hinge-lines of the cover hinge-strip, the blotter forming the hinge-line proper of the cover and protected thereby.

No. 250,376. Postage or Revenue Stamp.—Gideon B. Massey, New York, N. Y., assignor of one-fourth to Francis E. Norris, same place.

No. 250,380. Copying Pad.—Waldo G. Morse, Rochester, N. Y., assignor of one-half to William S. Oliver, same place.

REISSUES.

No. 9,952. Scrap Book.—Koch, Sons & Co., New York, N. Y., assignees of Bernard J. Beck, deceased. Original No. 175,327, dated March 28, 1876.

DESIGNS.

No. 12,590. Statuary.—John Rogers, New Canaan, Conn. Term of patent 14 years.

No. 12,591. Font of Printing Type.—Edwin C. Ruthven, Philadelphia, Pa., assignor to MacKellar, Smiths & Jordan, same place. Term of patent 14 years.

TRADE-MARKS.

"The arbitrarily selected name 'A. W. Faber.'"

No. 8,836. Lead Pencils.—Eberhard Faber, Port Richmond, N. Y.

"The letters and word 'A. W. Faber.'"

No. 8,859. Pencils and Rubber Erasers.—Gustav Schwanhäusser, Nuremberg, Bavaria, Germany.

"The representation of a floating swan."

No. 8,859. Drawing Lead Pencils.—Gustav Schwanhäusser, Nuremberg, Bavaria, Germany.

"The representation of an anchor."

No. 8,860. Drawing Lead Pencils and Rubber Erasers.—Gustav Schwanhäusser, Nuremberg, Bavaria, Germany.

"The representation of a key."

ACME STATIONERY AND PAPER COMP'Y,

No. 117 Fulton Street, New York,

WILL HAVE READY FOR THE TRADE EARLY IN JANUARY, 1882, THEIR

Acme Valentine Poem,

— ENTITLED —

“MY LOVE,”

Illustrated with Six HANDSOME Designs in Water-Colors.

This Valentine is finished in the highest style of art, and has been pronounced by art connoisseurs and critics who have seen it, to be the handsomest one ever presented to the public, both in artistic design and finish, and in the quality of workmanship displayed in its execution, and is one that will be of permanent value and interest.

STYLES OF MOUNTING.

- No. 1.—Plain with silk hinge, cord and tassel; an ornamental card-board protector and envelope.
- No. 2.—Same with heavy silk fringe, cord and tassels, card-board protector, and inclosed in a box instead of an envelope.
- No. 3.—Mounted between heavy Passe Partout Mats, 8 x 11 inches; gilt edge, in box.

- No. 4.—Bound in Album style, gilt edge, heavy beveled boards, silk finish, muslin, in box.
- No. 5.—Same in Leatherette binding.
- No. 6.—Same as No. 2, but inclosed in a handsome SILK PLUSH BOX.

BLANK BOOKS,

1882.

SPECIAL NOTICE FOR THE NEW YEAR!

WE take pleasure in announcing to the Jobbers of BLANK BOOKS that we have again enlarged and added to our manufacturing facilities to keep pace with our increasing trade, and notwithstanding the promptness with which we have served our customers the past fall, this unusual demand has stimulated us to pile up a much larger stock than has ever before been carried by any manufacturer, thereby giving us a supply to fill at once any orders from our entire list, the variety of which speaks for itself.

Our prices are uniformly low, and parties favoring us with their orders will be promptly and faithfully served.

THE BAY STATE PAPER COMPANY,

HOLYOKE, MASS., were among the pioneers in the W. C. Paper trade and their goods, from the start, were distinguished for their fine quality and the superior style in which they were wrapped. Their example has been approved and imitated by a swarm of competitors, who have flooded the market with inferior goods, put up in packages of 600 to 800 sheets, misleading the unwary, and sold at apparently lower figures; but the trade and consumers generally recognize the fact that a good article, honestly put up, in 1,000 sheet packages, is the most profitable both for use and for sale. Their goods are all guaranteed 1,000 sheets to package, and no short count. No wood is used in any of these papers, but they are made of the very best stock in the market.

THE "MEDICATED BOUDOIR" BRAND

Has no equal for weight, strength, softness, and color, and commands the front place with "fine retail trade." Present reduced quotations furnished on application.

RALPH TRAUTMANN, Publisher, 312 Broadway, New York.

Trade Gossip.

All new goods and designs which are not, strictly speaking, "Novelties" will be noticed under this head. The trade are requested to forward descriptions with samples in order to secure proper notice.

J. R. Nelson, dealer in notions, Warrensburg, Mo., is closing out.

Oscar Moonig, bookseller and stationer, Jefferson City, Mo., is dead.

Mrs. G. B. Carter, dealer in fancy goods, Dallas, Tex., is closing up.

C. G. Mitchell, wholesale dealer in notions, Utica, N. Y., has sold out.

Randel & Bruno, printers, New York city, have made an assignment.

A. H. Goetting is doing an immense business in all the lines that he handles.

Linn J. Ladd, publisher of the *Leader*, Vandalia, Mo., has sold out to Chapel G. White.

I. H. Hamburger has now ready fifty numbers of valentine cards and thirty-five of Easter cards.

Mr. Macdonald, of John Walker & Co. of London, is in the city this week on his semi-annual trip.

E. W. Flaxington, manufacturer of paper boxes, Philadelphia, is advertised to be sold out by the sheriff on the 22d inst.

Green & Cavanaugh, dealers in notions, St. Louis, Mo., have dissolved partnership. Archambeault & Cavanaugh succeed.

Hard & Parsons are preparing for the spring business an extensive line of goods which will be specially suitable for the jobbing trade.

Willy Wallach has just received a full line of samples of Tuck's valentines and Easter cards, which embrace many very beautiful designs.

D. Lothrop & Co., Boston, have published a "Young Folk's History of France," "Heart's Content" and "Stories for Language Lessons." These are all illustrated "juveniles."

The committee of investigation into the affairs of Miller, Ussing & Co., appointed last week, has not as yet called the creditors together to submit its report, but is engaged in the matter and will probably be prepared in the course of the coming week.

The *L'Artiste* Publishing Company, 7 Warren street, this city, has issued an illustrated almanac for 1882, the typographical appearance of which is very good. The almanac is replete with illustrations appropriate to the seasons. "Afternoon Tea" is the title of another of the company's publications, containing rhymes for children, with original illustrations both amusing and instructive to the young folks.

A meeting of the creditors of J. H. Van Kirk & Co. took place on Tuesday at the Stationers' Board of Trade. The committee of creditors submitted two offers it had received to purchase the entire stock and assets of the firm. These offers were from Carter, Rice & Co., of Boston, at \$27,000, and Henry Lindenmeyr at \$30,000 cash. The committee recommended that the offer of Mr. Lindenmeyr should be accepted as for the best interests of all concerned. It is very likely that the assignee will act upon this report of the committee, and close out the stock and assets at the best price obtainable to Mr. Lindenmeyr, in which event the creditors will probably receive a dividend of about 25 per cent. in cash.

A meeting of the stockholders of the American Book Exchange was held on Monday at No. 764 Broadway. John B. Alden, the president of the company, occupied the chair. A good deal of time was spent on the part of some of the gentlemen present in finding fault with the way in which Mr. Alden had managed the affairs of the concern, and one irate clerical gentleman characterized him as a "chimera." A committee, consisting of Richard Hendy, W. G. Halsey and E. C. Cunningham, was appointed to examine the books of the Exchange and report to a meeting of the stockholders, to be held to-morrow at noon. A meeting of the creditors of the concern took place on Wednesday at the Stationers' Board of Trade, at which the committee submitted a report, which consisted chiefly of a letter from Mr. Randall, the receiver, reviewing the efforts he had made to ascertain the assets and their condition. He said that the most valuable portion of the plates, including the "U. K." plates, were sold to a number of the paper dealers constituting what was called the "Syndicate," of which Mr. Squier (Frank Squier, of Perkins, Goodwin & Co.) was the agent. They were sold for a specific sum of money, with the right to repurchase them at fixed prices within certain dates, which right to repurchase the Exchange has forfeited. He believed, however, that the plates were merely pledged, and could be obtained from their holders for less than the Exchange received for them. He recited in his letter to the committee the fact, that Mr. Alden had made attempts to sell by auction the most valuable portion of the miscellaneous books, and at private sale to Alden & Chadwick and various other parties, without receiving therefor any security. The report charges Mr. Alden, in very strong terms, with trying to make away with assets of the concern, which should properly be in the hands of the Receiver. The Receiver, it is understood, will take immediate possession of all of the publications and other assets remaining undisposed of. W. D. Wilson was appointed a committee to act in conjunction with the Receiver, to inquire further into the matter and report at a meeting to be held on January 11.

About seven o'clock on last Saturday evening a fire, said to have originated in the boiler-room, broke out in the building 452 Broadway, this city. The first floor, basement and sub-cellar were occupied by A. & E. Wallach, importers and dealers in fancy goods and stationers' supplies, and before the flames could be extinguished they spread to some of the upper floors of the building. Almost everything belonging to A. & E. Wallach was damaged either by fire or water and their loss is estimated at \$300,000, on which there is an insurance of \$165,000. As soon as possible the firm will start in business again, and one of the Messrs. Wallach will leave for Europe directly for the purpose of selecting goods for the spring trade.

Samuel Raynor & Co. will on next Saturday at 12 o'clock give an ice-cream party at their store, on William street, to their hands, and will make their usual liberal distribution of Christmas presents to all of their employees.

Osborne N. Sargent, steel-plate engraver and wedding stationer, Boston, has removed to 328 Washington street, *Transcript* building.

Dezoi & Co., stationers, &c., Montreal, Can., have compromised at fifty cents on the dollar.

M. O'Shea, bookseller and stationer, San Francisco, Cal., has been partly burned out.

A. K. Stehley, stationer, &c., Hays City, Kan., has sold out.

The firm of Safdi Brothers, printers, Cincinnati, has been changed to Oppenheimer & Co.

Charles Webster, of the firm of Charles Webster & Co., booksellers, &c., Milwaukee, Wis., is dead.

Payne & Marsden, publishers of the *Mining News*, Ruby Hill, Nevada, have dissolved partnership.

W. W. Thompson has been elected president of the Southern Railway News Company, Louisville, Ky.

Rosa B. Baldwin, dealer in fancy goods, Upton (West), Mass., has sold out to the Misses Wood & Chamberlain.

Peterson & Lawson, dealers in notions, Grove City, Minn., have dissolved partnership. O. H. Peterson continues.

McCarthy & Hasberg intend to launch out largely in their new store, 487 Broadway, after moving there on February 1.

S. D. Ludden & Co., wholesale dealers in notions, Chicago, Ill., have dissolved partnership. S. D. Ludden continues.

Wm. P. Dane, New York, has just issued some new assorted folders for balls, concerts and advertising purposes. These are novel and pleasing, and likely to take.

The Artistic Papeterie and Complimentary Card Co., of which J. T. Roberts is manager, reports sales excellent, and present indications are favorable to the enterprise.

J. H. Bufford's Sons show five varieties of New Year calling cards, which come in plain and in gold beveled edges. They are published by the firm, and are neat and very striking. Parties desiring such goods should see them.

C. W. R. Smith, stationer and printer, Philadelphia, removed some months ago from 1,035 Walnut street to 130 South Eleventh street, where he has his store and office under one roof. He reports a satisfactory condition of trade.

"Vick's Illustrated Floral Guide" for 1882 is an elegant book of 130 pages, two colored plates of flowers, and more than 1,000 illustrations of the choicest flowers, plants and vegetables, and directions for growing. It is handsome enough for the centre-table or a holiday present. It will be sent to any address for ten cents. It is printed in both English and German.

The Acme Stationery and Paper Company has brought out something entirely new in valentines. It is a poem entitled "My Love," illustrated with six designs from water-color drawings. The first design is a very pretty scene of apple branches covered with blossoms which surround two loving doves. A silvered border is embellished with conventional designs of apple blossoms. The second design represents daisies under the moonlight, and the border has daisy ornamentation; the third design is of lilies with a lily border; the fourth of blue violets, with a border of conventional style; the fifth is of roses, the wild rose being the prominent feature, and the sixth design illustrates two billing doves, Cupid looking on, and a mirror to reflect the chosen fair. A valentine motto concludes this design, and the border is of hearts and darts. The styles of mounting are as follows: No. 1—Plain with silk hinge, cord and tassel, an ornamental card-board protector and envelope; No. 2—Same with heavy silk fringe, cord and tassels, card-board protector, and enclosed in a box instead of an envelope; No. 3—Mounted between heavy passepartout mats, 8 by 11 inches, gilt edge, in box; No. 4—Bound in album style, gilt edge, heavy beveled boards, silk finish, muslin, in box; No. 5—Same in imi-

tation morocco binding; No. 6—Same as No. 2, but inclosed in a handsome silk plush box.

H. C. Stivers, publisher, Little Falls, Minn., has sold out to Simmons & Fuller.

The stock of I. Baer, dealer in fancy goods, San Francisco, Cal., has been attached.

M. Sellinger, dealer in fancy goods, New Haven, Conn., has made an assignment.

Warren Chichester, dealer in paper and twine, New York City, has made an assignment.

Charles & Battle, publishers of the *Southerner*, Tarboro, N. C., have dissolved partnership.

Chase & Frater, publishers, Brainerd, Minn., have dissolved partnership. Chase continues.

The Nippon Mercantile Company shows a large and varied line of Japanese goods suitable for stationers' holiday trade.

Rosser, McClure & Morley, bookbinders and printers, Lafayette, Ind., have dissolved partnership. McClure & Morley continue.

The *Uptown Advertiser*, New York, is now called *The Sunday Advertiser*, Stein Brothers, 1,652 Third avenue, are the publishers.

E. & H. T. Anthony & Co. report having had a very successful season and are now preparing to launch out extensively in the spring.

E. P. Chapin and the Chapin Paper Company, Springfield, Mass., have consolidated under the style of the Chapin Paper and Pulp Company.

The stock of Isaac Robinson, fancy goods dealer, San Francisco, Cal., has been attached, and application has been made to force him into insolvency.

The attention of the trade is again invited to McCarty & Hasberg's removal to 487 Broadway, corner of Broome street, which will occur on February 1.

The *West Chicago Banner*, formerly *Union Park Banner*, published by Turner & Lloyd, 638 West Lake street, Chicago, is now the *West Chicago Banner*, Frank E. Stanley, 186 West Madison street, being the publisher.

The senior member of the firm of W. Minifie & Son, Baltimore, Md., having died, the business will be conducted under the same name by the surviving partner, J. Woodfin Minifie, he being sole owner of the stock, good-will, &c.

Attention is called to an advertisement of a well known Boston stationer and printer, who, having other business requiring his personal attention, wishes to dispose of his stationery, printing and blank-book department. This is an opportunity seldom offered.

On January 1 a new paper warehouse will be started in Cincinnati under the name and style of Ross, Rollins & George. The two latter, for a long time, were prominently connected with Chatfield & Woods, and are regarded as being enterprising and energetic men. The new firm starts with the best wishes of the trade.

The application of Samuel Clemens (Mark Twain) for a Canadian copyright of his new book has been refused by the Dominion Department of Agriculture and Arts. The claim was based on Clemens' visit and domicile for two weeks in Montreal. The authorities decided that such residence is not a domicile.

Frank D. Phinney, book and job printer, 4 Brighton avenue, Rochester, N. Y., having accepted the post of superintendent of the Baptist Mission Press, Rangoon, Burmah, has sold his entire outfit and business to Judson J. Withall, who has removed it to 39 North Union street, Rochester, where he will continue it in all of its branches.

Griffith & Startzman, booksellers and stationers, What Cheer, Iowa, have dissolved partnership.

Ralph Trautmann reports a great demand for all of his publications, but particularly for the series of portraits of authors and poets.

Rev. A. W. Coan is now editor of the *Herald of Gospel Liberty*, Dayton, Ohio, and C. W. Garoutte is the publishing agent. These gentlemen succeed the Rev. T. M. McWhinny, who was both editor and agent.

During the past year McLoughlin Brothers have enriched and beautified their valentines to such an extent that their value is enhanced nearly two-fold, while the prices remain the same. As its increasing manufacturing facilities enable this firm to make better goods each year at less cost it shares this advantage with its patrons, and consequently offers a very choice and full line of the most elegant valentines on the market, thus forming the finest display the firm has ever made in this line of goods. The

new and beautiful easel valentines can always be kept in sight, either in the parlor or boudoir, and are among the most acceptable tokens of love yet devised. They are strong and compact, and like the valentine cards, are delicately and artistically trimmed with fringes and satins in rich and chaste designs. The chromo box, cupid's dart valentines and fringed cards are put up in lots. Among the cupid's darts are many desirable low-priced valentines. The comics, as usual, have undergone many changes, and by numerous additions are kept fully up with the times. Changeable and portrait comics are among the latest novelties. These, with the Long Jokers and Useful Hints, the popular comics of last season, and the regular kinds form a combination of novelties in comics that cannot be excelled. The lots are all freshly made up and do not contain "old stock." As the firm's aim is not simply to make up a lot, but to make each lot-valentine so perfect that the dealer will be entirely sold out at the end of the season. An advertisement of these goods will be found in another column.

FOLEY'S PAT. IMPROVED STYLOGRAPHIC PEN.

Great reduction in price: No. 1, \$1.50; No. 2, \$2; No. 3, \$2.50; No. 4, \$3. A liberal discount to the Trade. FOLEY'S PATENT STYLUS is the best and only Pen with point, spring and cleaser in air tube. Fully warranted, and exchangeable for gold pens and pencils.

THE STATIONER

DEVOTED TO THE INTERESTS OF THE

Stationery and Fancy Goods Trades.

WEEKLY--\$2.00 PER ANNUM.

Single Copies - - - 10 Cents.

NEW YORK, THURSDAY, DECEMBER 22, 1881.

Advertisements cannot be received for insertion in the current week later than 12 m. on Wednesday. The charge for advertising is 25 cents a line, each insertion. Special terms for standing and displayed advertisements to be had on application.

This journal aims to be a medium of information for and a representative of the interests of every one connected with the stationery and fancy goods trades. It contains a full and trustworthy survey of the market for stationery in this country, in all cases giving the actual prices at which goods can be bought of importers and jobbers in this city, together with a detailed account of novelties in the trade, patents relating to stationery, and current items of interest. A review of foreign markets and accounts of movements abroad will also be furnished, and no pains will be spared to make THE STATIONER a thorough and complete exponent of the trade.

Subscription and postage for Great Britain, per annum..... 12s.

Any information our readers may wish to obtain shall be cheerfully given, and prompt replies will be made to all inquiries addressed to us on any subjects of interest to the trade.

Communications on all trade matters are earnestly solicited. Address

HOWARD LOCKWOOD, Pres. and Treas.

Subscribers to THE STATIONER can be supplied with the best cloth binder in the market. Deliverable at the publication office. Price, fifty cents.

Readers of this paper who avail themselves of the information obtained from its columns by advertisement or otherwise, are requested to notify their correspondents of the source of their information.

"MERRY CHRISTMAS" to all our friends.

SCARCELY can we realize that twelve months have passed since last we gave a Christmas greeting.

It has been a short year. Trade has scarcely had time to breathe, and has rushed along with a fullness and impetuosity which required an effort to keep up with.

We hope that we may say as much for the condition of trade twelve months hence as now. Perhaps we can. It is within the control of the business interests of the country; but if they default, the atonement will not be long coming.

PRUDENCE, even in the heyday of success, is a virtue not to be neglected. We have had something to say lately about extended credits; the trade, buyers and sellers should beware of them. When a man wants long time he is buying too much or his trade is not in a very hopeful condition. The cash buyer is a factor of safety; trust is an element of business, but too long credits presage destruction. Don't forget it.

READERS OF THE STATIONER have had occasion of late to remark an increasing number of failures. Let us stop and ask why these occur. There are several causes for this. One is too limited capital, or too large a spread for the means at command; another is selling under cost—the reason whereof we leave our readers to imagine—and others are the result of misfortune beyond control or of business incapacity. When we find 10 to 25 per cent. offered in settlement, we are led to ask what has become of the assets, and why this wide difference in the purchasing and paying capacity of the debtor? But is this the time to ask such a question? Should it not be the proper inquiry at the outset of transactions?

GOOD fortune and prosperity in trade betget carelessness, and this, in turn, repentance. Few can repent with indifference, and it is better, therefore, not to start on the road to mourning. With the coming of another year, with a prospect yet unclouded, we feel that it is the duty of a trade representative to sound these notes of warning. We do not look for the worst, but honestly expect to see the best trade in the coming year; but there are chances, and these taken too often bring the grim certainty of defeat. Whatever changes may be in store, there are yet no signs of impending trouble, but this assurance should not prevent a painstaking review of the situation, and the intelligent conduct of business.

EXPORTATION, as a means to avoid overproduction, is one of the precepts that we have sought to impress upon American manufacturers. That some have come and more are coming to this view of our industrial situation is quite apparent; but there is yet a large class of our manufacturers which professes indifference to the claims

of other markets than our own, and to this class we take the privilege of saying—not in the way of dictation, but of anxiety for the general good—that they cannot count long upon the present status of industrial prosperity. If a manufacturer has all or more than he can do to comply with current home requirements, it does not by any means follow that he is always to be thus happily situated. Ages follow ages, cycles follow cycles, and trade is not exempt from the changes which are induced. History—we need not go back to the "old times," for we have had experiences which are comparatively new—tells us that periods of commercial and industrial prosperity are followed by corresponding periods of depression. We are now, perhaps, at the height of our prosperity. Before the decade rolls away we may feel the strait into which the changes of business may bring us, and then we shall seek to gain the ground which we have neglected. If our lamps are not "trimmed and burning" it will be too late to attempt to excite an illumination then. All of the "hurrah" possible will not bring us to the point that might have been attained in season. Competition is induced by prosperity, and when our manufacturing resources are developed beyond the needs of our population and disorganization in the market follows, it will be found a very satisfactory thing to have an established foreign connection which will keep our factories running. All parts of the world do not share alike in the enterprises which develop so fast in our energetic and growing country; but remote people are being educated to the character of our goods, and their demands would increase were our manufactures well set before them. American goods find a ready market abroad, and it should therefore be a study and a desire to extend our export trade. We are finding that we can compete with the manufacturers of other countries. Shall we occupy the field or wait for the day of desolation?

WANTED—AN ORGANIZATION.

NEW YORK, December 17, 1881.

To the Editor of The Stationer:

It seems that the stationery clerks have no organization like clerks of other branches of business. Would it not be a good idea to organize an association to protect their interests, to help each other to procure situations, and keep the cheap (bread-and-water) men out?

Hoping you will insert this in your valuable paper, I am, &c., VERITAS.

ANOTHER "BEAT."

ST. LOUIS, December 19, 1881.

To the Editor of The Stationer:

We can beat "E" in Uica who beats "Occasional" in Washington, viz.: A prominent dry-goods house in this city advertises and sells *The Century* (Scribner's) for 25c., *Harper's Magazine*, 25 cents, &c., &c., G. S.

At the meeting of the trustees of the Stationers' Board of Trade held this week, it was decided to give the annual dinner, but the time and place has not yet been determined upon. George W. Davids is on the committee having the matter in charge.

--	-------

A valuable archaeological discovery, which may be said to equal that of the celebrated Kertch antiquities at the Hermitage of St. Petersburg, has recently been made near the Cossack village of Sewersk in the Sakuban district, in one of the *Kurdans*, i. e., the old tombs, in the steppes of Southern Russia. A number of objects were found, but special attention was drawn to two glass vessels, unfortunately broken, but the pieces of which still give evidence of their remarkable ornamentation. They are profusely covered with gold, the hoops containing large rubies and bearing golden chains, by which heart shaped pearls are suspended. Another object of cylindrical shape, evidently a cup-holder, consists of pure gold, and shows two griffins in bass-relief. Another important object is a gold plate six inches in diameter, with a fine bass-relief representing a whole episode. M. Felizin, an eminent Russian archaeologist, is of opinion that the tomb in question must have been that of an important personage of the Bosphorean kingdom, and that its origin dates back as far as the period of King Perisad II., who began to reign in the year 284 B.C. A gold coin which was found confirms this view.

Charles J. Cohen, Philadelphia, is getting matters into shape for January staples. The day after Christmas all hands will be immersed in stock-taking, and by the first of the coming year all of the lines in staples will be well arranged and ready for the inspection of the trade.

A visit to the blank-book establishment of Boorum & Pease reveals the largest stock of all grades of blank-books to be found in this country. This must be a gratifying advantage to the dealer, as it insures prompt filling of orders.

OBITUARY.

W. H. H. LALEY.

W. H. H. Laley, holding a prominent position with J. B. Lippincott & Co., of Philadelphia, publishers, stationers and booksellers, died at his home in that city of typhoid fever, on Tuesday night of last week, aged about thirty-two years. Although quite a young man, he held the responsible position of superintendent of the stationery department in the house with which he was connected, and as such made all of the purchases of that class of goods for the firm, which brought him into business relations with most of the prominent houses in the stationery trade. The members of the firm and all who knew him speak very highly of him as a man of the most untiring energy, and possessed of many admirable traits of character. His death was quite unexpected, he having been confined to his house for only a few days. All of the members of the firm in whose employ he was attended his funeral, as well as a number of members of the trade, several going on from this city.

LETTER GILDING.

Letters written on vellum or paper are gilded in three ways. In the first a little size is mixed with the ink, and the letters are written as usual; when they are dry a slight degree of stickiness is produced by breathing on them, upon which the gold leaf is immediately applied, and by a little pressure may be made to adhere with sufficient firmness; in the second method, some white lead or chalk is ground up with strong size, and the letters are made with this by means of a brush; when the mixture is almost dry the gold leaf may be laid on and afterward burnished; the best method is to mix up some gold powder with size, and make the letters of this by means of a brush. The edges of the leaves of books are gilded while in the binder's press by first applying a composition formed of four parts of Armenian bole and one of sugar candy, ground together to a proper consistence, and laying it on by a brush with white of egg; this coating, when nearly dry, is smoothed by the burnisher; it is then slightly moistened with clear water, and the gold leaf applied and afterward burnished. In order to impress the gilt figures on the leather covers of books, the leather is first dusted over with very fine powdered rosin or mastic, then the iron tool by which the figure is made is moderately heated, and pressed down upon a piece of leaf-gold, which slightly adheres to it, being then immediately applied to the surface of the leather with a certain force, the tool at the same time makes an impression, and melts the mastic which lies between the heated iron and the leather; in consequence of this the gold with which the face of the tool is covered is made to adhere to the leather, so that on removing the tool a gilded impression of it remains behind.

PORTABLE GLUE.—The following is a standard receipt for portable glue: "Put a pinch of shredded gelatine into a wide-mouthed bottle, put on it a very little water, and about one-fourth part of glacial acetic acid; put in a well fitting cork. If the right quantity of water and acid be used, the gelatine will swell up into worm-like pieces, quite elastic, but at the same time firm enough to be handled comfortably. The acid will make the preparation keep indefinitely. When required for use, take a small fragment of the swelled gelatine, and warm the end of it in the flame of a match or candle; it will immediately 'run' into a fine clear glue, which can be applied at once direct to the article to be

mended. The thing is done in half a minute, and is, moreover, done well, for the gelatine so treated makes the very best and finest glue that can be had. This plan might be modified by dissolving a trace of chrome alum in the water used for moistening the gelatine, in which case, no doubt, the glue would become insoluble when set. But for general purposes, there is no need for subsequent insolubility in glue."

Attention is invited to Mr. Cohen's advertisement in another column. The reputation and standing of this house are guarantees of its ability and correctness.

The weak points in most books is just where the covers join the backs. But this is more particularly marked in heavy books, as ledgers, &c., the leather cracking from constant bending backward and forward in opening and shutting the book. To obviate this unpleasant feature, the joint should be made to extend some distance on to the cover. The durability of the binding is considerably increased by this process, the strain upon the "hinge" portion being correspondingly lessened.

Market Review.

OFFICE OF THE AMERICAN STATIONER, {
WEDNESDAY, December 21, 1881. }

THE MONEY MARKET.—The money market has worked a shade easier, although more or less stringency is still experienced by borrowers. The Treasury disbursements on account of called bonds are not large enough to make money abundant, but they are sufficient to counteract the withdrawals occasioned by large Government revenues. After the turn of the year, and the annual settlements have been completed, we shall probably have an easy money market for a considerable period. The stock market is both dull and weak, for although there may have been feeble attempts at a rally, prices generally closed lower than a week ago. Government bonds show little change in prices, if we except a slight advance in the extended sixes. Railroad mortgages are generally weak, in sympathy with the depression in the share list. The market for foreign exchange was dull and steady.

THE PAPER MARKET.—There is no new feature in trade this week. Business is about the same as it has been for several weeks past. Although, as a general thing, there is an indisposition for new transactions so close to the end of the year, we hear of considerable doing in the renewal of contracts for the coming year, and in most instances on terms quite satisfactory to the manufacturer. Values continue in a very firm line. We hear of some manufacturers of low grade manillas asking an advance of $\frac{1}{4}$ to $\frac{1}{8}$ c. The dealers and manufacturers of straw boards last week adopted a new scale of prices, making an advance of \$5 per ton on the three grades, which are \$30, \$55 and \$50 per ton for Nos. 1, 2 and 3 respectively.

THE STATIONERY MARKET.—Business this week has been confined almost entirely to retail sales and the duplication of orders given earlier in the season. Many of the stores of our wholesale houses have been converted into bazars for the sale of holiday attractions, and most of them have had all their force of employees taxed to their utmost ability to meet the varied wants of a multitude of customers. Here and there are heard complaints of a lighter holiday trade than in former years, but, as a general thing, business is reported to be much larger this season than during any other in the history of the trade. A notable evidence of the prosperity of trade at this time is to be seen in the unusually small number of business changes announced to occur at the beginning of next year, showing that most business men are satisfied to leave well enough alone and are adverse to making changes. Orders continue to come in for New Year cards in large quantities, and every dealer appears satisfied. Prices of staples hold steady and generally firm.

MARCUS WARD & CO.'S ANNOUNCEMENTS.

CHRISTMAS AND NEW-YEAR CARDS FOR 1881-82.

THE NEW DESIGNS ARE COMPLETELY SUCCESSFUL.

"At Home."

THE NEW ART GIFT-BOOK for the Holiday Season bears this title. Its quaint, square pages represent children of all degrees—"At Home,"—with all the charms which the ideal of costume can add to the loveliness of childhood. Known all over America as originators and first introducers of Christmas Cards, Marcus Ward & Co. have been asked, on all sides, to bring out a book which should abound in the versatile fancy and quaint conceit of their Cards, combined with good drawing and harmonious color. The work now introduced is the response to this wide-spread demand. Every page of "At Home" is a picture, not in glowing, gaudy colors, but in the subdued and harmonizing tints now favored by the devotees of culture. The pictures not only give the perfection of juvenile costume, but also afford glimpses of English Interiors, with the proper coloring, decoration and furniture of some of the most æsthetic of English Homes. The verses in "At Home" enhance its interest, and are in themselves worthy of the beautiful book of which they form part.

Decorated by THOMAS CRANE.

Illustrated by J. G. SOWERBY.

\$2.50

THE ANCHOR OF HOPE. THE HAVEN OF PEACE.

New Illuminated "Daily Portion" Book.

BY THE REV. DR. MACDUFF.

\$2.00

Every page of this beautiful "Book of Days" is decorated in colors with exquisite flowers. The book is actually two books within a single cover. The Anchor will become the Christian's Hope in the morning, while The Haven will be his sure resting-place at night. When the morning portion has been read, the Christian will close and reverse the book, and there "The Haven of Peace" awaits his return when "evening shades prevail." This dual form of book is so convenient for ready reference that it is sure to be appreciated. Motto Texts have been adopted to head every page uniformly, special texts, differing every day, follow, and then comes the poem for the morning or evening, respectively.

THE SHAKSPERIAN CALENDAR.

An illuminated Calendar for the library or drawing-room, with date slip to tear off daily, and appropriate quotations from Shakspeare for every day in the year. Price, 50 Cents.

DAY UNTO DAY.

A SACRED CALENDAR. With quotations from Scripture (arranged in weekly subjects) for every day in the year. Also, Church Festivals, Holidays, etc. The new design for 1882, in colors and gold, represents "The Passing Days." Price, 50 Cents.

EVERY DAY.

"A CALENDAR for men of business and other busy men." Daily date slips to tear off, similar to the above, with quotations from various authors of undying fame. The new design is unique for harmony of color and decorative beauty. Price, 50 Cents.

THE SEASONS' CALENDAR.

A small Calendar, eight pages, with four new and beautiful illuminated designs by KATE GREENAWAY, representing the seasons. Also, Church and Legal Holidays, Postal information, etc. Price 15 Cents.

TECHNICAL ENAMEL PAINTING.

In enamel painting the work of art is more for copying than for original painting. The same freedom of touch is not obtainable in enamel painting as in water-color drawing or in oil painting. In the two latter, great facility can be obtained in the handling, and the touch for character, in trees and drapery, can be given with rapidity and efficiency. At one coloring, by the hand of a master, a water-color drawing, or an oil painting, can be given the effect of high-finish while the colors are wet, and the work of two, three or four colorings may not be required. This can never be accomplished in enamel painting. An enamel painter requires two, three or more "fibres" before the artist can obtain the effect he desires. This is caused by the want of transparency in, and the crude character of, the colors used, the tones of which can only be brought out by firing. In oil painting this is obtained at once in the hands of a master, by laying in the opaque colors and finishing in transparent colors, the highest lights in oil painting being obtained by impasting on the color as thick as possible. In the clouds of Constable's oil paintings I have noticed that the artist has used the pallet-knife to obtain the effect he desired. In enamel painting, especially in flowers, the high-lights are taken out by the tip-end of an uncolored pencil which the artist first applies to the tip of his wet tongue and then takes out the lights of the picture, leaving the white ground bare. This requires technical skill and technical knowledge. The vehicles used require careful selection, and the colors should be ground to the highest degree of fineness by the artist himself on a small slab with a small glass ruler. These colors should be ground in the rawest spirit of turpentine, and when thoroughly ground should be placed by the pallet-knife on a piece of plaster-of-paris "bat" to draw all the turpentine out, and thus leave the color in a state that it might easily be reduced to the finest powder. This powder might be stored away in pill-boxes, and when used should be mixed on a pitcher slab about six or eight inches square.

In this state of powder it is ready for use on the color-slab to be mixed with the proper vehicles; these vehicles are raw turpentine, the oil of turpentine, and the oil of tar. The turpentine is placed in a gallipot, which is again placed in a saucer. The turpentine in time fattens, and creeps over the edge of the gallipot into the saucer, and "fattens" into oil of turpentine, which can be thinned by raw turpentine for use. To this should be added another gallipot and saucer containing tar oil. Now here comes the technical use of the vehicles. The colors should not be made too "fat," or left too "raw." I have said that the lights in an enamel painting are taken out by the pencil, always a camel-hair one. If the color be too "fat," this cannot be cleanly done, or if it be too raw, a similar evil is encountered. To perfect the color in use, a little tar oil is mixed with it, and occasionally used in taking out the lights. This was the manipulation or *modus operandi* of the late David Evans, one of the finest wild-flower painters in the world, and in my experience I have followed the same practice with the best results.

To the camel-hair pencil should be added the stick or holder which performs some of the most important work in the art of enamel painting. It should be made of alder wood, and sharpened at the end away from the pencil. With this the artist takes out the sharpest and most brilliant lights of the picture, occasionally cleaning the

end of the pencil-stick on the front of his working coat and then wetting it on the tip of his tongue for a cleaner touch.

There are no art materials, possibly, so diversified in quality as enamel slabs for painting on, and enamel colors for use in enamel pictures. All these colors being of a mineral character require the best chemical mixing and the finest grinding. Rose color and purple having bases of gold are sometimes tampered with in the use of a baser material in the manufacture of those colors, and blues and reds are difficult of obtaining for pure art purposes. The enamel artist, Evans, used in his blues a little chloride of sodium or common salt; and his rose-colors and purples were generally of Emery's make. He had worked on the finest wares at Swansea, Worcester, Coalport, Chelsea, the Potteries and elsewhere. Specimens of this clever artist might now be seen at the Liverpool Museum. At the great works of Minton's and Copland's, he was one of the first hands, and no doubt is now well remembered by those who do honor to the trade. From these great works the best of colors might be obtained, not by purchase, but from the kindness of the employers, who are ever ready to assist in the development of art, as the quantity required for art purposes and amateur use is so very small.

Having secured an unblemished porcelain slab or other porcelain article, the subject might be sketched in with a little india-ink rubbed up in water; then the work is commenced for the first firing. The work can either have a background or can be painted without one, and here the skill of the artist is first tried. The background in the first coloring might be "bossed" in with a small "dabber," and then the subject taken out and arranged—of course, according to the lights and darks and colors of the picture. First, second, third, and perhaps a fourth firing may be required as the work goes on, shadows darkening, tints brought out, and the background receiving the most beautiful and effective stippling, until at last this work of art stands out before the admiring gaze of the beholder, a finished work of technical ability, gorgeous in color, most deep and rich in tone, and defying all the power of time in permanency of hues! But even here a few other touches might be required and another firing given. Mr. Evans to this end used a little "white enamel" mixed in water—the finest dots, as it were, for seed-pearls, and the work was finished.—*Pottery Gazette*.

INDIAN INK.—If you are laying colors on drawing paper wet with a brush and clean water as large a portion as you can conveniently color at one time, then blot the water off with blotting paper as you proceed with the color, leaving the drawing paper only a little damp. This process will remove a little of the superfluous ink, and enable the color to lay much more evenly, and at the same time prevent the ink from running with the color. Of course, this relates to where the drawing has been inked in before the color goes on. It is always best to color the drawings before they are inked in. On tracing cloth put the color on the back of the drawing.

The revised New Testament is not so popular at New Haven as it was. The ministers have been studying it, and at a meeting recently decided that it is too faulty to be endorsed. The chief criticism is of the bad English, and Rev. Dr. John E. Todd declared that he had counted one hundred and fifty errors of grammar in one of the epistles to the Corinthians alone.

MICA MASKS.

A German manufacturer of mica ware now makes mica masks for the face, which are quite transparent, very light, and affected neither by heat nor by acids. They afford good protection to all workmen who are liable to be injured by heat, dust, or noxious vapors, all workers with fire, metal and glass melters, stone masons, &c. In all kinds of grinding and polishing work, the flying fragments rebound from the arched mica plates of the mask without injuring them. These plates are fixed in a metallic frame, which is well isolated by means of asbestos, so as not to be attacked by heat or acid. These masks allow the turning of the eyes in any direction, and, as against mica spectacles, they afford the advantage of protection to the whole face. In certain cases, the neck and shoulders may also be guarded by a sheet of cloth impregnated with fire-proof material, or by asbestos sheet attached to the mask. The interval between the mica and the eyes allows of workmen who have poor eyesight wearing spectacles, and of workers with fire or in melting operations wearing colored glass spectacles under the mask, without fear of breakage of the glass, mica being such a bad conductor of heat. Where the mask has to be worn long, it is found desirable to add a caoutchouc tube with mouth-piece for admission of fresh air; the tube passes out to the shoulders, where its funnel-shaped end (sometimes holding a moistened sponge) is supported. The mask has a sort of cap attached to it for fixture on the head.

NICKEL—ORIGIN OF ITS NAME.

"Nickel," says an old magazine of 1824, "signifies in German, from which it is derived, false, dirty or foul, and in this sense is applied to the very worst description of females. Now, nickel is found in different parts of Germany, and was supposed by the miners to be copper. As they could not, however, extract any copper from it, they gave it the name of Kupfernickel, or false copper. When a scientific chemist of the name of Cronstedt came to examine it, about 1750, and found that it was a metal different from all others, he retained the latter part of the name, given it in reproach, and called it *nickel*, which has since been universally adopted; and thus an element of nature is stigmatized by a term than which no more opprobrious name can be given to a woman. For any other people but Germans this is certainly of no consequence, but it is rather a curious specimen of the manner in which names, that in a scientific point of view ought to express the qualities of substances, are applied. Nickel is rather a scarce mineral, and is always found combined with some other metals, which, for a long time, occasioned its separate existence to be denied. The brittle metal that is usually sold under this name always contains iron, arsenic, copper, cobalt, and bismuth. When pure, it is a fine white color, resembling silver, and is rather softer than iron. It is malleable both when cold and hot, it is attracted by the magnet, and, like steel, may be converted into a magnet, pointing, when suspended, to the north like a common magnetic needle. It is put to no use, and is, perhaps, most remarkable on account of its forming a part of almost all the stones that have fallen from the sky (meteoric stones) in every part of the world."

Mutilated gold coin is a legal tender at a valuation in proportion to its actual weight, according to section 3,585 Revised Statutes, which provides that: "The gold coins of the United

States shall be legal tender in all payments at their nominal value, when not below the standard weight and limit of tolerance provided by law for the single piece, and when reduced in weight below such standard and tolerance shall be a legal tender at valuation in proportion to their actual weight." The section seems to have been overlooked or ignored by the banks and treasury officials, but we presume now that so much interest is taken in mutilated coin that arrangements will be made to retire mutilated gold coins.

FOR SALE IN BOSTON—A FIRST-CLASS Manufacturing Stationery, Printing and Blank-Book Business, thoroughly established and having as nice a line of customers as is possible to obtain. Now pays a good profit, and can easily be doubled. Steady increase of this and other business prevents giving either proper attention. Will give buyer access to books, personal introduction to customers, and take part of store for office of other business. Grand opening for two young men. \$3,000, two-thirds cash. THE WEB TABLET.

The most compact and convenient form ever devised for writing paper.

ELEGANT IN DESIGN AND FINISH. A PERFECT ARTICLE.

Adapted alike to the requirements of the Office, Counting Room and Home use. Substantially made, finished in Leather, ornamented in Gold. Will last a lifetime. The cylinder contains a web of paper wound in a compact roll. The free end extends across the tablet and under the guard at the end, which guard also serves to separate the web into sheets after it has been written upon. We manufacture Octavo, Commercial and Packet Note, Bath and Letter Sizes, and paper for same, with Business Heading, Initial or Ornamental Corners, at regular intervals, samples of which will be furnished at the following rates:

Octavo, filled with Initial Paper,	\$1.85	Packet Note, filled with Initial Paper,	\$2.25
Commercial Note, filled with Initial Paper,	2.10	Bath Note, filled with Initial Paper,	2.85
Letter Note, filled with Initial Paper,			\$3.25.

Note that the Tablet has all the advantages of the ordinary pad or tablet with none of the objectionable features. The edges of the paper are free from adhesive material, and protected from dust and dirt, while the thinness of the Tablet permits the hand to rest upon the desk or table in an easy, natural position.

4 BOND STREET, NEW YORK.

"THE GREAT ROCK ISLAND ROUTE"

Calls your attention to the following REASONS WHY, if about to make a Journey to the GREAT WEST, you should travel over it:

As nearly absolute safety as is possible to be attained. Connections in UNION DEPOTS, at all important points. No change of cars between CHICAGO, KANSAS CITY, LEAVENWORTH, ATCHISON or COUNCIL BLUFFS. Quick journeys because carried on Fast Express Trains. Day cars that are not only artistically decorated, but furnished with seats that admit of ease and comfort. Sleeping cars that permit quiet rest in home-like beds. Dining cars that are used only for eating purposes, and in which the best of meals are served for the reasonable sum of seventy-five cents each. A journey that furnishes the finest views of the fertile farms and pretty cities of Illinois, Iowa and Missouri, and is afterwards remembered as one of the pleasant incidents of life. You arrive at destination rested, not weary; clean, not dirty; calm, not angry. In brief, you get the maximum of comfort at a minimum of cost.

That the unremitting care of the Chicago, Rock Island & Pacific Railway for the comfort of its patrons is appreciated, is attested by its constantly increasing business, and the fact that it is the favorite route with delegates and visitors to the great assemblages, political, religious, educational and benevolent, that assemble from time to time in the great cities of the United States, as well as tourists who seek the pleasantest lines of travel while en route to behold the wonderful scenes of Colorado, the Yellowstone and Yosemite. To accommodate those who desire to visit Colorado for health, pleasure or business, in the most auspicious time of the year, the Summer season and months of September and October, the Company every year puts on sale, May 1st, at all coupon ticket offices in the United States and Canada, round trip tickets to

DENVER, COLORADO SPRINGS AND PUEBLO.

At reduced rates, good returning, until October 31st. Also to San Francisco, for parties of ten or more, good for ninety days, at great reduction from regular fares.

REMEMBER, this is the most direct route for all points WEST and SOUTHWEST. For further information, time-tables, maps or folders, call upon or address

R. R. CABLE,

Vice-President and Gen'l Man'gr, Chicago.

Trade, . . . \$2.00

EVERY STATIONER wants the above
Works for the

FOLLOWING REASONS:

The **Price Book and Catalogue** furnishes Stationers information which, if they have at all, is usually scattered and never right at hand when wanted. As a book of immediate reference it will be found invaluable.

The **Directory of Paper Manufacturers and Jobbers** is a guide to **First Hands** in the Paper Trade. Any one who uses it intelligently can save many times its cost at once.

THE **PRICE BOOK** is deliverable in the cities of New York, Boston, Philadelphia, Chicago, Detroit and St. Louis, where purchasers can have it packed with any goods they may be buying.

THE **DIRECTORY** is sent post-paid.

All Stationers who wish to keep
ABREAST WITH THE TIMES,
must own these two books.

THE BRITISH TARIFF.

Now that tariffs and commercial relations are so much talked of throughout the world, a statement lately made by the United States Consul at Leeds, England, concerning the British tariff will be of interest. Mr. Dockery says:

One has become so used to hear custom-houses derided by Englishmen that one naturally concludes there is no such thing in England. Excepting the customs officers, I venture to assert there are not 300 people in England, however intelligent otherwise, who know anything about the amount of duties annually collected, the number of dutiable articles, or the per cent. of duty some of these articles pay. Their ignorance on this subject is truly remarkable. Perhaps they have been too much occupied with the task of correcting the shortcomings of other nations to pay any attention to their own failings. They pretend to be free-traders at home; they claim they have a free breakfast table for the poor man. Neither is true. They affect great repugnance to any country that has a tariff of 50 or 100 per centum ad valorem on any article. In their own country on one article a duty of nearly 2,000 per cent. is charged and collected. This article yields them the largest item of customs revenue, and it comes chiefly from the United States. Tobacco is the article. It is classed in their own tariff list as an article subject to "ordinary import duty," in contradistinction to a "countervailing duty," such, for instance, as the customs duty on spirits, and everything else subject to internal revenue duty. On tobacco (which is in very general use by the laboring classes in England, and which is consequently of the cheapest kind), the duty ranges, according to moisture, from 84 to 92 cents per pound for the raw or unmanufactured article, and, if manufactured, it pays a duty of from \$1.04 to \$1.16 per pound. This is called (in England) a revenue duty. I cannot see it in that light, as the manipulated article is distinctly charged, say 20 cents per pound more than the raw article. As a matter of fact, it is so strongly protective that it prevents Americans from successfully competing with the English manufacturer in England, owing to their being handicapped with an additional 20 cents per pound on the manufactured article. This is an enormous protection. A great part of the tobacco consumed in England is of an inferior quality, its original cost at the American shipping port having been not more than six cents per pound; it pays, if not manipulated, say a 92-cent revenue duty on entering England, and, if made into smoking or plug tobacco, it pays \$1.16, or an additional 24 cents per pound duty. Here we have a revenue duty of say 1,530 per cent., and a further strictly protective duty of 400 per cent., making in all a duty of 1,930 per cent. Cigars pay a duty of \$1.32 per pound. I do not give undue prominence to this one article, since it is one from which the large amount of \$43,000,000 of duty was collected last year.

Another item, tea, pays 12 cents per pound duty. This is not a protective duty, but it does not allow the free breakfast table; yet, at this rate, some of it pays as much as 100 per cent., and the total duty collected from this source last year amounted to \$18,000,000. It is more generally consumed in England than in any other civilized country, and is a requisite of the breakfast table; yet, we are told, there is a "free breakfast table."

Coffee, another article people use at the "breakfast table," pays a duty of three cents per pound; but if "ground, prepared, or in any way manufactured," it must pay four cents per pound

—a protection to coffee millers of 30 odd per cent. of duty.

Cocoa in the raw state pays two cents per pound, but if ground, prepared, or in any manner manufactured, it pays four cents per pound; in other words, the duty on the manufactured article is double that on the raw article.

The foregoing is some of the duties in force in England, and they are sufficient to show that this is not a free-trade country in the full sense of the term. Comparatively to population, more revenue annually is collected at English custom-houses than at those of any other country in the world, excepting the United States, the total amount collected during the past year having reached \$96,000,000, while the United States, with nearly twice as large a population, collected \$186,000,000 in the same period. Germany, with a much larger population than England, collected from customs, \$78,000,000.

The chief items of receipt under the head of custom duties for England during the past year were: From chicory, \$360,000; cocoa, \$230,000; coffee, \$1,025,000; currants, \$1,380,000; figs, \$130,000; raisins, \$775,000; rum, \$1,150,000; brandy, \$7,935,000; tea, \$18,500,000; tobacco and snuff, \$43,000,000; wine, \$7,000,000.

The following is a list of dutiable articles, viz.: Alcohol, ale, beer, brandy, playing cards, chicory, chloroform, chloral, hydrate, cigars and cigarettes, cocoa, coffee, collodine, cologne water, cordials, currants, in essence of spruce, ether, iodide of ethyl, figs, fig cake, preserved fruit (in spirits), naphtha, pickles, gold and silver plate, plums and prunes, raisins, soap, gin, rum, whiskey, all other spirits, wine and varnish; and besides these there are about ninety or one hundred articles chiefly from America, and principally patent medicines, which are held to be liable to duty at the rate of \$3.36 per gallon.

There are in Great Britain and Ireland no less than 133 customs districts, each with a collector or superintendent and subordinates. In London alone the number of customs officers exceeds 1,550, while in Liverpool about 650 are employed, aggregating for the two ports 2,200 officials. These facts and figures do not look well as regards the much vaunted idea of a free and untrammelled trade! However, they prove conclusively the general idea I have advanced, that there has been only the semblance of free trade in England all the while that the advocates of free trade were so assiduously endeavoring to persuade other nations to adopt their theory, and as practice and theory have not been in accord here, they should not be surprised if their motives are impugned to the extent of asserting that sharp practice was resorted to in order to establish an illimitable monopoly.

Now, I beg to submit a statement of the revenue and expenditure of the British and American governments respectively for the years 1879-80. For this purpose I take the pound sterling to represent \$5, and state the items in millions and fractions thereof, which, though not quite exact, approximates closely enough:

BRITISH REVENUE.	
Source.	Amount.
Customs.....	\$96,600,000
Excise (internal revenue).....	126,500,000
Stamp duty.....	56,500,000
Land and house tax.....	13,350,000
Income tax.....	46,150,000
Post office.....	\$31,750,000
Telegraphs.....	7,100,000
Crown lands.....	1,950,000
Miscellaneous.....	26,400,000
Total.....	\$406,600,000

BRITISH EXPENDITURE.	
Interest on debt.....	\$143,810,000
Army and navy.....	153,360,000
Civil list, pensions, &c.....	8,000,000
Civil service and miscellaneous.....	116,500,000
Total expenditure.....	\$421,770,000
Leaving a deficit of.....	15,470,000

AMERICAN REVENUE.	
Customs.....	\$186,500,000
Internal revenue (excise).....	124,000,000
Land sales.....	\$1,015,000
Miscellaneous.....	22,000,000
Total revenue.....	\$333,515,000

AMERICAN EXPENDITURE.	
Interest on debt.....	\$95,750,000
Army and navy.....	51,650,000
Indians and pensions.....	62,700,000
Civil service and miscellaneous.....	57,500,000
Total expenditure.....	\$267,600,000
Leaving a surplus of.....	65,915,000

It will be observed that from three items, viz., stamp duty, land and house tax, and income tax not charged in the United States, England collects the sum of \$116,000,000 annually.

In truth, everything is taxed either directly or indirectly in this country, every article of foreign or home manufacture being levied upon in some way or other to help swell the amount of revenue necessary to carry on the government. Owners of land and houses, occupiers of land and houses as well; all professions, all trades, incomes from whatever source; deeds, probates, legacies, and successions; bills of exchange and receipts, patents, carriages, houses, men-servants, guns, dogs, and personal property generally, must all pay. The poor tax is another very heavy tax, being levied upon occupiers of houses, and the total amount of this tax during the year 1879 for England and Wales was \$65,000,000, or more than \$2.50 per head of population. More than one-third of this amount was expended for other purposes than the relief of the poor, the payments toward county, borough, and police rate, to highway and school boards having amounted to upward of \$22,000,000. The actual relief to the poor during the year amounted to \$1.55 per head of population and the number of paupers was 843,000.

TRADE NOTICE.

These Celebrated Pens are now manufactured with unprecedented skill and care. They have the distinction—which has now become historical—of being the FIRST SUCCESSFUL AMERICAN STEEL PENS, also of having been so popular as to have been counterfeited to the extent of HUNDREDS OF THOUSANDS of gross, which was stopped by judgments of the SUPREME COURT of NEW YORK and of the UNITED STATES COURTS.

The genuine Pens are now sold direct to the Trade by the proprietors,

THE WASHINGTON MEDALLION PEN CO.,

I WILL INSURE YOUR HOGS.

Dr. Jos. Haas' Hog AND Poultry Remedy.

THE ONLY SCIENTIFIC SWINE REMEDY COMPOUNDED.

Read My Propositions!

First—When my remedy is used as a preventive, I will insure hogs by the head for a year, and will make a deposit of money to make such insurance good. If any hogs die, they will be paid for from such deposit; you can refer to my bankers, Messrs. Fletcher & Sharpe, Indianapolis, Ind., for my standing financially.

Second—Where my expenses are paid, I will visit herds of not less than 100, and I will arrest the disease among them, or forfeit \$500.

Third—After hogs have been regulated with my remedy, I guarantee that the annual cost of feeding will not exceed 25 cents per head. Furthermore, that the increase of actual flesh will far more than pay for the remedy used.

SEND FOR IT!

It is not an experiment, but an established success. Remember, it is the only remedy that is used and indorsed by the great breeders of this country and England. It owes its great fame to its genuine merits, and every mail brings tidings of its good work. The evidence in its favor is so strong the most scientific men of the country have pronounced it the conqueror of this disease. It is gaining ground daily, and no hog raiser up with the times can do without it. It is not only a protection against disease, but it is a powerful appetizer.

Inquire of my Bankers, Messrs. Fletcher & Sharpe, Indianapolis, Ind., for my standing. Will make a deposit of necessary money, and will pay for all that die.

SEND FOR IT! I GUARANTEE IT WILL STOP THE COUGH AMONG HOGS

and put them in fine condition for fattening. It will expel the poison from their system, tone them up, and invigorate them generally. It will make them thrive so as to astonish you. It will pay such a large per cent. on the investment, that no one can afford to be without it.

REFER TO ANY WELL KNOWN BREEDER OR SHIPPER IN ANY PART OF THE COUNTRY.

J. H. Whetstone, druggist, Iowa City, says: "The Haas Remedy sells better and with less effort than any proprietary medicine I have ever undertaken to sell of any kind. We have nothing in stock to-day but what I would rather do without than the Haas Remedy."

C. H. Klauenburg, druggist, Carlinville, Ill., says: "The Remedy sells well, and is the best on earth."

O. A. Elliott, druggist, Russell, Ia., says: "The Remedy has given good satisfaction here."

J. N. Penn & Sons, druggists, Sydney, Ia., say: "We hear good reports from what we have sold."

Ed. J. Brown, druggist, Edina, Mo., says: "It has given general satisfaction in this county. Have sold \$1,000 worth in three months. Have tested its merits myself."

J. M. Kufer, druggist, Macomb, Ill., bought \$400 lot of Haas' Remedy and sold \$300 of it in seven weeks.

SEND FOR IT. LIBERAL TERMS TO THE TRADE. Terms, Circulars, &c., on application.

W. Harris, druggist, Storm Lake, Ia., says: "It has given splendid satisfaction."

J. C. Eacker, druggist, Elliott, Ia., says: "Have sold several orders and in every case satisfaction given."

A. P. Gano, druggist, Missouri City, Mo., says: "It will be a popular article in our drug market."

J. W. Wyman, druggist, Unionville, Ia., says: "It cures chicken cholera every time."

Smith & Thomas, druggists, Platte City, Mo., say: "It gives good satisfaction here."

Duffield & Harlan, druggists, Centreville, Ia., say: "It is entirely satisfactory."

Dr. S. S. Clayberg, druggist, Avon, Ill., says: "It gives good satisfaction here."

Melle Williams, druggist, Taylorville, Ill., says: "Have a good trade. It gives splendid satisfaction."

JOURNALISM IN THE UNITED STATES.

The variety and extent of journalism in the United States is shown off to great advantage by the forthcoming report of the tenth census. The collection and collation of the facts bearing on this particular national industry was committed to the hands of S. N. D. North, who is himself an experienced newspaper editor, and his report will show that there were printed in this country during the late census year 11,418 periodical publications, of which 989 were daily, 8,725 weekly, and the remainder semi-weekly, tri-weekly, bi-weekly, monthly, semi-monthly and tri-monthly. New York takes the lead with 1,412, Illinois coming next with 1,092; Missouri standing eighth on the list with 581. These publications are divided into some twenty classes: Devoted to general news, politics and family reading are 8,556; to religion, 572; agriculture, 162; commerce and finance, 143; trade, 166; insurance and railroads, 51; magazines and periodicals devoted to general literature, 145; Sunday newspapers, 247; medicine and surgery, 111; law, 44; science and mechanics, 73; education, 23; art, society, music and fashion, 72; college and school papers, 219; children's and Sunday school, 192; freemasonry and similar, 146; illustrated publications, 512; miscellaneous, 496. Of the whole number 10,619 are printed in English, and 769 in other languages. Of these latter 605 are German, 35 French, 4 Indian, 2 Chinese, 2 Polish, 5 Welsh, 15 Bohemian, 2 Portuguese, 26 Spanish, 22 Swedish, 9 Dutch, 4 Italian, 15 Norwegian and 1 Catalan. Of the religious publications there are 114 unsectarian, 75 Methodist, 73 Baptist, 67 Romanish, 32 Episcopalian, 39 Presbyterian, 3 Dunkard, 6 Spiritualist, 6 Mormon, and 1 Shaker. An estimate of the cost of running these publications shows that \$28,571,336 was paid out in wages alone during the census year; the percentage of which paid for work on daily papers was 56.65 and for weekly and other papers 43.35 per cent. In the production of these publications 50,799 male and 3,855 female operatives find employment; 16,480 persons, among whom are quite a number of females, are returned as editors or on editorial staffs. The gross value of the annual product of these publications amounted to \$87,441,132, of which the dailies are credited with \$42,750,132, and the others with \$44,691,098. The percentage of receipts from advertising on the former was 59.69, and the latter 48.31 per cent. The percentage of receipts from subscription was—dailies, 46.21; others, 53.79. The average daily consumption of paper was—on dailies, 297,568 pounds; the total weight used during the year being 178,165,951 pounds. The aggregate circulation per issue of dailies was 3,637,424 copies, and for all classes 31,177,924. The aggregate number of copies of daily papers issued during the census year was 1,135,532,446, and for all classes 2,077,650,675. The average subscription price of daily papers is \$7.31. The people of this country pay out more than \$26,000,000 a year for their newspapers and periodicals.

Mr. North's newspaper statistics will soon appear in the shape of a report, which will give an exhaustive history of the subject, and when his investigations, which are of a more thorough nature than ever before made in this line, are completed he will present the Smithsonian Institute with a collection, embracing a copy of every paper ever printed in this country.

DALTON, MASS., U.S.A.

HAS BEEN AWARDED THE

GRAND PRIZE GOLD MEDAL

AND RECOMMENDED THE

Medal of Honor and Perfection
At PARIS, 1878,

This being the HIGHEST and ONLY AWARD given for

LINEN RECORD and LEDGER PAPER

Also, the only Gold Medal given for Ledger Paper at the Adelaide, Australia, Exhibition, 1881.

—A SPECIALTY.—

THIS Paper has received THE HIGHEST PREMIUM over all others from the Cincinnati Industrial Exhibition, Massachusetts Charitable Mechanics' Association, Franklin Institute of Philadelphia, Louisville Exposition, Medal and diploma from United States Centennial Commission, Medal of Progress American Institute, 1877, and Medal of Improvement and Progress, Boston, 1878. Its

PRINCIPAL ADVANTAGES

are as follows:—1. It contains more LINEN than any other Ledger Paper, has a longer fibre, and is, consequently, tougher. 2. Having a harder and better body, it frays less in erasure, so that by simply using the rubber after the eraser, the ink is prevented from spreading. 3. It is more uniform in Weight Color and Finish. 4. It never cockles if properly bound. 5. Its chemical action upon ink is such that it both writes and rules up better. For proof of the foregoing, refer to a large number of Stationers, Bookbinders, Bookkeepers, and Recorders, who have given it, after a severe test, the preference over all others. This paper is Double Sized, and will stand any climate or the most acid of fluid inks.

Each sheet is water-marked with name and date.

For sample sheet, ERASE and REWRITE FOUR TIMES on same spot.

CHICAGO CHIT-CHAT.

[FROM OUR REGULAR CORRESPONDENT.]

WESTERN OFFICE LOCKWOOD PRESS,
8 LAKESIDE BUILDING, CHICAGO, ILL., DEC. 19, 1881.

Baird & Dillon have just opened a stock of fine imported alibons in various leathers, fur and plush. As to make-up, there is every variety of design, from plain or pebbled leather to handsomely paneled, gilt, inlaid or embossed. The "padded back" album is a sensible innovation.

The type-writer is now an assured success in the West, and appears in almost every large business house. This success may truly be ascribed to the incessant business energy of the Western manager, H. Unz. Mr. Unz expects soon to visit the Remington factories in the East.

Mr. Taylor—Livermore pen—goes home in a few days to spend the holidays.

J. S. Macdonald has recently enlarged his facilities and increased his room.

The *U. S. Monthly* is a new Chicago publication now in its third month. It contains thirty-two pages, and both illustrations and matter promise great things. It is profusely illustrated. Price \$2 per year.

The ink men are jubilant over the weather. Usually shipments of ink stop out here about October 1; but this year the weather has been peculiarly propitious, and the Sanford Company is as busy as in mid-summer.

The Marseilles Paper Company reports business very brisk.

Although this is supposed to be the dull season in the motor business, Tuerk Brothers & Johnston, 86 and 88 Market street, report that they are now behind on their orders, and that they will have to run full time and increase their force this winter, to be able to fill their orders with reasonable promptness, and that they now have orders promised them that will keep them busy up to the middle of next July. They shipped to Malcolm Brothers, Melbourne, Australia, who have the exclusive agency of the Tuerk motor in that country, an invoice of about \$1,000 worth of motors in September, and another shipment to the same firm of \$500 worth of motors in October, and a similar shipment in November. They recently sold the village of Gloversville, N. Y., a No. 13 motor, to run a large stone crusher, which requires a ten horsepower engine to run it. They also put in and attached a No. 12 motor to the organ in the Church of Our Lady of the Sacred Heart, connected with the University of Notre Dame, at Notre Dame, Ind. The motor is giving the most

perfect satisfaction. They are also finishing a No. 13 motor and all the attachments for the purpose of running the elevator in the large and handsome building recently erected by Lilburn, Baker & Co., at Ottumwa, Ia. They are also finishing a No. 12 motor for W. O. Granger & Co., Sherbrook, P. Q., to run a large Hawkins blower in connection with the gas-works there.

G. B. H.

CINCINNATI CLIPS.

[FROM OUR REGULAR CORRESPONDENT.]

CINCINNATI, December 26 (Xmas), 1881.

Such a Christmas as this Cincinnati hasn't had in many a year. It hasn't been cold at all this winter, and December has been almost like May in temperature. But, oh, how unlike May overhead and underfoot have been the last eight days! Last Saturday it did not rain, and it was the only day of the last blessed week when the air was not dark with overshadowing clouds and damp with rushing rain. To-day again the heavens are hidden and the air is heavy with descending mist and dismal with darkness. This weather took the life out of the city holiday trade. But for this drawback it would have been the greatest in the history of the city. The book and fancy stationery shops had anticipated a phenomenal trade. The weather could not be foreseen. It was exceptional; a repetition of it for a week preceding Christmas is not likely to occur in the next quarter of a century. But the stationers had provided for an immense sale, presuming upon reasonably good weather. That they acted with good judgment what they did sell in spite of the weather proves beyond question. They not only saved themselves but made money. They have no misjudgment to regret. Disappointments are never pleasant, but theirs in this instance is not that they failed to have a good trade but that for the reason of bad weather they did not get out of this Christmas the brilliant trade that was in it. The stationers of Cincinnati furnish holiday goods for more than a third of a million people, of whom a quarter of a million live in Cincinnati, seventy thousand just across the Ohio River in Covington and Newport, and fully thirty thousand more in the immediate suburbs of the city on the Ohio side. On last Thursday and Friday, in pouring rain, Fourth street was lined with carriages, and on Saturday, when there was no rain, the crowds on the sidewalks were a sight to remember. But in spite of the weather the shops kept open all the week till ten o'clock at night. At all hours, day and night, they looked crowded and all of the shops had extra clerks employed.

Who were the purchasers, what they bought, and how much they bought become topics of interest when the facts are known. Well, "Who were the purchasers?" The answer is "Everybody." Formerly they were chiefly the rich; now they were rich, poor and well-to-do people. And "What did they buy?" Why, books, toys, Christmas cards, engravings and no end of fancy articles. It is a happy index to the character of Cincinnati people that they bought more standard books and volumes in sets—more absolutely and relatively—than in any previous holiday season. This was the distinguishing feature of the purchases. In other respects the selections by buyers were pretty evenly balanced, bating the fact that there was a very lively call for Christmas cards. But no class of goods was neglected. Another feature of the purchases was the universal selection of superior goods. Finally on this point, a most healthy indication was the absence of extravagance in purchases. This leads to the question: "How much did they buy?" A true answer would be "As much as they ought to afford." The rich did not buy extravagantly, as they did in war times, and those not rich bought according to their means, and bought with better taste and relatively more than in former years.

A most beautiful feature of the trade was the amount of money spent for ephemeral treasures for children. All of the shops were luminous with the best products of the age in literature and art as offerings to childhood and infancy. The fact that they were purchased so freely reminds one of that other fact that the first Christmas gifts ever given were costly but ephemeral, and were bestowed upon a child. In fact, the sanctity which surrounds infancy and childhood in this age dates scarcely further back than the first Christmas. They were "wise men" who first gave Christmas gifts, and who shall say that it is not characteristic of wisdom to keep up the custom?

Dismissing Christmas and the temptation to follow fancies in writing about this festival season, and taking up instead the practical everyday topic of general trade, one can say for Cincinnati that there is every indication that trade here is healthful. This is a great manufacturing city, and in common with other great industrial centres, shows an increase in the weekly Clearing House transactions as compared with last year, while at the centres where commerce predominates there is either a falling off or a decrease in the amount of exchanges. There have been two pretty heavy failures here in the last fortnight. Both came as unexpectedly as the explosion of a military mine. Neither was in any way connected with the stationery trade. In both cases the assets

are believed to be nearly equal to the liabilities. Occasional failures all over the country are having the effect to produce caution, but have not excited distrust. The fifty millions of people in this country, the hundred and ten thousand miles of railroad, the balance of trade in our favor, the tendency to increase the export of our goods, the respect in which this nation is held by the old-world nations, and the rush of a better class of emigrants to our shores, are all taken into consideration no less by Cincinnati merchants than by those of other cities; and these circumstances are wonderful promoters of faith in the immediate future of business. Another consideration often mentioned is that the very massiveness of the business of the country is a protection against shocks; wherefore, failures such as once would have shaken it now produce no appreciable disturbance.

PRINCE WILLIAM.

TRADE AT TORONTO.

[FROM OUR REGULAR CORRESPONDENT.]

TORONTO, Ont., December 23, 1881.

First and foremost to all whom these presents may come, whether the staff of THE STATIONER or its readers, a merry Christmas and a happy New Year, to one and all, and many of them.

There is something radically wrong with the weather. I don't know whose door to lay it at; there being so many weather-tinkers just now; it is impossible to say who is at fault. Anyway, when one finds an overcoat uncomfortable at this season, and mud in the streets, he is safe in saying that it is not Canadian, nor as Canada is universally expected to be just about now.

Good sleighing at Christmas time is what we want. It is more in keeping with our ideas of the holiday season. It makes good roads; enables the country people to get in with many of the good things we like to get about this time; and then, having got our money, we are very anxious they should give it back in exchange for numberless things we have to offer, and fill their sleighs with parcels, which shall be opened with laughing faces on the return.

However much we miss the snow and the jingle of the merry bells, trade is good. I do not know of a house in the trade that is not busy. There never was a finer display of holiday goods. It is really a treat to stroll along the business streets after lamplight and note the tastefully arranged windows with their tempting contents. It would be impossible to give even a faint idea of the variety, and to one who has a taste for fine things, and whose purse may not be capacious enough to gratify even a moderate indulgence, it is somewhat trying. However, there is a gratification in looking at pretty things though you are unable to buy them. And, my friend, have you ever thought, as you admired those beautifully executed hand-painted cards, plaques and other ornamental goods that are offered at this season of the year, of the stories that many of them could tell? How loving young hands have wrought them out during silent hours of the night, with a hope of getting something with which to cast a ray of pleasure in the homes where misfortune had taken up an abode. God bless all such all over the world.

I. B. Rolland & Fils write me from Montreal that their new paper mill at St. Jerome is progressing, and that they expect to have the building up and inclosed in March, and to be at work early next spring. They will make fine papers.

The Toronto Company's new mill at Cornwall is also being rapidly pushed, and will be in working order early in the season.

Every day new enterprises are starting up—paper, cotton, woolen mills, &c. Among the latest is a company, with a capital of one million dollars, at Sherbrook, P. Q., for the export of asbestos, and another to hull rice (the object of the latter is to import rice, which in its natural state is free, and clean it here), and another, with a capital of one million and a half, to erect smelting works at Belleville. The latter is the nearest point for shipping the iron ore from the Marmora Mines, and is connected by rail. The ore is in high repute, and large quantities have been shipped for some time to your side.

I have just taken a walk around to see what was doing in the retail stores, and, notwithstanding the open weather, I found Willing & Williamson, Hart & Co., N. Ure & Co., Jos. Bain & Son, Robert Marshall, Rowsell & Hutchison, Wesleyan Book Room, W. R. Haight, Winnifoth Brothers, R. D. Smith & Co. and others full of anxious purchasers. If we had had good sleighing I do not know what would have followed. I add the following from the *Monetary Times*, from which you can take as much as you please:

"To the generality of those who peruse our pages from week to week—we mean the mercantile class—the circumstances of the present Christmastide are well fitted to suggest joyousness and kindness. The dark days of 1875 to 1878 have been succeeded by prosperous ones. Insolvencies and bad debts are few. Profits are fair. Payments are prompt. Values are rising or at least steady. Manufactures are brisk and extending. Capital, some of it foreign, flows readily into industrial enterprises. The mineral, timber, grazing, railway and other interests of the Dominion are receiving increased attention, as evidenced by the number of companies formed to operate in all these directions. Our banks, while affording ready facilities for the use and transfer of money, are doing so, we believe, with wise caution and at reasonable rates. The testimony of bankers is that past-due bills are as rare now as they have ever been in the history of the Dominion. It is found by the great loan companies that farmers are 'forehanded,' and are meeting their installments or paying off their mortgages with an alacrity that would have been incredible three years ago. And this state of things means a great deal to our country shopkeepers, weighted and hampered as they were so long by slow outstandings and by depreciating stocks."

C. H.

The prospect of a literary feast is held out to searchers after antiquity. It is said that there are hopes of a great find of ancient manuscripts when the French have captured the holy city of Kairwan, in Tunis. Kairwan is the Mecca of the African Mahomedans, and is said to contain a vast quantity of ancient manuscript stored away in the mosques, and which has, it is believed, remained undisturbed for centuries. The Ulemans, the only educated class of Mohammedans, are not sufficiently well versed to be interested in Greek or Latin manuscripts. These mosques contain, it is thought, many other works of antiquity of eastern origin, which have been searched for elsewhere in vain. It has been suggested that the French Government send out some of the most learned French professors, well versed, not only in the Greek and Latin, but also in the Oriental languages, to make a compilation and take charge of the most valuable of them. The prospect of great discoveries has created quite an excitement among the literati of both France and England.

There may be a furlough from our customary work; there can never be any lawful vacation from doing good. There may be change of place, scene, fellowship; there must be none in the spirit of self-sacrificing beneficence.

LETTERS PATENT FOR INVENTIONS.

By JAMES A. WHITNEY, COUNSELLOR-AT-LAW.

X.

WHAT CONSTITUTES A PATENTABLE INVENTION—(CONTINUED).

The most common form of a patent claim is to a combination of mechanical parts. It is essential to the patentability of a combination that several elements shall interact one upon the other to produce a result which would not be produced by the aggregate but separate operation of the parts. To illustrate: The fire-box, oven, and flues of a stove occupy such a relation with each other in the operation of the apparatus that the purposes for which it is designed would be frustrated if either of those parts were removed, each and all of them being necessary to the result, and each being correlated to the others in such manner as to effectuate an end which neither could produce alone. Such is an actual and legitimate combination.

On the other hand, if we should place upon a single handle a claw-hammer, a tack-hammer, and a screw-driver, the action of one would not modify or be modified by the action of any of the others. The claw-hammer would pull nails precisely as if on a separate handle; the tack-hammer would drive tacks precisely as if separated from the others; and the screw driver would drive screws no better and no different than it would if no hammer was in existence. This, therefore, instead of being a combination of co-acting parts, would be simply an aggregation of non-interacting parts, and the latter (except in very rare instances where certain modifying principles intervene) is not patentable.

There are many inventions, however, in which the parts as a combination are old, and yet by some new juxtaposition are caused to produce a novel or improved result. These are more properly termed "arrangements" of parts, and as such are as patentable as are combinations, although the scope of the claims is necessarily more limited. Many inventions described as combinations are, in fact, arrangements, inasmuch as the broad combination is modified by the introduction of some specific limitation as to the position or relation of the parts. One of the earliest of reported cases touching this point is that of *Parker v. Hatfield*, tried as long ago as 1845, in which the novelty of a certain water-wheel consisted in the position of the shaft, the latter being horizontal, and in the number of wheels attached thereto. The utility derived from these arrangements consisted in increased convenience of attaching the shaft directly to the saw of a saw-mill without the intervention of gearing and also in the avoidance of friction and in an increased efficiency when used with a low head of water. In this instance the element of position is clearly important, and a similar remark applies to most patent claims to arrangements of parts.

In many cases the invention may be reduced to still narrower limits and yet be patentable—as, for example, when the gist of the improvement lies in the novel form of the device. The question of the patentability of such an improvement came up in *Davis v. Palmer* in 1827 before John Marshall, Chief Justice of the United States, and related to a novel mold-board for plows, the face of the new mold-board being worked "upon transverse circular lines with radii in the exact proportion of thirty-six to twelve." In the trial of this case a statutory objection was urged which does not now exist—the act of 1793 having declared that "simply changing the form or proportion of any machine

shall not be deemed a discovery." The chief-justice held that the word "simply" had "great influence." He said: "It is not every change of form or proportion which is declared to be no discovery; but that which is simply a change of form or proportion, and nothing more. If by changing the form and proportion a new effect is produced, there is not simply a change of form and proportion, but a change of principle also." This is the ruling up to the present day, and its evident fairness will doubtless cause its retention among the primary principles of the patent law. I have said that the statutory objection just indicated does not now exist. While this is true as concerns the written law, it is to be remarked that its intent is still carried into effect in judicial decisions, and simply changing the form of an article without producing any new or improved result has only slight chance of being supported as a patentable subject matter.

I have thus sketched the principal subdivisions under which patentable inventions may be classified, but it is not to be understood that there are not others which might also be equally entitled to protection.

While classification is necessary to place different inventions in accord with general principles, yet technical definitions are too inelastic to meet the constantly broadening requirements of practice, and there is, if anything, too great a tendency to follow definitions rather than to rely upon the language of the Constitution and of the statutes, which holds substantially that every invention in arts and industries which is new and useful and capable of being distinguished from what was previously in use should be entitled to the protection of letters patent. It is only by proceeding upon this principle that justice can be done in all cases and the arts and industries receive that continued impetus which can only be derived from an impartial administration of the law and the recognition of inventive skill, no matter in what manner applied, in the promotion of industries.

NEW TRACING PAPER.

A French patent has been obtained by M. Tillet, for taking copies of drawings, &c., in any color and on any kind of paper. The paper is dipped first in a bath containing $1\frac{1}{2}$ ozs. white soap, $1\frac{1}{2}$ ozs. alum, 2 ozs. English glue, $\frac{1}{2}$ oz. precipitated albumen, 1-10 oz. glacial acetic acid, $\frac{1}{2}$ oz. alcohol 60°, 25 ozs. water. It is then dipped in a second bath, containing $2\frac{1}{2}$ ozs. burnt umber, ground in alcohol; 1 oz. lampblack, $\frac{1}{2}$ oz. English glue, 25 ozs. water. The paper is now sensitive to the action of light, and must be kept in the dark. If the paper is to be prepared for negative copies, it is dipped in another bath similar to the second, in which umber is substituted by black. For colored positive pictures, black is substituted by red, blue, or any other color required. The drawing which is to be copied is placed in a copying frame, with the negative paper above. In clear weather it will be sufficient if exposed for two minutes. After the exposure, the negative is dipped in water, the drawing then appears white, and is left to dry. The positive copy is taken by placing the negative on the glass and the positive paper over it. After two minutes' exposure, this is dipped in water, and the black dissolves.

PHOTO-LITHOGRAPHIC TRANSFER PAPER.—The paper is first treated with a solution as follows: Gelatine, 100 parts; chrome alum, 1 part; water, 2,400 parts. Dry, and treat with the white of an egg. Now sensitize in a bath consisting of—chrome alum, 1 part; water, 14 parts; alcohol, 4 parts.

BLANK BOOKS, 1882. BLANK BOOKS, 1882.

SPECIAL NOTICE FOR THE NEW YEAR!

WE take pleasure in announcing to the Jobbers of BLANK BOOKS that we have again enlarged and added to our manufacturing facilities to keep pace with our increasing trade, and notwithstanding the promptness with which we have served our customers the past fall, this unusual demand has stimulated us to pile up a much larger stock than has ever before been carried by any manufacturer, thereby giving us a supply to fill at once any orders from our entire list, the variety of which speaks for itself.

Our prices are uniformly low, and parties favoring us with their orders will be promptly and faithfully served.

BOORUM & PEASE, 28, 30, 32 & 34 Reade St., NEW YORK.

Trade Novelties.

[We will be glad to receive samples of all novelties issued in the trade, and will notice all such which possess merit free of charge. It is desirable to accompany descriptions with cuts whenever possible.]

NEW PATENTS.

No. 250,413. Weighing Scales for Mail Matter.—Maurits J. Albracht, Jr., Amsterdam, Netherlands. Patented in France May 1, 1880, in Germany May 3, 1880, in Great Britain and Ireland May 24, 1880, in Austria May 28, 1880, and in Belgium May 31, 1880.

Indicates on a dial the amount of postage for different classes of matter, both for at domestic and International Postal Union rates.

No. 250,458. Game Box.—William T. Shay, Brooklyn, N. Y.

No. 250,467. Portable Writing Case.—Seth Wheeler, Albany, N. Y.

No. 250,469. Paper Bottle.—Alphonso C. Williams, Cambridgeport, Mass.

No. 250,486. Combined Tablet and Easel.—Andrew B. Banghart and Charles H. Treat, Frankford, Del.

No. 250,487. Apparatus for Spreading Varnish for Printing Wall Paper by Hand.—George H. Beck, New York, N. Y.

An apparatus for spreading varnish or paint for printing hand-made wall-papers, consisting of an endless belt running on suitable rollers over a vertically-adjustable cushion-box and between two rollers, one of which dips into the varnish and spreads it on the outer surface of the apron.

No. 250,501. Bill-File.—William R. Cole, Pottsville, Pa.

No. 250,507. Toy Whip.—Edward Driscoll, Jr., Fall River, Mass., assignor of two-thirds to Andrew Jones and T. C. Hennessey, same place.

No. 250,509. Toy Stove.—Elias Durlach, Brooklyn, E. D., N. Y.

No. 250,536. Book-Clasp.—Ernst P. Hinkel, Offenbach-on-the-Main, Germany. Patented in Germany May 1, 1881.

No. 250,537. Lead and Crayon Holder.—Joseph Hoffman, New York, N. Y., assignor to Joseph Reckendorfer, same place.

No. 250,541. Adding Machine.—William M. Howland, Topsham, Me.

No. 250,555. Type-Justifying Machine.—William A. Lorenz, Brooklyn, and Louis K. Johnson, New York, N. Y. Filed February 12, 1878.

In an apparatus for cutting off leads from the end of a page of such leads, a lead-elevating plate provided with arms, which arms embrace an adjustable surface, against which the page of leads is advanced, thereby allowing of the elevation of leads of different thickness, or of two leads at the same time.

No. 250,579. Machine for Grounding Wall Paper.—Ira Robbins, Camden, N. J., and David Heston, Philadelphia, Pa., assignors to said Heston.

No. 250,671. Mucilage Holder.—Albert A. Mandell, Hyde Park, Mass.

A mucilage holder or box having a jointed arm hinged to the lid and to the back of the box, and arranged so as to lie close to the box when it is closed, and to be made to extend by opening the lid, so that when fully opened that part of the arm secured to the lid will form an upright support for the lid, with its lower end resting on a plane with the bottom of the box.

No. 250,675. Printer's Roller.—Joseph H. Osgood, Peabody, Mass.

A composition for printers' inking-rollers, in which are mixed dextrine and gelatine or glue.

No. 250,690. Bill-File.—William F. Turnbull, Hampton, Va.

In a bill-file, the combination of a vertical frame having suspended from its upper end centrally a fixed threading-needle, and a sliding frame with a perforated elevated platform, to receive the pile of bills or other articles and automatically feed them up to the needle, whereby the needle is thrust through the pile of bills for the thread connection.

No. 250,759. Magic Lantern.—Nelson T. Scott, New York, N. Y.

No. 250,802. Stylographic Pen.—William E. Gard, Baltimore, Md.

No. 250,816. Toy.—Adolph Horowitz, Cincinnati, Ohio, assignor of one-half to Marcus Simonton, same place.

No. 250,851. Toy Money-Box.—Walter Stranders, New York, N. Y., assignor to Charles C. Shepherd, Passaic, N. J.

No. 250,988. Book-Sewing Machine.—David McConnell Smyth, Hartford, Conn., assignor to the Smyth Manufacturing Company, same place.

No. 250,989. Book-Sewing Machine.—David McConnell Smyth, Hartford, Conn., assignor to the Smyth Manufacturing Company, same place.

No. 250,990. Book-Sewing Machine.—David McConnell Smyth, Hartford, Conn., assignor to the Smyth Manufacturing Company, same place.

No. 250,991. Book-Sewing Machine.—David McConnell Smyth, Hartford, Conn., assignor to the Smyth Manufacturing Company, same place.

RE-ISSUES.

No. 9,967. Match Safe.—William Trotter, Jr., Oyster Bay, N. Y. Original No. 248,898, dated November 1, 1881.

No. 9,966. Box for Matches and Other Articles.—William Trotter, Jr., Oyster Bay, N. Y. Original No. 248,236, dated October 11, 1881.

TRADE MARKS.

No. 8,913. Fluid Writing and Copying Inks.—Fountain Ink Company, New York, N. Y. "The figure of a fountain."

The price of pure white porcelain is 40 per cent. higher than that which is blemished by the smallest spot, and hence many efforts have been made to free the clay from the iron particles which adulterate it. Magnetism has been called in several times for the purpose, but without success until quite recently, when by means of the dynamo-electric current from a Gramme machine, Pilduyt & Sons, at the potteries of Mehun-sur-Yèvre and Creil, have been able to effect the desired result. The method consists in passing the porcelain paste in a highly liquid form in front of two powerful magnetic poles which withdraw the ferruginous particles from it. For this purpose two powerful electro-magnets are placed with opposite poles facing one another, and between them is a kind of trough or funnel with a vent hole in its lower part. The liquid clay is caused to flow along the sides of this trough past the magnetic poles, which attract the iron to the sides. Twice a day the sides are cleaned of the deposited material. In this way half a ton of paste can be purified per day in each trough. The magnetic deposit consists mainly of silicate of iron and a trace of carbon.

Making a joke is like throwing a top. If it doesn't come down on its point it will not spin.

INTERNATIONAL COPYRIGHT.

The commercial treaty between France and Belgium, which is now under consideration by a committee of the French Chamber, includes international copyright among the subject matter of its provisions. It is proposed to extend the period within which foreign authors shall mutually enjoy an absolute right of authorizing a translation of their works from five to ten years, provided that the translation first appears within three years. But this extension does not satisfy the "Syndicat des Sociétés littéraires et artistiques pour la Protection de la Propriété intellectuelle à l'Etranger," which is presided over by M. G. Hachette. He urges that the literary convention of June, 1881, between France and Spain, which fixes no limit of time as regards translation except that of the author's copyright in the original, should be adopted as the standard formula; that it should not be necessary for an author to state, in the front of his work, that he reserves the right of translation; and that the reproduction of articles in periodicals and newspapers, other than political, should be prohibited, unless with the sanction of the author. One would have thought that the question of translation, as opposed to reproduction, was not of much importance between France and Belgium.—*London Academy*.

CEMENT FOR GLASS.

It is well known that when gelatine or glue is treated with bichromate of potassium it becomes insoluble after being exposed to the light. Where the exposure has been prolonged, the gelatine is not even affected by hot water. This peculiar change is known to depend on a chemical change taking place in the materials, the gelatine exerting, under the influence of the sunlight, a reducing action on the chromic acid of the bichromate, reducing the latter to the condition of chromic oxide. This change is clearly indicated by the change of the material from an orange-red to a dark-green color, the latter being a characteristic indication of the formation of chromic oxide.

This behavior of bichromated gelatine is the basis of a number of photographic, photo-lithographic and photo-engraving processes, which have been brought to a high state of perfection. It is not so well known, however, that bichromated gelatine, rendered insoluble by exposure to light, makes an excellent cement for glass. This, however, is asserted to be the fact, and as it may prove useful to some of our readers, we give the following description of the mode of preparing and using the material for this purpose:

One part of a very pure and colorless gelatine is dissolved in 15 parts of water in which 3 parts of bichromate of potassium has previously been dissolved. This must be done in a dark place, or at least in a room illuminated only by a weak candle or gas light. And the mixture itself must be carefully kept from sunlight, best in a black bottle in a dark room. To cement fractured glass fragments together, the edges are first thoroughly cleaned, then slightly warmed, and coated with a very thin coating of the cement, in a dark room. The pieces are then pressed together, and, if at all possible, kept under pressure (by tying with cord, wire, etc.), and then exposed to direct sunlight. If the edges have been thoroughly adjusted and the cement applied thin, even hot water will not separate the pieces. Opaque objects are not so thoroughly cemented together by this mixture, since the rays of the sun cannot strike the fractured edge throughout its whole extent.

THE WEB TABLET.

The most compact and convenient form ever devised for writing paper.

ELEGANT IN DESIGN AND FINISH. A PERFECT ARTICLE.

Adapted alike to the requirements of the Office, Counting Room and Home use. Substantially made, finished in Leather, ornamented in Gold. Will last a lifetime. The cylinder contains a web of paper wound in a compact roll. The free end extends across the tablet and under the guard at the end, which guard also serves to separate the web into sheets after it has been written upon. We manufacture Octavo, Commercial and Packet Note, Bath and Letter Sizes, and paper for same, with Business Heading, Initial or Ornamental Corners, at regular intervals, samples of which will be furnished at the following rates:

Octavo, filled with Initial Paper,	\$1.85	Packet Note, filled with Initial Paper,	\$2.25
Commercial Note, filled with Initial Paper,	2.10	Bath, filled with Initial Paper,	2.85
Letter, filled with Initial Paper,	\$3.25		

Note that the Tablet has all the advantages of the ordinary pad or tablet with none of the objectionable features. The edges of the paper are free from adhesive material, and protected from dust and dirt, while the thinness of the Tablet permits the hand to rest upon the desk or table in an easy, natural position.

1882 Valentines 1882

ANNOUNCEMENT.

WE hereby beg leave to announce to the trade the completion of our line of Valentines for 1882, which we think will compare very favorably even with our line of Christmas Cards, which in so high a degree met with the approval of the trade.

ASSORTMENT.—Our Valentines are put up in envelopes or boxes containing twelve cards, unless the quantity is otherwise specified. The assortment is made up of the different designs contained in the series, and as no series has twelve different designs, the designs are more or less repeated. Our Satin Print and Silk-trimmed Valentines are carefully packed each in a neat box.

ENVELOPES.—We furnish envelopes without extra charge for all cards in this line, costing \$1.80 per set or over.

SILK-FRINGED CARDS.—All fringed Valentines come provided with protectors and envelopes to insure safe transmission through the mails, and are made up with assorted colors of fringes. We would call attention to these attractive cards, which are made up with the best quality of heavy silk fringe, especially made for us.

SHOW CARDS SUPPLIED TO THE TRADE WITH ORDERS.

Our regular line of Valentines consists among others of the following series:

Nos. 101, 102, 104, 108, 111 and 116.—Flower designs, ranging in price from 35c. to \$3.60 per set of twelve.

Nos. 102F, 102D, 102DF, 104D, 104F, 108F, 108D, 108DF, 111F, 111D, 111DF and 116F. — Flower designs, Silk Fringed Cards, Folding Cards, with and without Silk Fringe and Tassels, ranging in price from \$2 to \$12 per set of twelve.

Nos. 119DF and 121DF—Are very rich Folding Cards with Silk Fringes and Tassels, costing \$18 and \$36 per set of twelve.

Nos. 103, 105, 106, 107, 112, 114, 115, 117, 118.—Figure designs, ranging in price from 75 cents to \$12 per set of twelve cards. These series can also be had with Silk Fringes, the prices then ranging from \$2.25 to \$18 per set of twelve cards.

Nos. 110F and 113F—Are new Fan Designs, with Silk Fringes and Tassels at \$3 per set of twelve.

No. 120DF.—Folding Design, Flowers on Satin, with rich Silk Fringes. Price, \$24 per set of twelve.

SPECIAL ATTENTION IS CALLED TO OUR

Satin Print and Silk-Trimmed Valentines,

EACH CAREFULLY PACKED IN A NEAT BOX.

122F.—Four Figure Designs, same as series 115, printed on Satin, and richly trimmed with Silk and Fancy Fringes.	
Price, each,	\$3.00
123F.—Two Figure Designs, same as series 117, printed on Satin, and richly trimmed with Silk and Fancy Fringes.	
This series is especially appropriate for older people, for husband or wife. Price, each,	3.50
124DF.—Two Figure Designs, folding same as series No. 121DF, richly trimmed with Silk and Fancy Fringes and Tassels. Price, each,	5.00

Of all Valentines costing \$3 per Set and over, we are ready to break sets, if so desired.

REGULAR DISCOUNTS TO THE TRADE FROM ABOVE PRICES.

Besides the above attention is called to our New Birthday Cards and Artistic Plaques and other Art Publications.

OUR LINE OF EASTER CARDS WILL SHORTLY BE ANNOUNCED.

THE BAY STATE PAPER COMPANY,

HOLYOKE, MASS., were among the pioneers in the W. C. Paper trade and their goods, from the start, were distinguished for their fine quality and the superior style in which they were wrapped. Their example has been approved and imitated by a swarm of competitors, who have flooded the market with inferior goods, put up in packages of 600 to 800 sheets, misleading the unwary, and sold at apparently lower figures; but the trade and consumers generally recognize the fact that a good article, honestly put up, in 1,000 sheet packages, is the most profitable both for use and for sale. Their goods are all guaranteed 1,000 sheets to package, and no short count. No wood is used in any of these papers, but they are made of the very best stock in the market.

THE "MEDICATED BOUDOIR" BRAND

THE PRINTING TIMES AND LITHOGRAPHER,

An Illustrated Technical and Fine-Art Journal of
Typography, Lithography, Paper-Making,
and the Auxiliary Trades.

THE NEW SERIES COMMENCED JANUARY, 1875.

THE PRINTING TIMES AND LITHOGRAPHER is a high class journal, devoted to the Printing and Graphic Arts, in all their various forms. It derives its information from, and circulates in, all parts of the world. No pains are spared to insure the accuracy of its intelligence and to render it in every respect worthy of the support of Letterpress Printers and Lithographers, as well as Artists, Antiquaries, and Literary Men generally.

Published on the 15th of each month, 4to, in wrapper, price 6d. Annual subscription (payable in advance), 8s., post free to the United States. Rates of Subscriptions for foreign countries on application. Post-office orders to be made payable at the West Central District Post Office, High Holborn, to WYMAN & SONS, 74 and 75 Great Queen Street, London, W. C., England.

Trade Gossip.

All new goods and designs which are not, strictly speaking, "Novelties" will be noticed under this head. The trade are requested to forward descriptions with samples in order to secure proper notice.

Thomas McCord, paper stock dealer, Quebec, Can., is dead.

Huffman & Bower, publishers, Franklin, Neb., have sold out.

C. C. Stevenson, publisher of the *News*, Gold Hill, Nev., has sold out.

Miller & Baugh, paper stock dealers, San Francisco, Cal., have been burned out.

Thomas L. Noonan, dealer in periodicals, Lawrence, Mass., is a petitioner in insolvency.

The stock of E. H. Hyde & Co., dealers in fancy goods, Oakland, Cal., has been attached.

The Readers and Writers Economy Company, Boston, will retire from business on January 1.

A pocketbook salesman is wanted by a well known house. See advertisement in another column.

Charles J. T. Tyler & Co., paper-box manufacturers, Baltimore, Md., were burned out yesterday.

S. E. & J. V. Carothers, publishers of the *Times*, McKeesport, Pa., have sold out to the Times Publishing Company.

M. A. Dowling & Co., publishers of the *Examiner*, West Bay City, Mich., have been burned out. Loss, \$1,800; insured \$1,000.

John H. Brunnings will represent the New York Blank-Book Company in the Middle and Western States instead of H. B. Beach, as formerly.

Langfeld, Turner & Andrews, the enterprising Philadelphia firm, have now a branch of their very large business at 366 Broadway, New York, where all the articles they manufacture may be had.

J. H. Van Kirk has engaged his services to Henry Lindenmeyr after January 1. Mr. Lindenmeyr has also employed the book-keeper, one of the salesmen, and the porter of the late firm of J. H. Van Kirk & Co.

The firm of Eicholtz & Newberry, stationers, printers and lithographers, and Williams & Shreve, printers, Philadelphia, Pa., have dissolved partnership. John G. Shreve has formed a copartnership with Eicholtz & Newberry, under the style of The Royal Printing House.

Yesterday the stock of paper belonging to Henry Louison, at his store 258 and 260 Pearl street, this city, was attached by Eugene Sullivan, paper-stock dealer, for a claim of \$300.85. It is understood that an attachment has also been obtained by another party against some paper stock at Mr. Louison's mill at Whippany, N. J.

In the suit of Victory Webb Manufacturing Company against Henry Ward Beecher and others of the *Christian Union* Publishing Company, the Special Term of the New York Supreme Court overruled the demurrer interposed by the defendants to the complaint on the ground that the allegations in it contained were insufficient. The General Term on Saturday overruled this decision, sustaining the demurrer. The action was brought to compel the defendants to pay for a printing press on the ground that they had failed to file their annual report after their organization.

A meeting of the creditors of Hamilton & Rockfellow, booksellers and stationers, Deadwood, D. T., was held at the Stationers' Board of Trade on Saturday, but the attendance was very small. A statement prepared by the firm was read, showing liabilities of about \$17,000, to pay which it made a proposition of 10 per cent. in cash, and 15 per cent. in three deferred payments of 5 per cent. each in three, six, and nine months. This offer was received with very little favor, and the meeting adjourned, leaving the matter for investigation in the hands of the Stationers' Board of Trade. Two losses from fire sustained by the firm and non-payment of the losses by the insurance companies are assigned as the principal cause of its present troubles. About a year ago the firm asked for and received an extension from its creditors. Among the creditors are the Western News Company, and Bradner, Smith & Co., of Chicago, the former for about \$2,000, and the latter for about \$1,400, both of which concerns, it is said, hold county bonds as collateral security, valued at about one-half of the amount of their claims; Keuffel & Esser, Stern & Lyon, John Foley, and the American News Company, of this city, the claim of the latter about \$600, and Langfeld, Turner & Andrews, of Philadelphia.

The Kiggins & Tooker Manufacturing Company is the name of a new corporation formed, which will, on January 1, succeed to the business of Kiggins, Tooker & Co., blank-book manufacturers of this city. It is understood that one or more of the young men who have been with the firm as salesmen are to become interested in the business of the new corporation.

A fire occurred Wednesday night of last week on the top floor of the five-story marble-front building No. 54 Barclay street, this city. The second floor is occupied by Leveridge & Co., dealers in novelties, whose loss is estimated at \$1,000 by water. The fire was caused by spontaneous combustion.

The *Oriental Casket* is the name of a new 24-page literary monthly, with illuminated tinted cover, which will be issued on January 1, 1882. L. Lum Smith is the publisher and proprietor; Emerson Bennett, editor. Office, 912 Arch street, Philadelphia, Pa.

Henry Hoe, the well-known agent in this country for Joseph Gillott & Sons, the old Birmingham firm of steel pen manufacturers, reports that his trade for the year just closing shows a great improvement over any former year.

The firm of Gaskill & Gresimer, commission paper-board dealers, Philadelphia, Pa., has been dissolved by the death of Joseph R. Gresimer. Thomas E. Gaskill continues.

Charles J. Cohen's new advertisement did not appear last week. It will be found in this issue. The trade are asked to take note of it.

R. A. Rogers & Co., Dayton, O., have issued a very neat announcement card for 1882, conveying the compliments of the season.

Akerman, Fortier & Co., stationers, Montreal, Canada, have dissolved partnership. Joseph Fortier continues.

Conrad & Pennypacker, publishers of the *Daily News*, Wilmington, Del., have sold out to W. R. Sperry.

A. E. Worden & Co., wholesale dealers in notions, Grand Rapids, Mich., are closing up.

H. H. Aplin, newsdealer, &c., West Bay City, Mich., has been burned out; not insured.

Ernst H. Hensing, dealer in notions, St. Louis, Mo., has sold out to Minnie Herweck.

D. J. McGill, bookseller and stationer, Denver, Col., has sold out.

Ledyard & Holmes, printers, Chicago, Ill., have dissolved partnership.

Paul Sauve, stationer, New Orleans, La., has called a meeting of his creditors.

Zediker & Robertson, publishers, Franklin, Neb., have dissolved partnership.

H. P. Gamble, fancy goods dealer, Leetonia, O., has sold out to Nold & Hephne.

William Riley, paper stock dealer, Somerville, Mass., has been burned out; insured.

The Memphis Auxiliary Publishing Company, printers, Memphis, Tenn., has suspended.

H. Franklin & Co., dealers in notions, Wapakoneta, O., have assigned to Charles Herbst.

Mrs. Demott, dealer in fancy goods, Red Bank, N. J., was a sufferer by fire on the 23d inst.

The Syms & Dudley Paper Company, Holyoke, Mass., has increased its capital to \$150,000.

Payette & Bourgeault, booksellers and stationers, Montreal, Can., have compromised at 75 cents on the dollar.

The firm of Rosser, McClure & Morley, printers and stationers, La Fayette, Ind., has been changed, Mr. Rosser going out. The business is continued under the name of McClure & Morley.

Spring & Robertson, printers and stationers, La Fayette, Ind., have dissolved partnership, Mr. Robertson retiring. The firm-name is now Spring, Emerson & Co.

W. E. & I. N. Parrish, Owensboro, Ky., sent out their holiday greeting and announcement on an engraved folder. This firm has made extensive improvements in its warerooms.

Henry Lindenmeyr having bought out the stock of paper and other assets of J. H. Van Kirk & Co., New York, has also taken the agency for the sale of the full line of the Keith Paper Company's papers.

The manifold and carbon paper business of J. T. Fourl & Co., of 309 Broadway, New York, has been bought by M. Battle, bookseller and stationer, late of 860 Third avenue, who has removed his place of business to 100 Nassau street.

The entire right, title and interest of the Hawkeye Printing Company, Burlington, Iowa, has been bought by the Bishop Brothers, who continue the business of printing, binding, blank-book making, and wholesale stationery, under the firm-name of Bishop Brothers Printing Company.

The C. C. White Paper Company has purchased the business of C. C. White, 151 Chambers street, New York, and will continue the manufacture of toilet paper, and are manufacturers' agents and dealers in paper and twine. C. C. White is president of the company, and Robert H. Leslie is secretary and treasurer.

E. Darrow and C. E. Darrow have formed a copartnership under the style of E. Darrow & Co., 67 East Main street, Rochester, N. Y., to continue the book, stationery, and publishing business commenced by E. Darrow in 1846, and continued by C. E. Darrow for the past three years. The firm will collect and pay all accounts of the late firm.

Daniel L. Wells and C. F. Ilsley, and others, trustees of the *Republican and News*, Milwaukee, Wis., have bought a controlling interest in the stock of the *Wilwaukee Sentinel*, W. G. Roberts, for many years business manager of the paper, retiring. Whether this will result in a consolidation of the two papers is not stated.

although the management of the two papers is now combined.

Simon Hoffman, dealer in fancy goods, New York city, has made an assignment.

W. W. Miller, 152 Dearborn street, Chicago, in July last sold his entire stock and "good-will" to Wells B. Sizer, of New York.

Francis & Loutrel, New York, have published their usual styles of diaries, among them the "Daily Memorandum Book," which is compact and convenient to carry in the pocket.

Thomas Marsh & Co., 919 Washington street, Boston, have published a new pocket map of Boston, prepared under the latest surveys. This map appears to be very carefully gotten up, and will be found useful.

Victor E. Mauger is at home, enjoying the holidays. The success of the cards made by Russell, Morgan & Co., for which he has the general agency, is something remarkable. The quality and price of the goods recommend them.

George W. Cross, 93 Duane street, New York, formerly of the firm of Cross, Gibson & Laimbeer, has established a blank-book manufactory at Saugerties, N. Y., adjoining J. B. Sheffield & Son's paper mill. He is employing over fifty hands.

C. B. Cottrell & Co., printing press manufacturers, New York, have a branch office at 112 Monroe street, Chicago, under the management of E. A. Blake. The presses made by this firm are specially adapted to nice work, as the publications of the Lockwood Press, which are printed on them, sufficiently show.

A. L. Bancroft & Co., San Francisco, Cal., have lately enlarged their manufacturing department, which includes lithographing, label printing, book and job printing and binding, at a cost exceeding fifty thousand dollars. They now have the most elegant printing office west of the Mississippi.

Sheridan's automatic clamp cutter has met a want that has been long felt by the trade. It is built in the best manner, and of the best material, and the clamp is perfectly automatic, and is so regulated that for every pound of resistance which the knife meets, there is over two pounds pressure upon the clamp, thus avoiding any possibility of the knife drawing and insuring perfect accuracy on any and every kind of work; this pressure is brought upon the paper by a lever, which is positive. No friction or springs are used. The great demand for this cutter, their book trimmer and ink-embossing press have given them this year a much larger sale than they have ever had in the course of their long business experience.

The St. Louis Paper Company is preparing to occupy the large double store, Nos. 703, 705, 707 and 709 Locust street, which is arranged to meet every requirement of its increasing trade. The offices will be handsomely fitted up in the front of the first floor, the entire warehouse has a splendid light from each side, and the shipping room is conveniently arranged in the rear, extending to Seventh street. The whole is equipped with most perfect machinery adapted to every purpose of the business, and includes a 48-inch "cutting-machine," a "Hickok OA" ruling machine, card cutters, etc. A new gas engine furnishes the power for the elevator and cutting machine. The stock of printers' goods carried by the company is said to be the largest and most complete in the West. This company is also about to add a complete stock of packing and wrapping papers of all grades required by wholesale and retail dry goods and clothing houses.

Russell, Morgan & Co., Cincinnati, have brought out a new edition of "Sportsman" playing-cards. The backs are ornamented with deer-heads, strings of fish and with the paraphernalia of fishing and shooting. This card, in the assortment, takes the place of that with the Japanese figured back.

The "Excelsior" measuring tapes, introduced by Keuffel & Esser, 127 Fulton street, New York, are now in general use by railroad com-

panies, engineers and surveyors. They have proved to be worthy of their name, as they excel in strength and durability. The attention of the trade is invited to the excellent articles for which it is safe to predict a continually increasing and well deserved demand.

Edward Walden, Jr., South Avenue, Delaware county, Pa., has recently gotten out an ink eraser (both in powder and in solid form), which, it is said, will instantly remove ink stains from the skin. It is a very handy article for writers.

THE BEST FLAT TOP DESK IN THE WORLD!

None of the various appliances we have presented for facilitating Desk labor have met with greater approval than the above. The lower sections are pivoted to the framework of the body of the Desk, which, with a touch of the hand, rotate at the will of the operator. Awkward draws and doors are thus done away with, and proper facilities afforded for the convenient classification of Books, Papers, &c. Twenty-four Pigeon-Holes in left case filled with our Patent Filing Boxes. We apply the same principle to Cylinder and other styles of desks. For particulars and prices send 3-cent stamp to

THE STATIONER.

DEVOTED TO THE INTERESTS OF THE

Stationery and Fancy Goods Trades.

WEEKLY--\$2.00 PER ANNUM.

Single Copies - - - 10 Cents.

NEW YORK, THURSDAY, DECEMBER 29, 1881.

Advertisements cannot be received for insertion in the current week later than 12 m. on Wednesday. The charge for advertising is 25 cents a line, each insertion. Special terms for standing and displayed advertisements to be had on application.

This journal aims to be a medium of information for and a representative of the interests of every one connected with the stationery and fancy goods trades. It contains a full and trustworthy survey of the market for stationery in this country, in all cases giving the actual prices at which goods can be bought of importers and jobbers in this city, together with a detailed account of novelties in the trade, patents relating to stationery, and current items of interest. A review of foreign markets and accounts of movements abroad will also be furnished, and no pains will be spared to make THE STATIONER a thorough and complete exponent of the trade.

Subscription and postage for Great Britain, per annum..... 12s.

Any information our readers may wish to obtain shall be cheerfully given, and prompt replies will be made to all inquiries addressed to us on any subjects of interest to the trade.

Communications on all trade matters are earnestly solicited. Address

HOWARD LOCKWOOD, Pres. and Treas.

Subscribers to THE STATIONER can be supplied with the best cloth binder in the market. Deliverable at the publication office. Price, fifty cents.

Readers of this paper who avail themselves of the information obtained from its columns, by advertisement or otherwise, are requested to notify their correspondents of the source of their information.

Now, wishing all of our readers a Happy New Year, and many a succeeding one.

WE hope that prosperity will continue and that profits may be multiplied in 1882 and in the years to come.

SATISFACTION with the results of the holiday sales seems to prevail, and the retailers have not yet got over their rush of trade. The weather here and elsewhere has been obstructive, but even this has not kept buyers at home.

LAST week and this we have had suggestions from younger members of the trade, who are growing up to the stationery business, that there should be an organization formed for mutual interest and assistance. We are not ready to say how far the ideas disclosed can be carried out, for we really have not had the time to think the proposition over and give it that fair judgment which it seems to require; but if the young men interested feel the need of association, there is no reason why it should not be tried. We are ready to print a call for a meeting and shall be glad if some good comes of it.

A CORRESPONDENT calls upon us to help in putting an end to the sales of stationery goods to dry-goods houses or to people who sell under cost. We have, we think, expressed ourselves quite plainly on this subject, and have suggested means whereby the trade can help themselves. We must recall to our correspondent's mind the fable of the wagoner whose cart stuck in a rut, and who, on sitting down and calling upon the Deity for help, was quite pertinently advised to first put his own shoulder to the wheel. If the trade mean business and will seriously go to work to decide upon and adopt measures to cure the ills which they complain of, they can reasonably demand our help, and we shall be glad to give it. If there is anything to be said or done we must have the stalwart support of the trade; they must supply us with proper means of exposing the abuses complained of, and must work together to sustain our efforts. We shall not be found wanting in any proper action which shall help them. If there are those who are willing to declare that they will not buy of manufacturers who sell their goods to be retailed in dry-goods stores at or under cost, we will print their names. But to meet the competition which is so hurtful to the trade we think that the most effective way to fight it is to take it on its own ground. There are "lots" of small wares which the stationer can sell too cheap for the comfort of his dry-goods selling neighbor. There has been enough said on this matter—and enough done—to induce the retail trade to work and act for their own salvation. If they cannot help themselves, or are careless and indifferent or fearful about making the effort, what will all of the vocabulary avail them?

Communications.

[Correspondents are requested to write on only one side of their paper. No responsibility for the opinions of correspondents attaches to this paper.]

That Organization.

NEW YORK, December 23, 1881.

To the Editor of The Stationer:

The article in your issue of to-day of THE STATIONER meets my ideas exactly.

Now, let five or six of the representatives of our trade, who coincide with these views, meet and form an association for the mutual protection of our interests, with a small amount as dues per month to support it, and I feel assured it would be a success.

I, for one, am ready to do all I can to further the interests of such an organization.

Hoping you will give this space in your valuable paper, and that some party may appoint a meeting through it, I remain, yours, &c.,

BEN TROVATO.

What Shall be the Cure?

NEW YORK, December 24, 1881.

To the Editor of The Stationer:

Please publish this as a suggestion to those who are continually complaining about the manufacturer selling to catchpenny dry-goods establishments, &c., and endeavoring to bring the stationery business between the manufacturer and consumer.

So much has been said in complaint that there is little or nothing left for me to say except by way of remedy, and the only cure is for THE AMERICAN STATIONER—our only trade journal—to take the liberty of advertising all names handed to it of those who are willing to agree, for the year 1882, not to purchase any merchandise from any manufacturer whose wares appear for sale at cost or below cost at any dry-goods store, or what would prove more decided, not to purchase from any manufacturer who sells to a dry-goods store or to those who do not make their living directly and legitimately from the stationery business. Some will say, "It cannot be done." As a proof of how strong the feeling which is working against the manufacturers in England is I can cite from a London stationer's journal the advertisement of a well known ink manufacturer: "We do not sell to drapers," &c.

Now, Mr. Editor, please agitate this question in behalf of those whose weak voices can only be heard through your well known medium, and perhaps you can obviate the impending misfortune of some of our stationers going to the poorhouse or insane asylum under the pressure of a monopoly which can be crushed by your influence. I remain, respectfully,

ONE WHO TRIES TO LIVE AND
LET LIVE.

The sixth annual dinner of the Stationers' Board of Trade will be given at Delmonico's, Twenty-sixth street and Fifth avenue, on Thursday evening, January 26. The arrangements proposed, if carried out, promise to make this dinner surpass any previous one given by this organization. The committee having the matter in charge is composed of George W. Davids, chairman; David Scott, of Vernon Brothers & Co., and Andrew Little, of Farmer, Little & Co. Among the invited guests who have signified their intention of being present are Clarkson N. Potter, Noah Brooks, Rev. De Witt C. Talmadge, Rev. Robert Collyer, Chauncey M. Depew, General Horace Porter, and Judge John R. Brady. The number of tickets is limited to one hundred and fifty, at \$10 each.

OBITUARY.

LOUIS STERN.

Louis Stern, who had been engaged in this city as a paper broker for about ten years, died at the Bloomingdale Asylum on Monday of last week, aged about thirty-eight years. Mr. Stern first became connected with the paper trade about ten years ago, when he entered it as a broker for Mr. Maas of Wall street, a banker and importer. About this time, as the importation of paper was favorable, Mr. Maas imported considerably, and the largest portion of his sales were made through Mr. Stern. During about the three years he was thus engaged with Mr. Maas, the *Herald* was among his customers for English-made paper, and through his friendship with William H. Henry, the business manager of the *Herald*, up to the time of his death, Mr. Stern acted as his broker in buying its paper. Among other firms, Mr. Stern also sold considerable paper for H. V. Butler, Jr., & Co., and was well liked by all who knew him. His death was quite sudden; no alarming symptom showing itself until the day before his death, when he was taken with convulsions. About a month before his death he was attacked with softening of the brain, and his friends had him placed in the asylum where he died.

It is reported that Willy Wallach has declined a re-election to the presidency of the Stationers' Board of Trade. This action is very much regretted by the trade, as Mr. Wallach's long business experience has tended to a great extent to make the organization as efficient as it is, and it is hoped that he will reconsider his decision and consent to a re-election.

The beautiful art of round writing, introduced into this country by the well known firm of Keuffel & Esser, 127 Fulton street, New York, is now attracting general and merited attention. It is adapted for documents, headings, checks, drafts, drawings, &c., and should be understood by every student, accountant, draughtsman, and clerk. Dealers and storekeepers should understand or learn it, as their sales will be very materially increased by the use of labels, show cards, &c., written in legible and attractive "round writing."

UNITED STATES TREASURY DEPARTMENT.

The following decisions of the United States Treasury Department are printed for the benefit of persons interested:

Duty on Color Stones or Mullers for Lithographic Printing.

The Department is in receipt of your letter of the 2d inst., further reporting on the appeal (8854 g) of Messrs. Robert Mayer & Co. from your assessment of duty at the rate of 20 per cent. ad valorem on certain so-called color stones, imported by them per "Oder," September 28, 1881. The importers claim that the stones are common lithographic stones, just as they come from the quarry, and that they are exempt from duty under the provision in the free list for "lithographic stones not engraved." The appraiser, however, reports, and an inspection of a sample shows, that the stones are not in the condition as taken from the quarry, nor of the same shape or size as lithographic stones; but that on the contrary they are stones which have been manufactured into conical shapes, with a flat surface on the bottom, for use in levigating or pulverizing inks and colors for printing lithographs. The Department is, therefore, of opinion that the claim of the appellants is erroneous, and that the stones, not being specially enumerated, are dutiable at the rate of 20 per cent. ad valorem, under section 2,516, Revised Statutes, as articles manufactured in whole or in part, not otherwise provided for. Your decision is affirmed. (Collector of Customs, New York, November 4.)

Duty on Rubber Dolls and Willow Baskets.

This Department is in the receipt of a report, dated the 7th inst., from the United States District Attorney at New York, stating that the suit of Rogers v. Merritt (N. S. 6,778) has been tried, and that a verdict was given in favor of the plaintiff, by direction of the court, on the 19th ult. The suit was brought to recover duties alleged to have been exacted in excess on certain rubber dolls, with whistles attached, and known as "whistling babies," and on certain willow baskets, stated by the District Attorney to have been made wholly of willow, but with a "cheap worsted ornament attached." The department has already decided, by its letter of April 14, 1881 (Synopsis 4,332), that similar dolls are dutiable at 35 per cent. ad valorem, instead of 50 per cent., which was the rate assessed by you in the case in question; and as it appears to have been found by the jury that the baskets were such as are specifically provided for as willow baskets in Schedule M, measures may be taken, according to the usual course of procedure, for the payment of the judgment, on the entry of satisfaction on the record. This course is recommended by the United States District Attorney, and the Attorney-General has certified that no writ of error to the Supreme Court will be taken in the case. (Collector of Customs, New York, November 17.)

Proposals for paper for the public printing will be received until January 17, 1882. The quantities called for embrace 72,000 reams of book paper, 500 sheets to the ream (four classifications); 1,000 reams of paper for post-office blanks; 1,000 reams map paper; 42,800 reams, 500 sheets to the ream, of writing papers (part of this paper to be water-marked, the dandy-roll being furnished by the government); 800 reams cover paper, 300 reams manilla papers, 100,000 pounds plate papers, 1,000 reams "Anchor" tissue-paper, 441,000 sheets glazed bond paper, 93,000 sheets imitation parchment paper, 5,000

sheets bank note paper, and 423,000 sheets card-board. Each bid must be made for entire lots at one price, and no bids for parts of lots will be considered. Bids must be made in cents and tenths of a cent. Paper containing mechanically prepared wood will not be accepted.

Among the prominent names mentioned in connection with the election to the Board of Trustees of the Stationers' Board of Trade, to take place next Tuesday at 2 o'clock, is George H. Jones, president of the Berlin & Jones Envelope Company.

Janentzky & Co., Philadelphia, are selling a great many of their beautiful beveled mirrors, which they manufacture in different sizes. The frames are made of white wood, oak, cherry, maple, or ebony, and being very wide, offer an appropriate ground for artists or amateurs to paint flowers or any other subjects on, the glass giving a pleasant relief.

It is suggested that if the Board of Trustees of the Stationers' Board of Trade use up some of the unexpended balance of the dinner fund from previous years, to provide a collation at their annual meeting next Tuesday, it would insure a much larger attendance of members, who would enjoy the collation and take much greater interest in the annual reports and election of officers.

Market Review.

OFFICE OF THE AMERICAN STATIONER,
WEDNESDAY, December 28, 1881.

THE MONEY MARKET.—The money market closed with 5@6 per cent. as the rate on pledge of stock collateral, and 3@4 per cent. on government bonds. Time loans quoted at 6 per cent. on stocks and 4 per cent. on government securities. The rates for commercial paper are nominal. First-class commands 6 per cent., and only the highest grades are in demand. The stock market has continued in a feverish and depressed condition. There has been an average decline of 15 to 20 per cent. during the last half of the year, and the bottom has not yet apparently been reached. Government bonds were higher for the extended 5s and lower for the 4½s. Railroad bonds were lower for purely speculative issues, but for strictly investment issues there was a good demand. Foreign exchange was heavy, the leading drawers of sterling having reduced their posted rates. There is now a profit in importing gold, although no large importations are expected.

THE PAPER MARKET.—Dealers are now experiencing the usual quietude incident to the closing of the year, but the volume of trade is fully up to the December average, and prices show little or no variation. The first and last months of the year are the duller of the twelve, and hence very little animation is looked for during the next few weeks. Spring trade will begin in February, and in the meantime business men will be largely occupied with their annual settlements and preparing for a new start. The assortment of stocks with city dealers is not large, and very few manufacturers show any urgency to secure new orders, most all being fairly engaged. A notable evidence of the prosperity of trade at this time is to be seen in the unusually small number of business changes announced to occur at the beginning of next year, showing that most business men are satisfied to leave well enough alone and are averse to making changes.

THE STATIONERY MARKET.—With the close of the holiday trade, business has settled down to the quietude which usually follows a busy season, and very little activity is expected for some weeks to come. Most of the trade are now engaged in taking account of stock, preparatory to striking their annual balances, and making their arrangements to start out on a new year. To the great majority of those engaged in the trade the year has been one of undisturbed prosperity, while to a comparatively few it has brought misfortunes and left sanguine hopes unfulfilled.

MARCUS WARD & CO.'S ANNOUNCEMENTS.

CHRISTMAS AND NEW-YEAR CARDS FOR 1881-82.

THE NEW DESIGNS ARE COMPLETELY SUCCESSFUL.

"At Home."

THE NEW ART GIFT-BOOK for the Holiday Season bears this title. Its quaint, square pages represent children of all degrees—"At Home,"—with all the charms which the ideal of costume can add to the loveliness of childhood. Known all over America as originators and first introducers of Christmas Cards, Marcus Ward & Co. have been asked, on all sides, to bring out a book which should abound in the versatile fancy and quaint conceit of their Cards, combined with good drawing and harmonious color. The work now introduced is the response to this wide-spread demand. Every page of "At Home" is a picture, not in glowing, gaudy colors, but in the subdued and harmonizing tints now favored by the devotees of culture. The pictures not only give the perfection of juvenile costume, but also afford glimpses of English Interiors, with the proper coloring, decoration and furniture of some of the most æsthetic of English Homes. The verses in "At Home" enhance its interest, and are in themselves worthy of the beautiful book of which they form part.

Decorated by THOMAS CRANE.

Illustrated by J. G. SOWERBY.

\$2.50

THE ANCHOR OF HOPE. THE HAVEN OF PEACE.

New Illuminated "Daily Portion" Book.
BY THE REV. DR. MACDUFF.

\$2.00

Every page of this beautiful "Book of Days" is decorated in colors with exquisite flowers. The book is actually two books within a single cover. The Anchor will become the Christian's Hope in the morning, while The Haven will be his sure resting-place at night. When the morning portion has been read, the Christian will close and reverse the book, and there "The Haven of Peace" awaits his return when "evening shades prevail." This dual form of book is so convenient for ready reference that it is sure to be appreciated. Motto Texts have been adopted to head every page uniformly, special texts, differing every day, follow, and then comes the poem for the morning or evening, respectively.

THE SHAKSPERIAN CALENDAR.

An illuminated Calendar for the library or drawing-room, with date slip to tear off daily, and appropriate quotations from Shakspeare for every day in the year. Price, 50 Cents.

DAY UNTO DAY.

A SACRED CALENDAR. With quotations from Scripture (arranged in weekly subjects) for every day in the year. Also, Church Festivals, Holidays, etc. The new design for 1882, in colors and gold, represents "The Passing Days." Price, 50 Cents.

EVERY DAY.

A CALENDAR for men of business and other busy men. Daily date slips to tear off, similar to the above, with quotations from various authors of undying fame. The new design is unique for harmony of color and decorative beauty. Price, 50 Cents.

THE SEASONS' CALENDAR.

A small Calendar, eight pages, with four new and beautiful illuminated designs by KATE GREENAWAY, representing the seasons. Also, Church and Legal Holidays, Postal information, etc. Price 15 Cents.

MARCUS WARD & Co., Nos. 611 & 613 Chestnut Street, Philadelphia.

INFRINGEMENTS IN FOUNTAIN PENS.

NOTICE TO DEALERS.—It is well known that the patent of Duncan Mackinnon covering a central air-tube in Fountain Pens has of late been extensively infringed, and that the owners of said Mackinnon Patent have issued a circular to the trade warning them against dealing in these infringing goods. It is therefore no longer safe to buy pens having the air-tube unless they are made under the authority of said patent.

The undersigned, C. W. LIVERMORE, proprietor of the Stylographic Pen Co., Providence, R. I., hereby gives notice that he is the only licensed manufacturer, under the said Mackinnon Patent, of Fountain Pens having the said air-tube. By the terms of his license no other parties can be authorized to manufacture pens having that feature, the said license being exclusive in its terms. No other manufacturer, therefore, has the right or can obtain the right to represent himself as licensed to make such pens.

A somewhat pretentious circular has been lately noticed, signed by "Samuel J. Elder, of Counsel for A. T. Cross" dated at Boston, Dec. 1, 1881, professing to cast doubts upon the validity of said Mackinnon Patent. We have only to say that our opinion of that patent is expressed by the fact that we sought and obtained a license to manufacture under it before making a single fountain pen, and that we continue to pay the royalties. Said Cross circular also takes pains to announce that said "Cross has" brought suit in Rhode Island against Charles W. Livermore, for infringement of his three patents, and that "suit is being pressed, and will reach a decision as early as possible." That he states the truth in the last part of the circular above quoted, is apparent from the following report found in the Providence Journal of December 14, 1881:

UNITED STATES CIRCUIT COURT.—Tuesday, Dec. 13.—Hon. LeBaron B. Colt, District Judge, presiding. Equity, Alonzo T. Cross vs. Charles W. Livermore. Opinion filed upon motion for a preliminary injunction, denying said motion. Samuel J. Elder for complainant; O. Lapham and Benjamin F. Thurston for defendant.

From which it appears that the "decision" has been reached, probably as early as Mr. Cross desired, and that he has tested "the patent question," if not to his own satisfaction, certainly without in the slightest degree disturbing the defendant Livermore, who will continue to offer, as heretofore, none but lawful goods manufactured under his own patents and the license aforesaid.

KNOEFER, THE AUSTRIAN ART-PRINTER.

About sixty years since William Savage demonstrated the artistic possibilities of the printing-press. In his splendid book on "Decorative Printing" there are several examples of the chromatic effect that can be obtained by the use of relief-blocks, and the ordinary typographic method of impression. The fatal objection to these at that time was their complexity, and, in consequence, their excessive cost. The expensiveness of such productions is, of course, regulated by the number of times each copy has to go through the press; and when, as in one of Savage's specimens, no less than twenty-nine distinct blocks, and even more than that number of printings, is necessary, it is obvious that such pictures, unless really artistic, are beyond the range of commercial possibilities.

Baxter, some years after Savage, took up the subject of chromatic typography as applied to reproductions of works of art, and was much more successful, commercially as well as artistically. But his method was not purely typographic; it was a combination or mixture of plate-printing with relief-printing. For many years his exquisite little pictures were the delight of frugal art lovers, and undoubtedly gave an impetus to art progress in an age when South Kensington æstheticism was unknown. Chromolithography soon after became developed. Artists like Louis Haghe and William Simpson, in conjunction with printers like the elder Day and the Haubarts brought it, in this country, to a degree of perfection which hardly left anything to be desired. It "took the wind out of the sails" of chromo-typography, to use a common expression, and deprived it of its *raison d'être*. The introduction of the lithographic printing machine followed, and vastly reduced the cost of such work. Chromo-typography, accordingly, became soon after an almost forgotten art. Messrs. Leighton did much to revive it in connection with the interests of the *Illustrated News*, the conductors of the *Graphic* having to follow suit, through the exigencies of competition; and, aided by the wondrously powerful machines of Parsons & Davis, they have undoubtedly achieved the best results yet seen in this country—a single example of which was provided in the last Christmas issue of Millais' "Cherry Ripe."

This is a rapid and superficial sketch of the fluctuations of chromo-typography in England. While acknowledging the degree of excellence that has been reached, it cannot be denied, however, that nothing yet produced is, from a fine-art point of view, satisfactory. Every print of the kind, if carefully examined, proclaims two things: one, that it has been done "cheap," and the other, that it has been done quickly. It need hardly be said that cheapness and haste are altogether opposite in their very nature to the artistic spirit, to which perfection, at any cost of time and pains, is the sole congenial sentiment.

Abroad may be found specimens of chromatic printing not produced under the pressure of time and of strict economy. There are one or two art-printers who make color work the specialty of their lives, and who throw themselves into its pursuit with the zeal, the patience and the devotion of the true artist. One of these, Herr Ludwig Lott, of Vienna, we have already referred to, and we are now about to introduce to our readers the name and the productions of a fellow-countryman and a fellow-laborer in the same special walk of art—we refer to Heinrich Knoefler.

Writing to us of this master, an able correspondent says: "I believe Knoefler to be the greatest artist that ever lived, who printed colored woodcuts from a printing press, and he does all the work himself! He does the drawing on the wood, he engraves his own drawings, prepares his own ink—that is, mixes and grinds it with varnish—and prints it, or at least himself superintends the printing!"

We have before us one of the latest works of Herr Knoefler. As a matter of course, the subject is religious; for it is only the universality of the religious sentiment on the Continent, and the consequent wide and constant demand for religious pictures that would justify a publisher in attempting such high-class work, which, whether looked upon artistically or from the printer's standpoint, is beyond all praise. The picture has been printed in eleven workings—i. e., from eleven different woodcuts—the colors often overlapping each other, to produce a great variety of tints, and especially neutral or deeper ones. When we note the register and the general effect produced, and compare it with Savage's "Ode to Mercy," printed from twenty-nine blocks, in thirty distinct colors, and so warmly denounced by Hansard in his "Typographia," we realize what has been done since his day to advance color-printing to the position of an art.

Still, this picture is not the finest that has come from his hand, graver and press. The window from the *ex-voto* church at Vienna ranks higher still, and is even a greater proof of Knoefler's art, as he had no pattern to go by. He had to make the drawing for it from the large cartoons of the artist, and to copy the colors in the church itself. Moreover, the woodcut work in the figures is finer, they being Knoefler's own work, while in the picture of the "Maria" the figures in the basement are the work of his son, who, though already a very clever artist, has not reached the wonderful purity of line, uniting strength and delicacy, of his father.

Like all great artists, Herr Knoefler is modest in his estimation of his own work, and very reticent concerning the circumstances of his long and brilliant career. We have nevertheless been able to secure some biographical particulars of this great artist printer from Herr Theodore Goebel, of Stuttgart, and we are confident that our success in this way will give satisfaction to every one who has seen any of the masterpieces he has produced.

Heinrich Knoefler was born in 1824 in Schoemlin, a small provincial town in the grand duchy of Saxe-Altenburg. His father was a clever joiner, cabinet-maker, and draughtsman, and though the son, showing decided talent at drawing, wanted to become an artist, the father insisted that Heinrich should follow his own calling, according him lessons in drawing, however, after he had reached his tenth year. These lessons formed the delight of his boyhood, and every spare moment was spent behind the drawing board. At the age of seventeen, an artist-painter from Dresden who took a lively interest in the studious and clever youth, gratuitously gave him lessons in oil-color sketching and painting. Young Knoefler, as may be expected, "felt happy as a king," and considered himself on the high-road to the realization of his aspirations. He was, however, but a joiner, and as a joiner he had, after the old, sacred custom of the workmen's guilds, to make his tour through Germany. When twenty years of age he began his wanderings, working first for one year at Meissen, rendered famous by the well known government porcelain manufactory.

Here he sought and founded friendships among the painters of the establishment, one of whom initiated him in water-color drawing, and many an hour was thus spent profitably. From Meissen Knoefler went to Hanover, staying there for five years, never lacking work as a joiner, being as clever with the plane and the chisel as with the pencil. To the latter, nevertheless, his spare hours were given, there being no painters in the place whose society he might have enjoyed or profited by. Professor Friedrich there gave him lessons in drawing from casts and afterward from life, and more than 100 people had, during the last year of his stay, sat for their portraits in crayons to the industrious and artistic *garçon-menuisier*.

In 1850 Knoefler left Hanover for Vienna, and it was here that he began to devote himself to the calling which he has since advanced to the highest degree of perfection. Working for about thirty weeks at his trade as a joiner, he was surprised one day in his workshop by Professor Chevalier de Perger while in the act of drawing the portrait of one of his co-workers. The professor was struck by the conspicuous talent of the young joiner. He insisted on his laying aside his joiner's tools, and obtained for him admission to the Imperial Academy of Painting. Knoefler now found himself on the summit of his highest aspirations; the dream of his life was about to become a reality—his career was to be that of artist and painter! There was one very dark side to that bright prospect—his father was so irritated by his leaving the avocation he had taught him, that he refused even the slightest assistance to his son in the pursuit of his new calling. The young man had consequently to depend entirely on himself. His savings from his joiner's labors consisted at the time of only 48 thalers, or about \$35. Still he went on undaunted, working under the direct supervision of his patron, Von Perger, and cultivating especially portrait painting in oils from life. Along with his artistic facility grew his fame, and he was soon earning a respectable living by this branch of art. One day Professor Perger, probably induced by his own appreciation of the growing influence and the spread of wood engraving, directed the attention of his pupil to this rising branch of the arts, and strongly advised him to cultivate it. It was rather against the will and inclination of Knoefler that he abandoned portrait-painting, and turned to that art in which he was destined to become the incomparable master he is now.

Following the advice of Herr von Perger, Knoefler, in 1852, became apprenticed to a xylographer, Herr Bader, who had come from Stuttgart. He now learned, as he says himself, "how to use the graver, and how to cut correctly a geometrical figure;" but felt extremely disappointed and unhappy when he became aware, as he soon did, that his master understood much less of the spirit of a drawing or painting than he did himself. In consequence of this defect on the part of his preceptor, he left him before he had completed the third month of his apprenticeship, and went home, where he set to work by himself with all his characteristic eagerness and zeal. He had the satisfaction of completing within five months a woodcut illustration of the Cathedral of St. Stephen, at Vienna, which was much admired, and quite astonished Professor von Perger, as well by its excellence as by the brief period in which it had been executed. This worthy man forthwith gave occupation to Knoefler, and continued it for three years. Knoefler then entered the service of the State Printing Office, at that time

under the celebrated directorship of Hofrath Auer; afterward he found occupation at the establishment of Zamarski & Dittmarsch, then renowned for its artistic tendencies in printing.

In 1856 Knoefler turned his attention to printing woodcuts in different colors. A flower, a head, a fish, a bird, and some butterflies were his first essays in that direction; they deserved attention, and found many admirers, though some of them had only been printed by the rude method of rubbing off with a paper-knife. Encouraged by the result, he ventured to cut miniatures for a fac-simile of a mediæval missal then being published at Vienna—the so-called Reiss Missal. These fac-similes proved to be little masterpieces, and he had to furnish more than thirty of them. A copy of this book may be found in the British Museum.

Still working for Zamarski & Dittmarsch, who prided his cuts in a few colors in their illustrated papers, Knoefler was dissatisfied with their printing, and resolved, in 1868, to print his works himself. For this purpose, he first borrowed a small press, going on drawing, engraving, and printing with his own hands. He very soon got initiated in the mysteries of the art, so much so, indeed, that when he was able to engage some printers, he knew how to direct them so as to secure the best kind of work. One of the first productions of his press was "The Spiritual Rose," after drawings of Professor Euehrich, consisting of a series of symbols of the Passion of our Lord. It was much admired, especially in France.

Knoefler has continued ever since at the same pursuits, adding fresh presses of his own to the first hired one, never lacking occupation, but always working too hard himself. It is sad to be compelled to add that a man whose life has been one of continual activity is now reduced to inactivity through the failing of his eyesight, perhaps the most tragic fate that could befall one whose whole career has depended on his eyes directing his clever hands!

Happily, Herr Knoefler has several sons, one of whom, in particular, proves to be a very clever disciple of his father and master. It is to be wished that the family may find the art prove a better paying one, for we understand that Herr Knoefler, though not poor, is far from being a rich man. He has been all his life too much of the real artist, too much an enthusiast of his art, to look after money, and it need not be pointed out that printing church subjects does not pay so well as painting the nude.

Herr Knoefler's works amount in all to a considerable number, and would form a most important feature in any collection of typographic rarities. Of the print of the above-mentioned stained window, no copies were produced for sale apart from the jubilee work of which it formed a portion. It may be instructive if we mention that the printing of Herr Knoefler's last picture was begun with gold, the contour drawing, in dark gray, following next, and so on to the end of the eleven workings.

It is greatly to be desired, in the interest of art-printing, that a complete series of Herr Knoefler's productions should be exhibited, for they are veritable triumphs of the typographic method, and would afford a splendid exposition of its highest artistic possibilities.—*Printing Times and Lithographer.*

Rubber-headed nails are made with the rubber head flat. The metallic part is of good quality, well pointed, and roughened along the sides so as to take a firm hold and not work loose. These nails are useful to put in wooden surfaces which come in contact with other hard surfaces, as in sewing-machine covers, piano lids, &c.

"THE GREAT ROCK ISLAND ROUTE"

Call your attention to the following REASONS WHY, if about to make a Journey to the GREAT WEST, you should travel over it:

As nearly absolute safety as is possible to be attained, are connections in UNION DEPOTS, at all important points. No change of cars between CHICAGO, KANSAS CITY, LEAVENWORTH, ATCHISON or COUNCIL BLUFFS. Quick journeys because carried on Fast Express Trains. Day cars that are not only artistically decorated, but furnished with seats that admit of ease and comfort. Sleeping cars that permit quiet rest in home-like beds. Dining cars that are used only for eating purposes, and in which the best of meals are served for the reasonable sum of seventy-five cents each. A journey that furnishes the finest views of the fertile farms and pretty cities of Illinois, Iowa and Missouri, and is afterwards remembered as one of the pleasant incidents of life. You arrive at destination rested, not weary; clean, not dirty; calm, not angry. In brief, you get the maximum of comfort at a minimum of cost.

That the unremitting care of the Chicago, Rock Island & Pacific Railway for the comfort of its patrons is appreciated, is attested by its constantly increasing business, and the fact that it is the favorite route with delegates and visitors to the great assemblages, political, religious, educational and benevolent, that assemble from time to time in the great cities of the United States, as well as tourists who seek the pleasantest lines of travel while en route to behold the wonderful scenes of Colorado, the Yellowstone and Yosemite. To accommodate those who desire to visit Colorado for health, pleasure or business, in the most auspicious time of the year, the Summer season and months of September and October, the Company every year puts on sale, May 1st, at all coupon ticket offices in the United States and Canada, round trip tickets to

DENVER, COLORADO SPRINGS AND PUEBLO.

At reduced rates, good returning, until October 31st. Also to San Francisco, for parties of ten or more, good for ninety days, at great reduction from regular fares.

REMEMBER this is the most direct route for all points WEST and SOUTHWEST. For further information, time-tables, maps or folders, call upon or address

EBONIZED WOOD.

A very simple process for ebonizing wood is given in the *Art Interchange*, as follows: "The wood is first stained with a decoction of logwood, which may be purchased from any druggist. It is dissolved in warm water until all has been taken up that the water will hold. Application to the wood is made freely with a large soft bristle brush, and the surface is rubbed with a cloth to prevent the formation of a gummy coat thereon. After the article has been left to dry for a few hours, the second application, which consists of vinegar in which a quantity of nails or clean filings have been soaked for several days, is also freely laid on with a brush. The moment the vinegar touches the wood it combines with the logwood solution in the pores, making an ink which is a permanent black stain. The influence of the iron in the vinegar is all-important. If any tendency to grayness is noticed, a second treatment is necessary; but this seldom happens. When perfectly dry, the article is varnished and rubbed down, or finished with furniture oil well rubbed in. Cherry is considered the best wood for ebonizing. Whitewood, maple and beech are used with good effect. Any close-grained dense wood will answer—ash, chestnut and oak are not suitable. This process, it is said, is used for fine ebony and gold furniture."

BRAZING BAND-SAW BLADES.

In order to obtain the best results from the band-saw machine, it is necessary that the blade be kept in good order, and properly placed upon the machine. The tension should be sufficient to prevent loose vibration, and adjustments should be so made that the guides will scarcely touch the blade which rapidly crystallizes and cracks when subjected to severe friction. It is of the greatest importance to make the joint so perfect that it will scarcely be perceptible. To do so, observe the following directions: Scarf the ends to be joined with the file to about one-half of the thickness of the blade, thus making new surfaces to be united. Place the ends thus prepared in the scarfing or holding frame in the position to be joined, making the lap from one-half to one inch, according to the width of blade. Having washed the surfaces with muriatic acid, or coated them with pulverized borax, introduce a slip of prepared silver solder between the laps large enough to cover the whole surfaces. Grasp the prepared parts with the tongs, which should be heated to a full red heat, and as soon as the solder runs, use a wet sponge and cool the tongs sufficiently, so that they may be withdrawn without interfering with the joint. It then only remains to draw the joint smoothly with a file and polish with fine emery cloth, being careful to make the joint the same thickness as the blade. In joining wide blades it is sometimes possible to restore the temper partially in long laps with a sponge and water; but narrow saws cool quickly and are generally hard enough. The teeth should be set evenly, care being taken that the teeth at the joint are not set wider than those of the more elastic part of the blade.

The latest novelty in inkstands is one cut from a block of coal. Hereafter editors will be able to heap coals—though not of fire—upon the heads of offending and offensive verse writers and others who call to inquire why their poems and essays have not received insertion, "as promised." Truly, science makes rapid strides, and plays into the hands of the irate newspaper man.

"SHERIDAN AUTO" PAPER CUTTER.

On introducing their automatic clamp paper cutter a little over a year ago, T. W. & C. B. Sheridan found that they had to contend with some prejudice, arising from the fact that some of the paper cutters sold as "self-clampers" were only friction clamp machines, and took a great deal of power to run them. It has been claimed that self-clamping cutters will only do certain kinds of work, but however true this may be of other machines, the manufacturers of the "Sheridan Auto" assert that it cannot be said of their cutter, inasmuch as it is employed on every variety of work to the perfect satisfaction of the people using it. In this

the reputation of making the best hand-clamp cutter in the market, and this machine they commend to the attention of buyers who are not ready to purchase the "Sheridan Auto." They also invite attention to their "book trimmer" and "ink embossing press," which are in use in many of the large binderies.

VALENTINES.

Prang's new valentine line for 1892 has just been finished, and the firm is now ready to accept orders. The line is even more extensive than that of last season, and, as before, many of the numbers are put up in four different styles, viz., single, double, single fringed and double

show a horseshoe of white flowers, the centre being filled out with pinks, moss-roses, &c. No. 109 is quite a novel idea, showing four designs; on a richly colored heavy drapery small floral bouquets are pinned, suitable lettering filling the rest of the card. No. 110 F is a handsome little fan with bamboo stem, of three floral designs with gold ornamentation. No. 111 is a particularly rich and tasty floral card of large size, and has a beautifully matched diagonal gold and light green ground; there are pansies, violets, azaleas, tea-roses, bridal wreath, and a variety of other flowers delicately grouped.

No. 112 has two figure designs, both very attractive, somewhat in the French style. No. 113 F

**"SHERIDAN AUTO" PAPER CUTTER.**

machine, of which an illustration is herewith given, the clamp can be brought down to the work and stopped, so that the operator can cut to the finest compass mark, the knife descending as in the "Sheridan" cutter. A lever being used, less power is required to run the machine, and, as it takes less revolutions to make a cut, the "Auto" is only run at one-half the speed required to make the same number of cuts per minute, thereby reducing the wear upon the cutter. The "Sheridan Auto" has the improved "index" attached to the "back gauge," as first introduced by the manufacturers, and by a late alteration it takes up less room than the "Sheridan."

The cutters made by T. W. & C. B. Sheridan are built in the best manner of the best material; all shafts are of steel, the bearing points are faced with steel and the small castings are also of steel.

The cutter illustrated clamps automatically, and as the pressure on the clamp is greater than the resistance against the knife, there is no drawing of the material, and accuracy is assured. Neither friction nor springs are used for clamping. This is a point to be borne in mind. The great demand that has arisen for this cutter, and the favor with which it is regarded by those who use it, are proofs that it meets the requirements for a first-class self-clamping machine. The manufacturers also retain in the "Sheridan" the points of excellence upon which they claim

fringe. All prices are represented in this line in order to meet all wants, and they range from 35 cents a dozen to \$5 apiece, list. Discounts on these goods are the same as they were on Christmas cards. Price lists can be had upon application at any of the firm's offices. The cards are put up in similar style to the Christmas cards, and with all cards costing \$1.80 per set and over envelopes are furnished with each set without extra charge. The satin and silk trimmed valentines are carefully packed each in a neat box. To facilitate sample orders, sets costing \$3 or more may be broken, but the cheaper cards are only furnished in sets of twelve.

No. 101 is an upright card, consisting of six brilliant floral designs on a diagonal gold and buff ground. No. 102 shows four gilt floral designs in a gold circle surrounded by a gray ground; this is a square card, and is sold in all the four styles. No. 103 has three very pretty children's designs, suitable to the occasion. No. 104 brings four dainty diagonal floral designs of daisies, pansies, asters and sweet brier. No. 105 is specially intended for children's use, and meets its purpose in a most charming way; it consists of four designs of pretty boys and girls. No. 106 has three attractive figure designs in the English style. No. 107 is again for children's use, and brings four rich and appropriate designs. No. 108 is a large square floral card on a light drab ground, apparently a brilliant bouquet, but upon closer inspection it will

shows an open fan in four designs, with fringe and tassels. No. 114 when opened shows a large card in two designs, one floral, of rich hollyhocks, &c., and the other "Cupid out in the cold." No. 115 has four very dainty designs of children and flowers. No. 116 and 116 F shows two rich floral designs of large size. No. 117 has two female figure designs of peculiar beauty and executed in soft tints. No. 118 is a large card, size 7½x9, and beautifully executed; on a dark, shaded background, ornamented with white and red roses, appear two female heads in a light gold-bordered circle, the one a blonde, the other a brunette. No. 119 DF is a folding card with a richly decorated outside and a figure design inside—a lady walking over the fields in a handsome pink dress. No. 120 DF is the well known No. 1 of last season, which met with so general favor that the supply gave out early in the season; the outside shows floral designs of wild roses and clover, the inside a floral sachet in a neat mat and a handsomely decorated page of lettering; this card is fringed and tasseled.

No. 121 DF is a large upright double card, with fringe and tassels. The outside shows two most delicately drawn designs of daisies on a silver ground; the inside, on the first page, a poem, specially made for it by Mrs. E. S. Froman, in a silver border, surrounded by conventional floral designs in delicate harmonizing tints. The other inside page shows a female figure walking through the fields near the sea-

shore. No. 123 F shows the four designs of No. 115, printed on satin and beautifully trimmed with fringe and satin border. Each card is packed in a separate box. No. 123 DF is also worthy of special notice; it contains the two designs described in No. 117, also printed on satin, with a broad puffed satin border and a new style double fringe—each one is in a separate box. No. 124 DF has the two designs of No. 121 DF on a satin-puffed, double-fringed border, a tassel being attached to open the cover by. Each card is packed in a fine box.

In explanation of the above used letters, it may be added that F stands for fringed, D for double, DF for double fringed, and where no letter is given single cards are meant. The backs of the whole line are charmingly designed, and are in themselves a decided feature. They are delicate and dainty, and give the cards an admirable finish.

Frang's new birthday cards also deserve special attention, and the firm is now able to supply the demand, which so far has been greater than the supply.

Frang's plaques, in a variety of subjects, should not be overlooked, and all dealers in fine fancy stationery should order samples of them. These plaques are finely finished, and have the advantage that they do not break like China plaques. The demand has been so far immense, and early orders are advisable.

HOLIDAY BOOKS.

Among the many books published during the holidays there came from the press of McLoughlin Brothers a number of pantomime books, entitled "Aladdin," "Blue Beard," "Cinderella," "Puss in Boots," and the "Sleeping Beauty." On opening the book in the centre there is a double-page picture representing the stage of a theatre with its footlights, private boxes, musicians, &c. By turning over part of a leaf a different scene is presented. There are fourteen scenes in each book. They are elegantly printed in oil colors, and have stiff board covers. From the time these books were first issued there was a perfect rush for them, giving the publishers all they could do to supply the demand. During Christmas week the newsboys saw in them a good opportunity for making an honest penny, and took hold of them with a vengeance, and there was not a business street in the city that had not at least half a dozen of these speculators displaying "pantomime books." The result was the firm had to work night and day to keep up the supply. When the sun went down on Christmas Eve there was not a single one left in the factory. The firm intends to make up the remainder of the edition at once, so as to be able to meet any demand it may have for them.

Socrates said that there are two sciences which every man ought to learn—first, the science of speech, and, second, the more difficult one of silence.

WANTED.

AN EXPERIENCED AND FIRST-CLASS SALESMAN FOR POCKET-BOOKS.

Address, with particulars, R. P., office American Stationer.

WANTED.—AN EXPERIENCED TRAVELER for a well established Manufacturing Stationery concern; none but those well acquainted on the road, and who can give A 1 references from former employers, need apply. Communications treated confidentially. Address, O. Z., office American Stationer.

BYRON WESTON

DALTON, MASS., U. S. A.

HAS BEEN AWARDED THE

GRAND PRIZE GOLD MEDAL

AND RECOMMENDED THE

Medal of Honor and Perfection

At PARIS, 1878,

This being the HIGHEST and ONLY AWARD given for

LINEN RECORD & LEDGER PAPER

Also, the only Gold Medal given for Ledger Paper at the Adelaide, Australia, Exhibition, 1881.

—A SPECIALTY.—

THIS Paper has received THE HIGHEST PREMIUM over all others from the Cincinnati Industrial Exhibition, Massachusetts Charitable Mechanics' Association, Franklin Institute of Philadelphia, Louisville Exposition, Medal and diploma from United States Centennial Commission, Medal of Progress American Institute, 1877, and Medal of Improvement and Progress, Boston, 1878. Its

PRINCIPAL ADVANTAGES

are as follows:—1. It contains more LINEN than any other Ledger Paper, has a longer fibre, and is, consequently, tougher. 2. Having a harder and better body, it frays less in erasure, so that by simply using the rubber after the eraser, the ink is prevented from spreading. 3. It is more uniform in Weight Color and Finish. 4. It never cockles if properly bound. 5. Its chemical action upon ink is such that it both writes and rules up better. For proof of the foregoing, refer to a large number of Stationers, Bookbinders, Bookkeepers, and Records, who have given it, after a severe test, the preference over all others. This paper is Double Sized, and will stand any climate or the most acid of fluid inks.

Each sheet is water-marked with name and date.

LOCKWOOD PRESS, 74 Duane Street, New York.
